

The National Assessment of Educational Progress (NAEP) assesses reading on a 0-500 point scale. In 2007, San Diego City Unified School District was one of eleven urban districts that voluntarily participated in the NAEP reading assessment on a trial basis.

Overall Reading Results for San Diego

- In 2007, the average scale score for eighth-grade students in San Diego was 250. This was not significantly different from their average score in 2005 (253) and was not significantly different from their average score in 2003 (250).¹
- San Diego's average score (250) in 2007 was not significantly different from that of public schools in large central cities² (250).
- The percentage of students in San Diego who performed at or above the NAEP *Proficient* level was 23 percent in 2007. This percentage was not significantly different from that in 2005 (23 percent) and was not significantly different from that in 2003 (20 percent).
- The percentage of students in San Diego who performed at or above the NAEP *Basic* level was 60 percent in 2007. This percentage was not significantly different from that in 2005 (63 percent) and was not significantly different from that in 2003 (60 percent).

Percentages at NAEP Achievement Levels and Average Score

NOTE: The NAEP grade 8 reading achievement levels correspond to the following scale points: Below *Basic*, 242 or lower; *Basic*, 243–280; *Proficient*, 281–322; *Advanced*, 323 or above.

Performance of NAEP Reporting Groups in San Diego: 2007

Reporting groups	Percent of students ³	Average score	Percent below <i>Basic</i>	Percent of students at or above		Percent <i>Advanced</i>
				<i>Basic</i>	<i>Proficient</i>	
Male	49	244 ↓	47	53	18	1
Female	51	256	33	67	27	2
White	26	271	18	82	42	3
Black	12	240	52	48	10	#
Hispanic	45	235	55	45	11	#
Asian/Pacific Islander	16	265	22	78	35	3
American Indian/Alaska Native	#	‡	‡	‡	‡	‡
Eligible for National School Lunch Program	57	236	54	46	12	1
Not eligible for National School Lunch Program	43	268	21	79	37	3

Average Score Gaps Between Selected Groups

- In 2007, male students in San Diego had an average score that was lower than that of female students by 12 points. In 2003, the average score for male students was lower than that of female students by 12 points.
- In 2007, Black students had an average score that was lower than that of White students by 31 points. In 2003, the average score for Black students was lower than that of White students by 33 points.
- In 2007, Hispanic students had an average score that was lower than that of White students by 36 points. In 2003, the average score for Hispanic students was lower than that of White students by 31 points.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 32 points. This performance gap was wider than that of 2003 (22 points).
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 53 points. In 2003, the score gap between students at the 75th percentile and students at the 25th percentile was 49 points.

Reading Scores at Selected Percentiles

NOTE: Scores at selected percentiles on the NAEP reading scale indicate how well students at lower, middle, and higher levels performed.

Rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2007.

↑ Significantly higher than 2005. ↓ Significantly lower than 2005.

¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in San Diego were 3 percent and 2 percent in 2007, respectively. For more information on NAEP significance testing see <http://nces.ed.gov/nationsreportcard/reading/interpret-results.asp#statistical>.

² "Large central city" includes public schools located in large central cities (population 250,000 or more) within metropolitan statistical areas as defined by the federal Office of Management and Budget. It is not synonymous with "inner city."

³ For comparison, non-White students comprised 77 percent of students in large central city public schools and 42 percent in public schools nationally at grade 8. Also, students eligible for free/reduced-price school lunch comprised 64 percent of students in large central city public schools and 40 percent in public schools nationally.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/reading/tuda.asp> for additional results and detailed information.
