

Preliminary 2007 Data on Employment Status by State and Demographic Group

This table presents preliminary data on employment status by demographic group for States from the Current Population Survey (CPS). It is being made available while work on producing a final table using the standard procedure continues. This table will differ from the final table in a number of ways, but it is expected that the data -- particularly for labor force participation rates, employment-population ratios, and unemployment rates -- will be little changed.

Differences between the preliminary and final tables are as follows:

- These preliminary data were developed from quarterly tabulations containing data rounded to the hundreds. The final data will be based on monthly data to the unit. The level (that is, number-of-person) estimates presented will be rounded to the thousands in both cases. The rounding error resulting from having averaged quarterly data is very small. Summation of level estimates for population groups included for all States results in differences of no more than a few thousand relative to the corresponding national totals.
- The underlying quarterly data for this preliminary table were tabulated on the initial population controls; that is, estimates of population available during the reference year and not end-of-year revisions. While the final table will reflect revised population estimates, the data in this preliminary table are consistent with the published CPS national totals. Differences in employment or unemployment levels between these preliminary data and the final data generally will be less than one percent.
- Data for Asians, marital status groups, and detailed age break-outs by race and ethnicity are not included in this preliminary table because they were not part of the quarterly tabulations.
- This preliminary table does not contain unemployment rate error ranges.
- The minimum bases used to determine which cells are of publishable reliability were approximated for this preliminary table, based on cells published for the prior two years. The final table will reflect actual minimum bases, calculated on the Census 2000-based sample for the first time. See appendix B of the *Geographic Profile of Employment and Unemployment* bulletin at www.bls.gov/opub/gp/gpapndb.htm for more information on the minimum base standard for statistical reliability.

General information on the uses and limitations of State and local area data from the CPS can be found at www.bls.gov/gps/notescps.htm. Questions can be addressed to the Division of Local Area Unemployment Statistics by e-mail at gpinfo@bls.gov or by telephone at (202) 691-6392.

^P = preliminary.

¹ Less than 500 persons.

NOTE: Data for demographic groups are not shown when they do not meet BLS publication standards of reliability for the particular area based on the sample in that area. See appendix B. Items may

not add to totals due to rounding. Detail for race and Hispanic or Latino groups will not add to totals because data for the "other races" group are not presented and Hispanics are included in the White and Black or African American groups. Data incorporate updated Census 2000-based population controls.
