

**Approval & Certification Center  
Proximity Detection Systems**

The Proximity Protection System Evaluation program provides the applicant with a means of having their product evaluated by MSHA prior to its initial usage on a permissible machine. This will allow the machine applicant to specify an MSHA evaluation number and, therefore, not require a complete electrical investigation in conjunction with a machine approval application.

<b>Evaluation No.</b>	<b>Company</b>	<b>Date</b>	<b>Description</b>
18-PDA090001-0	Nautilus International Control & Eng. Ltd.	2/11/2009	Model MF4 Magnetic Field Antenna/ Array-TX
18-PDA090002-0	Matrix Design Group	03/03/09	M3-1000 Proximity Detection System
