The Honorable
David Dewhurst
Lieutenant Governor of Texas
PO Box 12068
Austin, TX 78711-2068

The Honorable
Tom Craddick
Speaker of the House of Representatives
PO Box 2910
Austin, TX 78768-2910

Dear Lt. Governor Dewhurst and Speaker Craddick:

Thank you for your support of programs related to Texas colonias. It is my pleasure to continue to champion the needs of persons living in colonias, including by working with state agency representatives to implement SB 827 (2005) by Zaffirini and Rep. Ryan Guillen. This important legislation relates to systems for identifying colonias and tracking the progress of state-funded projects that benefit colonias, then submitting a related report to the legislature.

SB 827's objective is to present a report card to the legislature, using a comprehensive classification system to demonstrate the state's progress in bringing water/wastewater, paved roads, and other assistance to colonias. Each year the state spends millions on programs that assist residents of colonias. We do not, however, have a system to determine whether the funds are reaching the highest priority communities. By classifying the colonias based on their respective levels of infrastructure and access to public health services, we can prioritize funding and target the colonias that have the most critical need.

Capitol Office: P.O. Box 12068 • Austin, Texas 78711 • 512/463-0121 • Fax 512/475-3738 • Dial 711 For Relay Calls

Printed on Recycled Paper

Letter to Lieutenant Governor Dewhurst and Speaker Craddick
November 9, 2006
Page Two

Due in great part to the excellent work of state agency representatives who spent countless hours classifying colonias and organizing the myriad of programs that serve colonias, I am confident that this report will help us make better decisions regarding programs that impact colonia residents. What's more, I hope that by improving colonias programs, we will create more opportunities for families in Texas to achieve their dreams.

Under the outstanding leadership of Yvette Sanchez, Director of Colonias Initiatives at the Office of the Secretary of State, and Jorge Vanegas, Director of the Center for Housing and Urban Development at Texas A&M University, this report reflects the assistance of numerous persons. Their cooperation is appreciated greatly.

Count on my continued leadership to help ensure that all colonia residents have quality roads, reliable water and wastewater infrastructure, and excellent public health services. I look forward to working with you and our colleagues on this and other issues during the forthcoming session.

Very truly yours,

Judith Zaffirini

JZ/lt

**Final Report in Response to Senate Bill 827 by
Senator Judith Zaffirini and Representative Ryan Guillen
79th Regular Session, Texas Legislature**

**Tracking the Progress of State-funded Projects
that Benefit Colonias**

Executive Summary

Background

Senate Bill 827 (SB 827), 79th Regular Legislative Session became effective September 1, 2005 after being signed into law on June 17, 2005. Authored by Senator Judith Zaffirini and sponsored by Representative Ryan Guillen, the bill requires a system for identifying colonias¹ and for tracking the progress of state funded projects that benefit colonias within 62 miles (100 kilometers) of the border with Mexico.

The legislation also requires a biennial report submitted to the Lieutenant Governor and the Speaker of the House by December 1 of each even numbered year. The report additionally requires the classification of colonias based on availability of services in order to identify the distressed areas with the highest health risks.

Under the leadership of the Office of the Secretary of State, state agencies met as a workgroup to implement the mandates of SB 827 and determine other information needed to track progress in colonias. The SOS Colonia Ombudspersons in the six largest Texas border counties with colonias also inventoried those colonias and entered the data collected into a database created by the US Geological Survey, which allowed for the classification of colonias.

Using this methodology, of the six most populous counties with colonias, there are 1786 colonias with a population of 359,825 residents; of these, 1092 with a population of 249,675 residents have complete or partial services and 442 colonias with 62,675 residents still lack services. For 312 colonias with a population of 47,475 residents, information on the status of services was not possible to obtain. This information is summarized in Table ES-1.

¹ The Office of the Secretary of State defines a “colonia” as a residential area along the Texas-Mexico border that lacks some of the basic living necessities, such as potable water and sewer systems, electricity, paved roads and safe and sanitary housing. Colonias, while frequently found in unincorporated areas of the counties, are also found within city limits. Upon receiving basic services, some colonias were annexed by an adjacent city and still others chose to incorporate in hopes of becoming eligible as applicants for federal and state funding, and assistance in the delivery of services to its residents.

Table ES-1		
Number of Colonias by Infrastructure Classification and Their Populations		
Basic Infrastructure Service	Total number of colonias	Estimated Population
Complete water and wastewater	636	145,408
Partial—water or sewer but not both	396	104,267
No water or sewer	442	62,675
Unknown	312	47,475

Conclusions and Recommendations

Much has been accomplished with the initial bond money of \$250 million passed by the citizens of the State of Texas in 1989 and 1991 for water and wastewater needs, coupled with the \$175 million approved for road paving in 2001. This substantial amount, in addition to other state and federal funds expended to improve the physical infrastructure in colonias, has significantly improved the living conditions for at least 145,408 colonia residents living in 636 colonias in the counties with the highest colonia population. Yet, clearly more work remains to complete existing projects and to reach other colonia residents who are still waiting for first time water and wastewater services, both along the border and statewide. The classification study, limited to the six counties with the largest number of colonias due to funding constraints, reveals that approximately 442 colonias, with a population of 62,675 colonia residents, are classified as areas with the highest health risk due to their lack of basic infrastructure including potable water, adequate sewage disposal and proper drainage, which exposes the population and surrounding communities to increased threats of infectious diseases and public health hazards.

Furthermore, with recent legislation (HB 467, 79th Regular Session) extending the definition of a colonia to an economically distressed area in any county, colonias can now possibly be found in any of Texas' 254 counties, large and small, rural and urban, with many or few residents, which only increases the number of Texans at risk who may need essential infrastructure services.

While the role of state government is not to solve every problem, in cases where unscrupulous developers have created conditions that affect the health of hundreds of thousands of residents and the environment, we recommend the following actions:

1. Strengthen enforcement of the Model Subdivision Rules to halt proliferation of additional colonias.
2. Develop a permanent colonias state fund.
3. Develop education and outreach programs to County Commissioners Courts and for colonia residents.
4. Continue to pursue federal funding for colonias.
5. Conduct a review of best practices in colonias funding among state and federal agencies.

6. Encourage university partnerships with state agencies and local counties to explore alternative technologies in providing much needed water, wastewater and housing needs.
7. Determine the number of homes required to define an area as a colonia.
8. Obtain funding to collect data on the remaining border and statewide colonias so these areas can also be classified, providing a more accurate account of the number of Texas communities that remain with the greatest infrastructure needs.
9. Increase mental health and substance abuse outreach services in colonias.
10. Develop a public education campaign on obesity in the colonias.

Acknowledgments

The Colonia Initiatives Program of the Office of the Texas Secretary of State would like to formally recognize Senator Judith Zaffirini for authoring, and Representative Ryan Guillen for sponsoring, Texas Senate Bill 827. This Program would also like to express its appreciation to Senator Zaffirini for her many years of vision, leadership, support, and unwavering commitment to helping improve the quality of life for Texas border colonia residents, and to Representative Guillen for his leadership and continuous efforts to assist colonia residents

In addition, this program would also like to formally recognize and express its appreciation to:

- Larkin Tackett, Legislative Director for Senator Judith Zaffirini, for his guidance and support of the SB827 Workgroup.
- The Ombudspersons from the Office of the Secretary of State for their hard work and the countless hours they spent researching and collecting data for the classification of colonias, and for the identification of colonias with the highest health risk.
- The participating agencies of the SB827 Workgroup and their representatives for their hard work and commitment to the successful implementation of SB827, as well as to improving the lives of colonia residents, including (in alphabetical order) the:
Department of State Health Services (DSHS)
Health and Human Services Commission (HHSC)
Office of the Attorney General (OAG)
Office of Rural Community Affairs (ORCA)
Texas Commission on Environmental Quality (TCEQ)
Texas Department of Housing and Community Affairs (TDHCA)
Texas Department of Transportation (TXDOT)
Texas Water Development Board (TWDB)
- Jean Parcher, U.S. Geological Survey (USGS) Geographic Research Specialist for the U.S. Mexico Border and Delbert Humberson, USGS Geographer, for developing the Colonia Health, Infrastructure, and Platting Status (CHIPS) relational database used by the Office of the Secretary of State Ombudsmen for the colonias classification reports. In addition, we would like to express our gratitude to Dr. Alven Lam, of the U.S. Housing and Urban Development, for initially providing funding for the USGS U.S.-Mexico Colonias project.
- Dr. Jorge Vanegas, Director of the Center for Housing and Urban Development (CHUD) of the College of Architecture at Texas A&M University (TAMU), and Oscar Muñoz, Deputy Director of the Colonias Program of CHUD/TAMU, for their leadership, assistance, support and always going above and beyond the call of duty. They volunteered to collect and compile the project data generated by the various agencies, developed and maintained timelines for the meetings of the SB 827 Working Group, and assisted writing the final report.

SECTION 1.0:
INTRODUCTION

This report examines the current state of funding for colonia infrastructure projects and the results of the state's investment to improve the living conditions in Texas border colonias.

1.1 The Challenge: Colonias – An Overview²

The term "colonia," in Spanish means a community or neighborhood. The Office of the Secretary of State defines a "colonia" as a residential area along the Texas-Mexico border that may lack some of the most basic living necessities, such as potable water and sewer systems, electricity, paved roads, and safe and sanitary housing.

However, various state and federal agency definitions will vary due to funding requirements. The differences among its applied definitions are attributed to the varying emphases placed on its specific characteristics by government agencies and codes. Consequently, the characteristics that define a colonia differ according to the type of agency, government code or issue being addressed at any given time. The challenge of providing services to colonia residents is one of the most complex human health and environmental challenges facing Texas today. It requires working with multiple levels of government and overcoming hurdles such as providing water service to colonia residents whose homes are in floodplains. In addition, federal funding for colonia projects is finite, eroding, and having to compete with other national interests.

Colonias can be found in Texas, New Mexico, Arizona and California, but Texas has both the largest number of colonias and the largest colonia population. About 400,000 Texans live in border colonias. Overall, the colonia population is predominately Hispanic; 64.4 percent of all colonia residents and 85 percent of those residents under 18 were born in the United States. According to the *"2003 Texas Water Development Board's Assessment of Water and Wastewater Needs for EDAP Counties,"* there are more than 2,333 Texas colonias, located primarily along the state's 1,254-mile border with Mexico.

1.1.1 History

The development of Texas colonias dates back to at least the 1950s, when developers created unincorporated subdivisions using agriculturally worthless land or land that lay in floodplains or in other rural properties. They divided the land into small lots, put in little or no infrastructure, and then sold them to low-income individuals seeking affordable housing. Colonia residents generally have very low incomes. Per capita annual income for all Texas counties bordering Mexico-where most of the colonias are located-tends to be much lower than the state average of \$30,732 (2004). In border counties such as Starr, Maverick and Hidalgo, per capita annual incomes in 2004 were \$11,362, \$13,586 and \$15,460, respectively.³

A limited supply of adequate, affordable housing in cities and rural areas along the Texas-Mexico border, coupled with the rising need for such housing has contributed to the development of new colonias and the expansion of existing ones. People with low-incomes often buy the lots through a contract for deed, a property financing method whereby developers typically offer a low down payment and low monthly payments but no title to the property until the final payment

² Material in this section is extracted from the official Web Site of the Office of the Texas Secretary of State: <http://www.sos.state.tx.us/border/colonias/faqs.shtml>, accessed 10/19/06

³ Income figures from the Bureau of Economic Analysis, <http://bea.gov/bea/regional/reis/scb.cfm>, accessed 11/10/2006.

is made. Houses in colonias are often constructed in phases by their owners and may lack electricity, plumbing, and other basic amenities. Colonia residents build homes as they can afford materials.

The growth of colonias has often challenged residents, as well as county, state and federal governments and others, to seek ways to provide basic water and sewer services and to improve the quality of life in the colonias. Local public funds and other resources are often limited and unable to provide service to the current and growing colonia population. Hidalgo County, which has the highest number of colonias, and the largest number of colonia residents in Texas, is typical of many border counties. For basic health and human services, environmental services and capital improvements, colonia residents must rely on an often-confusing combination of local, state and federal programs, many of which come and go, depending on the political and economic climate.

1.1.2 Issues and Challenges Facing Colonias

Access to Water and Sewer Service

Because of the potentially serious consequences for public health and its effect on quality of life, one of the greatest concerns regarding the colonias is the lack of wastewater infrastructure and potable water.

Many colonias do not have sewer systems. Instead, residents must rely on alternative, often inadequate wastewater disposal methods. Wastewater disposal systems, which in some circumstances may provide adequate wastewater disposal, often pose a variety of problems: they are too small, improperly installed and can overflow, or on inadequately sized lots. The problem is exacerbated by the poor quality of colonia roads, which are frequently unpaved and covered with caliche or their materials that prevent thorough drainage. During heavy rains, water collects because of inadequate drainage systems, elevation and topography. These conditions, combined with inadequate wastewater disposal systems, often result in sewage pooling on the ground.

Even if the colonias had adequate sewer systems, the border area lacks sufficient facilities to treat wastewater. In many places, there are no treatment facilities at all. Consequently, border communities often discharge untreated or inadequately treated wastewater into canals and arroyos (a creek or stream), which then flow into Rio Grande River or the Gulf of Mexico.

Securing potable water also presents a challenge to colonia residents. Many must buy water by the bucket or drum to meet their daily needs or use wells that may be contaminated.

Colonia residents can find themselves in a catch-22 situation. Even when water lines and sewer systems are in place, many cannot access the services because their homes do not meet building codes. Many homes, built without regard for indoor bathrooms or plumbing, are treated as substandard or dilapidated by housing inspectors. These homes cannot pass inspection to qualify for hook up to water lines, and residents cannot afford the repairs or improvements necessary to bring them up to code.

Housing

Many residents construct housing in the colonias little by little, using available materials. Professional builders are used infrequently. Residents often start with tents or makeshift

structures of wood, cardboard or other materials and, as their financial situation allows, continue to improve their homes. Housing in older colonias tends to be better developed because residents have had more time to make improvements.

Health

Disparities in health status exist between the State of Texas and the Texas-Mexico border region (including both the non-colonia and colonia border areas). Those health disparities include lack of access to health care services, a shortage of health care providers, and increased rates of certain infectious diseases, such as tuberculosis. Health issues and challenges for colonia residents are exacerbated by other factors, including weak environmental infrastructure, dilapidated homes, a lack of potable water and sewer and drainage systems, fear of losing wages for time spent away from work, and lack of awareness of available health care programs. For these reasons, colonia residents' health care problems may go unreported and untreated. For children, these barriers can be serious and may result in slow growth and lower educational development rates.

Unemployment

The unemployment rate in some colonias is more than eight times the state rate. A 1993 Texas A&M study discovered that unemployment in five Lower Rio Grande Valley colonias ranged from 20 percent to 60 percent, compared with the overall Texas unemployment rate of 7 percent. In addition, many colonia residents often cannot find year-round work due to the seasonal nature of their primary occupations. Fieldwork represents 29.5 percent of their jobs, construction work, 24.4 percent, and factory work, 14.9 percent.

Contract for Deed

Since the 1950s, the contract for deed has been the most frequently used financing mechanism in the colonias because many individuals have neither a credit history nor the resources to qualify for traditional bank or credit union financing. A contract for deed is a financing arrangement, often at high interest rates, whereby land ownership often remains with the seller until the total purchase price is paid.

Traditionally, contracts for deed, unlike deeds of trust, were not recorded with the county clerk, making it easy for the developer to reclaim the property, as well as making it difficult to enforce any commitment of the developers' part to provide infrastructure. If the buyer fell behind in payments, the developer could repossess the property, often within 45 days, without going through the traditional foreclosure process. Developers also could claim any improvements made on the property.

Steps are being taken to remedy some of the inequities inherent in contracts for deed. In 1995, the Texas Legislature passed the Colonias Fair Land Sales Act to protect those who must rely on contracts for deed to finance property. The legislation requires developers to record the contract and counties to keep a record of contracts for deed. It also requires developers to provide a statement of available services, such as water, wastewater and electricity, and whether the property is located in a floodplain. Developers must provide property buyers with an annual statement-including amount paid, amount owed, the number of payments remaining and the amount paid to taxing authorities on the purchaser's behalf.

Although the legislation sets a minimum standard for contract for deed land sales, other problems with this method of financing remain.

Contracts for deed make it difficult for homeowners to secure financing to build a house or make home improvement. Because title to the land often does not transfer to the buyer until it is fully paid for, an applicant cannot use the property as collateral when applying for a loan. Therefore, financial institutions are reluctant to lend money to improve the property.

1.2 The Response: Colonia Initiatives Program of the Office of the Secretary of State

1.2.1 Program Mission

"One of government's chief responsibilities is to help Texans with the greatest needs. The Secretary of State's Ombudsman Program is a central part of our initiatives to assist needy Texans living in colonias. The program is helping to provide better roads, bring water and wastewater infrastructure to areas that lack these basic services, and improve the quality of life for some of Texas' neediest citizens." - Governor Rick Perry

1.2.2 Program's Role in Colonias

During the 76th Texas Legislative session in 1999, legislators passed and Governor George W. Bush signed SB 1421 to advance efforts to get colonia residents' homes connected to water and wastewater services more expediently.

As a major part of this new legislation, the Office of the Secretary of State hired a Director of Colonia Initiatives to work in Austin, and supervise six Colonia Ombudsmen to work in border counties with the highest colonia populations: Hidalgo, El Paso, Starr, Webb, Cameron and Maverick counties.

The ombudspersons serve as advocates among border colonia residents, federal and state agencies, local governments, non-profit organizations and utility companies to ensure residents are connected to water and wastewater services in the most efficient and timely manner possible.

When a local governmental entity or Water Supply Corporation applies for funding of a water/wastewater project to provide services to colonia residents they will often request the technical assistance of the Colonia Ombudspersons. The ombudspersons assist with different tasks required of the funding agency. Specific tasks involve coordinating meetings with project engineers, managers, water supply corporations and/or colonia residents to monitor the status of projects; delivering and interpreting surveys, collecting household information, and collection and review of required documents. They also assist the federal and state agencies when specific information is requested from the local level.

The ombudspersons also serve as conduits for information, often conducting community outreach by coordinating and facilitating community meetings with colonia residents to discuss impact of new water/wastewater systems in their area and the changes it will bring. In addition, they monitor the progress throughout the different phases of the projects to ensure there is momentum and follow through. The ombudspersons also provide monitoring and oversight to the projects; they verify the number of projected beneficiaries and ensure that the reported

number becomes the actual number of beneficiaries. In addition, they work to ensure that each project will provide water and wastewater services to the maximum number of residents allowed, thereby maximizing state dollars.

As the State's lead in coordinating colonia initiatives, the Colonia Initiatives Program of the Office of the Secretary of State works to connect and coordinate activities to broaden and enhance the quality and quantity of services to colonia residents along the border that contribute to a better quality of life.

Besides physical infrastructure projects, the ombudspersons assist with other collaborative initiatives that provide much needed services to colonia residents. One such initiative is Operation Lone Star, a medical training exercise that provides colonia residents with medical and dental services free of charge. This is a collaborative project involving the local counties, Texas Department of State Health Services, Texas National Guard, Marine and Naval Reserves and the Secretary of State.

A third initiative is the State of Texas Interagency Coordination Meeting. This consortium of 13 federal and state funding and regulatory agencies meets to discuss project timelines and issues on a quarterly basis, serving as a significant venue to improve the coordination of information and planning for the state's efforts in the strengthening of physical infrastructure in colonias along the Texas-Mexico border.

The group's objectives are the following:

- Collaborate and coordinate specific infrastructure project information and data;
- Identify project barriers that allow for immediate collective problem solving;
- Expedite the delivery of basic services to colonia residents; and
- Provide agency's update on progress in colonia initiatives and projects.

This program is a major part of the Secretary of State's efforts to improve the quality of life for colonia residents along the border.

1.3 Texas Senate Bill 827 (79th Regular Legislative Session)

Texas Senate Bill 827, authored and filed in the 79th Regular Legislative Session by Senator Judith Zaffirini and sponsored by Representative Ryan Guillen, requires the establishment of a system for tracking the progress of state-funded projects that benefit colonias and the submission of a related report to the legislature. Its objective is to present a report card to the legislature using a comprehensive classification system, to demonstrate the state's progress in bringing water/wastewater, paved roads, and other assistance to colonias. By identifying the colonias with the greatest need, the state can prioritize its funding and target the colonias, which have the most critical need, especially since more colonias continue to have unmet needs. For example, the Texas Water Development Board's "*2003 Assessment of Water and Wastewater Needs for Economically Distressed Area Program Counties*" reports that there were 2,333 economically distressed areas with water supply or wastewater supply needs, or both.

SB 827 defines "colonia" as a geographic area that: (1) is an economically distressed area as defined by Section 17.921, Water Code; and (2) is located in a county any part of which is within 62 miles of an international border. The Bill mandates that the Secretary of State (SOS)

establish and maintain a classification system that allows the SOS to track the progress of state-funded projects in providing water or wastewater services, paved roads, and other assistance to colonias. To achieve this objective, the SOS is responsible for compiling information from the *Office of Rural Community Affairs (ORCA)*, the *Texas Water Development Board (TWDB)*, the *Texas Transportation Commission (TXDOT)*, the *Texas Department of Housing and Community Affairs (TDHCA)*, the *Department of State Health Services (DSHS)*, and any other agency considered appropriate by the SOS for purposes of the classification system. In addition, the SOS shall compile information on colonias that is received from the colonia ombudsmen under Section 775.004.

The Bill also requires that the SOS submit a report to the presiding officer of each house of the legislature, no later than December 1 of each even-numbered year, which presents the results of three main tasks mandated to the Office of the SOS:

- Establish and maintain a statewide system for identifying colonias;
- Establish and maintain a statewide system for classifying colonias with the highest health risk to colonia residents, based on factors identified by the SOS; and
- Prepare a report on the progress of state-funded projects in providing water or wastewater services, paved roads, and other assistance to colonias.

The Bill allowed the SOS to contract with a third party to develop the classification system, the identification system, or to compile or maintain the relevant information required by this section. However, as a result of a lack of funding to engage an external contractor, personnel from the Colonia Initiatives Program of the SOS executed these tasks with the assistance from personnel from various state agencies, through the SB 827 Working group created to specifically implement the Bill's mandates.

1.4 A Reader's Guide

The report that follows is organized in the following sections:

- Section 2.0 contains the description of the process followed, and of the results obtained, in the development of a statewide system for identifying colonias.
- Section 3.0 contains the description of the process followed, and of the results obtained, in the development of a statewide system for classifying colonias with the highest health risk to colonia residents, based on factors identified by the SOS.
- Section 4.0 contains the summary of progress of state-funded projects in providing water or wastewater services, paved roads, and other assistance to colonias, by agency, including:

Specific agencies listed in the Bill (DSHS, ORCA, TDHCA, TxDOT, TWDB); as well as,

The *Health and Human Services Commission (HHSC)*, the Office of the Attorney General (OAG), Texas Commission on Environmental Quality (TCEQ) and the *U.S. Geological Survey (USGS)*, which were identified by the SOS as appropriate to be included in this report.

- Section 5.0 contains a set of conclusions and lessons learned in the development of this first report, and specific recommendations for the improvement of the process, and the development of specific mechanisms, for enhancing the value of future reports.
- Finally, the report includes appendices with complementary and supplementary information.

SECTION 2.0:
STATEWIDE COLONIA IDENTIFICATION SYSTEM

2.1 Process Followed

The identification system adopted by the SB 827 Work Group was devised and implemented by the *Texas Water Development Board (TWDB)* and the *Office of the Attorney General (OAG)*. The TWDB created a numbering system for its initial 1992 Colonia Needs Assessment. An identification number consists of seven digits: a three-digit state county code (001 thru 254), followed by a four-digit number. The system was continued and modified during TWDB needs assessment updates in 1995 and 1996. During these updates there was a substantial flux in the colonia list whereby many colonias either added or deleted, depending on whether they met *Economically Distressed Areas Program (EDAP)* eligibility at the time or not. For additions, the first digit of the four-digit number was assigned an A (1995) or a B (1996).

When TWDB contracted for the 2003 Needs Assessment, in consultation with OAG and contractor Turner, Collie and Braden, it was decided the study would catalog and track colonias as identified by other agencies. In some cases, existing colonia areas were broken up for formal subdivision boundaries. It thus became desirable to renumber all colonias in a uniform manner.

The new identification numbers would follow the same basic pattern: the three-digit county code followed by a unique four digit number, with colonias generally being assigned a number in alphabetical order within each county. To make the new ID number distinct from previous numbering systems, an alpha character “M” was prefixed to each number.

In FY 2006, the SB 827 Workgroup, a consortium of all state agencies involved in colonia project funding, as well as the OAG and *Texas Commission of Environmental Quality (TCEQ)*, agreed to adopt this latest version of the identification system as a statewide standard for the uniform recognition of colonias.

With the 32 counties designated in SB 827, 2,019 colonias have been identified to date (1,850 colonias have been mapped) and assigned a number. Nearly half of these are in Hidalgo County. The six primary colonia counties, Cameron, El Paso, Hidalgo, Maverick, Starr and Webb comprise 90% of the border counties.

STATEWIDE COLONIA CLASSIFICATION SYSTEM

3.1 Process Followed

The following state agencies participated in establishing the criteria for the classification of colonias: Department of State Health Services, Health and Human Services Commission, Office of the Attorney General, Office of Rural Community Affairs, Texas Commission on Environmental Quality, Texas Department of Housing and Community Affairs, Texas Department of Transportation, Texas Water Development Board and the Office of the Secretary of State. This consortium of state agencies that work to address colonia issues, identified as the SB 827 Work group, met on several occasions and established the following criteria to be used in classifying the current state of colonias, based on a color coding system of red, yellow, or green.

Colonias that lacked platting, water and or wastewater were identified as distressed areas with the highest health risk. These colonias were coded as **red**.

Colonias with existing water services, either through functional water wells or through connections to a water system, or had wastewater disposal availability through functional septic tanks or connections to an existing system but lacked adequate road paving, drainage or solid waste disposal system were in the intermediate category of health risk. These areas were coded **yellow**.

Finally, colonias with all of the services identified above--water, wastewater, road paving, drainage systems and solid waste disposal--were coded as **green**. These had the lowest health risk.

The ombudspersons used a criteria checklist to classify all the colonias in their assigned county—the six counties with the highest colonia populations. Section 3.3 contains this checklist. While the ombudspersons worked to ensure that the most current data on colonias was being used, it should be noted that in some cases data was unavailable and/or conflicting with other agency or county data.

3.2 Concerns/Issues with Data

Several challenges presented themselves during the collection of data of which included:

1. In some instances the ombudspersons were unable to verify platted and/or recorded subdivision where no records or conflicting information was available. There were some cases where the colonia was part of a larger platted colonia and that portion was never replatted or recorded.
2. The classification system fails to recognize that some of the colonias may be unable to connect to a centralized water and/or sewer system due to cost associated with these services.
3. In determining road paving for a colonia, the question as to whether roads in colonias are passable is subject to the ombudsperson's individual interpretation. The county definition of passable, in some instances, does not fit what the rest of the community (i.e. the colonia residents, school districts, emergency medical services) way view as passable.
4. Another challenge encountered by the ombudspersons was the fact they often were unable to obtain verification on the how some colonias were identified as colonias, with some containing only 2-10 homes with minimal population (i.e. 2, 4, 8, residents).

3.3 Colonia Classification Criteria Used

The following checklist was used by the colonias ombudspersons in determining how to classify colonias according to the color-coded system described in 3.1.

Identification		
County _____		
Colonia ID # _____		
Colonia Name (s) _____		
Est. Colonia Population _____		
Infrastructure		
<i>Platting</i>		
*If not in the TWDB/OAG Database, has the colonia been platted? (Y/N/Unknown)		
If yes, has the plat been recorded? (Y/N/Unknown)		
If yes, please provide the date it was recorded. _____		
If no, does a map exist? (Y/N/Unknown)		
If no, when was the community first established? _____		
<i>Water</i>		
*How is potable water provided in this colonia?		
_____ Public water distribution system (Y/N/Partial)		
_____ Private wells? (Y/N/Partial)		
_____ Hauled in? (Y/N/Partial)		
*Do all lots have a potable water supply? (Y/N)		
<i>Wastewater</i>		
*Is a wastewater collection system available in the colonia? (Y/N/Partial)		
*Are there lots not served by adequate wastewater disposal? (Y/N/Partial)		
<i>Solid Waste Disposal</i>		
*Is a trash collection system available in the colonia? (Y/N/Partial)		
<i>Drainage</i>		
*Does the colonia flood during rainfall? (Y/N/Partial)		
*Is any part of the colonia in a flood plain? (Y/N/Partial)		
<i>Roads</i>		
*Are the streets and roads passable in all weather conditions? (Y/N/)		
*Are access roads from the colonia to public roads paved? (Y/N/Partial)		
Access to, and Information about, Health		
*Is it a health professional shortage area? (Y/N)		
*Is there access to a Texas A&M Community Resource Center, a clinic, mobile clinic or transportation to a clinic available? (Y/N)		
*Are promotoras or a comparable outreach program available in the area? (Y/N/Partial)		
Financial Availability		
*List the federal and/or state agencies, non-profit organizations and other entities that are currently servicing the colonia and the type of project/service they are/will be providing.		
Name of Agency	Type of Project	Service to be/being provided
1. _____	_____	_____
2. _____	_____	_____
3. _____	_____	_____
4. _____	_____	_____
5. _____	_____	_____
6. _____	_____	_____
7. _____	_____	_____

3.4 Results Obtained

The following Tables present the information on the number of colonias and colonia residents and the status of the infrastructure available in those colonias.

Classification Levels for the Colonias within the Six Selected Counties:
(Version allowing for Septic Tanks)

Table 3.1 Total Number of Colonias and Their Population	
Total Number of Colonias	Total Estimated Population of the Colonias
1786	359,825

Key to Tables 3.2, 3.4 and 3.5

Green: colonias with water, wastewater, paved roads, drainage systems and solid waste disposal. These had the lowest health risk.

Yellow: colonias with existing water services, either through functional water wells or through connections to a water system, or which had wastewater disposal availability through functional septic tanks or connections to an existing system but lacked adequate road paving, drainage or solid waste disposal system. These had intermediate health risks.

Red: colonias that lacked platting, water and or wastewater and identified as distressed areas with the highest health risk.

SECTION 4.0:
AGENCY REPORTS TO THE SECRETARY OF STATE

4.1 Office of Rural Community Affairs (ORCA) **[Sec. 2306.083]**

4.1.1 Agency Mission

"To assist rural Texans who seek to enhance their quality of life by facilitating, with integrity, the use of the resources of our state so that sustained economic growth will enrich the rural Texas experience for the benefit of all."

4.1.2 Agency's Role in Colonias

ORCA's primary goal in funding colonias is the elimination of existing conditions that adversely impact public health and safety in communities containing residents who primarily have low to moderate incomes. In colonias, ORCA's Community Development Block Grant (CDBG) Program primarily funds water and wastewater projects, street paving, and drainage improvements.

Since January 2002 (when ORCA began operations), the agency has awarded 481 grants (totaling \$159,991,146) to 176 communities and counties (benefitting colonias within those communities and counties) along the Texas-Mexico Border to assist those communities, counties, and colonias in addressing community and economic development needs. As a result, 991,213 rural Texans along the Texas-Mexico border have benefited from ORCA's assistance. Of those rural Texans along the Texas-Mexico border, 602,927 are persons of low to moderate income.

ORCA funds colonias in counties located within 150 miles of the international border through the Colonia Fund and colonias beyond 150 miles of the international border through the Non-border Colonia Fund. Rural cities and counties throughout the state may also apply for funding on behalf of colonias through the Community Development (CD)/CD Supplemental Fund. In addition, ORCA provides funding for the operation of seven Colonia Self-Help Centers, which are administered by the Office of Colonia Initiatives (OCI) of the Texas Department of Housing and Community Affairs (TDHCA). Services offered by the Colonia Self-Help Centers include tool libraries, housing rehabilitation, and contract for deed conversion.

4.1.3 Analysis of Agency's Colonias Data

The colonia data presented in this report was gathered from ORCA's database, which contains information on all projects that have been funded through the CDBG Program since 1983. The construction funding associated with the type of infrastructure improvement has been identified for each project from ORCA's database. The total project cost includes construction components plus engineering and contract administration costs.

The U.S. Department of Housing and Urban Development requires ORCA's CDBG program to prepare an annual Performance Evaluation Report (PER), which contains extensive project fiscal and beneficiary information that is derived from ORCA's database. It is important to note that when the CDBG Program began funding colonia improvements, state colonia reporting requirements were not defined, and so aggregate project information was not broken out to identify improvements made on a per colonia basis—each project can provide benefit to one or

more colonias. Over the years, the agency methodology used to describe and fund colonias has evolved to gather more information.

In implementing Senate Bill (SB) 827, ORCA has begun gathering additional information about colonia improvements funded through new contracts. Beginning with grants funded in 2005, applicants are asked to identify the specific colonias included in the application and are requested to break out costs for improvements by colonia. ORCA is utilizing hand held GPS units so that the specific location and boundaries of colonias can be identified. In addition to collecting more detailed information, database improvements have increased ORCA's ability to track colonia information in more recent contracts.

4.1.4 Methodology/Variations

ORCA's database was enhanced in 1999 and has allowed the agency to enter more detailed information related to projects, including the information now required by SB 827. The previous database lacked the ability to track the amount of information that is currently collected and, as a result, detailed information collected for older contracts is not available electronically. For this reason, the information reported on projects funded prior to 1999 does not include the related informational breakouts that are available for more recent projects.

ORCA did attempt to gather further information on these older projects, even though the SB 827 interagency workgroup determined that research on projects funded prior to the enactment of the bill was not economically feasible.

Whenever possible, ORCA has identified specific colonias by name and by Colonia Identification Number in this report, using a list of recognized colonias and their associated Colonia Identification Numbers provided by the Office of the Attorney General (OAG). However, ORCA's database information on older projects does not often reference colonias by name, as this was not a state or federal reporting requirement at the time these projects were funded. Each project file contains a defined project area, but the project area may not identify a colonia's name and may not be correlated with a recognized colonia. ORCA has attempted to correlate the named colonias in older colonia projects to the Colonia Identification Numbers in the OAG's database whenever possible, and this process did result in a number of matches. Colonias that could not be matched with relative confidence were reported without Colonia Identification Numbers. SB 827 requires all state funded projects to identify each colonia by its Colonia Identification Number, when such a number exists.

Legislative districts for each colonia project were identified according to a list provided by the OAG. This list of colonias and their respective legislative districts were used to verify state senate and house districts for the colonias found in the OAG's database. Many projects address multiple colonias throughout a county, resulting in multiple senate or house districts, which were not listed due to the structure of the report. In addition, a number of colonias funded by ORCA are not listed in the OAG's database and were not matched to a senate or house district. Where this occurs, the legislative districts have not been identified.

4.2 Texas Water Development Board (TWDB) **[Sec. 487.060]**

4.2.1 Agency Mission

The TWDB is the state's water planning and water project financing agency. The TWDB's main responsibilities are threefold: collecting and disseminating water-related data; assisting with regional water planning, and preparing the State Water Plan for the development of the state's water resources; and administering cost effective financial assistance programs for the construction of water supply, wastewater treatment, flood control and agricultural water conservation projects.

4.2.2 Agency's Role in Colonias

Since 1989, the TWDB has implemented the Economically Distressed Areas Program (EDAP) as authorized in Chapters 16 and 17 (Subchapter K), Water Code, to improve water and wastewater services to economically distressed areas of Texas, including colonia neighborhoods in counties adjoining the Texas-Mexico border. The program provides financial assistance in the form of grants, loans or a combination grant/loan to provide water and wastewater services where the facilities are inadequate to meet the minimal needs of residents. The EDAP includes measures to prevent future substandard development.

The program has through its history involved collaborative funding with federal agencies, such as the Environmental Protection Agency, the North American Development Bank, the Border Environmental Cooperation Commission, and the United States Department of Agriculture-Rural Development, state agencies such as the Office of Rural Community Affairs, local governments like counties, cities, and water and wastewater utilities; and other groups like the Rensselaerville Institute and Community Resources Group.

The EDAP provides funding for planning, design, construction, acquisition or improvements of water supply and wastewater collection and treatment projects. Political subdivisions, including cities, counties, water districts and nonprofit water supply corporations, are eligible to apply for EDAP funds.

Other TWDB programs that compliment the EDAP are the Colonia Wastewater Treatment Assistance Program that provides federal matching funds to the EDAP; the Colonia Plumbing Loan Program, a low-interest loan program available to assist colonia residents in specified border counties with financing plumbing connections and with installation of necessary plumbing improvements within their homes, and the Colonia and Community Self-Help Programs where the local residents provide volunteer labor (sweat equity) to construct the facilities, and/or donate equipment, materials, and supplies.

Through September 30, 2006, the TWDB has committed more than \$4.1 million in planning grants and over \$500 million in construction commitments through the EDAP and its related programs to 92 projects to start or upgrade water and wastewater services in 780 colonias in 22 Texas counties.

4.2.3 Analysis of Agency's Colonias Data

The TWDB has an ongoing interest in identifying areas that may be eligible for and need financial assistance, in identifying the extent of needed assistance, and in tracking the impacts and extent of projects funded through the EDAP and other programs.

In 1992 the TWDB undertook its first comprehensive assessment of the water and wastewater infrastructure needs of colonias in Texas. This study included 37 counties: all counties within 100 kilometers of the Texas-Mexico border, and other counties that met the eligibility criteria for the EDAP. TWDB staff utilizing site visits, data from and interviews with county and local officials to identify 1,193 colonia areas with an estimated population of 279,863. Despite challenges and shortcomings the 1992 study provided state and federal policy makers with data about colonias, and a means with which to quantify the scope of perceived problems and the extent of programs, such as the EDAP, in attempting to solve them.

To update colonias data, the TWDB contacted county and local officials in 23 border area counties in 1995 and 33 counties (31 then-eligible, and two that were no longer eligible but that had ongoing construction projects) in 1996. The 1996 update identified 1,495 economically distressed areas with an estimated population of 392,188 in the 33 counties. Construction funding from EDAP and other sources in the 33 counties was estimated at \$336.3 million serving 384 colonias with an estimated population of 165,236.

In 2003 the TWDB contracted to perform a re-assessment of the water and wastewater infrastructure needs of EDAP-eligible counties by contacting officials and representatives of 42 EDAP-eligible counties. Sources of information included all of the planning and countywide studies funded by the TWDB, county comprehensive studies funded through the Office of Rural Community Affairs, and the Office of the Attorney General's (OAG) Border Colonia Geographic Database, which were integrated in the TWDB databases ("1996" data, as updated). Geographic processes developed for the OAG database were a significant improvement in defining economically distressed areas more precisely. The 2003 study identified 2,333 economically distressed areas with an estimated population of 484,912. Of these, 1,409 economically distressed areas with a population of 212,701 were estimated to have water supply or wastewater needs, or both.

The TWDB maintains several databases relating to financial assistance programs and community infrastructure needs.

4.2.4 Methodology/Variations

Type of Initiative/Investment

- Funding amounts are commitments from the following programs:
 - The Economically Distressed Areas Program (EDAP)
 - The Colonia Wastewater Treatment Assistance Program (CWTAP)
 - The Colonia Self Help Program (CSHP)
 - The Colonia Plumbing Loan Program (CPLP)
 - The Colonia Areas Management and Support Program (CAMSP)

- Funding amounts are divided among water infrastructure, wastewater infrastructure, and “other”. Other amounts include feasibility studies, facilities planning, structural design, management support, plumbing fixtures and household connections, and in some cases water and wastewater utility infrastructure amounts that are not differentiated within TWDB data.
- TWDB has tried to identify other sources in the “Other types of data” column on the far right hand side of the template.

Basic Project Information

- The project number and description are the project number and project title columns in the TWDB database.
- The project sponsor is the legal authority (i.e. city, district, county) receiving financial assistance for the project.
- The colonia name or “M” number is represented simply as M in the template. Many projects have many impacted colonias some that result in character strings so long they cannot easily be displayed in the template. They appear at the end of each row rather than the middle.
- The number of people served is the sum of the population of the colonias estimated to be impacted by the project. This does not necessarily mean that the project provides first time, or retail utility service. Note also that many colonias are impacted by more than one project; hence the column cannot be meaningfully summed. Note that colonias and population figures include only colonias identified in the TWDB 2003 Needs Assessment. (This has generally been adapted by the SB 827 Workgroup as the starting point for a shared resource for SB 827 reporting.)

Basic Project Attributes

- The project cost is the sum of the items under Type of Initiative/Investment. Note that this method of presenting data excludes funding from other TWDB administered programs, such as the State Revolving Fund Programs.
- The project approval date is the date of the first financial commitment for construction for projects involving water or wastewater infrastructure construction. For projects that do not involve construction it is the date of the first financial commitment.

4.3 Department of State Health Services (DSHS) [Sec. 1001.033]

4.3.1 Agency Mission

The Department of State Health Services promotes optimal health for individuals and communities while providing effective health, mental health and substance abuse services to Texans.

DSHS is responsible for assuring the provision of the following essential public health functions:

- Monitor the health status of individuals in the community to identify community health problems.
- Diagnose and investigate community health problems and community health hazards.
- Inform, educate, and empower the community with respect to health issues.
- Mobilize community partnerships in identifying and solving community health problems.
- Develop policies and plans that support individual and community efforts to improve health
- Enforce laws and rules that protect the public health and ensure safety in accordance with those laws and rules.
- Link individuals who have a need for community and personal health services to appropriate community and private providers.
- Ensure a competent workforce for the provision of essential public health services.
- Research new insights and innovative solutions to community health problems.
- Evaluate the effectiveness, accessibility, and quality of personal and population-based health services in a community.

4.3.2 Agency's Role in Colonias

The activities of the DSHS Office of Border Health (OBH) are reflected in the essential public health functions listed above. OBH was created in 1993 to enhance agency efforts to promote and protect the health of border residents by reducing community and environmental health hazards along the Texas-Mexico border, in collaboration with communities and U.S. and Mexican local, state and federal entities. OBH has field staff in seven border communities (Eagle Pass, El Paso, Harlingen, Laredo, McAllen, Presidio and Uvalde) to facilitate a coordinated response to public health concerns along the border. Staff includes experts in sanitation, environmental health, toxicology, epidemiology, food safety, and policy analysis and development.

4.3.3 Analysis of Agency's Colonias Data

OBH projects focused specifically on colonias include partnership in the Small Town Environmental Program, an interagency effort headed by the Office of Rural Community Affairs

(ORCA). The project assists small communities and colonias in meeting their water and wastewater needs by using the community's own resources (human, material and financial). Through a contract with The Rensselaerville Institute (TRI), OBH provides technical assistance to community members on how to manage their own projects. Data on the projects with which OBH has been involved are included in Appendix 5. Funding for the technical assistance contracts was provided to DSHS by the Centers for Disease Control & Prevention (CDC) and a private foundation.

Other colonia-related OBH projects include environmental health assessments under the Economically Distressed Areas Program (EDAP); general environmental health surveys unrelated to EDAP; *Healthy Border 2010* initiatives (a subset of the CDC's *Healthy People 2010* goals), Operation Lone Star, which, in collaboration with military personnel, delivers direct medical and dental services to children and adults in Cameron, Hidalgo and Starr counties; mosquito abatement in Webb County; and home environmental assessments in Webb County in coordination with the Texas A&M Colonias Promotora program. Since 1994, an estimated \$8.4 million from state, federal and private sources has been directed specifically to Texas colonias through the efforts of DSHS

4.3.4 Methodology/Variations

Historically, neither OBH nor DSHS as a whole has had a centralized data collection tool related to colonias. DSHS as a partner agency with the Health & Human Services Commission (HHSC) is in the process of evaluating the current method of data collection. (See *Methodology/Variations* 4.7.4 in the HHSC section of this report).

For the purpose of this report, DSHS OBH extracted colonias-specific activities from historical records and previous colonias reports; in an effort to present the data consistently with that of other agencies, OBH organized the data by county. This data is reported in Appendix 6, along with data from other agencies in the unified data collection template.

Many DSHS colonia projects impact multiple colonias in a particular area of a border county. When an event or activity is held in a particular colonia it is open to anyone, thereby potentially serving persons who are residents of other colonias, cities, nearby counties, etc. People served are not asked where they live. Therefore, the number of people served cannot be connected to number of colonias residents served or which specific colonias were served.

4.4 Texas Department of Transportation (TxDOT) [Sec. 201.116]

4.4.1 Agency Mission

TxDOT's mission is work cooperatively to provide safe, effective and efficient movement of people and goods.

Vision: To be a progressive state transportation agency recognized and respected by the citizens of Texas:

- providing comfortable, safe, durable, cost-effective, environmentally sensitive and aesthetically appealing transportation systems that work together,
- ensuring a desirable workplace which creates a diverse team of all kinds of people and professions,
- using efficient and cost-effective work methods that encourage innovation and creativity, and
- promoting a higher quality of life through partnerships with the citizens of Texas and all branches of government by being receptive, responsible and cooperative.

4.4.2 Agency's Role in Colonias

Senate Bill 1296, 77th Legislature, 2001, requires the Texas Public Finance Authority, in accordance with requests from the Office of the Governor, to issue general obligation bonds and notes in an aggregate amount not to exceed \$175 million, and as directed by the department, distribute the proceeds to counties to provide financial assistance for colonia access roadway projects to serve border colonias.

The department worked with the Office of the Governor, the Secretary of State, the Texas Water Development Board, and the Texas A&M University Center for Housing and Urban Development in developing the rules and procedures for the border colonia access program.

In December, 2001, the commission adopted rules for the program that defined eligibility requirements, project selection criteria, funding allocation, and administrative procedures.

The department, through the border district offices, issued a program call in the years 2002 and 2004 for eligible counties to prepare an application for each project that a county would like to submit for consideration. A separate application is prepared for each project. The border district offices have the application forms available for the counties with a scheduled deadline for completed applications to be received. In order to be considered for the program call, the application must provide a clear and concise description of the work proposed, an implementation plan, including a schedule of proposed activities and a detailed estimate of project costs and a map delineating project location and termini.

The department evaluates the applications, and if determined to be in compliance with Texas Administrative Code §15.105 will submit the applications to the commission for approval under.

Prior to receiving funds under this program, a county must execute an agreement with the department at the district level. The District is responsible for the program administration of the Border Colonias Access Program as stipulated under §15.106 of the Texas Administrative Code, Title 43, Chapter 15. The agreement, among other things, will include a commitment by the county to place the project on the county road system. Water and wastewater services that are expected to be placed in or across an approved road project right of way prior to constructing the project. The county will expend funds received only on eligible costs. In addition, the county will comply with all applicable federal, state, and local environmental laws and regulations and permitting requirements. The county is responsible for maintaining the road.

4.4.3 Analysis of Agency's Colonias Data

The projects are classified as paving or repaving roads and/or improving drainage. The first call included 274 projects from 21 counties as approved by the commission. Most of the projects from the first call have been completed. The second call, commission approved in December of 2004, had a total of 68 projects in 22 counties. The anticipated year of completion for those projects is 2009.

The database includes the project name, type of project, the length of the road and the obligation amount. All data are in the exhibits attached to the following minute orders for the 1st Call: 108813, commission approved on February 28, 2002, 108846, commission approved March 28, 2002 and 108870 commission approved on April 25, 2002. The 2nd call minute order is 109899, commission approved on December 16, 2004.

4.4.4 Methodology/Variations

Types of Initiative/Investment

A \$50 million program 1st call was issued on January 18th, 2002. The commission selected projects for all of the \$50 million by the end of April, 2002.

The 2nd call program for \$50 million was issued on December 16th, 2004. To date, \$100 million has been approved by the commission for paving, repaving, and drainage projects in over 300 colonias in 22 counties. The estimated total project mileage is over 400 miles.

The following words and terms shall have the following meanings, unless the context clearly indicates otherwise.

- Border colonia--A community, located in an eligible county that is identified as a colonia in the Texas Water Development Board's colonia database.
- Border districts--The El Paso, Laredo, Pharr, and Odessa department districts.
- Commission--The Texas Transportation Commission.
- County road--A road owned and maintained by a county.
- Department--The Texas Department of Transportation.
- Eligible costs--The cost of constructing, administering, or providing drainage for a project, including the cost of leasing equipment used substantially in connection with a project, or acquiring materials used solely in connection with a project.

- Eligible county-- A county located in the El Paso, Laredo, or Pharr department districts, and Terrell County, that has adopted the model rules promulgated by the Texas Water Development Board under Water Code, §16.343
- Public road--A road owned and maintained by a municipality, county, or the department.
- Rural border county--An eligible county that:
 - Has a population of less than 55,000, as determined by the latest decennial census;
 - Is adjacent to an international border.

For a project to be eligible for consideration for the program, it must:

- be located within an eligible county listed by the Texas Water Development Board (TWDB);
- have one terminus at or within a border colonia and one terminus at a public road;
- be designed and constructed by the county or its contractor to minimum colonia access road standards

Basic Project Information/Attributes

The database lists all projects by name and with the TWDB identification number. The description of the job includes the length of the paving or repaving job and whether any drainage work will be included. The population figures are taken from Texas Water Development Board colonias data listing from fiscal year 2002. The funding type is differentiated between allocation and competitive funding monies.

As mentioned earlier, most of the first call projects are completed. The second call is in the early phase of work and expects these jobs to be completed by 2009.

4.5 Texas Department of Housing and Community Affairs (TDHCA) [Sec. 6.1565]

4.5.1 Agency Mission

To help Texans achieve an improved quality of life through the development of better communities.

TDHCA accomplishes this mission by administering a variety of housing and community affairs programs. A primary function of TDHCA is to act as a conduit for federal grant funds for housing and community services. However, because several major housing programs require the participation of private investors and private lenders, TDHCA also operates as a housing finance agency.

More specific policy guidelines are provided in §2306.002 of TDHCA's enabling legislation.

- The legislature finds that:
 - Every resident of this state should have a decent, safe, and affordable living environment;
 - Government at all levels should be involved in assisting individuals and families of low income in obtaining a decent, safe, and affordable living environment; and
 - The development and diversification of the economy, the elimination of unemployment or underemployment, and the development or expansion of commerce in this state should be encouraged.
- The highest priority of the department is to provide assistance to individuals and families of low and very low income who are not assisted by private enterprise or other governmental programs so that they may obtain affordable housing or other services and programs offered by the department.

TDHCA's services address a broad spectrum of housing and community affairs issues that include homebuyer assistance, the rehabilitation of single family and multifamily units, rental assistance, the new construction of single family and multifamily housing, special needs housing, transitional housing, and emergency shelters. Community services include energy assistance, weatherization assistance, health and human services, child care, nutrition, job training and employment services, substance abuse counseling, medical services, and emergency assistance.

TDHCA is primarily a pass-through funding agency and most programs, excluding many Community Affairs programs, award funds through a formal competitive process. As such, it distributes funds to entities that in turn provide assistance to households in need at the local level. This distribution is done using a number of techniques.

- Almost all housing development, rehabilitation, and rental assistance related funding is awarded through formal competitive Request for Proposals (RFP) and Notice of Funding Availability (NOFA) processes.
- First time homebuyer and down payment assistance is allocated through a network of participating lenders.

- Community Affairs' funds are predominantly allocated through a network of community-based organizations who receive their funding on an annual, ongoing basis.

Funding sources for the services listed above include the US Department of Housing and Urban Development (HUD), US Treasury Department, US Department of Health and Human Services, and US Department of Energy, and State of Texas general revenue funds. With this funding, TDHCA strives to promote sound housing policies; promote leveraging of state and local resources; prevent discrimination; and ensure the stability and continuity of services through a fair, nondiscriminatory, and open process.

4.5.2 Agency's Role in Colonias

The Office of Colonia Initiatives role is to expand housing opportunities to colonia and border residents living along the Texas-Mexico border by increasing knowledge and awareness of programs and services available through Texas Department of Housing and Community Affairs (TDHCA). Programs such as the Contract for Deeds Conversion assists colonia residents in becoming property owners by converting their contracts for deeds into a traditional mortgage while obtaining a lower interest rate. The Texas Bootstrap Loan Program is designed to promote and enhance homeownership for very low income Texans by providing loan funds to purchase or refinance real property on which to improve existing or construct new residential housing through the assistance of Self-Help Centers and other State-certified nonprofit organizations.

The Department also implements projects that promote improving the quality of life of colonia residents and border communities, empower and enhance organizations building capacity to better serve the targeted colonia population. Provide comprehensive education to colonia and border residents, develop cooperative working relationships between other state, federal, and local organizations to leverage resources and exchange information. Promote comprehensive planning of communities along the Texas-Mexico border to better understand community and resident needs, and, to serve as a catalyst for colonia residents by allowing input into major funding decisions that will affect border communities.

The Office of Colonia Initiatives assists other Texas Department of Housing and Community Affairs program divisions by coordinating activities in the colonias and border communities. Currently, the Office of Colonia Initiatives headquarters and Border Field Offices (in Edinburg, Laredo, and El Paso) employ eight employees that provide consumer education, housing and financial assistance, and community services along the Texas-Mexico border region to colonia and border residents and state, federal, and local organizations.

4.5.3 Analysis of Agency's Colonias Data

Contract for Deed Conversions (CFDC or CFD)

The *Contract for Deed Conversion (CFD)* Program is designed to help colonia residents become property owners by converting their contracts for deeds into warranty deeds. Participants in the program may not earn more than 60 percent of Area Median Family Income (AMFI) and the property must be their primary residence. The properties proposed for this initiative must be located in a colonia as identified by the Texas Water Development Board colonia list or meet the Texas Department of Housing and Community Affairs' definition of a colonia. The program

helps colonia residents become property owners by converting their contracts for deed into traditional mortgages, thus allowing colonia residents to build equity in their homes.

Texas Bootstrap Program (Bootstrap)

The *Texas Bootstrap Loan Program* is required under Subchapter FF, Chapter 2306, Texas Government Code, to make available \$3 million for mortgage loans to very low-income families (60% Area Median Family Income) not to exceed \$30,000 per unit. This program is a self-help construction program, which is designed to provide very low-income families an opportunity to help themselves through the form of sweat equity. All participants under this program are required to provide at least 60 percent of the labor that is necessary to construct or rehabilitate the home. Under this program all applicable building codes must be adhered to. In addition, nonprofit organizations can combine these funds with other sources such as those from private lending institutions, local governments, or any other sources. However, all combined loans cannot exceed \$60,000 per unit.

Colonia Self-Help Center (CSHC or SHC)

The operations of the colonia SHCs are funded by the *U.S. Department of Housing and Urban Development (HUD)* through the *Texas Community Development Block Program (TxCDBG)* 2.5% colonia set-aside, which is approximately 2.2 million per year. The CDBG funds are transferred to the Department through a Memorandum of Understanding with the Office of Rural Community Affairs. CDBG funds can only be provided to eligible units of general local governments; therefore, the Department must enter into a contract with each affected county government. The Department provides administrative and general oversight to ensure programmatic and contract compliance to meet legislative intent.

Owner Occupied Program (OCC)

Under HUD guidelines, the *HOME Investment Partnership Program (HOME)* funds are reserved for people at or below 80 percent (80%) of Average Median Family Income for an area. HOME regulations allow for a variety of housing activities, all aimed at providing safe, decent affordable housing to low-income families.

The HOME Program's *Owner Occupied Program* provides funds for the rehabilitation of single-family homes. This program includes, roof repair or replacement, electrical system and plumbing repairs. After the construction is completed, the homes must meet Texas Minimum Construction Standards.

In order to qualify for this program, an individual must own and reside in their home. Rental houses are not eligible. Sometimes, a home may not be repairable. In those instances, a home may be demolished and replaced by a "stick-built" or a manufactured home.

4.5.4 Methodology/Variations

Data used for the SB 827 Working Group is retrieved from the Texas Department of Housing and Community Affairs' Contract System, Oracle System and the MITAS program software.

TDHCA awards contracts through an application process for specific amounts to various municipalities, nonprofit agencies, for profit and public housing agencies around the state to administer various program activities, which are not specific to a particular colonia.

This report is broken into three categories for reporting purposes. The first report titled “Organization” includes contracts between the Texas Department of Housing & Community Affairs (TDHCA) and municipalities, nonprofit agencies, for profit and public housing agencies. These contracts were identified based on the awardees entering data into the TDHCA’s Contract System stating that funds would be expended in a colonia, but did not identify a specific colonia. In some instances the colonia information was supplied by the awardees and those colonias are identified in the report. Under this report the Texas Bootstrap Loan Program tracks the “number of households served” not the “number of people served”; for any marked “pending” under the “Colonia Name or M Number” we have modified the TDHCA’s Contract System to require the municipalities, nonprofit agencies, for profit and public housing agencies to identify the colonia under any active contract where funds have not been expended.

The second report titled “TDHCA” these direct loans that were made by TDHCA to the applicants. Under the “number of people served” the information listed is “number of household served” for this report.

The final report is titled “County” are contracts that were awarded to municipalities, nonprofit agencies, for profit and public housing agencies. However, no information was provided by these awardees to identify whether or not any of these funds were expended in colonias.

Information retrieved for the SB 827 Working Group included information on Colonia Legislative Districts, which was provided in a Microsoft Excel-based format from the Texas Office of Attorney General’s and used to determine both Legislative House and Senate jurisdictions.

Data extraction from TDHCA’s Contract System, Oracle System and MITAS allowed the Office of Colonia Initiatives to populate the following information requested through a SB 827 Working Group template created by the Texas Secretary of State’s Office:

- Legislative District
- Type of Initiative/Investment (Housing, Other)
- Basic Project Information (Funding Agency, Project Number and Description, Project Sponsor)
- Area and People Served by the Project (County, Colonia Name or M number, # of People Served)
- Basic Project Attributes (Project Cost, Project Approval Date, Project Execution Start Date, Project Completion Date, Project Target Date)

For future reporting purposes we have updated both the TDHCA’s Contract System and MITAS Program to include the name of the colonia.

4.6 Office of the Attorney General (OAG)

[By Specific Request of the SOS]

Though not mandated to report under the criteria of Senate Bill 827, the Office of the Attorney General (OAG) has served in a consulting capacity to the Secretary of State and the reporting agencies. The basis for the OAG's role has been the unique Colonias Geographic Database which it developed. This database contains detailed map, demographic and socioeconomic data on approximately 2,000 colonia areas identified by the Texas Water Development Board and other state and county agencies. An interactive version of the database, available on the OAG's website (<http://maps.oag.state.tx.us/colgeog/>) receives approximately 40,000 hits or queries per year. This application is used by OAG attorneys and staff as well as by state and federal agencies and the public. Use of information from this database and the OAG's expertise gained in its construction has assisted the SB 827 workgroup to promulgate a universally accepted statewide numbering ID system for colonias and to develop a priority classification system for colonia needs as well as a reporting system for ongoing and completed state colonia projects implemented by state agencies. The OAG has also provided maps to accompany the report mandated by this bill.

Work on the OAG's colonias database continues. In addition to working with the SB 827 Workgroup, database activities for FY2006 included the following:

- Added Nueces County communities to the database
- Updated additional colonia descriptive data received from the Texas Water Development Board
- Closely consulted with and provided guidance to the United States Geological Survey (USGS), which is employing newly available appraisal district geographic information system data to refine colonia boundary information in selected counties
- Provided data and methodology for estimating population of colonias (by overlaying colonia boundaries onto census block boundaries) to the Texas Legislative Council

4.7 Health and Human Services Commission (HHSC) [By Specific Request of the SOS]

4.7.1 Agency Mission

The mission of HHSC is to provide the leadership and direction and foster the spirit of innovation needed to achieve an efficient and effective health and human service system for Texas.

4.7.2 Agency's Role in Colonias

For the past five years, the HHSC Office of Border Affairs (OBA) has facilitated the Colonias Initiative, an interagency project that involves all the HHS agencies. It includes the planning and coordination of service delivery in colonias along the Texas Mexico border. Its goal is to improve access of services for colonia residents.

The OBA has regional staff in El Paso, Eagle Pass\Del Rio, Laredo, and the Rio Grande Valley. These regional coordinators provide oversight and leadership to the local HHS agencies as they provide outreach and program services in local colonias. Services provided include, but are not limited to client intake; dental and physical health services; mental health and substance abuse evaluations; health screenings (e.g. vision, hearing, diabetes); information and referral to local resources; skills training; and ESL\GED classes. Additionally, HHSC Regional Coordinators facilitate coordination with a variety of local community based organizations. Their efforts have led to improved communication, coordination, efficiency and maximization of resources throughout the border area. HHSC has also partnered with the Texas Workforce Commission, the Texas Education Agency, and the Texas A&M Colonias Program to improve access to employment and educational opportunities among colonia residents. Furthermore, HHSC contracts with the Texas A&M Colonias Program for promotoras/community health workers to provide colonia residents with information and referrals to all the HHS and partner agencies as well as assisting with Medicaid and CHIP enrollment.

Many of the Colonias Initiative services are provided at the Texas A&M Colonias Program Community Resource Centers, which are located in colonias throughout the border. However, residents can also access services at schools, churches, health clinics, and in some instances their homes.

4.7.3 Analysis of Agency's Colonias Data

All HHS agencies are tracking the number of colonia residents served. This data is submitted to the OBA director who compiles the information monthly and is shared with agency administration. The average monthly number of residents served through the Colonias Initiative is approximately 30,000. This number is based on the sum of total residents served as provided by each of the reporting agencies.

4.7.4 Methodology/Variations

Historically, there has been no centralized data collection tool. Therefore, HHSC and partner agencies are in the process of evaluating the current method of data collection as well as

implementing new measures for the Colonias Initiative. Plans are underway to collect specific information regarding a wider variety of agency services, age and gender groups, as well as costs of services. The Commission's Information Technology (CIT) division has organized a project team that is designing a web-based data entry collection tool so agencies can submit their data electronically. This tool will allow the HHS agencies to collect, maintain, and disseminate data in a comprehensive and consistent format. It would be phased in during FY 07 and will be maintained by the CIT division.

4.8 Texas Commission on Environmental Quality (TCEQ) [By Specific Request of the SOS]

4.8.1 Agency Mission

The Texas Commission on Environmental Quality strives to protect our state's human and natural resources consistent with sustainable economic development. Our goal is clean air, clean water, and the safe management of waste.

4.8.2 Agency's Role in Colonias

The primary colonias roles of the Texas Commission on Environmental Quality (TCEQ) are related to the oversight of water and wastewater services through its Public Drinking Water, Utilities, Water Quality, Onsite Sewerage Facilities, and Enforcement programs. It should be noted that the TCEQ regulates water and wastewater systems and utilities but has no authority over "colonias" and/or colonias developers; however, the TCEQ helped develop the Model Subdivision Rules of the Texas Water Development Board (TWDB).

Enforcement

Some of our enforcement actions relate to public water systems that include cities other political subdivisions and water supply corporations (WSCs) which provide or could provide water/wastewater services to colonias.

Certificates of Convenience and Necessity

A Certificate of Convenience and Necessity (CCN) gives the holder the legal right to provide water and/or sewer utility service, and it delineates the service area. It also obligates the certificate holder to provide service to every customer and qualified applicant who requests service within that area. Sometimes CCN issues can delay the establishment of water and/or wastewater service, especially when competing jurisdictions wish to provide service to the same area or the applicant can not prove it has the financial, managerial, or technical capabilities to serve.

On-Site Sewerage Facilities

On-Site Sewerage Facilities (OSSFs) are regulated by the TCEQ; however, counties or municipalities can receive authorization from the TCEQ to regulate the program in their locality. For example, Cameron, El Paso, Hidalgo and Nueces County are authorized agents of the program, as well as municipalities like Palmhurst and Combes.

Military Assistance

Through an agreement with the Department of Defense, National Guard units have helped dig trenches and wells for water supply in the U.S.-Mexico border region, including Dimmit, Webb, and Hidalgo counties. This program is currently dormant.

Total Maximum Daily Loads

The water quality in certain watersheds, such as Petronilla Creek, Oso Bay/Creek and the Arroyo Colorado can be affected by discharges from colonias. The TCEQ has developed Total Maximum Daily Loads (TMDLs) in these areas; in the Arroyo Colorado, the TCEQ funded a local partnership to develop a Watershed Protection Plan to address low dissolved oxygen and nutrient impacts. A TMDL calculates the amount of a certain pollutant (such as nitrates or bacteria) that must be reduced in order to attain and maintain a use (public water supply, aquatic life, recreation, etc.) of a surface water body. Based on those calculations, the state develops an implementation plan to mitigate man-made sources of pollution within the watershed and restore full use of the water body.

Colonias Coordination

The TCEQ also works through the Office of the Secretary of State and various state and federal agencies to address colonias issues collectively, as required by SB 1421, 76th Legislative Session. In these regular meetings project-specific information is discussed regarding communities seeking water and/or wastewater service and how best to provide them service. Staff from Border Affairs and the Environmental Law, the Water Supply, and the Field Operations divisions also participates in these meetings. In addition, TCEQ participates in the implementation of colonias bills, such as SB 827 and SB 1202, 79th Regular Session.

Model Subdivision Rules

Along with the TWDB and the Office of the Attorney General, the TCEQ is charged by statute with developing Model Subdivision Rules (MSRs), which counties are required to adopt if they wish to obtain funding for Economically Distressed Areas through the TWDB. The MSRs have not been revised since 1999.

4.8.3 Analysis of Agency's Colonias Data

The agency does not collect data on colonias.

4.9 United States Geological Survey (USGS) [By Specific Request of the SOS]

4.9.1 Agency Mission

The mission of the USGS is to serve the Nation by providing reliable scientific information to describe and understand the Earth; minimize loss of life and property from natural disasters; manage water, biological, energy, and mineral resources; and enhance and protect our quality of life. The vision of the USGS is to become a world leader in the natural sciences thanks to our scientific excellence and responsiveness to society's needs. A major focus of the geographic discipline within the USGS is to conduct research to monitor the rates, causes, and consequences of landscape change (both physical and human induced) over time to predict future conditions and model alternative scenarios for growth management.

4.9.2 Agency's Role in Colonias

The USGS provides expertise in scientific database collection and mapping procedures along the U.S.-Mexico border, and participates in collaborative partnerships with Mexican Federal agencies. The role of the USGS in providing geospatial and demographic database information to monitor colonias in Texas and Arizona was initiated through a collaborative project with the U.S. Department of Housing and Development (HUD), Mexican Instituto Nacional de Estadística Geografía e Informática (INEGI), and the U.S. Geological Survey (USGS) in 2002. This colonias monitoring program provides a publicly accessible, bi-national, Geographic Information System (GIS) database to enable civic leaders and citizens to inventory, analyze, and monitor growth, housing, and infrastructure in border communities. High-technology tools are provided to support planning and development along the border with a sustainable and comprehensive approach. Local government and non-profit agencies can employ this system to facilitate applying for grants to improve living conditions in the colonias and other poverty-stricken areas. The geospatial data can be viewed on the Internet Map Service from the web sites, <http://borderhealth.cr.usgs.gov> and <http://tx.usgs.gov/geography>.

In collaboration with the Office of the Attorney General of Texas (OAG), the USGS has been developing new methods to incorporate local government data to update the colonias database. County appraisal districts have boundaries, plat information, and occupied lots for each of the subdivisions in the county, many of which match up to colonias designated by the Texas OAG. Local water and wastewater utility districts, at the minimum, maintain current information on utility availability for each of the colonias. Furthermore, county appraisal districts and utility districts are beginning to maintain their databases in a geospatial digital format. More about this program is located at: http://tx.usgs.gov/geography/FS2004-3070_revised.pdf

In collaboration with the Office of the Texas Secretary of State (SOS), the USGS designed a comprehensive database to assist the SOS Colonias Ombudsmen to collect the most recent utilities, road conditions, medical facilities and population information to facilitate analysis of living conditions and development priorities in the colonias. This relational database includes input forms and a report generator. When completed, this database and the updated colonias boundaries will be available for public use.

4.9.3 Analysis of Agency's Colonias Data

The geospatial data that the USGS is building along the U.S.-Mexico border in collaboration with universities and federal, state, and local governments are available in an Internet Map Service for public viewing and analysis. Processes developed to bi-nationally integrate the datasets across the border are documented on the website <http://borderhealth.cr.usgs.gov>. The majority of the U.S. layers are publicly available for download, whereas the Mexican data is copyrighted.

In relation to colonias data, the USGS has collected current digital boundary datasets for colonias in Maverick and El Paso County, and has started to collect them in Hidalgo County, using local appraisal district data and plat maps from the Texas OAG. In order to develop metrics for determining priorities in colonia development, the USGS will incorporate the completed SOS Colonias Ombudsmen comprehensive database into the current spatial boundary datasets of the colonias. All of this data will be delivered to the Texas OAG for public distribution. In addition, to monitor accessibility to medical and public education, the USGS has updated the geospatial location of regular public schools in El Paso and Maverick County as maintained by the Texas Education Agency, and has updated the geospatial location of the hospitals as maintained by the Texas State Department of Health Services

4.9.4 Methodology/Variations

The USGS employs the most current geographic information system techniques to collect, store, and distribute the geospatial databases. The design of the comprehensive database for collection of infrastructure data by the Colonias Ombudsmen was designed by the USGS to reduce data input errors and standardize the integrity of the database.

SECTION 5.0:
CONCLUSIONS AND RECOMMENDATIONS

Much has been accomplished with initial bond money of \$250 million passed by the citizens of the State of Texas in 1989 and 1991 for water and wastewater needs coupled with the \$175 million for road paving in 2001. This substantial amount, in addition to other state and federal funds expended to improve the physical infrastructure in colonias has significantly improved the living conditions for at least 145,408 colonia residents living in 636 colonias in the counties with the highest colonia population. Yet, clearly more work remains to complete existing projects and to reach other colonia residents both along the border and state-wide who are still waiting for first time water and wastewater services.

This classification study, limited to the six counties with the largest number of colonias due to funding constraints, reveals that approximately 442 colonias, with a population of 62,675 colonia residents, are classified as areas with the highest health risk due to their lack of basic infrastructure including potable water, adequate sewage disposal and proper drainage, which exposes the population and surrounding communities to increased threats of infectious diseases and public health hazards.

Furthermore, with recent legislation (HB 467, 79th Regular Session) extending the definition of a colonia to an economically distressed area in any county, colonias can now possibly be found in any of Texas' 254 counties, large and small, rural and urban, with many or few residents.

While the role of state government is not to solve every problem, in cases where unscrupulous developers have created conditions that affect the health of hundreds of thousands of residents and the environment, there are actions that can be taken at the state level. These include:

1. Strengthen enforcement of the Model Subdivision Rules should be strengthened to halt proliferation of additional colonias.

The Office of Attorney General is the state agency charged with enforcing the Model Subdivision Rules of the Texas Water Development Board but in the recent past has lost grant funding for its border investigators who were working with the local counties in identifying illegal land sales and development. Additional funding, either through state or federal monies, should be obtained for this critical role.

2. Develop a permanent colonias state fund.

With a need to continue to provide water/wastewater and other services to colonias residents who often cannot pay the tremendous start-up costs to obtain hook-ups to water distribution or wastewater collection systems, and due to the high number of remaining unplatted colonias along the border with existing colonia residents, allow the fund to assist local counties with platting expenses so that the residents can one day be eligible to receive first time water and wastewater services. Legislature should consider creation of a dedicated fund.

3. Develop education and outreach programs to County Commissioners Courts and for colonia residents.

County commissioners should be educated on the tremendous role they can play in resolving colonias problems and in stopping the proliferation of colonias. Meetings of the TDHCA Colonia Resident Advisory Committee revealed that often colonia residents are unaware of the resources that are available to assist them.

4. Continue to pursue federal funding for colonias.

As recently as five years ago, EPA provided \$100 million through the North American

Development Bank for water/wastewater projects in the border region; often, in the U.S. these funds were used for colonias. Unfortunately, this funding has decreased over the last few years to less than \$50 million. The federal government should be encouraged to increase border water/wastewater funding.

5. Conduct a review of best practices in colonias funding among state and federal agencies.

A review of best practices among state funding agencies for colonias should be undertaken and these lessons applied to future state funding programs.

6. Encourage university partnerships with state agencies and local counties to explore alternative technologies in providing much needed water, wastewater and housing needs.

Often colonias are so far from existing systems that the cost and topography of the region makes it impossible to connect residents to conventional water and wastewater systems.

7. Determine the number of homes required to define an area as a colonia.

The data collected by the ombudspersons revealed that a number of colonias had a population of 0.

8. Obtain funding to collect data on the remaining border and statewide colonias so these areas can also be classified, providing a more accurate account of the number of Texas communities that remain with the greatest infrastructure needs.

9. Increase mental health and substance abuse outreach services in colonias.

10. Develop a public education campaign on obesity in the colonias.

AN ACT

relating to systems for identifying colonias and for tracking the progress of state-funded projects that benefit colonias and the submission of a related report to the legislature.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Subchapter B, Chapter 405, Government Code, is amended by adding Section 405.021 to read as follows:

Sec. 405.021. REPORT ON STATE-FUNDED PROJECTS SERVING COLONIAS. (a) In this section, "colonia" means a geographic area that:

(1) is an economically distressed area as defined by Section 17.921, Water Code; and

(2) is located in a county any part of which is within 62 miles of an international border.

(b) Based on information provided under Subsections (c) and (d), the secretary of state shall establish and maintain a classification system that allows the secretary of state to track the progress of state-funded projects in providing water or wastewater services, paved roads, and other assistance to colonias.

(c) The secretary of state shall compile information received from the Office of Rural Community Affairs, the Texas Water Development Board, the Texas Transportation Commission, the Texas Department of Housing and Community Affairs, the Department of State Health Services, and any other agency considered

1 appropriate by the secretary of state for purposes of the
2 classification system.

3 (d) The secretary of state shall compile information on
4 colonias that is received from the colonia ombudsmen under Section
5 775.004.

6 (e) The secretary of state shall:

7 (1) prepare a report on the progress of state-funded
8 projects in providing water or wastewater services, paved roads,
9 and other assistance to colonias; and

10 (2) submit the report to the presiding officer of each
11 house of the legislature not later than December 1 of each
12 even-numbered year.

13 (f) The report to the legislature must include a list of
14 colonias with the highest health risk to colonia residents, based
15 on factors identified by the secretary of state.

16 (g) In conjunction with the establishment of the
17 classification system required by this section, the secretary of
18 state shall establish and maintain a statewide system for
19 identifying colonias.

20 (h) The secretary of state may contract with a third party
21 to develop the classification system or the identification system
22 or to compile or maintain the relevant information required by this
23 section.

24 SECTION 2. Subchapter C, Chapter 487, Government Code, is
25 amended by adding Section 487.060 to read as follows:

26 Sec. 487.060. REPORT TO SECRETARY OF STATE. (a) In this
27 section, "colonia" means a geographic area that:

1 (1) is an economically distressed area as defined by
2 Section 17.921, Water Code; and

3 (2) is located in a county any part of which is within
4 62 miles of an international border.

5 (b) To assist the secretary of state in preparing the report
6 required under Section 405.021, the office on a quarterly basis
7 shall provide a report to the secretary of state detailing any
8 projects funded by the office that serve colonias by providing
9 water or wastewater services, paved roads, or other assistance.

10 (c) The report must include:

11 (1) a description of any relevant projects;

12 (2) the location of each project;

13 (3) the number of colonia residents served by each
14 project;

15 (4) the cost or anticipated cost of each project;

16 (5) a statement of whether each project is completed
17 and, if not, the expected completion date of the project; and

18 (6) any other information, as determined appropriate
19 by the secretary of state.

20 SECTION 3. Chapter 775, Government Code, is amended by
21 amending Section 775.003 and adding Section 775.004 to read as
22 follows:

23 Sec. 775.003. COLONIA OMBUDSMAN PROGRAM. The colonia
24 initiatives coordinator shall ~~may~~ appoint a colonia ombudsman in
25 each of the six border counties that the coordinator determines
26 have the largest colonia populations.

27 Sec. 775.004. INFORMATION ON COLONIAS. (a) The colonia

1 ombudsmen shall gather information about the colonias in the
2 counties for which the ombudsmen were appointed and provide the
3 information to the secretary of state, to assist the secretary of
4 state in preparing the report required under Section 405.021.

5 (b) To the extent possible, the ombudsmen shall gather
6 information regarding:

- 7 (1) the platting of each colonia;
8 (2) the infrastructure of each colonia;
9 (3) the availability of health care services;
10 (4) the availability of financial assistance; and
11 (5) any other appropriate topic as requested by the
12 secretary of state.

13 (c) The ombudsmen shall provide the information to the
14 secretary of state not later than September 1 of each even-numbered
15 year.

16 SECTION 4. Subchapter D, Chapter 2306, Government Code, is
17 amended by adding Section 2306.083 to read as follows:

18 Sec. 2306.083. REPORT TO SECRETARY OF STATE. (a) In this
19 section, "colonia" means a geographic area that:

- 20 (1) is an economically distressed area as defined by
21 Section 17.921, Water Code; and
22 (2) is located in a county any part of which is within
23 62 miles of an international border.

24 (b) To assist the secretary of state in preparing the report
25 required under Section 405.021, the board on a quarterly basis
26 shall provide a report to the secretary of state detailing any
27 projects funded by the department that provide assistance to

1 colonias.

2 (c) The report must include:

3 (1) a description of any relevant projects;

4 (2) the location of each project;

5 (3) the number of colonia residents served by each
6 project;

7 (4) the cost or anticipated cost of each project;

8 (5) a statement of whether each project is completed
9 and, if not, the expected completion date of the project; and

10 (6) any other information, as determined appropriate
11 by the secretary of state.

12 SECTION 5. Subchapter B, Chapter 1001, Health and Safety
13 Code, is amended by adding Section 1001.033 to read as follows:

14 Sec. 1001.033. REPORT TO SECRETARY OF STATE. (a) In this
15 section, "colonia" means a geographic area that:

16 (1) is an economically distressed area as defined by
17 Section 17.921, Water Code; and

18 (2) is located in a county any part of which is within
19 62 miles of an international border.

20 (b) To assist the secretary of state in preparing the report
21 required under Section 405.021, Government Code, the commissioner
22 on a quarterly basis shall provide a report to the secretary of
23 state detailing any projects funded by the department that provide
24 assistance to colonias.

25 (c) The report must include:

26 (1) a description of any relevant projects;

27 (2) the location of each project;

1 (3) the number of colonia residents served by each
2 project;

3 (4) the cost or anticipated cost of each project;

4 (5) a statement of whether each project is completed
5 and, if not, the expected completion date of the project; and

6 (6) any other information, as determined appropriate
7 by the secretary of state.

8 SECTION 6. Subchapter C, Chapter 201, Transportation Code,
9 is amended by adding Section 201.116 to read as follows:

10 Sec. 201.116. REPORT TO SECRETARY OF STATE. (a) In this
11 section, "colonia" means a geographic area that:

12 (1) is an economically distressed area as defined by
13 Section 17.921, Water Code; and

14 (2) is located in a county any part of which is within
15 62 miles of an international border.

16 (b) To assist the secretary of state in preparing the report
17 required under Section 405.021, Government Code, the commission on
18 a quarterly basis shall provide a report to the secretary of state
19 detailing any projects funded by the department that serve colonias
20 by providing paved roads or other assistance.

21 (c) The report must include:

22 (1) a description of any relevant projects;

23 (2) the location of each project;

24 (3) the number of colonia residents served by each
25 project;

26 (4) the cost or anticipated cost of each project;

27 (5) a statement of whether each project is completed

1 and, if not, the expected completion date of the project; and

2 (6) any other information, as determined appropriate
3 by the secretary of state.

4 SECTION 7. Subchapter E, Chapter 6, Water Code, is amended
5 by adding Section 6.1565 to read as follows:

6 Sec. 6.1565. REPORT TO SECRETARY OF STATE. (a) In this
7 section, "colonia" means a geographic area that:

8 (1) is an economically distressed area as defined by
9 Section 17.921; and

10 (2) is located in a county any part of which is within
11 62 miles of an international border.

12 (b) To assist the secretary of state in preparing the report
13 required under Section 405.021, Government Code, the board on a
14 quarterly basis shall provide a report to the secretary of state
15 detailing any projects funded by the board that serve colonias by
16 providing water or wastewater services or other assistance.

17 (c) The report must include:

18 (1) a description of any relevant projects;

19 (2) the location of each project;

20 (3) the number of colonia residents served by each
21 project;

22 (4) the cost or anticipated cost of each project;

23 (5) a statement of whether each project is completed
24 and, if not, the expected completion date of the project; and

25 (6) any other information, as determined appropriate
26 by the secretary of state.

27 SECTION 8. This Act takes effect September 1, 2005.

David Neuhorst
President of the Senate

Jim Caddell
Speaker of the House

I hereby certify that S.B. No. 827 passed the Senate on April 14, 2005, by the following vote: Yeas 31, Nays 0; and that the Senate concurred in House amendment on May 27, 2005, by the following vote: Yeas 29, Nays 0.

Lacey Spaw
Secretary of the Senate

I hereby certify that S.B. No. 827 passed the House, with amendment, on May 25, 2005, by a non-record vote.

Robert Hawens
Chief Clerk of the House

SB 827 IMPLEMENTATION TIMELINE**

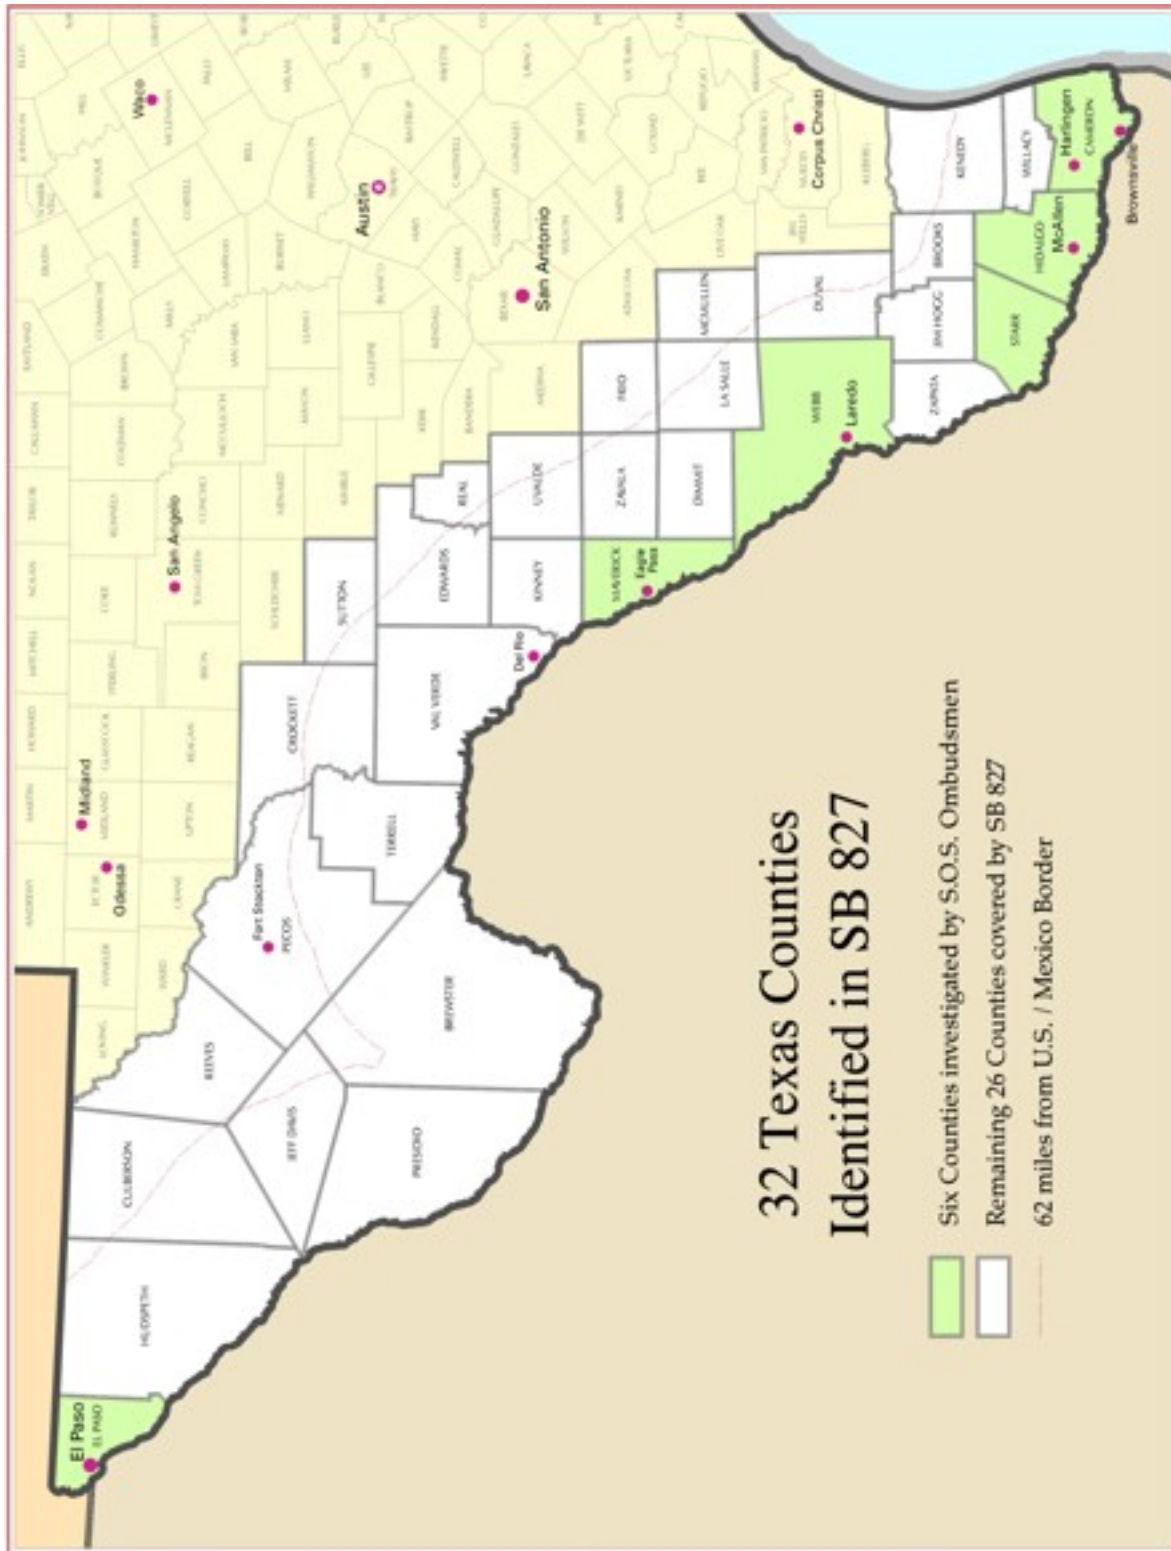

SCHEDULE FOR SB 827 WORKGROUP
(Updated and Modified 04Oct.'06)

	2006											
	January	February	March	April	May	June	July	August	September	October	November	December
SB 827 Workgroup Meetings	26Jan.'06	23Feb.'06	30Mar.'06	No Meeting	02May'06	15Jun.'06	13Jul.'06	No Meeting	14Sep.'06	05Oct.'06	No Meeting	No Meeting
Phase I: Development of Partnering Agreement, and Final Report Format	■											
Milestone: Submission of Partnering Agreement and Final Report Format to SB 827 Workgroup for Review & Approval		◆										
Phase II: Pilot Data Collection Run by Agency, Discussion, Agreement with Final Report Format, and Decision to Proceed		■										
Milestone: Submission of Pilot Run Data to Dr. Vanegas @ TAMU by End of Business Day 24Mar.'06, for Preliminary Consolidation			◆									
Phase III: Data Collection by Agency				■								
Milestone: Submission of Data to SB 827 Workgroup for Consolidation						◆						
Phase IV: Data Collection by SB 827 Workgroup						■						
Milestone: Submission of Final Data to Ms. Yvette Sánchez (SOS) & Dr. Vanegas (TAMU) by End of Business Day 18Aug.'06, for Final Consolidation								◆				
								Due Date: 18Aug.'06				
Phase V(a): Preparation of Initial Draft of Final Report by Ms. Yvette Sánchez (SOS) & Dr. Vanegas (TAMU)								■				
Milestone: Submission of Initial Draft Report to SB 827 Workgroup for Initial Review									◆			
									Due Date: 14Sep.'06			
Phase V(b): Preparation of Final Report by Ms. Yvette Sánchez (SOS) & Dr. Vanegas (TAMU)									■			
Milestone: Submission of Final Report to SB 827 Workgroup for Final Review										◆		
										Due Date: 05Oct.'06		
Phase V(c): Review of Final Report by SB 827 Workgroup									■			
Milestone: Approval of Final Report by SB 827 Working Group										◆		
										Due Date: 01Nov.'06		
Milestone: Submission of Final Report by Ms. Yvette Sánchez (SOS) & Dr. Vanegas (TAMU) to SOS Office after Final Approval by SB 827 Working Group											◆	
											Due Date: 08Nov.'06	
Phase VI: Completion and Printing of Final Report by SOS Office											■	
Milestone: Submission of Final Report to State Legislature												◆
												Due Date: 01Dec.'06

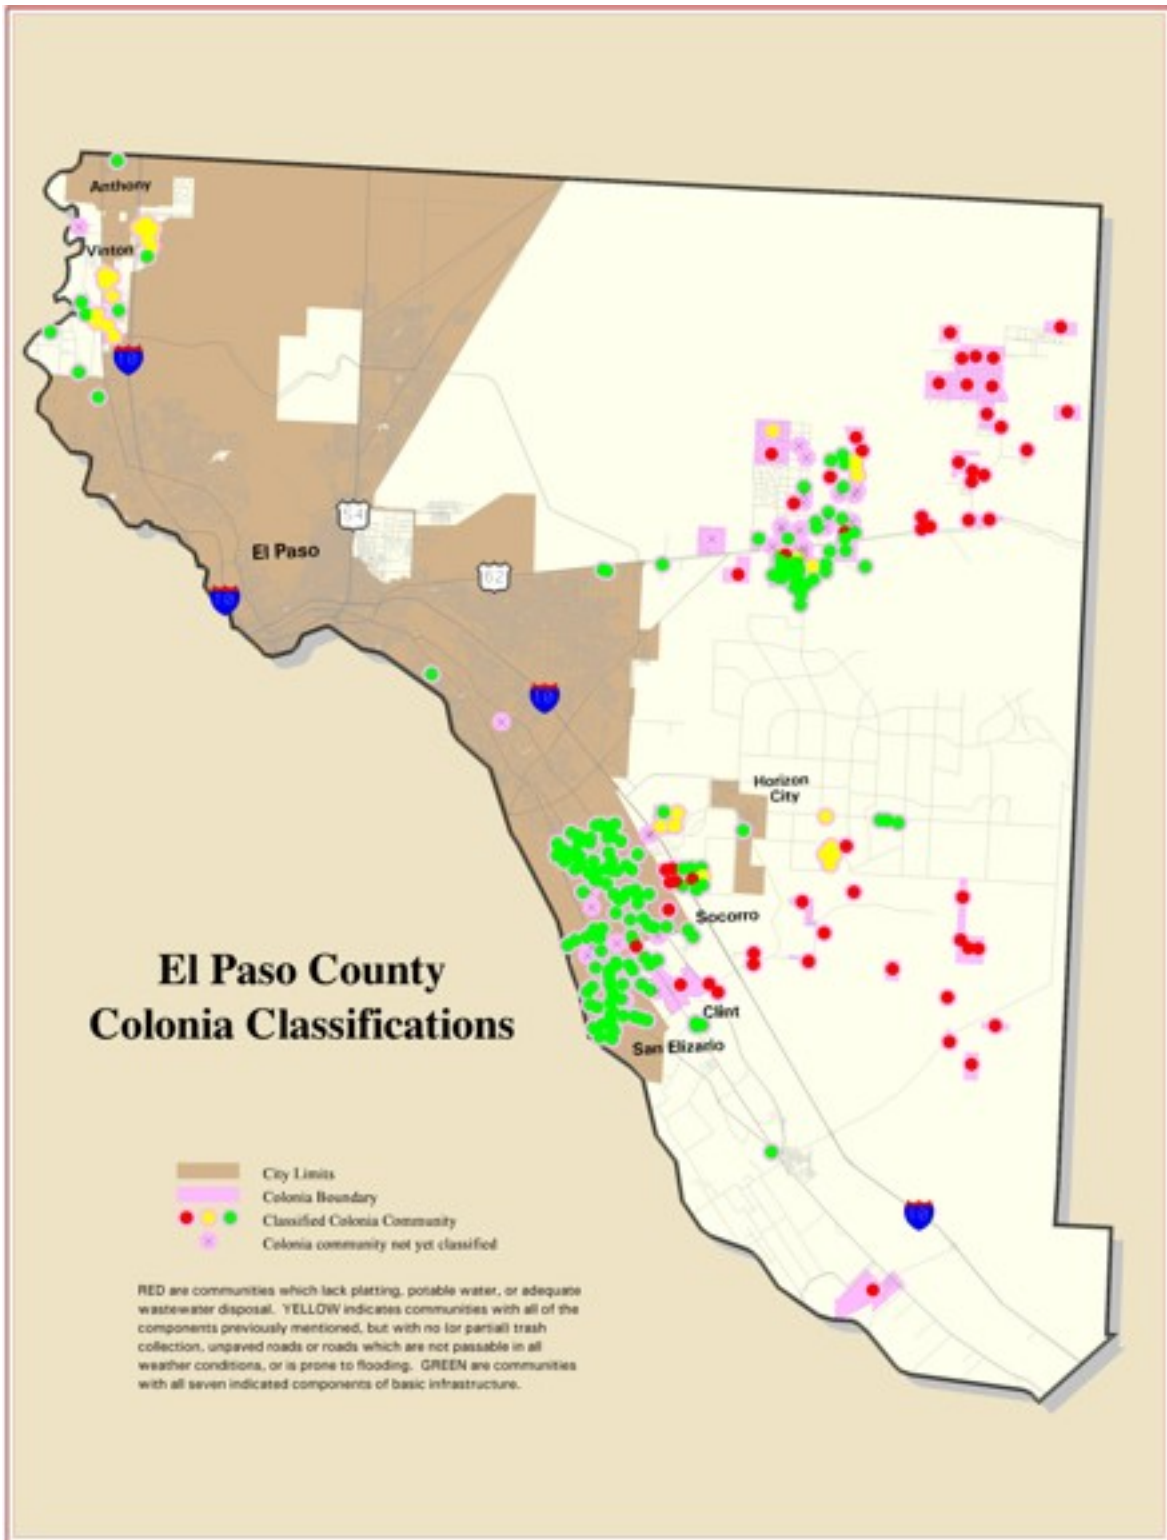

◆ Note: All milestones to be defined by consensus within the SB 827 Workgroup

**APPENDIX 5:
SB 827 DATA COLLECTION TEMPLATE**

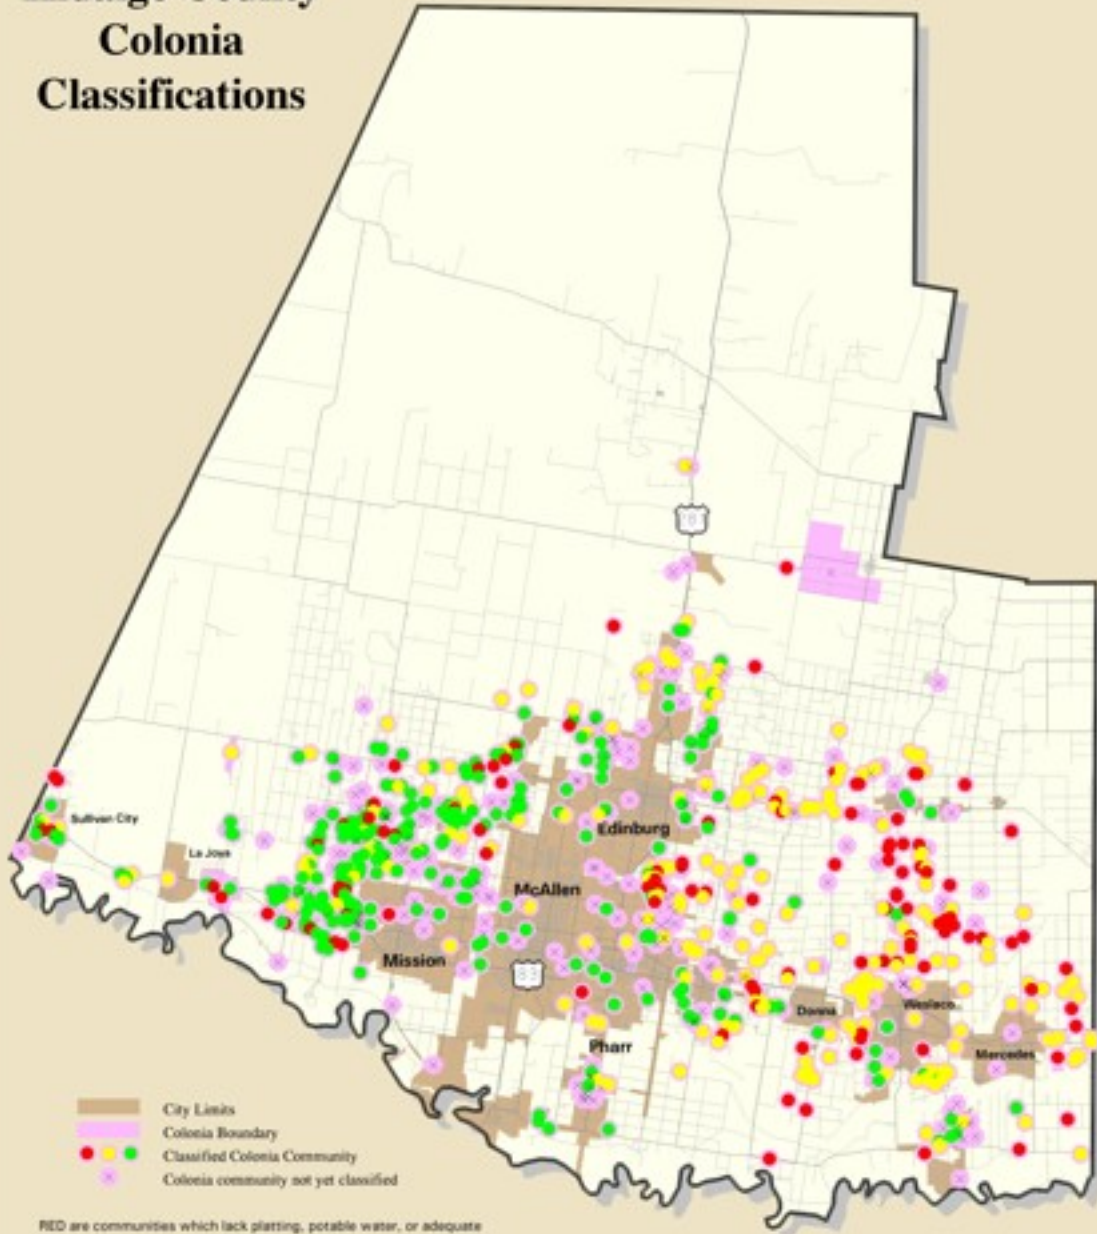

**APPENDIX 6:
MAPS**

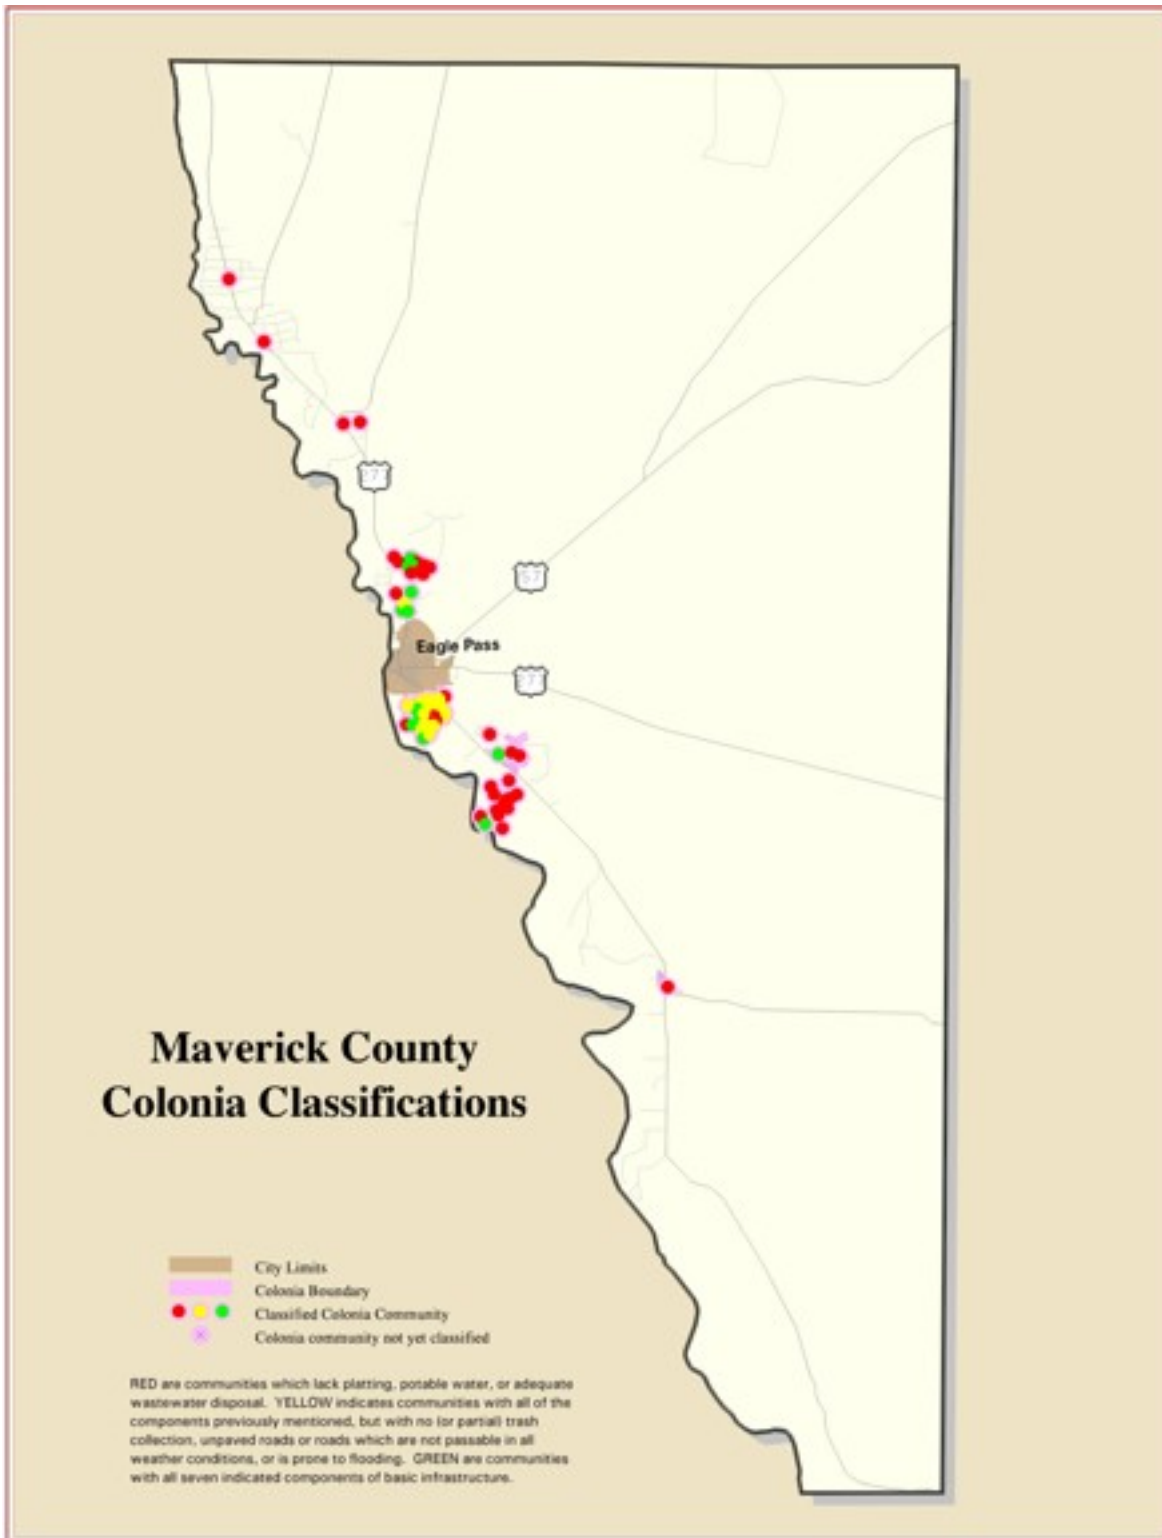

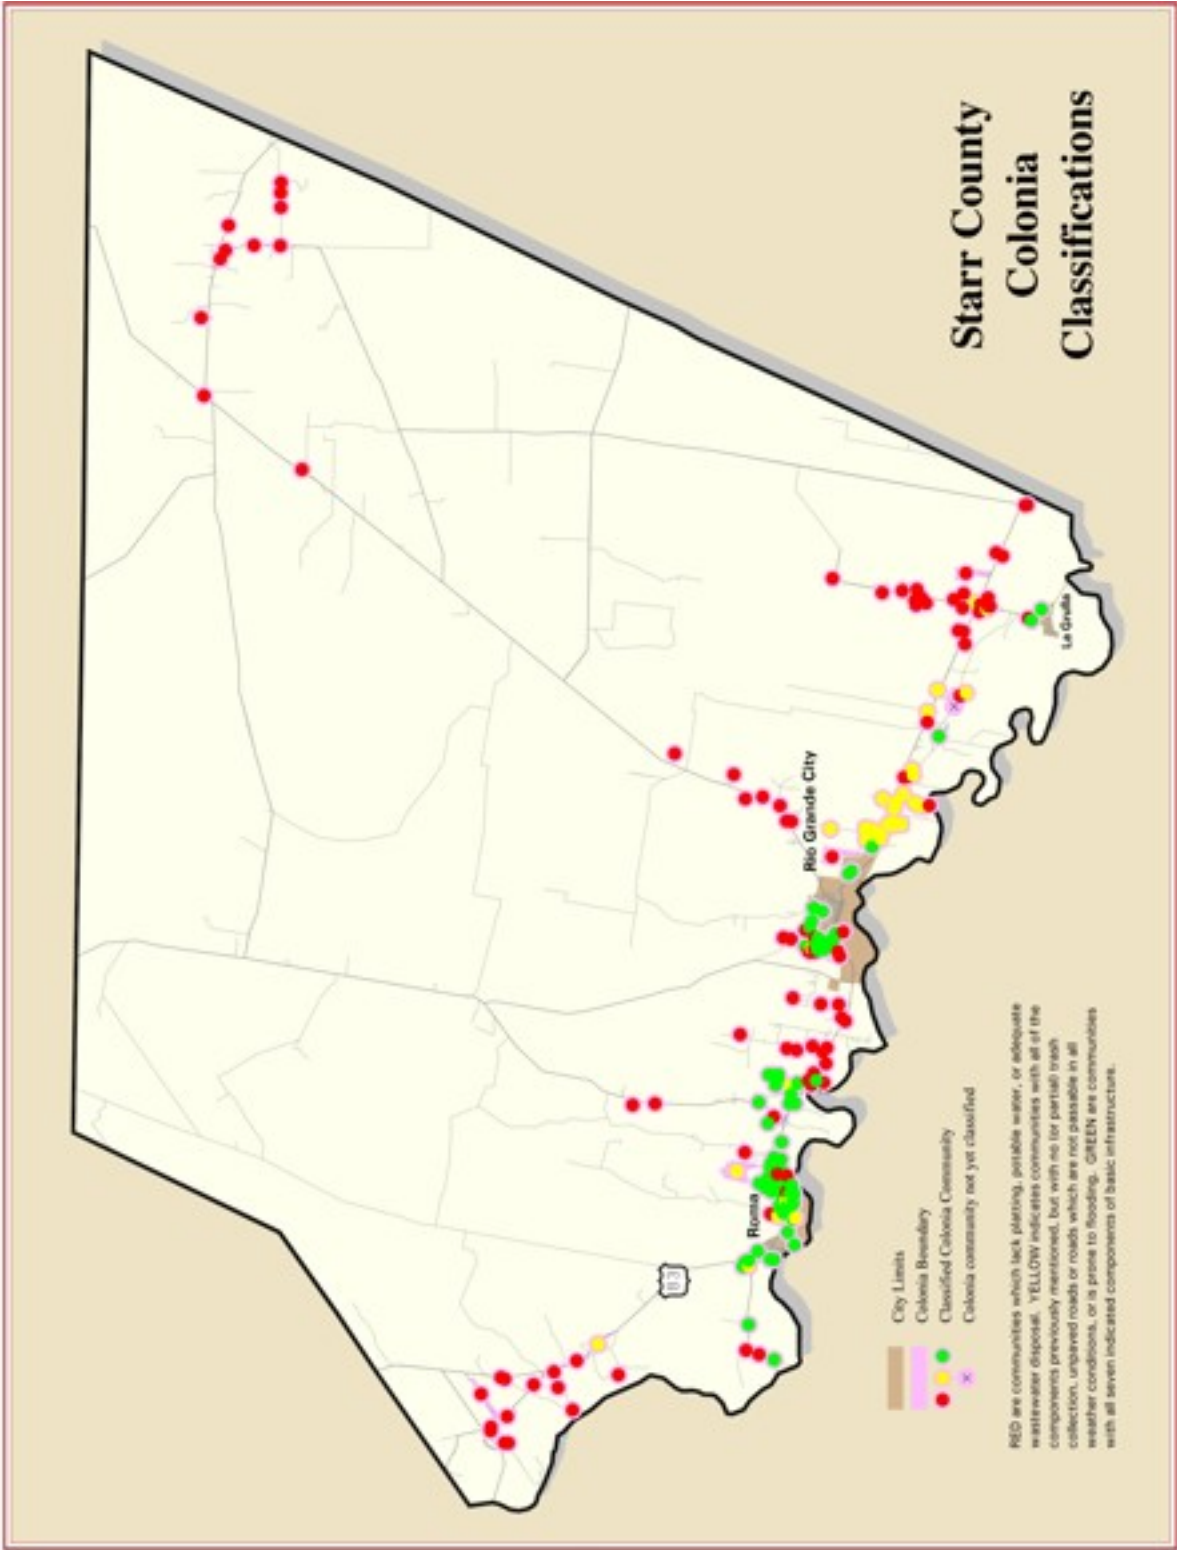

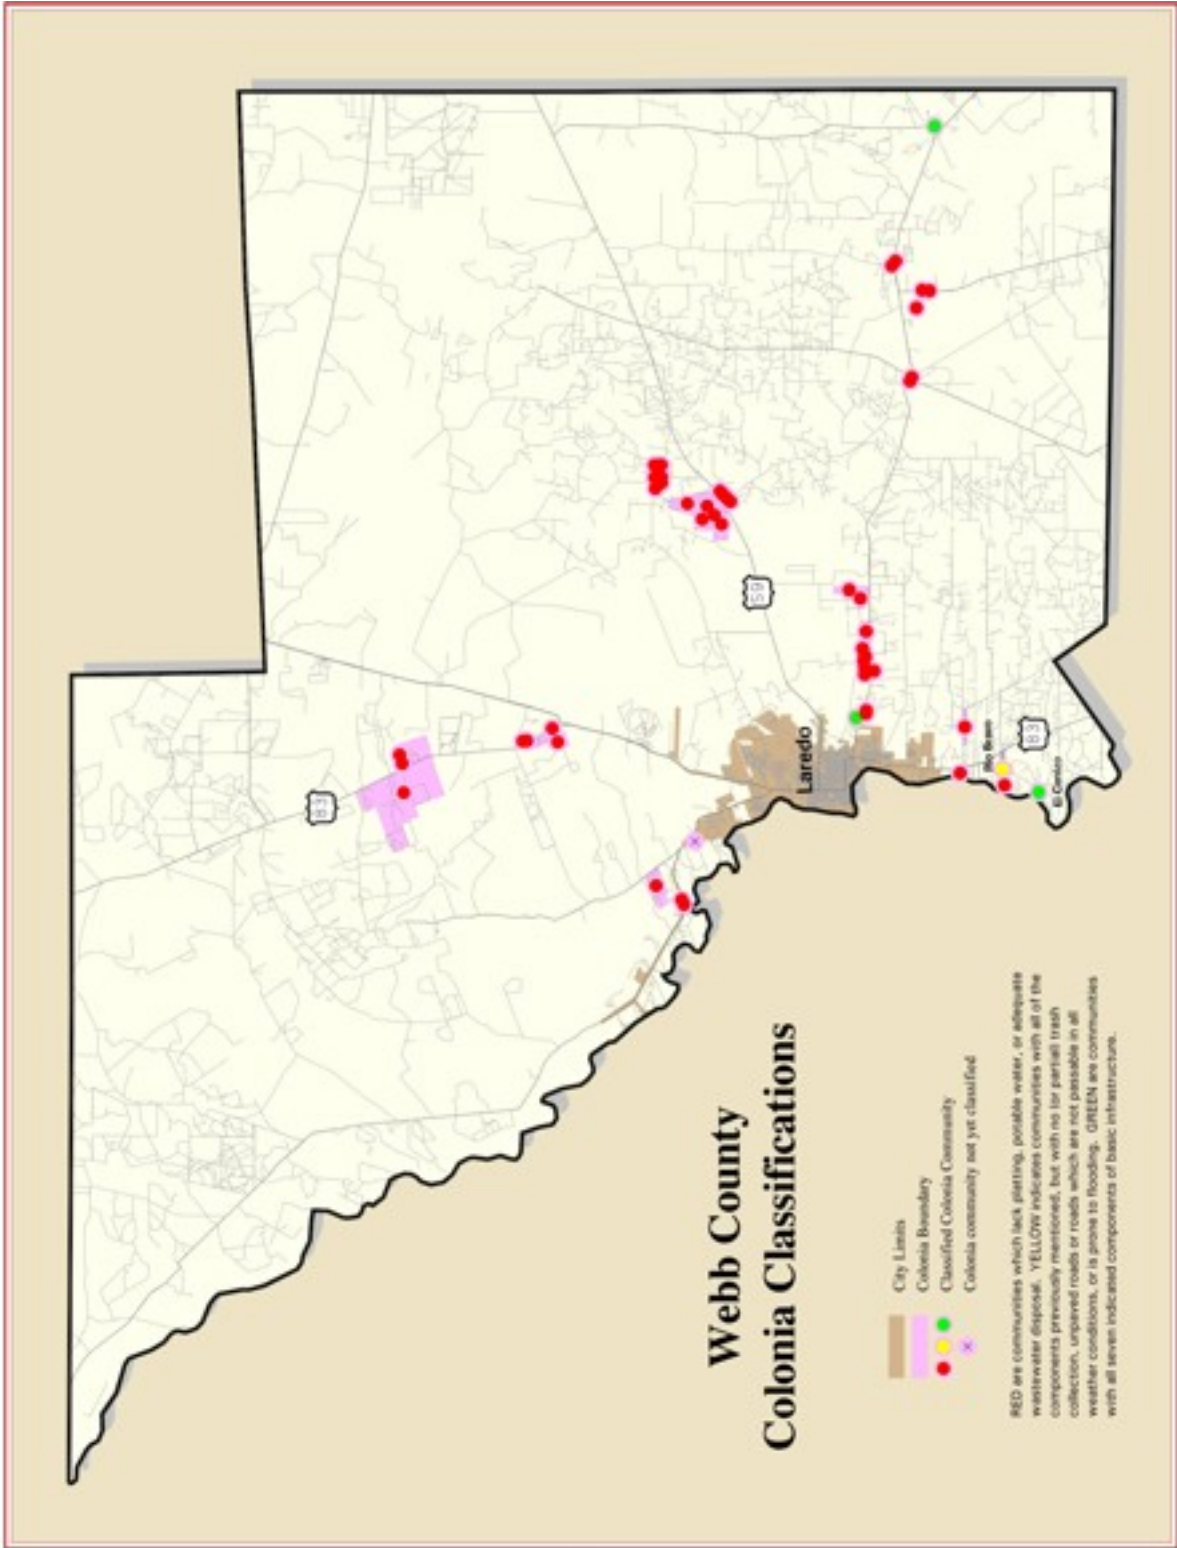

Hidalgo County Colonia Classifications

RED are communities which lack platting, potable water, or adequate wastewater disposal. YELLOW indicates communities with all of the components previously mentioned, but with no (or partial) trash collection, unpaved roads or roads which are not passable in all weather conditions, or is prone to flooding. GREEN are communities with all seven indicated components of basic infrastructure.
