May 2008

The U.S.-Panama Trade Promotion Agreement Provides Enhanced Market Access

The U.S.-Panama Trade Promotion Agreement (TPA) offers tremendous opportunities for Hawaii's exporters. Panama's strategic location as a major shipping route and the massive project underway to expand the capacity of the Panama Canal enhance the importance of the U.S.-Panama TPA for Hawaii's exporters.

When the Agreement enters into force, 88 percent of U.S. consumer and industrial exports to Panama, including nearly all information technology products; aircraft and related equipment; agriculture and construction equipment; medical and scientific equipment; environmental products; pharmaceuticals; fertilizers; and agro-chemicals will become duty-free immediately. The remaining tariffs phase out over 10 years. U.S. farmers and ranchers will also become much more competitive, benefiting from immediate duty-free treatment of more than 60 percent of current U.S. agriculture exports. Key U.S. agriculture exports such as high-quality beef, other meat and poultry products, soybeans, most fresh fruit and tree nuts, distilled spirits and wines, and many processed food products, will be duty-free upon entry into force of the Agreement. Tariffs on most remaining U.S. farm products will be phased out within 15 years.

Opportunities for Hawaii's Businesses to Participate in the Panama Canal Expansion Project

The U.S.-Panama TPA will ensure that Hawaii's firms can participate on a competitive basis in the \$5.25 billion Panama Canal expansion project that will offer many opportunities for U.S. providers of goods and services. Ultimately, the Canal expansion will benefit Hawaii's exporters by increasing the Canal's capacity, which will reduce the costs of transporting goods while keeping up with the demands of a growing global economy.

Hawaii Depends on World Markets

Hawaii's export shipments of merchandise in 2007 totaled \$560 million, up from \$368 million in 2003, an increase of 52 percent.

Hawaii's exports of merchandise to Panama in 2007 totaled \$53 thousand.

Exports Support Jobs for Hawaii's Workers –

Export-supported jobs linked to manufacturing account for an estimated 0.8 percent of Hawaii's total private-sector employment. Approximately 1.4 percent of all manufacturing workers in Hawaii depend on exports for their jobs. (2006 data are the latest available.)

Exports Sustain Hundreds of Hawaii's Businesses – A total of 632 companies exported from Hawaii locations in 2006. Eighty-seven percent of these companies (549), or more than four-fifths, were small and medium-sized enterprises, with fewer than 500 employees.

The U.S.-Panama TPA Expands U.S. Services Providers' Access to Panama's Services Market

The U.S.-Panama TPA expands U.S. service providers' access to Panama's primarily service-based economy. The Panama Canal and the Colon Free Zone provide much of the stimulus for Panama's services sector. Key services include banking and financial services, accounting, legal, and insurance services, inter-modal transportation services, container ports, flagship registry, tourism, and medical and health services. Panama made substantial commitments to liberalize its services trade. For example, Panama committed to open its telecommunications and financial services sector to U.S. companies, to lift restrictions on investment in retail services trade and to provide new access to professional services that previously had been reserved exclusively to Panamanian citizens.

Hawaii Exported \$53 Thousand in Goods to Panama in 2007

The U.S.-Panama TPA Moves the Trade Relationship from One-Way Preferences to Reciprocity

In 2007, 91 percent of Panama's exports to the United States entered duty free under unilateral U.S. trade preference programs such as the Caribbean Basin Initiative and Generalized System of Preferences or under zero Normal Trade Relations tariffs. Because of high Panamanian tariffs, U.S. exporters do not have equivalent access to the Panamanian market. The U.S.-Panama TPA levels the playing field and enhances competition because it moves the U.S.-Panama commercial relations beyond one-way preferences to full partnership and reciprocal commitments.

Hawaii's SMEs Will Benefit from U.S.-Panama TPA Provisions

Small and medium-sized firms generated over two-fifths (43 percent) of Hawaii's total exports of merchandise in 2006. This is the seventh highest figure among the states, and is well above the national SME share of total exports of 29 percent. SMEs particularly benefit from tariff-eliminating provisions of free trade agreements (FTAs) and should benefit from significant tariff cuts under the U.S.-Panama TPA. The transparency obligations, particularly those contained in the customs chapter, are also very important to SMEs, which may not have the resources to navigate customs and regulatory red tape.

The U.S.-Panama TPA Opens New Markets for Hawaii's Exports

Petroleum and Coal Products – In dollar terms, the state's leading export category in 2007 was petroleum and coal products, which accounted for 33 percent, or \$187 million, of Hawaii's total merchandise exports. The U.S.-Panama TPA will eliminate duties on key products such as marine diesel fuel and lubricating greases. Currently, Panamanian tariffs in this sector range as high as 30 percent.

Transportation Equipment – The state's second leading export category in 2007 was transportation equipment, which accounted for 16 percent, or \$88 million, of Hawaii's total merchandise exports. Hawaii's exporters of transportation equipment including aircraft, autos, and other transportation equipment, will benefit from U.S.-Panama TPA tariff reductions. One hundred percent of U.S. aircraft and related equipment exports will receive duty-free treatment immediately upon entry into force of the agreement. For motor vehicles, 55 percent of U.S. industrial exports will receive duty-free treatment immediately upon implementation of the agreement, including road tractors, trucks under five metric tons, SUVs, and shock absorbers. For other transportation equipment, certain U.S. industrial exports will receive duty-free treatment immediately upon entry into force of the Agreement, including high-value added products such as sea vessels, and trailers and semi-trailers, which currently face Panamanian tariffs averaging 13.9 percent.

Computers and Electronic Products – Hawaii's global exports of computers and electronic products in 2007 totaled \$30 million. Hawaii's exporters of machinery will benefit from U.S.-Panama TPA tariff reductions. Hawaii's exporters of computers and other information technology equipment will benefit from U.S.-Panama TPA tariff reductions. Certain U.S. exports of information technology equipment will receive duty-free treatment immediately upon entry into force of the Agreement, including DVDs, telephone and fax equipment, semiconductors, and medical and laboratory instruments.

The U.S.-Panama TPA Creates Opportunities for Hawaii's Agriculture

In 2006, Hawaii's agriculture exports amounted to \$96 million (latest data available). Despite high tariffs and other barriers on agricultural products, including key Hawaii farm products such as fruits, nuts, and sugar, U.S. exporters shipped \$304 million in U.S. farm products to Panama in 2007, up \$95 million from 2006. A primary U.S. objective was to change the "one-way street" of duty-free access currently enjoyed by most Panama exports into a "two-way street" that provides U.S. suppliers with access to Panama's market and levels the playing field with competitors. This objective was achieved. The U.S.-Panama TPA also includes far-reaching bilateral provisions concerning sanitary and phytosanitary (SPS) measures and technical standards that will help to eliminate long-standing regulatory barriers faced by a variety of U.S. products in the Panamanian market.

For more information on agriculture exports and U.S.-Panama TPA, see the fact sheets prepared by the U.S. Department of Agriculture at <http://www.fas.usda.gov/itp/us-panama.asp>

Free Trade Works for Hawaii's Exporters

In the first four years of the U.S.-Chile FTA (2004–2007), Hawaii's exports to Chile have increased 158 percent. Hawaii has also seen significant export growth (1,790 percent) to Singapore since that FTA took effect in 2004 and in the last three years (2005–2007), Hawaii's exports to the CAFTA-DR region have increased 1,423 percent.

All state export data in this report are based on an unrevised Origin of Movement (OM) series. This series allocates exports to state based on transportation origin, i.e., the state from which goods began their journey to the port (or other point) of exit from the United States. The transportation origin of exports is not always the same as the location where the goods were produced. Thus conclusions about "export production" in a state should not be made solely on the basis of the OM state export figures.
