

TABLE S12. Industries¹ with the highest number of nonfatal illness cases of disorders associated with repeated trauma, private industry, 2001

Industry	SIC code ²	Number (000s)	
		2000	2001
Motor vehicles and equipment	371	39.3	³ 35.0
Meat products	201	25.2	³ 21.8
Hospitals	806	8.2	7.8
Aircraft and parts	372	6.0	5.8
Grocery stores	541	5.4	3.7
Air transportation, scheduled	451	3.0	3.2
Electronic components and accessories	367	3.0	3.1
Computer and data processing services	737	2.0	3.0
Miscellaneous plastics products, n.e.c.	308	4.7	³ 2.9
Telephone communications	481	3.6	2.9
Medical instruments and supplies	384	3.0	2.7
Offices and clinics of medical doctors	801	3.3	2.7
Medical service and health insurance	632	2.9	2.7
Miscellaneous electrical equipment & supplies	369	2.5	2.6
Fire, marine, and casualty insurance	633	2.7	2.5
Metal forgings and stampings	346	3.9	³ 2.3
Commercial banks	602	2.1	2.3
Household furniture	251	1.8	2.0
Private industry⁴		241.8	³216.4

¹ Industries with the highest number of illness cases of disorders associated with repeated trauma were determined by analysis of the number of cases at the 3-digit SIC code level. The analysis included those 3-digit industries which reported at least 2,000 cases of disorders associated with repeated trauma.

² *Standard Industrial Classification Manual*, 1987 Edition.

³ A statistical significance test indicates that the difference between the 2001 count and the 2000 count is statistically significant at the 95 percent

confidence level.

⁴ Excludes farms with fewer than 11 employees.

NOTE: The n.e.c. abbreviation means that the category includes those components not elsewhere classified.
