

## Cautionary Notes

Death Summary Tables are intended for general understanding of the distribution of causes of death among individuals in the study files. They are not necessarily uniform from one study to another. They might not be constructed according to the same groupings of ICD codes groups and should not be used comparatively.

The number of deaths shown in the Tables should reflect the number of known deaths with ICD codes appearing in the data files provided by CEDR. This figure may differ from:

- The number of deaths stated in the overview text, other CEDR documentation, or published articles about the study
- Total number of individuals in the cohort
- Total number of individuals represented in the data files provided to CEDR
- The number of individuals in the cohort excluded from the data files provided to CEDR

These variations may occur for numerous reasons, e.g. researchers sometimes retain individuals in their analytic files whose data are not used or discussed in their final analyses or published papers.

The publication of a new ICD revision by the WHO does not terminate use of the former revision. A researcher might use a different revision than the one in effect at the time of death or at the time of the analysis.

In the ORISE working data, ICD codes in the 800-999 range are "E" codes that is SUPPLEMENTARY CLASSIFICATION OF EXTERNAL CAUSES OF INJURY AND POISONING (E800-E999).

<b>SSFL05A2 - ICD Cause of Death</b>	<b>Males</b>	<b>Females</b>
<b>Infectious &amp; Parasitic Diseases</b>	<b>11</b>	<b>1</b>
<b>All Malignant Neoplasms</b>	<b>431</b>	<b>22</b>
Lip, Oral Cavity & Pharynx	8
