VITAL STATISTICS OF THE UNITED STATES, 1980

VOLUME III—MARRIAGE AND DIVORCE

A brief summary of the contents for each section is listed below for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

Section 1. Marriages

For the United States:

National trend data.

Marriage totals and rates for each State, division, and region and the 50 largest SMSA's.

Marriage totals for each county or county equivalent.

Monthly marriage totals for each State, division, and region.

For the marriage-registration area and 5 selected nonregistration States.

Marriages classified by major demographic characteristics of bride and groom and by characteristics of marriage performed in each participating State; marriage rates specific for sex, age, and previous marital status.

Section 2. Divorces

For the United States:

National trend data.

Divorce totals and rates for each State, division, and region and the 50 largest SMSA's.

Divorce totals for each county or county equivalent.

Trend of national estimates of the total number of children involved in divorce.

For the divorce-registration area:

For each participating State, divorces classified by major demographic characteristics of husband and wife, characteristics of their marriage, and number of children.

Section 3. Puerto Rico and Virgin Islands (U.S.)

Marriage and divorce totals for each county or county equivalent.

Marriages classified by major demographic characteristics of bride and groom.

For Virgin Islands only, divorces and annulments classified by characteristics of husband and wife, duration of marriage, and number of children.

Section 4. Technical Appendix

Historical and contemporary sources of marriage and divorce statistics, design of the samples of marriages and divorces and annulments, variability of sample estimates, and uniformity and completeness of the reporting forms and the collected data. Tables of the population estimates used as bases for rates.

Section I. Marriages

Table	Page
1-1. Marriages and marriage rates with percent changes from preceding year: United States, 1920-80 -----	1-5
1-2. Marriages and marriage rates with percent changes from preceding year: Marriage-registration area, 1957-80 ----	1-6
1-3. Marriage rates per 1,000 unmarried women 15 years of age and over and 15-44 years of age: United States, 1940-80 -----	1-6
1-4. Estimated number of marriages and marriage rates, by month with and without seasonal adjustment: United States, 1971-80 -----	1-7
1-5. Marriages and marriage rates: United States, each region, division, and State, 1976-80-----	1-8
1-6. Marriages and marriage rates per 1,000 men and women 15 years and over by place of residence: United States, each region, division, and State, and outside United States, 1980 -----	1-9
1-7. Marriage rates by age of bride and groom: United States, marriage-registration area, each region, division, and State, 1980 -----	1-10
1-8. Marriage rates by age of bride and groom with percent changes: United States and each region, 1960, 1970, and 1980 -----	1-12
1-9. Marriages by month: United States, marriage-registration area, each region, division, and State, 1980 -----	1-13
1-10. Percent distribution of marriages by month marriage performed: United States and each region, 1960, 1970, and 1980 -----	1-14
1-11. Percent distribution of marriages by month marriage performed and resident status of bride and groom in State where married: United States, marriage-registration area, and each region, 1980 -----	1-14
1-12. Median age of bride and groom by specified age of spouse and resident status in State where married: United States, marriage-registration area, and each region, 1980 -----	1-15
1-13. Median and mean age of bride and groom, by specified age of spouse: United States, 1960, 1970, and 1980 -----	1-16
1-14. Median and first and third quartiles of age at marriage for brides and grooms: United States, each region, division, and State, 1980-----	1-17
1-15. Median age of bride and groom by resident status in State where married: United States, each region, division, and State, 1980 -----	1-18
1-16. Number and percent distribution of marriages, by age of bride and groom: United States, 1960, 1970, and 1980-----	1-19
1-17. Number and percent distribution of marriages, by age of bride and groom: Each region, 1960, 1970, and 1980 ----	1-20
1-18. Percent distribution of marriages by resident status of bride and groom in State where married: United States, marriage-registration area, each region, and State, 1980 -----	1-21
1-19. Percent distribution of marriages by day of week marriage performed: United States and each region, 1960, 1970, and 1980 -----	1-22
1-20. Marriage rates by previous marital status and age of bride and groom: Marriage-registration area, 1980 -----	1-23
1-21. Median age and first and third quartiles of age at marriage of bride and groom, by previous marital status of each partner: Marriage-registration area, 1980 -----	1-23
1-22. Median and mean age of bride and groom at first marriage of both, by age of spouse: Marriage-registration area, 1980 ----	1-24
	1-1

Table	Page
1-23. Percent distribution of marriages by previous marital status of bride and groom: Marriage-registration area and each registration State, 1980-----	1-25
1-24. Percent distribution of marriages by marriage order of bride and groom, by race: Marriage-registration area and each registration State, 1980-----	1-26
1-25. Percent distribution of marriages by month marriage performed, by marriage order and race of bride and groom: Marriage-registration area, 1980 -----	1-27
1-26. Percent distribution of first marriages and remarriages by type of ceremony performed, by age of bride and groom: Marriage-registration area, 1980 -----	1-27
1-27. Marriages by age of bride and groom: United States, marriage-registration area, each region, division, and State, 1980 ----	1-28
1-28. Marriages by age of bride, by age of groom: United States, marriage-registration area, and each region, 1980-----	1-30
1-29. Marriages by age of bride and groom, by resident status of bride, by resident status of groom in State where married: United States and each region, 1980-----	1-34
1-30. Marriages by age and resident status of bride and groom: United States, marriage-registration area, each region, and State, 1980 -----	1-36
1-31. Marriages by resident status of bride and groom in State where married: United States, marriage-registration area, each region, and State, 1980-----	1-46
1-32. Marriages by day of week marriage performed and resident status of bride and groom in State where married: United States, marriage-registration area, each region, and State, 1980 -----	1-47
1-33. Percent distribution of first marriages and remarriages of bride and groom, by type of ceremony performed: Marriage-registration area and each registration State, 1980-----	1-56
1-34. Percent distribution of marriages by age at marriage and median age of bride and groom, by marriage order: Marriage-registration area, 1971-80-----	1-57
1-35. Marriages by previous marital status, age, and race of bride and groom: Marriage-registration area, 1980 -----	1-58
1-36. Marriages by marriage order and age of bride and groom: Each marriage-registration State, 1980 -----	1-59
1-37. Marriages by age of bride, by age of groom: Marriage-registration area, 1980 -----	1-62
1-38. First marriages of both bride and groom, by age of bride, by age of groom: Marriage-registration area, 1980 -----	1-63
1-39. Marriages by previous marital status and age of bride, by age of groom (all grooms and single grooms): Marriage-registration area, 1980 -----	1-64
1-40. Marriages by previous marital status and age of groom, by age of bride (all brides and single brides): Marriage-registration area, 1980 -----	1-65
1-41. Marriages by age of widowed and divorced brides, by age of widowed and divorced grooms: Marriage-registration area, 1980 -----	1-66
1-42. Marriages by race of bride by race of groom: Marriage-registration area and each registration State, 1980-----	1-67
1-43. Marriages by race and age of bride, by race and age of groom: Marriage-registration area, 1980 -----	1-70
1-44. Marriages by previous marital status and race of bride and groom: Marriage-registration area and each registration State, 1980 -----	1-71
1-45. Marriages by number of this marriage of bride and groom: Marriage-registration area and each registration State, 1980 -----	1-74
1-46. Marriages by marriage order and age of bride and groom, by month marriage performed: Marriage-registration area, 1980 -----	1-75
1-2	

Table	Page
1-47. Marriages by marriage order and race of bride and groom, by month marriage performed: Marriage-registration area, 1980 -----	1-76
1-48. Marriages by marriage order and age of bride and groom, by resident status of bride by resident status of groom in State where married: Marriage-registration area, 1980-----	1-77
1-49. Marriages by marriage order and age of bride and groom, by resident status in State where married: Marriage-registration area, 1980 -----	1-79
1-50. Marriages by previous marital status of bride and groom, by resident status in State where married: Marriage-registration area and each registration State, 1980 -----	1-80
1-51. Marriages by marriage order of bride and groom, by nativity status in State where married: Marriage-registration area and each registration State, 1980 -----	1-86
1-52. Marriages by marriage order, nativity and resident status of bride and groom in State where married: Marriage-registration area, 1980 -----	1-90
1-53. Marriages by nativity and resident status of bride and groom in State where married: Each marriage-registration State, 1980 -----	1-91
1-54. Marriages by resident status of bride and groom in State where married, by type of ceremony performed: Marriage-registration area and each registration State, 1980 -----	1-96
1-55. Marriages by age of bride and groom, by resident status in State where married and type of ceremony performed: Marriage-registration area, 1980 -----	1-99
1-56. Marriages by previous marital status and age of bride and groom, by type of ceremony performed: Marriage-registration area, 1980 -----	1-100
1-57. Marriages by marriage order of bride and groom and type of ceremony performed: Marriage-registration area and each registration State, 1980-----	1-101
1-58. Marriages by previous marital status of bride and groom, by resident status in State where married and type of ceremony performed: Marriage-registration area and each registration State, 1980 -----	1-104
1-59. Number of marriages by educational attainment of bride and groom: 19 reporting States, 1980 -----	1-114
1-60. Marriages and marriage rates for the 50 largest standard metropolitan statistical areas in the United States and their component counties: 1980-----	1-115
1-61. Marriages: United States, each State and county, 1980-----	1-117

Sampling Variability of the Marriage Statistics

In the tables which present statistics based on data from probability samples of marriage records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 4-7 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown below. Figures for States shown as "zero" indicate that all records were tabulated and thus data are not subject to sampling variability.

Marriage-registration area	105		
Alabama	100	Michigan	225

1940	82.8	122.4

SECTION 1 - MARRIAGES

Table 1-4. Estimated Number of Marriages and Marriage Rates, by Month, With and Without Seasonal Adjustments: United States, 1971-80

[Rates on an annual basis per 1,000 estimated population for specified month. The number and rates of marriages by month adjusted for seasonal variation are the figures that would have occurred during the month if the characteristic seasonal pattern of marriages observed during the years 1971-80 had been eliminated. Beginning in 1978, data include nonlicensed marriages registered in California; see Technical Appendix]

Item and year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
NUMBER OF MARRIAGES												
Unadjusted for Seasonal Variation												
1980	126,000	149,000	166,000	177,000	237,000	276,000	315,000	277,000	203,000	197,000	189,000	178,000

SECTION 1 – MARRIAGES

Table 1-20. Marriage Rates by Previous Marital Status and Age of Bride and Groom: Marriage-Registration Area, 1980

[Based on sample data. Rates per 1,000 male and female population of specified age residing in area. Marriages of persons under 15 years of age are included in youngest age group; rates are based on populations which exclude persons under 15 years of age. Rates for all marriages are based on unmarried population, those for first marriages are based on single population, and those for all remarriages are based on widowed and divorced population. Except for median and mean ages for all marriages, figures exclude data for Iowa. Figures for widowed and divorced, but not for all remarriages, exclude data for Michigan, Ohio, and South Carolina. Figures for all marriages include previous marital status not stated; all remarriages include widowed or divorced not stated]

Previous marital status and age	Bride	Groom
ALL MARRIAGES		
15 years and over	54.2	66.8
15-17 years	20.2	3.0
18-19 years	90.9	39.2

¹"Divisions" shown are census divisions, the nearest equivalent to counties.
²Data are incomplete.
³Divisions are parishes.
⁴Data are county where marriage license was issued and marriage certificate was filed, not necessarily county where marriage occurred.
⁵Washabaugh county has merged with Jackson county.
⁶Independent cities have the same status as counties and are listed after counties.
⁷On January 1, 1974, Nansermond merged with the independent city of Suffolk.
⁸Includes the independent cities of Manassas and Manassas Park.
⁹Includes the independent city of Poquoson.

Section 2. Divorces

Table	Page
2-1. Estimated number of divorces and annulments and rates, with percent changes from preceding year: United States, 1920-80 -----	2-5
2-2. Divorces and annulments and rates: United States, each region, division, and State, 1975-80 -----	2-6
2-3. Reported annulments and percent of total divorces and annulments: United States and each State, 1975-80 -----	2-7
2-4. Divorce rates per 1,000 married women 15 years of age and over with percent changes from preceding year: United States, 1920-80 -----	2-8
2-5. Median ages of divorced husband and wife at time of decree and at time of marriage: Divorce-registration area and each registration State, 1980 -----	2-8
2-6. Median duration of marriage prior to divorce or annulment: Divorce-registration area and each registration State, 1976-80 -----	2-8
2-7. Estimated number of children involved in divorces and annulments, average number of children per decree, and rate per 1,000 children under 18 years of age: Divorce-registration area and each registration State, 1980 -----	2-9
2-8. Estimated number of children involved in divorces and annulments, average number of children per decree, and rate per 1,000 children under 18 years of age: United States, 1953-80 -----	2-9
2-9. Percent distribution of divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1980 -----	2-9
2-10. Percent distribution of divorces and annulments by duration of marriage at time of decree: Divorce-registration area and each registration State, 1980 -----	2-10
2-11. Divorces and annulments by place where marriage was performed: Divorce-registration area and each registration State, 1980 -----	2-11
2-12. Divorces and annulments by age of husband and wife at time of decree: Divorce-registration area and each registration State, 1980 -----	2-12
2-13. Divorces and annulments by age of husband and wife at time of marriage: Divorce-registration area and each registration State, 1980 -----	2-13
2-14. Divorces and annulments by race of husband by race of wife: Divorce-registration area and each registration State, 1980 -----	2-14
2-15. Divorces and annulments by number of this marriage of husband and wife: Divorce-registration area and each registration State, 1980 -----	2-16
2-16. Divorces and annulments by duration of marriage at time of decree: Divorce-registration area and each registration State, 1980 -----	2-17
2-17. Divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1980 -----	2-18
2-18. Divorces and annulments by duration of marriage at time of decree and number of children reported: Divorce-registration area and each registration State, 1980 -----	2-19
2-19. Divorces and annulments by month marriage performed: Divorce-registration area and each registration State, 1980 ----	2-21
2-20. Divorces and annulments by educational attainment of husband and wife: 20 reporting States, 1980 -----	2-22
	2-1

Table	Page
2-21. Divorces and annulments by duration of marriage at time of separation: 21 reporting States, 1980 -----	2-22
2-22. Divorces and annulments by duration of separation at time of decree: 21 reporting States, 1980 -----	2-23
2-23. Divorces and annulments by duration of marriage at time of decree by number of this marriage of husband and wife: Divorce-registration area, 1980 -----	2-23
2-24. Divorces and annulments by number of children under 18 years of age by race: Divorce-registration area and each registration State, 1980 -----	2-24
2-25. Divorces and annulments by age of husband and wife at time of decree by number of children under 18 years of age: Divorce-registration area, 1980 -----	2-28
2-26. Divorces and divorce rates for the 50 largest standard metropolitan statistical areas in the United States and their component counties: 1980 -----	2-29
2-27. Divorces and annulments: United States, each State and county, 1980 -----	2-31

Sampling Variability of the Divorce Statistics

In the tables which present statistics based on data from probability samples of divorce records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 4-8 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown below. Figures for States shown as "zero" indicate that all records were tabulated and thus data are not subject to sampling variability.

Divorce-registration area	60	Missouri	0
Alabama	75	Montana	15
Alaska	0	Nebraska	0
Connecticut	15	New Hampshire	0
Georgia	75	New York	0
Hawaii	15	Ohio	100

Section 3. Puerto Rico and Virgin Islands (U.S.)

Table	Page
3-1. Marriages, divorces and annulments, and rates: Puerto Rico and Virgin Islands, 1940-80 -----	3-3
3-2. Marriages and divorces and annulments: Puerto Rico, Virgin Islands, and county equivalents, 1980 -----	3-4
3-3. Marriages by month marriage performed: Puerto Rico and Virgin Islands, 1980 -----	3-5
3-4. Marriages by day of week marriage performed: Puerto Rico and Virgin Islands, 1980 -----	3-5
3-5. Marriages by resident status of bride and groom in area where married: Puerto Rico and Virgin Islands, 1980 -----	3-5
3-6. Marriages by marriage order and age of bride and groom: Puerto Rico and Virgin Islands, 1980 -----	3-6
3-7. First marriages of both bride and groom, by age of bride, by age of groom: Puerto Rico and Virgin Islands, 1980 -----	3-6
3-8. Marriages by previous marital status of bride and groom: Puerto Rico and Virgin Islands, 1980 -----	3-7
3-9. Marriages by number of this marriage of bride and groom: Puerto Rico and Virgin Islands, 1980 -----	3-7
3-10. Divorces and annulments by specified characteristics: Virgin Islands, 1980 -----	3-8
3-11. Divorces and annulments by specified characteristics of husband and wife: Virgin Islands, 1980 -----	3-8
3-12. Divorces and annulments by duration of marriage at time of decree and number of children under 18 years of age: Virgin Islands, 1980 -----	3-8

NOTES

Reporting areas

Marriage data are shown for both Puerto Rico and the Virgin Islands. Divorce totals are shown for both Puerto Rico and the Virgin Islands and detailed divorce statistics for the Virgin Islands only.

Geographic classification

Data are shown by place of occurrence. Totals are shown for the local areas of St. Croix Island and St. Johns and St. Thomas Islands (the latter two combined) in the Virgin Islands and for the primary geographic subdivisions, "municipios," in Puerto Rico. Courts empowered to grant divorces are located only in a few municipios in Puerto Rico; residents of other municipios obtain divorces in these courts.

Race and color

For 1980, brides and grooms are not shown by race or color for either Puerto Rico or the Virgin Islands. Husbands and wives divorced in 1980 are classified as white or all other for the Virgin Islands.

Section 4—the Technical Appendix—includes information about the sample specifications, sampling errors, and completeness of reporting for these statistics.

SECTION 3 – PUERTO RICO AND VIRGIN ISLANDS

3-3

Table 3-1. Marriages, Divorces and Annulments, and Rates: Puerto Rico and Virgin Islands, 1940-80

SECTION 4 - TECHNICAL APPENDIX

SOURCES OF DATA

Marriage and divorce statistics in this volume are based on information from three sources: (1) Complete counts of events obtained from all States, (2) samples of marriage and divorce certificates from States meeting specified reporting criteria, and (3) machine-readable data for all marriages and all divorces occurring in States participating in the Vital Statistics Cooperative Program.

State and local officials annually provide complete counts of marriages and divorces by county of occurrence and marriages by month of occurrence. From these counts, marriage and divorce totals are derived, and rates are computed for each State, geographic division, region, and the United States. For marriages a total is also derived for the marriage-registration area.

Sample records are obtained by the National Center for Health Statistics (NCHS) from microfilm copies of the original certificates received from the registration offices of States and areas comprising the marriage-registration area (MRA) and the divorce-registration area (DRA). For 1980, a census year, sample marriage records were also obtained for five States not in the MRA (See discussion under the heading Special marriage data for 1980). The statistical information on these records, including data on the characteristics of marriages and divorces and of the persons involved in them, is edited, classified, transferred to tape for computer processing, and tabulated in NCHS. Exceptions to this procedure are statistics from those States in the MRA or DRA that submit machine-readable data to NCHS through the Vital Statistics Cooperative Program. Statistical data for 1980 for both marriages and divorces were provided through the Vital Statistics Cooperative Program by the following eight States: Illinois, Missouri, Nebraska, New York (except for New York City marriages), Rhode Island, South Carolina, Vermont, and Virginia. For marriages only, precoded data were provided by Florida, Maine, Montana, and New Hampshire.

The marriage totals for the MRA and each participating State derived from sample data differ slightly from the totals obtained from the complete counts described previously. The two published divorce totals for each State in the DRA also vary slightly. Only one total is published for the DRA; it is based on sample data.

Marriage and divorce statistics for the United States, for the registration areas, and for individual States are limited to events occurring during the year and registered within the specified area. Tabulations (except for table 1-6) are by place of occurrence and include events occurring to nonresidents. A tabulation of marriages by place of residence of bride and groom, has been included in this volume (table 1-6) since residence data were obtained from all but three States for events occurring during 1980. Marriages or divorces of members of the Armed Forces or other U.S. nationals that occur outside the United States are excluded. *United States* refers to the 50 States and the District of Columbia. Alaska has been included in the U.S. tabulations since 1959 and Hawaii, since 1960. Data for Puerto Rico and the Virgin Islands were compiled for 1980 and preceding years except 1966-69 and 1972. Data for these areas were processed separately from the rest of the MRA and DRA and appear in section 3 of this volume.

Sources of marriage and divorce data since 1867 are shown in table 4-1; a description of these sources can be found in section 7, Volume III, *Vital Statistics of the United States, 1960*.

Nationwide counts

In 1980 the total counts of marriages by State and county were obtained from central files of marriage records for the 47 States maintaining them and from the District of Columbia. The registration officials of Manhattan supplied the counts for the five boroughs of New York City. In the three States without central files, counts were obtained from the counties by State officials or by NCHS. State officials reported the counts for Arizona and Oklahoma. County totals were obtained from county officials in New Mexico. Marriages performed in 1980 were not reported by eight counties in Kentucky.

Although total counts of marriages performed were requested from each county registration official, as in prior years, a small number of counties reported instead the number of marriage licenses issued. The number of marriage licenses issued is usually 1 or 2 percent greater than the number of marriages performed. (See page 2-1, section 2, Volume I, *Vital Statistics of the United States, 1959*.)

Beginning with final marriage statistics for 1978, nonlicensed (confidential) marriages registered in California were included in national and geographic totals and rates. Section 4213 of the California Civil

Code allows unmarried couples who have been living together to be married confidentially without obtaining a marriage license or health certificate. In 1972 this section was amended to require county clerks to keep sealed records of these marriages and periodically to report the total number to the California State Department of Health Services. Since reporting began, nonlicensed marriages have increased rapidly, from 2,857 in 1973 to 48,040 in 1980. A description of the number and effect of nonlicensed California marriages can be found on page 4-3 of Volume III, *Vital Statistics of the United States, 1978*.

Total counts of divorces by State and county include decrees of absolute divorce and of annulment as well as decrees of marriage dissolution introduced in many States during the 1970's. These counts were obtained from central files of the 46 States maintaining them and from the District of Columbia. Either local or State officials provided the county totals for the four States without central files of divorce records. Local officials in Indiana and New Mexico supplied the county totals. State officials in Arizona and Oklahoma obtained the county totals and forwarded them to NCHS.

Divorces and annulments in 1980 were not reported for one county or more in the following States: Arkansas (2), Kentucky (15), Louisiana (5), Michigan (1), and Wisconsin (1). The number of divorces for some counties in Indiana is based on the number of petitions filed, rather than on the divorce decrees granted.

Divorce counts shown for each State in tables 2-2 and 2-25 are those that were provided to NCHS on a yearly basis. In July 1981 the Division of Health Statistics in Arkansas provided revised statistics for that State. Statistics previously submitted and published for the years 1971-79 erroneously included dismissals and legal separations in the totals. Revised counts for 1975-79 provided by Arkansas officials are shown in table A along with rates based on the revised counts and calculated in NCHS.

Table A. Revised Number of Divorces and Annulments and Rates: Arkansas, 1975-79

Year	Number	Rate ¹
1979	15,501	6.8
1978	14,951	6.7
1977	14,792	6.7
1976	14,219	6.6
1975	13,434	6.2

¹ Rates are based on revised population figures.

Standard metropolitan statistical areas

The standard metropolitan statistical areas (SMSA's) used in this report are those established by

the U.S. Office of Management and Budget, using final 1980 census population counts, and used by the U.S. Bureau of the Census except in the New England States.

Except in the New England States an SMSA is a county or a group of contiguous counties containing a city of 50,000 inhabitants or more or an urbanized area of 50,000 with a total metropolitan population of at least 100,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to specified criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city or cities.

In the New England States the Office of Management and Budget uses towns and cities rather than counties as geographic components of SMSA's. The National Center for Health Statistics cannot, however, use the SMSA classification for these States because its data are not coded to identify all towns. Instead, the New England County Metropolitan Areas (NECMA's) are used. These areas are established by the Office of Management and Budget and are made up of county units.

Marriages and marriage rates with seasonal adjustments

For all years appearing in table 1-4 the number of marriages and the marriage rates have been adjusted for large seasonal and daily fluctuations.

Registration areas

Registration areas for collecting marriage statistics were established in 1957 and for divorce statistics, in 1958. These areas include States with adequate programs for collecting marriage and divorce statistics. Criteria for participation in the registration areas are

1. A central file of marriage or divorce records
2. A statistical report form conforming closely in content to the Standard License and Certificate of Marriage (figure 4-1) or Standard Certificate of Divorce, Dissolution of Marriage or Annulment (figure 4-2)
3. Regular reporting to the State office by all local areas in which marriages or divorces are recorded
4. Tests for completeness and accuracy of marriage or divorce registration carried out in cooperation with NCHS.

In 1980 the MRA (figure 4-3) comprised 42 States, the District of Columbia, Puerto Rico, and the Virgin Islands. The DRA (figure 4-4) included 30 States and the Virgin Islands. Table 4-2 shows when States and independent registration areas established central files and when they were admitted to the MRA and DRA.

In the statistical tabulations in this volume, *Marriage-registration area* refers only to the 42 States and the District of Columbia. *Divorce-registration area* refers to the 30 States. Marriages in the MRA accounted for 80 percent of all marriages in the United States in 1980, and divorces in the DRA accounted for 49 percent of all divorces.

Special marriage data for 1980

In 1980 an effort was made to obtain national marriage data to use along with the detailed population bases available from the 1980 census.

Marriage records were sampled for five States not in the MRA—Arkansas, Nevada, North Dakota, Texas, and Washington. With the addition of these States, marriage data by age and State of residence for the bride and groom are available for the entire United States except for three States without central files of marriage records—Arizona, New Mexico, and Oklahoma.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE—PUBLIC HEALTH SERVICE—NATIONAL CENTER FOR HEALTH STATISTICS
1978 REVISION

HRA-165
Rev. 1/78

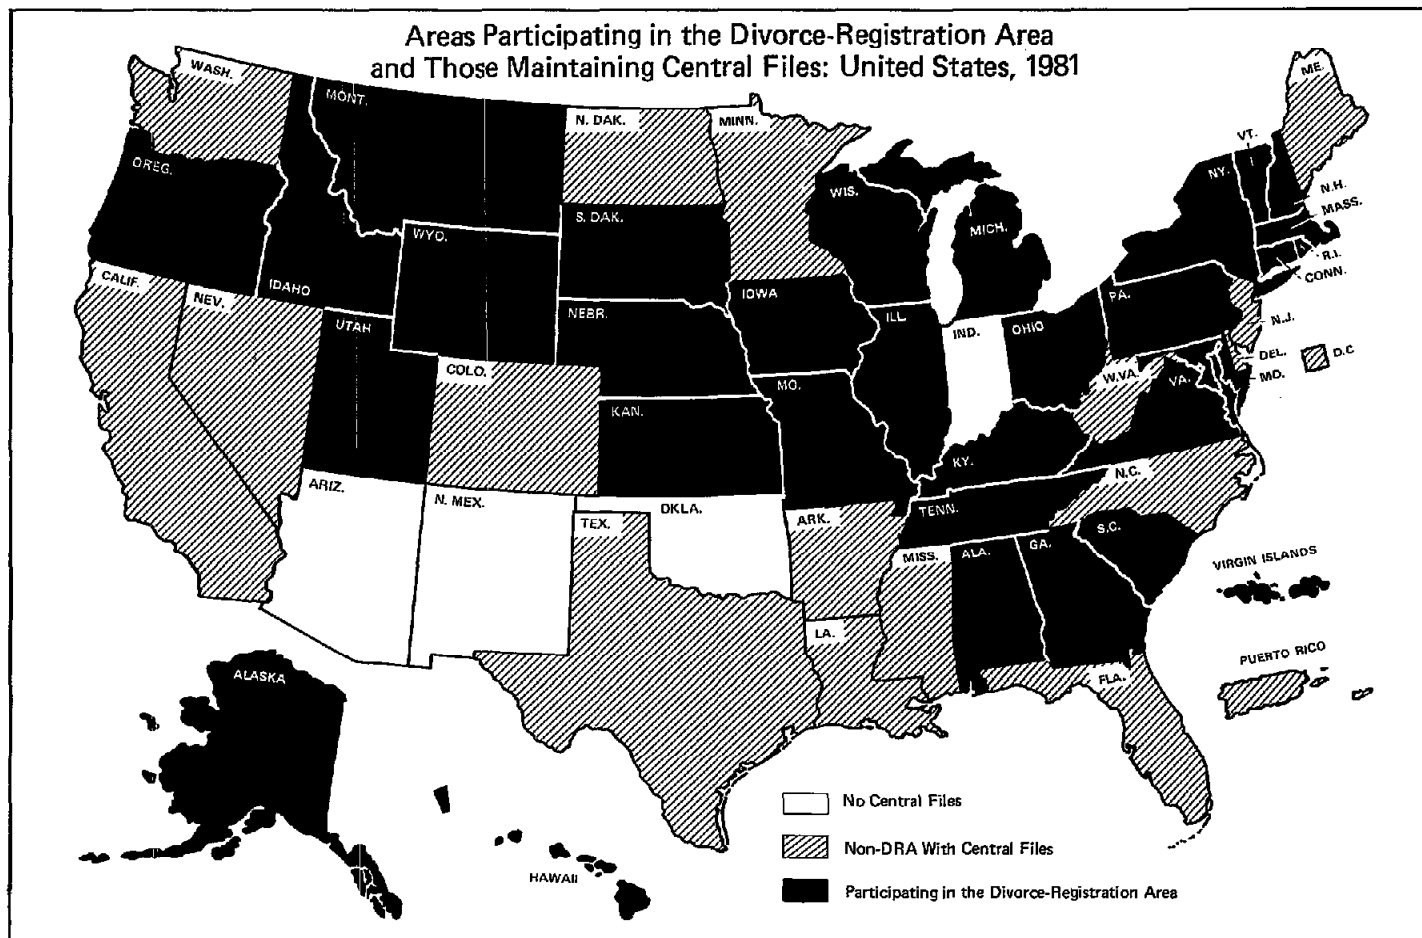

Dissolution of Marriage or Annulment (figure 4-2), issued by the Public Health Service, serve as the principal means of getting comparable data from documents used to collect information on marriages and divorces in the United States. Model reporting forms, prepared in close collaboration with the Public Health Conference on Records and Statistics, were first recommended to the States in 1954 for adoption January 1, 1955, and stood without revision through 1967.

Revised standard certificates were recommended to the States for use beginning January 1, 1968. A

description of the original standard certificate can be found in the Technical Appendix, Vol. III, *Vital Statistics of the United States*, 1960; a description of the first revision can be found in the Technical Appendix of the same volume for 1968.

A second revision of each of the standard certificates was recommended to the States for use beginning January 1, 1978. The marriage certificate was revised to include a section providing the license to marry, to request age in addition to date of birth, and to request both title of person performing the ceremony and type of ceremony (civil or reli-

FIGURE 4-4

could be identified if either item was stated. Colorado, Idaho, Maryland, and Oregon requested only the item on previous marital status. For these States the number of not stated cases for the missing item (number of this marriage) was reduced by the number of cases assumed to be first marriages because previous marital status was stated as single. Michigan, Ohio, and South Carolina requested only the item number of times previously married. Not stated cases for the missing item (previous marital status) were reduced by the number of persons assumed to be single because they had been previously married "0" times. Both items, previous marital status and number of this marriage, were removed from the Iowa marriage certificate July 1, 1976.

Marriage laws in Minnesota were amended in 1978, establishing that the application contain information about former marriages only if either party was married before. The amended law does not direct that a previous marital status of single be shown. As a result, marriage order not stated in-

creased in Minnesota, from 3 percent of brides and 2 percent of grooms in 1977 to 23 percent of brides and 21 percent of grooms in 1980. Previous marital status and number of this marriage were affected in a similar manner.

SAMPLE DESIGN

The sampling of marriages and divorce records for States in the registration areas was initiated in 1960. For earlier years, data on characteristics had been compiled from predesigned tables completed on the basis of all events and submitted by the States.

Obtaining the records

Each year the States and areas participating in the MRA and the DRA prepare microfilm copies of their records, which are purchased by NCHS. Further processing, including the selection of samples of certificates from microfilm copies and the code-punching,

verification, and tabulation of statistical data from the sample records, is carried out by NCHS. As previously noted, exceptions to this procedure are made for States in the Vital Statistics Cooperative Program that provide machine readable computer tapes containing statistical data on marriages and divorces.

For marriages the records refer to all marriages performed in 1980 within the 42 MRA States, the District of Columbia, Puerto Rico, and the Virgin Islands. Nonlicensed marriages performed in California are not included in the sample because by California law the certificates for these marriages are retained as confidential records in the offices of the county clerks (see discussion in the section on Nationwide counts). For divorces the records refer to all decrees of absolute divorce, dissolution of marriage, and annulment that were granted during 1980 within the 30 DRA States and the Virgin Islands.

Interlocutory divorce decrees or decrees "nisi" (which grant that the divorce takes permanent effect at a specific time in the future if the couple does not reconcile in the meantime) are included among the records of the States that grant them, usually for the year in which they were granted.

Sampling procedures

The marriage sample was designed to yield estimates of State totals as well as frequency distributions by characteristics of the bride and groom. These estimates were made for the total MRA and each State in the MRA. A sampling rate was designated for each of the MRA States so that the selected sample for it would consist of at least 2,500 records. Five different sampling rates were used; all records, 1/2, 1/5, 1/10, and 1/20. All records were automatically included in the total MRA sample for States submitting marriage data through the Vital Statistics Cooperative Program. Overall, about 38 percent of all marriages in the MRA were included in the sample for 1980.

Sampling procedures for the divorce sample parallel those for the marriage sample. A sampling rate was selected so that the expected sample for each DRA State would contain at least 2,500 records. Five different sampling rates were used; all records, 1/2, 1/5, 1/10, and 1/20. All records were included in the total DRA sample for the States in the Vital Statistics Cooperative Program. Overall, about 46 percent of all divorces in the DRA were included in the sample for 1980.

The sampling procedures assure for each State a relative variance of 4 percent or less on a 1-percent estimate, that is, on an estimate of a characteristic that comprises 1 percent of the total events in the State. The sampling rates, number of events, and sample cases by State for 1980 are shown in tables 4-5 (marriages) and 4-7 (divorces).

ESTIMATING PROCEDURES

Area totals

The figures obtained from complete counts of events furnished by the State and local offices differ slightly from the estimated totals based on sample data. When possible, major differences between the totals estimated from the sample and those based on independent counts for each reporting State are reconciled before the sample data are weighted and tabulated. However, even in States where 100 percent of the records are sampled, the sample estimate may differ from the State count because of differences between NCHS and State cutoff dates in accepting records.

The sample estimate of marriages in the MRA differed from the complete count by 2.7 percent. It differed by no more than 4 percent in all States (including the States in the special sample), except for California, which differed by 22.8 percent. In California, nonlicensed (confidential) marriages are not available for inclusion in the MRA marriage sample (see the discussion in the section on Nationwide counts). The 5-percent sample of California marriages for 1980 was drawn from 162,824 licensed marriages. The corresponding weight for California sample records was based on this total. Since no information is available on the characteristics of persons obtaining nonlicensed marriages, no estimate is available for the bias introduced in sample estimates by the omission of these marriages.

The sample estimate of divorces in the DRA differed from the complete count by less than 0.1 percent. It differed by less than 3 percent in all States.

Frequencies

Procedures for estimating frequency distributions for various characteristics from the marriage and divorce samples involve two steps.

1. Each sample case was assigned a weight which was the reciprocal of the sampling ratio used to select the case. If a marriage record was selected from a State with a sampling ratio of

1/10, that record was assigned a weight of 10; if 100 percent of the records were processed from a State, each such record was assigned a weight of 1.

2. Tabulated counts consisted of summing the records multiplied by their assigned weights. Thus each frequency distribution, such as age at marriage of first-married brides, is a sum of the weighted sample cases included.

The weights for all sample records are identical within each State. However, as shown in tables 4-5 and 4-7, the weights vary among the registration States from 1 to 20. Therefore, for the MRA or DRA, any two approximately equal frequencies may have different sampling errors, varying with the proportion of cases for each stratum included in the estimate.

Rates

Rates for 1940, 1950, 1960, 1970, and 1980 are based on the population enumerated as of April 1 in the censuses of those years. Rates for all other years are based on the estimated midyear (July 1) population for the respective years. Rates are based on population estimates including Armed Forces stationed in the United States but excluding Armed Forces abroad, except divorce rates for 1941-46 which are based on populations including Armed Forces abroad.

Beginning in 1980, rates by previous marital status for the MRA were based on the unmarried population 15 years and over rather than 14 years and over, which had been the standard until 1980. Marriages of brides and grooms under 15 years of age were included in data for the MRA totals and the youngest age group.

Population estimates for 1971-79.—Rates for 1971-79, except those by marital status, have been revised based on revised population estimates which are consistent with the 1980 Census levels. The 1980 Census counted about 5.5 million more persons than had been estimated for April 1, 1980. The revised estimates for the United States are published by the Bureau of the Census in the *Current Population Reports*, Series P-25, Number 917. Population estimates by month are based on data published in the *Current Population Reports*, Series P-25, Number 899. Unpublished revised estimates for States were obtained from the Bureau of the Census.

Allocation

On the computer tapes containing sample marriage records, values were allocated for missing ages of bride and groom. Reporting of these items has been almost 100 percent complete since 1960; in 1980 both items were more than 99.6 percent complete for the MRA. Because States in the DRA vary radically in the completeness with which items are reported on the divorce records, no allocations were made.

Children involved in divorces

To obtain national estimates for 1970 through 1980, the average number of children under 18 years of age per decree for the DRA was multiplied by the national divorce total. From 1965 to 1969 the average number of children per decree was computed for the 16 States that had reported children with a satisfactory degree of completeness in 1965 (Alaska, Hawaii, Idaho, Iowa, Kansas, Michigan, Missouri, Montana, Nebraska, Ohio, Oregon, South Dakota, Tennessee, Virginia, Wisconsin, and Wyoming); the national divorce total was multiplied by this average. This method was also used to revise figures for 1961-64, originally estimated by using a different method. Consequently, data for 1961-64 shown in table 2-9 differ from figures appearing in Volume III, *Vital Statistics of the United States* prior to the 1965 issue. In 1960 the estimate was based on sample data for the United States. For earlier years total counts from States reporting the number of children were used to estimate the children involved in divorce for the United States.

The race of a child involved in a divorce is inferred from the race of the husband and wife. When the spouses are both in the same racial category, the child is assigned to that category. When the husband is white and the wife is not, the child is assigned to the wife's race. When the husband is not white, the child is assigned to the husband's race. When the race of only one spouse is stated, the child is assigned to the stated race.

SAMPLING ERRORS

Statistics for States where all records were used have no sampling error. For other States each statistic has a sampling error (or standard error) denoted by $\sigma(x)$. The sampling error is primarily a measure of variation that occurs by chance because a sample of records is surveyed rather than the entire population.

The sampling error can be computed because within each State or registration area the probability that a record will be chosen for the sample is known (either all records, 1/2, 1/5, 1/10, or 1/20, as shown in tables 4-5 and 4-7). For about 68 percent of all possible samples of equal size, the estimate from the sample would differ from the value obtained from a complete count by less than the standard error. For about 95 percent of all samples, the difference would be less than twice the standard error.

Sampling errors are shown in table 4-6 for marriages and table 4-8 for divorces. To facilitate comparisons among registration States with widely varying totals of marriages and divorces, the sampling errors for the registration areas and participating States are shown for frequencies expressed as percents of State or of registration area totals. For example, table 1-35 shows 90,500 remarriages to brides 20-24 years of age in the MRA for 1980. This estimated frequency is about 5 percent of all brides in the MRA (1,868,595). In table 4-6 under the column "5 or 95" in the row for the total MRA we find the sampling error 912. Thus chances are about 68 out of 100 that the actual number of remarriages to brides 20-24 years of age is within one standard error of the estimate from this particular sample ($90,500 \pm 912$), or between 89,588 and 91,412. The interval from 89,588 to 91,412 is called a 68-percent confidence interval for the actual number of remarriages of brides 20-24 years of age. The sampling error of a given frequency of marriages or divorces in a particular State can be calculated from the formula

$$\tilde{\sigma}(x_{ij}) = \sqrt{\frac{N_i(N_i - n_i)p_{ij}q_{ij}}{n_i - 1}}$$

where

- i* = a State or registration area
j = a subclass, such as an age group of brides

N_i = the final count of events reported by State *i* (table 1-6 or 2-2)

n_i = the number of sample records in State *i* (table 4-5 or 4-7)

p_{ij} = estimated proportion of all cases with the characteristic *j* to be studied for State *i* (shown in the spread margin of table 4-6 or 4-8 as percent under "1 or 99," "2 or 98," "3 or 97," etc.)

$q_{ij} = 1 - p_{ij}$

$x_{ij} = N_i p_{ij}$, the estimated frequency of the characteristic under study.

In this formula we see that when the number of sample records, n_i , is the same as the total marriages, N_i , the numerator becomes zero, and there is no sampling error for States that have all their records processed. We also see that because the values of p_{ij} and q_{ij} are complementary, their product ($p_{ij}q_{ij}$) remains the same if their values are reversed. For instance, the estimated sampling error for an estimate of 5 percent is the same as the sampling error for 95 percent. Therefore, the sampling error for both values is listed in one column in tables 4-6 and 4-8 under the heading "5 or 95."

For example, to calculate the sampling error for previously widowed Mississippi brides

$N_i = 27,908$, the final count of Mississippi marriages (table 1-6)

$n_i = 2,742$, the number of sample records for Mississippi (table 4-5)

$x_{ij} = 1,480$, the estimated frequency of previously widowed Mississippi brides (table 1-44)

p_{ij} = the number of previously widowed Mississippi brides expressed as a percent of all marriages: $1,480/27,908 = .05$ or 5 percent

$q_{ij} = 1 - p_{ij} = .95$ or 95 percent

and,

$$\tilde{\sigma}(1,480) = \sqrt{\frac{27,908(25,166)(.05)(.95)}{2,741}} = 110$$

So chances are 68 out of 100 that the actual number of previously widowed Mississippi brides is between 1,370 and 1,590 ($1,480 \pm 110$).

The estimated sampling error for the MRA can be computed from the formula

$$\tilde{\sigma}(x_i) = \sqrt{\frac{\sum_{k=1}^{43} \frac{N_k(N_k - n_k)}{n_k - 1} p_{kj}q_{kj}}{n_k - 1}}$$

where

43 refers to the 42 States and the District of Columbia in the MRA

N_k = the final count of events reported by the *k*-th MRA State

- n_k = the number of sample records in the same State
 p_{kj} = the estimated percent of all cases in State k with the characteristic j
 $q_{kj} = 1 - p_{kj}$

Using the same formula, sampling errors for the DRA shown in table 4-8 were computed by summing over the 30 States in the DRA.

Many of the tables in this volume show percent distributions rather than frequencies. The sampling error for such a percent can be computed by dividing the sampling error found in table 4-6 or 4-8 by the estimated total number of events for the area. For example, table 1-23 shows that 3.9 percent of all Oregon brides were previously widowed. In table 4-6 under the spread margin "4 or 96" the Oregon sampling error is 59. Divide 59 by 23,000, the estimated number of marriages in Oregon as shown in the stub margin of the same table. The result is 0.3 percent, the sampling error for an estimated 4 percent of 1980 Oregon marriages. Thus chances are about 68 out of 100 that the actual percent of previously widowed Oregon brides is 3.9 ± 0.3 , or between 3.6 and 4.2 percent.

The following formula is used to compute a sampling error for the proportion of events in a subclass of a subgroup, where the number of events in the subgroup is also subject to sampling error:

$$\tilde{\sigma}(x/y) = (1/y) \sqrt{\tilde{\sigma}^2(x) - (x/y)^2 \tilde{\sigma}^2(y)}$$

where

- y = the estimated frequency of the subgroup
 x = the estimated frequency of the subclass of the subgroup
 $\tilde{\sigma}(y)$ = the sampling error of y from table 4-6 or 4-8
 $\tilde{\sigma}(x)$ = the sampling error of x from table 4-6 or 4-8

To illustrate, if we wanted the sampling error for the proportion of all previously married Utah brides who were 45-54 years of age, let

- x = 260 previously married Utah brides who were 45-54 years of age (table 1-36)
 y = 3,850 previously married Utah brides
 x/y = .0675

$\tilde{\sigma}(x) = \tilde{\sigma}(260) = 31$ by interpolation between "1 or 99" and "2 or 98" in table 4-6 since x is approximately .015 of all Utah brides ($x/N = 260/17,080 = 0.015$)

$\tilde{\sigma}(y) = (3,850) = 108$ by interpolation between "20 or 80" and "25 or 75" in table 4-6 since y is .225 of all Utah brides ($y/N = 3,850/17,080 = .225$)

$$\tilde{\sigma}(x/y) = (1/3,850) \sqrt{31^2 - (.0675)^2 (108)^2} = .0078 \text{ or } .08 \text{ percent.}$$

So chances are 68 out of 100 that the actual proportion of previously married Utah brides who were 45-54 years of age was $.0675 \pm .0078$, or between 5.97 percent and 7.53 percent.

The statistical significance of the difference between two proportions may be tested by the following formula:

$$\frac{(x_1/y_1) - (x_2/y_2)}{\sqrt{\tilde{\sigma}^2(x_1/y_1) + \tilde{\sigma}^2(x_2/y_2)}}$$

where the x 's and y 's represent the same subgroups as above, but of two populations, and where the denominator, under the square root sign, represents the sampling error of the difference between the proportions x_1/y_1 and x_2/y_2 shown in the numerator of the formula. If the above ratio is 2 or larger, the difference between proportions is considered significant at the .05 level.

For example, 6.75 percent of previously married brides in Utah were 45-54 years of age, with a sampling error of .80 percent. Using the same procedure for previously married brides in Massachusetts, .1049 or 10.49 percent were 45-54 years of age, with a sampling error of .0088 or 0.88 percent. Substituting these values in the formula above gives the following results:

$$\frac{.1049 - .0675}{\sqrt{(.0088)^2 + (.0078)^2}} = \frac{.0374}{.0118} = 3.2$$

Since the difference in proportion divided by the sampling error is greater than 2, this difference of 3.74 percentage points between remarried brides in Utah and those in Massachusetts, is expected to occur by chance less than once in 20 times; the difference is statistically significant at the .05 level.

NONSAMPLING ERRORS

In addition to the sampling errors previously described, there are several other sources of variation.

Incomplete reporting

Nonresponse errors in marriage and divorce data may arise from any of these three sources: (1) The item is not on the certificate of a particular reporting area. For example, the item "color" was removed from the 1971 revision of the Massachusetts marriage record; (2) sometimes when a State revises its form to include additional items, copies of the old form are still used extensively by registration offices until a supply of the old version is exhausted; or (3) although the item may be on the form, there may be no response, or the response may be illegible or unusable. Items on some forms are badly worded and do not elicit responses sufficiently precise to be classified.

Items not answered for any of these three reasons are tabulated as "not stated." Tables 4-9 and 4-10 show the proportions of not stated cases for specified characteristics of marriages and divorces for 1980. Footnotes to entries identify the specific State where an item was not on the certificate form (not reportable). A major proportion of the not stated cases were due to the absence of items on some of the reporting forms (not reportable). On the divorce records, personal information (age, race, etc.) typically has been less completely reported than information about the dissolved marriage or about the type of decree.

Other sources of error

Inconsistent responses.—Occasionally, for both marriages and divorces, the responses to related items are inconsistent. For example, the previous marital status of the bride or groom, as shown on the marriage certificate, may not be consistent with the

stated number of times married or number of this marriage. Such differences are reconciled before tabulation.

Ambiguous wording of items.—Some of the items are worded so that they do not yield information easily classified in standardized categories. This often leads to errors in classification, more frequently of geographic place names (residence, place of marriage, and place of birth) and of previous marriages.

Microfilm errors.—Errors in the arrangement of the records received on microfilm in NCHS sometimes occur when numbers on the records are out of sequence, missing, or duplicated, or when records that are not part of the universe being sampled are erroneously included in the file.

Processing errors.—Errors may arise in coding, punching, or tabulating of records. However, all sample coding was verified 100 percent; data already on computer tape were edited for impossible codes and for inconsistencies. Instances of impossible codes and inconsistencies in information about previous marriages were rechecked to the records.

In general, for most of the data available from 1960 onward, the completeness and year-to-year consistency are evidence of the basic reliability and coverage of the marriage- and divorce-registration systems.

SECTION 4 – TECHNICAL APPENDIX

Table 4-1. Sources of Marriage and Divorce Data: United States, 1867-1980

Time period	Marriage	Divorce ¹
1867-86	Estimates prepared by National Office of Vital Statistics based on results of field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.
1887-1906	Estimates based on data from field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.
1907-15	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1916	Numbers collected through mail survey conducted in 1917-18 by Bureau of the Census.	Numbers and detailed statistics collected through mail survey conducted in 1917-18 by Bureau of the Census.
1917-21	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1922-32	Annual collection by Bureau of the Census through mail query to States with central files and to counties in the remaining States.	Numbers and detailed statistics collected annually by Bureau of the Census through mail query to States with central files and to counties in the remaining States.
1933-36	Estimates by S. A. Stouffer and L. M. Spencer on basis of data available from selected States (<i>American Journal of Sociology</i> , January 1939).	Same as for marriage.
1937-40	Estimates based on transcript returns and mail surveys of State and county offices conducted by Bureau of the Census. Some detailed statistics for 1940 based on transcript program.	Same as for marriage.
1941-43	Estimates based on data from published State reports and from files of Bureau of the Census and Federal Home Loan Bank Board.	Same as for marriage.
1944-47	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices.
1948-56	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.
1957	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the marriage-registration area (MRA).	Same as for 1948-56.
1958-59	Same as for 1957.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the divorce-registration area (DRA).
1960	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of marriage records designed to provide estimates for the United States, the four regions, the marriage-registration area, and each registration State. Totals of either marriages or marriage licenses by county and by month also tabulated in each State. These and totals estimated from samples were checked for consistency.	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of divorce records. Records in the sample provided statistics on absolute divorces and annulments for the United States, the four regions, the divorce-registration area, and each registration State. Totals for each State by county also tabulated in each State. These and totals estimated from samples were checked for consistency.
1961-69	Statistics prepared in the National Center for Health Statistics for the MRA and each MRA State from probability samples of the marriage records collected by each MRA State. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for MRA States, checked for consistency with totals estimated from sample records.	Statistics prepared in the National Center for Health Statistics for the DRA and each DRA State from probability samples of the records of absolute divorces and annulments collected by each DRA State. Pretabulated totals by county, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for DRA States, checked for consistency with totals estimated from sample records.
1970	Statistics prepared in the National Center for Health Statistics for the United States (excluding Arizona, New Mexico, and Oklahoma), the MRA, each MRA State, and eight nonregistration States from probability samples of the marriage records collected by each MRA State and each of the eight nonregistration States. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions. For MRA States and the eight nonregistration States, these totals were checked for consistency with totals estimated from sample records.	Same as for 1961-69.
1971	Same as for 1961-69.	Same as for 1961-69.
1972-74	Same as for 1961-69 except for Florida. In 1972, 1973, and 1974 Florida sent a computer tape of items precoded for all marriages in that State.	Same as for 1961-69.
1975	Same as for 1961-69 except for Florida, Maine, Missouri, Nebraska, New Hampshire, New York (excluding New York City), Rhode Island, South Carolina, and Vermont. These States sent tapes of items precoded for all marriages.	Same as for 1961-69 except for Missouri, Nebraska, New York, Rhode Island, South Carolina, and Vermont. These States sent tapes of items precoded for all divorces.
1976-79	Same as for 1975, except Virginia in 1976 and Illinois and Montana in 1977 were added to the group of States submitting precoded data-tapes.	Same as for 1975, except Virginia in 1976 and Illinois in 1977 were added to the group of States submitting precoded data-tapes.
1980	Statistics prepared in the National Center for Health Statistics for the United States (excluding Arizona, New Mexico, and Oklahoma), the MRA, each MRA State, and five nonregistration States from probability samples of the marriage records collected by each MRA State and each of the five nonregistration States. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions. For MRA States and the five nonregistration States, these totals were checked for consistency with totals estimated from sample records.	Same as for 1979.

¹Includes reported annulments.

Puerto Rico	×	×	(²)	×	×	×	×	(³)		×	
Virgin Islands	×	×	×	×	×	×	×	×	×	×	×

¹Item appears on certificate but is not coded.

²Item may be inferred from the signature of the officiant.

³Number of previous marriages.

⁴Previous marital status.

⁵Item does not specifically request State, but State or city was reported on most records; major cities were allocated to appropriate States.

⁶For this State, cities and towns are minor civil divisions directly below the county level. (Towns are equivalents of townships.)

⁷Item requests date only if last marriage ended by divorce.

SECTION 4 – TECHNICAL APPENDIX

Table 4-4. Selected Items of Statistical Information on Divorce or Annulment Records of Divorce-Registration States and Virgin Islands: 1980
