<sup>1</sup> For a definition of coal producing regions, see the Glossary.

<sup>2</sup> Mines that produce greater than 50 percent of their coal by continuous mining methods.

<sup>3</sup> Mines that produce greater than 50 percent of their coal by conventional mining methods or mines that produce coal using shortwall, scoop loading, hand loading, or other methods or a 50/50 percent continuous conventional split in mining methods, or mines that produce less than 10,000 short tons, which are not required to provide data.

<sup>4</sup> Mines that have any production from the longwall mining method. A typical longwall mining operation uses 80 percent longwall mining and 20 percent continuous mining.

s Value is less than 0.05 of the table metric, but value is included in any associated total.

- = No data are reported.

Note: • Totals may not equal sum of components because of independent rounding.
