

Personal Protective Equipment Conference

New Technologies - Standards - Training for Emergency Response | Fort Lauderdale, FL | November 16 - 20

2009

The Technical Support Working Group (TSWG) conducts the U.S. national interagency research and development program for Combating Terrorism through rapid research, development, and prototyping. The Chemical, Biological, Radiological, and Nuclear Countermeasures (CBRNC) subgroup within TSWG identifies interagency user requirements in relation to terrorist-employed CBRN materials. One of the major areas of research and development within the CBRNC subgroup is personal protective equipment (PPE). The CBRNC subgroup is hosting a conference on PPE to further the research and development of new and innovative technologies.

The PPE 2009 Conference will provide TSWG and its partners with a forum to highlight emerging technologies in the area of personal protective equipment. PPE 2009 will include an exhibition of new technologies from PPE vendors, focused briefings on emerging PPE capabilities, and a seminar series on standards and next-generation tools. Join us for extensive networking opportunities and break-out session discussions on the future directions for PPE research and design.

REGISTRATION: Registration Opens May 1st, 2009. Go to the TSWG homepage www.tswg.gov and click on the Personal Protective Equipment Conference banner.
