EMPLOYER COSTS FOR EMPLOYEE COMPENSATION—SEPTEMBER 2008

Employer costs for employee compensation for civilian workers averaged \$28.87 per hour worked in September 2008, the U.S. Department of Labor's Bureau of Labor Statistics reported today. Wages and salaries, which averaged \$20.13, accounted for 69.7 percent of these costs, while benefits, which averaged \$8.74, accounted for the remaining 30.3 percent. Employer costs averaged \$2.42 for insurance benefits (life, health, and disability insurance) or 8.4 percent of total compensation. In addition to insurance, the other benefit categories were: legally required benefits, including Social Security, Medicare, unemployment insurance, and workers' compensation, which averaged \$2.27 (7.9 percent of total compensation); paid leave benefits (vacations, holidays, sick leave, and personal leave), which averaged \$2.03 (7.0 percent); retirement and savings, which averaged \$1.28 per hour (4.4 percent of total compensation); and supplemental pay (overtime and premium, shift differentials, and nonproduction bonuses), which averaged 75 cents per hour worked (2.6 percent). (See table 1.) The Employer Costs for Employee Compensation program is a product of the National Compensation Survey, which measures employer costs for wages, salaries, and employee benefits for nonfarm private and state and local government workers.

State and local government employers spent an average of \$13.41 for benefits for every hour worked in September 2008, which accounted for 34.2 percent of total compensation. (See table 3.) Private industry employers averaged \$7.93 for benefits or 29.3 percent of total compensation. (See table 5.) State and local government employer costs for health benefits were higher (\$4.21) than private industry (\$1.93). Retirement and savings costs, which includes both defined benefit and defined contribution plans, were also higher for state and local government employers (\$3.09) than private employers (\$0.97).

Private industry

In September 2008, private industry employer compensation costs averaged \$27.07 per hour worked. Private industry employer wages and salaries averaged \$19.14 per hour (70.7 percent), while benefits averaged \$7.93 (29.3 percent). Private industry employer costs for paid leave averaged \$1.81 per hour worked (6.7 percent), supplemental pay averaged 82 cents (3.0 percent), insurance benefits averaged \$2.07 (7.7 percent), retirement and savings averaged 97 cents (3.6 percent), and legally required benefits averaged \$2.26 (8.3 percent) per hour worked. (See table 5.)

NOTE

Effective with the December 2008 release, compensation data aggregated across all metropolitan and nonmetropolitan areas—which currently appear in table 7—will be discontinued as a result of classification changes to metropolitan statistical areas.

Compensation costs in state and local governments

In September 2008, employer costs in state and local governments averaged \$39.18 per hour worked. State and local governments wages and salaries, averaged \$25.77 per hour (65.8 percent), while benefits, averaged \$13.41 (34.2 percent). Among state and local government employees, average hourly compensation costs were higher for management, professional, and related occupations (\$48.21) than for service occupations (\$28.56) and sales and office occupations (\$26.69). Wages and salaries averaged \$32.80 per hour worked for management, professional, and related occupations; \$17.30 for service occupations; and \$16.49 for sales and office occupations. Wages and salaries accounted for 60.6 percent of total compensation for service employees and 61.8 percent for sales and office employees; for management, professional, and related employees, wages and salaries represented a significantly higher proportion of total compensation (68.0 percent). (See tables 3 and 4.)

For state and local government employees, employer costs for insurance benefits ranged from \$3.55 per hour, or 12.4 percent of total compensation for service occupations, to \$4.89 per hour worked, or 10.1 percent of total compensation for management, professional, and related occupations. For sales and office occupations, employer insurance costs averaged \$3.97 or 14.9 percent of compensation. The largest component of insurance costs was health insurance, which averaged \$4.21, or 10.8 percent of total compensation for state and local government employees.

In September 2008, the average cost for retirement and savings benefits was \$3.09 per hour worked in state and local governments (7.9 percent of total compensation). Included in this amount were employer costs for defined benefit plans, which averaged \$2.75 per hour (7.0 percent), and defined contribution plans, which averaged 34 cents (0.9 percent). Defined benefit plans specify a formula for determining future benefits, while defined contribution plans specify employer contributions but do not guarantee the amount of future benefits.

A major component of benefit costs is paid leave, including vacations, holidays, sick leave, and personal leave. The average cost for paid leave was \$3.25 per hour worked for state and local government employees. Among occupational groups, the average cost for paid leave for management, professional, and related workers was \$3.85, significantly higher than the costs for sales and office workers, which averaged \$2.42, and for service workers, which averaged \$2.56.

Costs for legally required benefits, including Social Security, Medicare, unemployment insurance (both state and federal), and workers' compensation, averaged \$2.33 per hour worked for state and local government employees. The average cost for management, professional, and related workers was \$2.71 per hour worked (5.6 percent of total compensation); greater than the costs for sales and office workers which averaged \$1.68 (6.3 percent), and service workers which averaged \$1.87 (6.6 percent).

The National Compensation Survey produces comprehensive data on the percentage of state and local government workers with access to and participation in employee benefit plans, including health and retirement and savings plans. State and local government benefits data were released in March 2008 and are available at <http://www.bls.gov/news.release/ebs3.nr0.htm>.

Note

The Employer Costs for Employee Compensation for December 2008 is scheduled to be released Thursday, March 12, 2009, at 10:00 AM EDT.

Chart A. Relative importance of employer costs for employee compensation, September 2008

Compensation component	Civilian workers	State and local government	Private industry
Wages and salaries	69.7%	65.8%	70.7%
Benefits	30.3	34.2	29.3
Paid leave	7.0	8.3	6.7
Supplemental pay	2.6	0.9	3.0

¹ Includes workers in the private nonfarm economy excluding households and the public sector excluding the Federal government.

² Includes mining, construction, and manufacturing. The agriculture, forestry, farming, and hunting sector is excluded.

³ Includes utilities; wholesale trade; retail trade; transportation and warehousing; information; finance and insurance; real estate and rental and leasing; professional and technical services; management of companies and enterprises; administrative and waste services; educational services; health care and social assistance; arts, entertainment and recreation; accommodation and food services; other services, except public administration; and

public administration.

⁴ Includes premium pay for work in addition to the regular work schedule (such as overtime, weekends, and holidays).

⁵ Cost per hour worked is \$0.01 or less.

⁶ Less than .05 percent.

⁷ Comprises the Old-Age, Survivors, and Disability Insurance (OASDI) program.

Note: The sum of individual items may not equal totals due to rounding.

¹ This table presents data for the three major occupational groups in State and local government: management, professional, and related occupations, including teachers; sales and office occupations, including clerical workers; and service occupations, including police and firefighters.

² Service-providing industries, which include health and educational services, employ a large part of the State and local government workforce.

³ Includes premium pay for work in addition to the regular work schedule

(such as overtime, weekends, and holidays).

⁴ Comprises the Old-Age, Survivors, and Disability Insurance (OASDI) program.

⁵ Cost per hour worked is \$0.01 or less.

⁶ Less than .05 percent.

Note: The sum of individual items may not equal totals due to rounding.

Table 4. Employer costs per hour worked for employee compensation and costs as a percent of total compensation: State and local government workers, by occupational and industry group, September 2008

Series	Total compensation	Wages and salaries	Benefit costs					
			Total	Paid leave	Supplemental pay	Insurance	Retirement and savings	Legally required benefits

¹ Includes mining, construction, and manufacturing. The agriculture, forestry, farming, and hunting sector is excluded.

² Includes utilities; wholesale trade; retail trade; transportation and warehousing; information; finance and insurance; real estate and rental and leasing; professional and technical services; management of companies and enterprises; administrative and waste services; educational services; health care and social assistance; arts, entertainment and recreation; accommodation and food services; other services, except public administration; and public administration.

³ Includes utilities; wholesale trade; retail trade; transportation and warehousing; information; finance and insurance; real estate and rental and leasing; professional and technical services; management of

companies and enterprises; administrative and waste services; educational services; health care and social assistance; arts, entertainment and recreation; accommodation and food services; and other services, except public administration.

⁴ Includes premium pay for work in addition to the regular work schedule (such as overtime, weekends, and holidays).

⁵ Cost per hour worked is \$0.01 or less.

⁶ Less than .05 percent.

⁷ Comprises the Old-Age, Survivors, and Disability Insurance (OASDI) program.

Note: The sum of individual items may not equal totals due to rounding.

¹ Data are available beginning with December 2006.

Note: The sum of individual items may not equal totals due to rounding.

TECHNICAL NOTE

Employer Costs for Employee Compensation (ECEC) measures the average cost to employers for wages and salaries and benefits per employee hour worked.

Wages and salaries are defined as the hourly straight-time wage rate or, for workers not paid on an hourly basis, straight-time earnings divided by the corresponding hours. Straight-time wage and salary rates are total earnings before payroll deductions and include production bonuses, incentive earnings, commission payments, and cost-of-living adjustments. Not included in straight-time earnings are nonproduction bonuses such as end-of-year payments, shift differentials, and premium pay for overtime and for work on weekends and holidays; these payments are included in the benefits component.

Benefits include: Paid leave—vacations, holidays, sick leave, and personal leave; supplemental pay—premium pay for work in addition to the regular work schedule (such as overtime, weekends and holidays), shift differentials, and nonproduction bonuses (such as referral bonuses and attendance bonuses); insurance benefits—life, health, short-term disability, and long-term disability; retirement and savings benefits—defined benefit and defined contribution plans; and legally required benefits—Social Security, Medicare, federal and state unemployment insurance, and workers' compensation.

In June 2008, the former other leave benefit was changed to include only paid personal leave. Paid personal leave accounts for the majority of the cost of the prior other leave benefit category. The National Compensation Survey will no longer collect costs for paid military leave, paid funeral leave, paid jury leave, and paid family leave (access data will still be available on these benefits).

Employer Costs for Employee Compensation includes data for the civilian economy, which includes data from both private industry and state and local government. Excluded from private industry are the self-employed and farm and private household workers. Federal government workers are excluded from the public sector. The private industry series and the state and local government series provide data for the two sectors separately.

The cost levels for this quarter were collected from a probability sample of approximately 56,000 occupations selected from a sample of about 12,000 establishments in private industry and approximately 11,800 occupations from a sample of about 1,900 establishments in state and local governments. The state and local government sample, which is replaced less frequently than the private industry sample, was replaced in its entirety in September 2007. The private industry sample is rotated over approximately 5 years, which makes the sample more representative of the economy and reduces respondent burden. Data are collected for the pay period including the 12th day of the survey months of March, June, September, and December. The sample is replaced on a cross-area, cross-industry basis.

When respondents do not provide all the data needed, a procedure for assigning missing values is used. This imputation procedure is comparable to that used for the Employment Cost Index (ECI). For a description, see "Accounting for missing data in the Employment Cost Index," in the April 2006 issue of the Monthly Labor Review at <http://www.bls.gov/opub/mlr/2006/04/art4abs.htm>.

The ECEC percent of total compensation estimates are calculated from cost aggregates and then rounded to the published level of precision. This method provides the most precise estimates of the percent of total compensation; however, estimates of the percentage of total compensation calculated from the published cost estimates may differ slightly from those calculated from the unpublished cost aggregates.

Sample establishments are classified by the industry categories based on the 2007 North American Industry Classification System (NAICS). Prior to December 2007, the 2002 NAICS classification system was used. Differences between the two NAICS systems did not affect any of the published series. Within a sample

establishment, specific job categories are selected and classified into about 800 occupational classifications according to the 2000 Standard Occupational Classification (SOC) system. Individual occupations are combined to represent one of ten intermediate aggregations, such as professional and related occupations, or one of five higher-level aggregations such as management, professional, and related occupations. Both the NAICS and the SOC classification systems are defined by the U.S. Office of Management and Budget (OMB). For more detailed information on NAICS and SOC, including background definitions, see the BLS Web sites: www.bls.gov/bls/naics.htm and www.bls.gov/soc/home.htm.

To be included in the ECEC, employees in occupations must receive cash payments from the establishment for services performed and the establishment must pay the employer's portion of Medicare taxes on that individual's wages. Major exclusions from the survey are the self-employed, individuals who set their own pay (for example, proprietors, owners, major stockholders, and partners in unincorporated firms), volunteers, unpaid workers, family members being paid token wages, individuals receiving long-term disability compensation, and U.S. citizens working overseas.

The state and local government sample consists of 152 areas that represent the Nation's 361 metropolitan statistical areas and 573 micropolitan statistical areas as defined by OMB in December 2003 and the remaining portions of the 50 states. The private industry sample consists of 151 metropolitan areas and nonmetropolitan areas that represent the Nation's 326 metropolitan statistical areas as defined by OMB in 1994 and the remaining portions of the 50 states. Metropolitan areas are defined as Metropolitan Statistical Areas (MSAs) or Consolidated Metropolitan Statistical Areas (CMSAs). Nonmetropolitan areas are counties and other geographic designations that do not fit the metropolitan area definition. The private industry sample will begin the conversion to December 2003 OMB area definitions in December 2008.

Current employment weights are used to calculate cost levels. These weights are derived from two BLS programs: the Quarterly Census of Employment and Wages (QCEW) and the Current Employment Statistics (CES). Combined, these programs provide the appropriate industry coverage and currency of data needed to match the ECEC. For more information on these changes, see "Changes in Calculations for the BLS Employer Costs for Employee Compensation Data, March 2007," at <http://www.bls.gov/ncs/ect/sp/ececcalc.pdf>. In most instances, private industry employment weights used in the ECEC were total employment estimates for 2-digit industry groups, such as utilities (NAICS 22) or wholesale trade (NAICS 42). In a few cases, more detailed private industry employment weights were used. These include 4-digit educational establishments—elementary and secondary schools (6111), junior colleges (6112), and colleges and universities (6113)—as well as the 6-digit aircraft manufacturing industry (336411). For state and local governments, a more aggregated level was used reflecting the level of detail published by the CES program. For both private and government establishments, the employment data were apportioned based on the sampling weights assigned to the Employment Cost Index (ECI) sample.

The ECI, which measures the change in employer costs for employee compensation, is calculated with fixed 2002 employment counts to prevent employment shifts among occupations and industries from influencing the changes. Therefore, changes over time in the Employer Costs for Employee Compensation survey will differ from those in the ECI.

Historical ECEC data are available in three listings, all available at: <http://www.bls.gov/ect/#tables>. The first historical listing covers data for the March reference periods from 1986 to 2001. These data use the Standard Industrial Classification (SIC) and Census of Population classification systems. The second listing contains data for the March, June, September, and December reference periods from March 2002 to December 2003. These data also are based on the SIC and Census of Population classification systems. The final listing includes data for March 2004 to the current reference period. These are based on the NAICS and SOC classification systems. Also, data and related articles are included in the bulletin, [Employer Costs for Employee](#)

Compensation, 1986-99 (Bulletin 2526), available upon request by calling (202) 691-6199 or by email to: NCSinfo@bls.gov.

Beginning with the March 2004 quarter, historical data are available based on the North American Industry Classification System and the 2000 Standard Occupational Classification. The new historical tables are available on the Internet site <http://www.bls.gov/ncs/ect/home.htm> or upon request. Information on how costs are calculated appears in "Measuring Trends in the Structure and Levels of Employer Costs for Employee Compensation," Compensation and Working Conditions, Summer 1997, at <http://www.bls.gov/opub/cwc/archive/summer1997art1.pdf>. An article on changes in employer compensation costs, "Tracking Changes in Benefit Costs," appears in Compensation and Working Conditions, Spring 1999, at <http://www.bls.gov/opub/cwc/archive/spring1999brief3.pdf>.

Relative Standard Errors

Because the ECEC is a sample survey, it is subject to sampling errors. Sampling errors are differences that occur between the results computed from a sample of observations and those computed from all observations in the population. The estimates derived from different samples selected using the same sample design may differ from one another. A measure of the variation among these differing estimates is the standard error. It can be used to measure the precision with which an estimate from a particular sample approximates the expected result of all possible samples. For more information on the calculation procedure, see "Changes in Variance Estimation Calculations for the BLS Employer Costs for Employee Compensation Data, March 2007," at <http://www.bls.gov/ncs/ect/sp/ececvmet.pdf>. The chances are about 68 out of 100 that an estimate from the survey differs from a complete population figure by less than the standard error. The chances are about 90 out of 100 that this difference would be less than 1.6 times the standard error. All the statements of comparisons appearing in this publication are significant at a 1.6 standard error level or better, unless otherwise indicated. This means that for differences cited, the estimated difference is greater than 1.6 times the standard error of the difference. The relative standard errors (RSE) for all estimates are available shortly after the release is issued at <http://www.bls.gov/ncs/ect/#tables>.

For a more detailed explanation of relative standard errors, see "Measuring Trends in the Structure and Levels of Employer Costs for Employee Compensation," Compensation and Working Conditions, Summer 1997, at <http://www.bls.gov/opub/cwc/archive/summer1997art1.pdf>. For a detailed explanation of how to use standard error data to analyze differences in changes over time, see "Analyzing Year-to-Year Changes in Employer Costs for Employee Compensation," Compensation and Working Conditions, Spring 1998, at <http://www.bls.gov/opub/cwc/archive/spring1998art3.pdf>. This article supplements an article from the Summer 1997 issue of Compensation and Working Conditions, "Explaining the Differential Growth Rates of the ECI and ECEC," available at <http://www.bls.gov/opub/cwc/archive/summer1997art2.pdf>, which examined how differences in the construction of these measures contribute to differing trends.

Standard errors relate to differences that occur from sampling errors, but not from nonsampling errors. Nonsampling errors are not measured and include survey nonresponse and data collection and processing errors. Survey nonresponse occurs when sample members are unwilling or unable to participate in the survey. Data collection errors include inaccurate data by respondents and definitional difficulties. Processing errors include errors in recording, coding, and entering data. Although nonsampling errors are not measured, BLS quality assurance programs include procedures for reducing such errors. These procedures include data collection reinterviews, observed interviews, computer data edits, and systematic review of reports on which data are recorded. Extensive field economist training also is conducted to maintain high data collection standards.

Comparing private and public sector data

Aggregate compensation cost levels in state and local government should not be directly compared with those in private industry. Differences between these sectors stem from factors such as variation in work activities and occupational structures. Manufacturing and sales, for example, make up a large part of private industry work activities but are rare in state and local government. Professional and administrative support occupations (including teachers) account for two-thirds of the state and local government workforce, compared with one-half of private industry.

A detailed examination of differences in compensation levels and trends between private industry and state and local government may be found in “Cost of Employee Compensation in Public and Private Sectors,” Monthly Labor Review, May 1993, on the BLS Internet site <http://www.bls.gov/opub/mlr/1993/05/contents.htm> and “Compensation Cost Trends in Private Industry and State and Local Governments,” Compensation and Working Conditions, Fall 1999, at <http://www.bls.gov/opub/cwc/archive/fall1999art2.pdf>.

Obtaining information

Articles, bulletins, and other information may be obtained by calling (202) 691-6199, sending e-mail to NCSinfo@bls.gov, or visiting the Internet site <http://www.bls.gov/ect>. Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service Number: 1-800-877-8339.
