A long lived line of severe thunderstorms, known as a derecho, moved from Iowa into northern Illinois early in the morning of Saturday July 5. The storm caused widespread damage to trees and power lines in Ogle county. The most intense damage occurred in Winnebago county, as the storm cut a wide swath from Pecatonica to the west side of Rockford, through downtown Rockford, to the southeast side of the city and Cherry Valley. Near Pecatonica corn was flattened and trees were damaged. In Rockford, many large trees were uprooted or snapped. Many limbs and power lines were down. 80,000 customers were without power. A 731 foot TV tower and antenna was blown down by the wind near Meridian and Auburn Roads. The tower was valued at 1.5 to 2 million dollars. The storm also cost the city of Rockford over 1 million dollars in clean up of trees on city property. An anemometer on the west side of Rockford clocked a 104 mph wind gust. The storms also caused tree damage in Belvidere in Boone county, Crystal Lake in McHenry county, and Libertyville in Lake county. A 67 mph gust was measured in Libertyville. As the storms moved into the Chicago area, a well defined line developed and moved southeast through the metro area. High winds and tree damage were reported in Kane, DuPage and Cook counties. In Kane county a retired meteorologist reported 70 mph winds in St. Charles. In DuPage county trees were damaged in Lisle, Downers Grove and Clarendon Hills. The storm hit hard on the southwest side of Chicago from 44th and Marshfield, through Washington Park to Jackson Park at 63rd and the Lakefront. Large trees were blown down and buildings were damaged. Chicago emergency management officials reported nearly 500 trees downed or damaged, and 68 homes and businesses damaged, 8 of them uninhabitable. The roof was taken off a Park District building and a brick commercial building was destroyed. Stackable containers at a railroad yard were blown over. Damages to this area were estimated to be at least 5 million

dollars. Winds were likely 90 mph or more. A wind gust to 88 mph was measured in Chicago Lawn with handheld equipment. Trees were also damaged in south suburban Midlothian. A 90 foot tall, 3 foot diameter Oak tree that was estimated to be 273 years old, possibly the oldest tree in Chicago, was blown down.

Strong thunderstorms, some supercells, developed over northeast Illinois from early afternoon through early evening in a very unstable airmass. The first storm pounded Kankakee county with hail up to golfball size. Other storms quickly developed in northern Cook, and in McHenry and Lake counties. Golfball size hail hit the areas of Buffalo Grove, Wheeling, and Deerfield along Lake-Cook Road. The hail damaged police cars and cracked the windshield of a vehicle in Wheeling. A car was dented in Deerfield. This storm also blew down tree limbs in Deerfield. Another storm in Ottawa in LaSalle county produced hail the size of golfballs, injuring a person at Chambers and Glover Streets. 60 mph winds in and near Ottawa damaged corn crops and blew tree limbs down on the road. A bolt of lightning struck a tree in Ottawa causing the tree to fall onto a fence and pool which were damaged. A storm dropped hail in southern Grundy and southwest Will counties. Hail damaged crops from north and east of Kinsman to just west of Verona, just east of Mazon, north and east of Gardner, and north of Morris in Grundy county. Trees, large limbs and power lines were blown down in Gardner. Hail also fell from near Wilmington in Will county into Kankakee county near Essex. Another storm in northern Will county dropped hail up to 1.25 inches in diameter from the far west side of Joliet and Plainfield near Drauden and Caton Farm, across I-55 and Route 30, to I-55 and Weber Road in Romeoville and Bolingbrook. This storm also caused tree damage in Lemont in Cook county. Later in the afternoon a storm dropped hail 1 to 2 inches in diameter across DuPage county. Some locations included Army Trail and Gary in Bloomingdale, 2 miles north of Route 64 and 59 in West Chicago, Route 83 and Grand in Addison, Glendale Heights, Wheaton and Lombard. The biggest hail report was 2 inches at Carol Stream. Other storms produced hail near Ashkum in Iroquois county and into northwest Indiana. Storms produced more hail in southern Cook and northern Will counties in the early evening before ending. Tree branches were also blown down around Orland

A line of thunderstorms moved across northern Illinois producing wind damage during the morning of July 7th. A tree and limbs were blown down north of Byron in Ogle county. Farm Service Agency reported a swath of corn flattened by winds south of Ashton to near Reynolds Road in Lee county. Tree limbs were blown down in Genoa in DeKalb county. Trees and power lines were blown down in Boone county. Officials estimated winds to 70 mph in Marengo where utility poles were bent over. A large tree limb fell onto a house in Huntley. Power lines were blown down along Hill Avenue in Aurora. A large tree was blown down on Route 126 in Plainfield in Will county. Large limbs were also down in Joliet. In Cook county, a spotter measured a 61 mph wind gust in Midlothian and limbs were blown down in Alsip. A large tree fell in Stickney in Cook county, knocking down power lines and damaging three cars. A few trees were blown down in Yorkville and Oswego in Kendall county. Lightning struck a tree 15 to 20 feet from a home in Riverwoods in Lake county. It is unclear how the lightning started a fire in the home, but the lightning may have traveled to the house by underground wires. The home was destroyed by the fire

Kankakee County Kankakee	07	2136CST			0	0		Thunderstorm Wind (EG50)

Thunderstorms brought damaging winds to portions of north central and northeast Illinois during the evening of July 7th. In Lee county 60 mph winds were reported at I-39 and U.S. 30 and trees were blown down southeast of the I-88/I-39 interchange. In DeKalb county, trees were reported down in DeKalb, Sycamore, and Cortland. A tree fell onto two cars in Waterman in DeKalb county, completely destroying both cars. In LaSalle county, trees, tree limbs and power lines were blown down in Leland, Earlville, Lostant, and Streator. Five miles southeast of Ransom, a 60 mph wind gust was reported. An 85 foot tall tree was blown down on a house in Wedron. Trees were damaged in Plano in Kendall county, at Forest and High Streets in Aurora in Kane county and in Channahon near the Grundy/Will county line. The hardest hit area was Morris in Grundy county. Trees, tree limbs and power lines came down knocking out power, damaging homes, businesses and vehicles. Signs were also blown down. Trees were damaged in Kankakee. Police reported 60 to 70 mph winds in Iroquois County and a construction trailer was destroyed near Watseka

Lake County Fox Lake to Gurnee	08	0741CST 0805CST			0	0		Hail(1.00)
Cook County Lincolnwood	08	0900CST 0905CST			0	0		Hail(0.75)

Ford County Gibson City	08	1603CST			0	0		Thunderstorm Wind (EG50)

The wind pushed a utility pole over and small trees were blown over.

Nickel size hail fell at Fox Lake, 1 inch hail fell at Gurnee, and penny size hail fell at Lincolnwood. The line of storms that produced the hail also produced a prominent shelf cloud which drew a lot of public and media attention. There were some reports of wall clouds and funnel clouds in McHenry County. A 17 year old male was struck by lightning in a parking lot in Oglesby in LaSalle county and was critically injured.

De Kalb County Sandwich to Somonauk	09	1046CST 1050CST			0	0		Thunderstorm Wind (EG54)
--	----	--------------------	--	--	---	---	--	---------------------------------

Emergency management reported a 62 mph wind gust at Sandwich. Tree limbs were blown down at Somonauk.

Golf ball size hail was reported at Glenwood Avenue and Springfield Avenue.

A line of severe thunderstorms moved southeast into northern Illinois from Wisconsin during the early morning hours of Tuesday July 15th. Several trees, large tree limbs and power lines were blown down across northeast Winnebago county. A woman was trapped in her home near Roscoe from fallen power lines that surrounded her home. Four 35 foot light posts were blown down and two construction trailers were damaged near Prairie Rose. A large metal roof was ripped off a building in Roscoe. Numerous trees were blown down in Belvidere in Boone county. Large tree limbs were blown down in Crystal Lake in McHenry County and large tree limbs were blown down in Franklin Park in Cook county. A lightning strike damaged several pieces of equipment at the Batavia Emergency Service Center. Power lines were blown down in Carpentersville in Kane county. A gust to 62 mph was reported on the west side of Chicago. Winds gusted to 70 mph across Joliet and Plainfield in Will county. Several trees, large tree limbs and power lines were blown down and a construction trailer was demolished near Shorewood. Hail was reported across many locations of Northern Illinois with the largest hail reported across Will county. There was also minor flooding reported across parts of Joliet in Will county and along Route 47 near Morris in Grundy county. Rainfall ranged between one and two inches in less than an hour across parts of Will and Grundy counties. Lightning struck a wooden storage shed in Naperville in Dupage county. The shed contained tools, copper tubing and other materials that were quickly consumed by fire.

Severe thunderstorms formed across far northern Illinois during the afternoon hours of July 17th and moved south across the Chicago Metro area through the evening. Several dozen reports of hail were received during these thunderstorms. Trees, tree limbs and power lines were blown down across many areas including Glenwood and Chicago in Cook county. Winds gusted to as high as 90 mph at 183rd and Halstead Roads in Lansing in Cook county. Lansing was hit the hardest with trees, tree limbs and power lines blown down across much of the city. Large tree limbs were also blown down in Steger in Cook county and damaged a house. Several trees, large tree limbs and power lines were blown down from Steger to Crete in Will county. Thunderstorms redeveloped later in the evening and moved south producing more hail. A wind gust to 70 mph was reported in Plainfield in Will county. Small trees were blown down 7 miles southeast of Oswego toward the Kendall Will county line. Numerous trees, large tree limbs and power lines were blown down in Bradley and Kankakee in Kankakee county. A gust to 60 mph was reported in Chatsworth in Livingston county. Winds gusted to 70 mph in Watseka where several trees, large tree limbs and power lines were blown down. Two of the trees fell onto houses in Watseka causing damage to each building. Minor flooding of some streets and low lying areas was reported across southern Cook county.

damaged or blown down in Evergreen Park. One of the trees fell onto a house in Evergreen Park. An estimated 50 mature trees were blown down in Naperville. One of the trees destroyed a backyard playhouse. A gust to 60 mph was reported in Woodridge in Dupage county, which blew down some tree limbs. By late evening, thunderstorms redeveloped over parts of northern Illinois producing severe hail. The largest hail reported was golf ball size hail in Kankakee. A building suffered roof and structural damage in Ashton in Lee county from winds as high as 75 mph. Trees were blown down southwest of Polo in Ogle county along Illinois Route 26. A gust to 64 mph was reported in Sandwich in DeKalb county. A tree fell onto a house in Mt. Prospect causing some roof damage and lightning hit a mobile home in Elk Grove Village, which blew out the home's wiring and started a fire. Trees, large tree limbs and power lines were blown down in Sheridan in La Salle county. Trees and large limbs were blown down in Melvin in Ford county and windows were blown out of some buildings in Melvin. Two trees were blown down in New Lenox in Will county where a woman was trapped in her car, but not injured. Trees and large tree limbs were blown down in Fairbury in Livingston county. Minor flooding was reported in Joliet in Will county.

A weak tornado touchdown near the Hideaway Lake Camp near Yorkville in Kendall county. The main line of thunderstorms had already moved east of the area when a small thunderstorm developed near Yorkville and quickly interacted with a lake breeze moving west through the same area. This interaction helped to form a circulation which spun up as a weak tornado. Numerous trees were damaged and some were blown down. Damage occurred to several trailers and campers from the falling trees and tree limbs. The tornado appeared to skip along the ground with the strongest winds staying aloft affecting mainly the trees. The tornado lasted about two minutes.

A line of severe thunderstorms moved east across north central Illinois during the early afternoon hours of July 27th. Additional thunderstorms developed ahead of the first line across the southern portions of the Chicago Metro area producing very heavy rain and widespread flooding. As the first line of severe storms reached Lee county, numerous trees, tree limbs and power lines were blown down in Amboy in Lee county. Trees were blown down onto houses in West Brooklyn, also in Lee county. Winds as high as 65 mph blew down trees, large tree limbs and power lines across many locations in La Salle county. Trees were blown down in La Salle. Trees were uprooted near Lake Holiday in far northeast La Salle county. Large tree limbs were blown down in Mendota, Norway and one mile east of Serena. A grain bin was crushed and partially lifted off its base in Ottawa and a tree fell onto a car in Seatonville, both in LaSalle county. Wind damage was widespread across Kendall county as well. Trees, large tree limbs and power lines were blown down in Plano, Newark and Oswego as well as many rural parts of the county. Trees were blown down blocking Illinois Route 71 west of Oswego. Trees 20 inches in diameter were blown down southeast of Plano along Lynwood Drive. Southwest of Plano, a large tree limb fell onto a roof and broke a skylight. Winds gusted to 74 mph in Sandwich in De Kalb county, where numerous large trees were blown down or uprooted and a 20 inch diameter tree fell onto house. Several trees and tents were blown down at an Antique show in Sandwich in DeKlab county where one person suffered a broken arm and another was hit in the head by a falling tent pole. Canopies were also blown off of stores in Sandwich. A two and a half foot diameter tree was snapped at its base in Morris in Grundy county. A gust to 60 mph was reported in Naperville in Will county. A one foot diameter tree was snapped in half on Winthrop Street, east of Larkin and north of Black Roads in Joliet. Large tree limbs and power lines were blown down in Kankakee. A tree fell onto power lines in Sheldon in Iroquois county.

In addition to the strong winds and wind damage, very heavy rain fell across much of Will and southern Cook counties. Most of the rain fell in a two hour period with 5.00 inches reported in Shorewood, 4.90 inches at the National Weather Service office in Romeoville, 4.10 inches in Midlothian, 4.00 inches in Joliet, 3.56 inches in Orland Park, 3.50 inches in Plainfield and South Holland, and 2.05 inches in Plano in Kendall county. Widespread street flooding was reported across all of north and central Will and southern Cook counties and many homes and businesses suffered water and flood damage. Retention ponds were flooded and backing up into yards and streets in Plainfield in Will county. Creeks were overflowing their banks in Midlothian in Cook county. Several roads had two to four feet of standing water and were impassible, some roads were partially washed away. Several cars were submerged at the intersection of Lagrange and Nebraska streets in Frankfort in Will county. A Will county sheriff's car was destroyed when it pulled into a flooded subdivision and sank. Several people had to be rescued from their cars after becoming trapped by flood waters in Frankfort, Lockport, Joliet, and Plainfield in Will county. A creek bridge was washed away in Lockport township. A man indirectly died from the flooding after walking into his flooded basement and being shocked because the water was in contact with electricity. An alley between Illinois and Main Streets in Lemont in Cook county was partially washed away by fast flowing water. 100 homes and 13 businesses were flooded in Lemont. Flood waters surrounded several buildings in Tinely Park. A 15 foot berm was washed away in unincorporated Palos Township which caused massive street and basement flooding in the Sandberg Glen subdivision. Street flooding was also reported in Plano in Kendall county.

Quarter size hail was reported at State Road 55 and State Road 10.

Thunderstorms formed over far northeast Illinois during the afternoon hours of July 17th and moved southeast into northwest Indiana during the evening hours. Trees, large tree limbs and power lines were blown down across many parts of Lake county, including St. John, Munster and Cedar Lake. Large tree limbs and power lines were blown down in St. John. A tree fell onto a house in Griffith causing significant damage to the building. A large tree also fell onto a house in Hobart causing massive damage to the second floor. An old lumber storage building was blown down near Dyer. Many other areas received large hail. Very heavy rain fell across Lake and Porter counties which caused flooding of some streets and low lying areas. A few roads were impassable because of high water. Rainfall amounts ranged between 1 and 2 inches but the rain fell in a very short period of time. 2.1 inches of rain was reported in just 15 minutes in Munster.

INDIANA, Northwest

0630CST

Thunderstorms moved across northwest Indiana producing hail and very heavy rain during the early morning hours of July 21st. Flooding was reported across all of Lake county. Houses were flooded in Dyer, St. John, and Schererville. Route 41 and Route 30 was closed with 3 to 4 feet of standing water. A few businesses suffered roof damage from the heavy rains in Lake county. Flooding was also reported in Hebron in Porter county and in Wheatfield in Jasper county. Many roads were closed due to flooding. The ground across parts of northwest Indiana was already saturated from heavy rains on July 17th. Some storm total rainfall reports include 5.50 inches in Wheatfield, 3.64 inches in Lowell, 3.27 inches in Crown Point and 2.16 inches in Rensselaer. For the entire month of July, Wheatfield reported 17.15 inches, Lowell reported 13.16 inches, Crown Point reported 10.35 inches and Rensselaer reported 16.93 inches.
