FCC RELEASES 2002 INTERNATIONAL TRAFFIC DATA

Washington, D.C. -- The Federal Communications Commission (FCC) today released a report entitled *2002 International Telecommunications Data*.

Traffic between the United States and other countries is reported on a country-by-country basis for international message telephone and private line services. Carriers were required to file their 2002 data by July 31, 2003, and revisions by October 31, 2003. For categorizing traffic, a facilities-based carrier is one that provides service using its own international transmission facilities, while a facilities-resale carrier is a carrier that provides service utilizing international circuits leased from other reporting international carriers.

Statistical Findings

- U.S. facilities-based and facilities-resale carriers billed for 35.1 billion minutes of telephone service in 2002, up from 33.3 billion in 2001- a 5% increase.
- In 2002, fifty-six U.S. facilities-based and facilities-resale carriers reported that they billed \$9.3 billion for international telephone service, \$988 million for private line services and \$113 million for international other miscellaneous services, compared to \$10.8 billion, \$1.5 billion, and \$210 million, respectively, in 2001. An additional eleven carriers requesting confidential treatment reported that they billed \$933 million in the above categories in 2002.
- U.S. and foreign carriers compensate each other for completed calls. Because U.S. customers place more calls than do foreign customers, U.S. carriers make net payments to foreign carriers. The net amount increased 6% in 2002, going from \$3.5 billion in 2001 to \$3.7 billion. In 2002, carriers retained 18% less international revenues. Carriers reported \$7.7, and \$9.4 billion retained revenues, respectively, in 2002 and 2001.
- In addition to the above, 706 carriers reported that they provided international message telephone service on a pure resale basis. Pure resale providers resell the services of underlying U.S. facilities-based and facilities-resale carriers. These pure resale providers billed customers \$4.9 billion for 27.4 billion minutes. The figures include twenty pure resale providers requesting confidential treatment. For comparative purposes, in 2001, 628 pure resale providers reported that they billed \$5.3 billion for 24.3 billion minutes.

The report is available for reference in the FCC's Reference Information Center at 445 12th Street, S.W., Courtyard Level, Washington, D.C. 20554. Copies may be purchased by contacting the FCC's duplicating contractor, Qualex International, Portals II, 445 12th Street, S.W., Room CY-B402, Washington D.C. 20554, telephone 202-863-2893, facsimile 202-863-2898, or via e-mail qualexint@aol.com. The report can also be downloaded from the **FCC-State Link** Internet site at www.fcc.gov/wcb/iatd/stats.html.

2002 International Telecommunications Data

March 2004

Introduction

This is the Federal Communications Commission's (FCC's) annual compilation regarding telecommunications service between the United States and international points during the year 2002. The last report was released January 23, 2003.* The data are compiled from reports submitted to the FCC by U.S. carriers pursuant to Section 43.61 of the Commission's rules. Section 43.61(a) directs carriers to file reports by July 31 that summarize international telecommunications service provided during the preceding calendar year. Carriers submit their final data for the preceding calendar year by October 31. The specific filing requirements are set forth in the *Manual for Filing Section 43.61 Data* (June 1995), which governs filings beginning with the 1995 international traffic data.

The Commission summarizes these filings in statistical reports. The statistical reports are used to monitor competition in international telecommunications markets. These reports are also used by the United States to develop and support policies and positions in discussions with foreign governments and international standards organizations, and by the telecommunications industry for facilities planning.

Statistical Findings

- In 2002, fifty-six U.S. facilities-based and facilities-resale (see definitions on page 4) carriers reported that they billed \$9.4 billion for international telephone service, \$988 million for private line services and \$113 million for international other miscellaneous services, compared to \$10.8 billion, \$1.5 billion, and \$210 million, respectively, in 2001. An additional twelve carriers requesting confidential treatment reported that they billed \$949 million in the above categories in 2002.
- U.S. billed minutes of telephone service increased 8% from 2001. U.S. facilities-based and facilities-resale carriers billed for 36.0 billion minutes of telephone service in 2002, and 33.3 billion in 2001.
- U.S. and foreign carriers compensate each other for completed calls. Because U.S. customers place more calls than do foreign customers, U.S. carriers make net payments to foreign carriers. The net amount increased 9% in 2002, to \$3.8 billion. Carriers reported \$3.5 billion net payments to foreign carriers in 2001. In 2002, carriers retained 18% less international revenues. Carriers reported \$7.7, and \$9.4 billion retained revenues, respectively, in 2002 and 2001.
- In addition to the above, 710 carriers reported that they provided international message telephone service on a pure resale basis. Pure resale providers resell the services of underlying U.S. facilities-based and facilities-resale carriers. These pure resale providers billed customers \$5.1 billion for 30.4 billion minutes. The figures include twenty-one pure resale providers requesting confidential treatment. For comparative purposes, in 2001, 628 pure resale providers reported that they billed \$5.3 billion for 24.3 billion minutes.

Figure 1 summarizes the traffic and revenue data reported by all U.S. facilities-based and facilities-resale carriers for 2002, but does not include pure resale service. These categories are explained below.

* Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *2001 International Telecommunications Data* (January 23, 2003).

Revised: June 3, 2004

Figure 1

2002 Data	Traffic*	Revenues Billed by U.S. Carriers (millions)	Net Settlements with Foreign Carriers (millions)	Net Retained Revenues** (millions)
Message Telephone	49,665	\$9,446	(\$2,981)	\$6,465
Private Line	15,415	988	None	988
International Other Miscellaneous***	Not meaningful	113	4	117
Total****	Not meaningful	\$11,496	(\$3,791)	\$7,705

* The following traffic measures are shown in the table:

For message telephone, millions of minutes; for private line, number of circuits.

Message and word counts include both U.S. billed traffic and foreign billed traffic that terminates in the United States, but excludes most traffic that transits the United States.

** Net U.S. carrier revenues equal billed revenues plus settlement amounts receivable from foreign carriers less amounts due to foreign carriers. See Figure 4, below. Detail may not match totals because of necessary roundings.

*** In 2002, recognizing the *de minimis* nature of associated revenues and burden to file, the Commission granted WorldCom, Inc.'s (d/b/a MCI) request not to report its miscellaneous other international telex and telegraph services. The Commission, however, did require the carrier to retain the data for telex and telegraph services for two years from the date of the Commission's response to the carrier's waiver request (i.e., until August 4, 2005). Other carriers that previously reported providing telex or telegraph service explained that they had either sold or discontinued their international telex and telegraph operations. As a result, there are no data reported on a facilities-based/facilities-resale basis for miscellaneous other international telex and telegraph services in 2002. Pure resale miscellaneous other international services are located in Section D (Pure Resale Services Page 18).

**** Total above includes \$949 million billed revenues, \$814 million net settlements, and \$135 million net revenues for twelve facilities-based and facilities-resale carriers requesting confidential treatment in the above categories.

Reporting Requirements

Different levels of reporting are used for different categories of service. Figure 2 shows that carriers must report traffic and revenues on a country-by-country basis for the most commonly used communications services.

Figure 2

Service	Level of reporting for traffic and revenues for larger U.S. points *

<p>Facilities-Based and Facilities-Resale Services</p> <p>Private Line Services</p>	<p>Country-by-country</p>
<p>Pure Resale Services (resale of underlying carrier switched services)</p>	<p>World totals</p>
<p>* Carriers may file world totals in lieu of country-by-country data for the smaller U.S. points identified in Figure 5.</p>	

International services are provided either on a facilities-based, facilities-resale, or pure resale basis. For categorizing traffic, **facilities-based** refers to services provided using international transmission facilities owned in whole or in part by the carrier providing the service. Facilities-based carriers use one or more international channels of communications to provide international telecommunications service. An international channel is a wire or radio link that facilitates electronic communications between a U.S. point and a point outside the domestic United States (see Figure 5, below). A facilities-based carrier either owns international channels, has an ownership interest in the channel such as an indefeasible right of use (IRU), or leases the channel from an entity that does not report those circuits in its own Section 43.61 reports. For categorizing traffic, **facilities-resale** refers to services provided by a carrier utilizing international circuits leased from other reporting international carriers. The determination as to whether international private line services are reported as facilities-based or facilities-resale generally is based on the first international link of a circuit. If the carrier has an ownership interest in that link, or leases it from an entity that does not report that link, then service provided over that circuit will be reported as facilities-based. Otherwise, the international private line service should be reported as facilities-resale.

Carriers provide **pure resale** services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic, and report the traffic on a country-by-country basis in their own Section 43.61 reports. Switchless resellers generally operate on a pure resale basis. A switchless reseller, however, could lease international circuits and operate on an international simple resale (ISR) basis. Figure 2 shows that there are reduced reporting requirements for services provided on a pure resale basis. Some carriers report traffic carried over circuits that they own and those that they lease from other carriers, as well as traffic that they handle on a pure resale basis (i.e., by reselling the switched services of underlying carriers). These carriers report detailed data for traffic that they carry over owned and resold circuits and summary data for switched traffic that they route to other U.S. carriers. Section D of this report has information on pure resale services. In 2002, 710 carriers reported that they provided international message telephone service on a pure resale basis. These pure resale providers billed customers \$5.1 billion for 30.4 billion minutes. Twenty-four of these pure resale providers also reported international facilities-based and facilities-resale services.

Starting with the 1991 data filings, carriers were required to file facilities-based traffic separately from pure resale traffic. Facilities-resale traffic was not separated from facilities-based traffic. Beginning with the 1995 data filings, carriers were required to provide separate switched service and private line data for facilities-based and facilities resale services. At that time, a few carriers were offering ISR services, which at that time consisted of telephone services provided over resold private lines, i.e. on a facilities-resale basis. The Commission subsequently allowed carriers to provide ISR services using owned circuits as well as resold circuits. Beginning with the 1997 data filings, carriers were required to separate switched services data by the financial arrangements made with carriers in foreign countries for terminating that traffic. Carriers now classify traffic as traditional settlement with proportionate return, and international simple resale

Revised: June 3, 2004

including traffic hubbed through an intermediate foreign country. Carriers continue to separately report facilities-based and facilities-resale private line services.

Carriers must report switched traffic in three broad categories: U.S. billed; foreign billed; and transiting. **U.S. billed** traffic includes all traffic billed by U.S. carriers, and includes most calls that originate in the United States, calls that are placed collect or "caller toll-free" to the United States, U.S. carrier "country-beyond" and "country-direct" calls, and U.S. carrier reorigination traffic.

Country-direct and **country-beyond services** are U.S. carrier offerings that allow customers in foreign locations to route calls through U.S. carrier facilities to reach the United States (country-direct) or any world point (country-beyond). Country-direct and country-beyond services rely on alternative billing arrangements, such as credit cards, and enable the customer at a foreign point to be served by a U.S. carrier rather than by a foreign carrier. Note that U.S. carriers or their affiliates may operate in foreign countries as foreign carriers. They do not report section 43.61 traffic on calls that they carry from one foreign country to another unless they carry this traffic through a U.S. point.

Reorigination traffic is billed by a foreign carrier, transits a U.S. carrier's facilities and terminates in a foreign point. Unlike traditional transiting arrangements, reorigination traffic is not settled pursuant to an accounting rate agreement between the originating and terminating carriers. Reorigination allows the foreign carrier to take advantage of the U.S. carrier's accounting rate agreement with the carrier in the terminating country. The U.S. carrier treats reorigination traffic like U.S. billed traffic when it settles with the carrier in the country of termination, and it reports this traffic as U.S. billed traffic for filing purposes.

In their public filings, carriers include country-direct, country-beyond and reorigination traffic with other U.S. billed traffic. In proprietary filings, carriers separate these services from other U.S. billed traffic. Table A1 shows that carriers reported 36.0 billion minutes of U.S. billed traffic in 2002, for which they billed \$9.4 billion. Table A41 shows that 31.2 billion of these minutes and \$8.1 billion of this revenue was for calls that originated in the United States or terminated collect or caller toll-free in the United States. Table A42 shows that 1.1 billion of these minutes and \$.8 billion of this revenue was for country-direct and country-beyond type services. Table A43 shows that 3.7 billion of these minutes and \$0.6 billion of this revenue was for reorigination services billed to foreign carriers.

Foreign billed traffic is all traffic billed by a foreign or correspondent carrier and includes most calls that originate at foreign points as well as collect and caller toll free calls placed by U.S. customers to foreign points. Foreign billed calls do not necessarily originate in the country for which the traffic is reported. In some cases, foreign carriers reoriginate traffic for other foreign carriers. U.S. carriers may not know which calls originated in a country and which calls had originated in some third country and then been reoriginated by the foreign carrier that sent the calls to the United States.

Transiting traffic is traffic that originates from an international point, is billed by a foreign

Revised: June 3, 2004

or correspondent carrier, is routed through the U.S., and terminates at an international point. Transiting traffic is reported for the country in which the service is billed. Unlike reorigination traffic, transiting traffic is settled based on the settlement rate between the actual countries of origination and destination. Cases in which U.S. carriers report both settlement receipts and settlement payments for transiting calls are where the operating agreements have cascade billing arrangements. In a cascade billing arrangement the U.S. carrier collects from the originating foreign carrier both the transit fee and the settlement amount that the originating foreign carrier will owe to the terminating foreign carrier. The U.S. carrier then makes the settlement payment.

As explained above, carriers separately report international switched telephone, telegraph, telex, and miscellaneous services based on the financial termination arrangements. **Traditional Settlement** traffic is settled according to the Commission's International Settlements Policy (ISP). See 47 C.F.R. Sections 43.51(e) and 64.1001. The settlement is based on the accounting rate, which is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route. The ISP requires nondiscriminatory accounting rates among U.S. carriers on a given route and that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. The ISP also requires that the U.S. carrier agree to accept no more than its proportionate share of return traffic from the foreign carrier. Table A39 shows that U.S. carriers reported 20.2 billion minutes of U.S. billed traditional settlement traffic in 2002, for which they billed \$4.7 billion.

ISR/Hubbed traffic is switched traffic that is routed and settled by the U.S. carrier outside the traditional settlement process and that may be carried over private lines that are interconnected to the public switched network on one or both ends of the private line. The Commission allows carriers to use ISR as a means to route U.S.-outbound and U.S.-inbound traffic between the United States and a rapidly growing number of approved countries. In many cases, U.S. carriers exchange traffic with a carrier in an approved country and that carrier "hubs" the call, i.e. terminates the call in or from a third country under a traditional settlement agreement. See 47 C.F.R. Sec. 63.17. Table A40 shows that U.S. carriers reported 15.8 billion U.S. billed ISR/Hubbed minutes of traffic in year 2002, for which they billed \$4.7 billion. U.S. carriers also reported receiving 7.1 billion foreign billed ISR/Hubbed minutes of traffic in year 2002. These figures understate the totals because the following carriers reported substantial amounts of ISR traffic as traditional: AT&T Corp. & Concert Global Networks, USA L.L.C., WorldCom, Inc. d/b/a MCI, Verizon Communications, Inc., Harris Corporation, IT&E Overseas, Inc., KDDI America, Inc., Singapore Telecom USA, Inc., Startec Global Communications Corporation, Telecom Italia North America, Inc., Telefonica Larga Distancia, Inc., and TRICOM USA, Inc. For example, while carriers reported 3.0 billion minutes of ISR traffic for Canada, and 1.1 billion minutes for the United Kingdom, they also reported 1.9 and 1.1 billion minutes of traditional settlement traffic respectively. The same problem exists for other ISR approved countries.

Revised: June 3, 2004

Figure 3 summarizes the traffic measures required for each type of service.

Figure 3

Service	Traffic measures
Message Telephone Service	Messages* and minutes**
Message Telegraph Service	Messages* and words
Teleprinter Exchange (Telex) Service	Messages* and minutes
Private Line Services	Circuits at year-end, 64-kilobit equivalent circuits at year-end, revenues for the entire year
Miscellaneous Services	Kilo segments, hours, minutes, sessions, depending on service ***
<p>* Carriers are not required to file message counts for transiting traffic.</p> <p>** Many carriers have requested proprietary treatment for country-by-country transiting minutes. Both U.S. and foreign carriers compete for transiting traffic. The minutes data would allow competitors to estimate contract revenues per minute. The published tables contain region and world totals for transiting minutes.</p> <p>*** Prior to filing 1995 data, carriers selected their own traffic measures for miscellaneous services.</p>	

For private line services, carriers report the number of actual circuits leased to customers at year-end. Beginning with their 1995 international traffic data, carriers also report these circuits in terms of voice-equivalent circuits. For lower bandwidths, this means reporting the number of 64-kilobit-per-second channels that would equal the actual circuits. An 18 megahertz video channel, however, should be reported as 240 voice-equivalent channels, a 24-megahertz video channel should be reported as 288 voice-equivalent channels, and a 36-megahertz video channel should be reported as 630 voice-equivalent channels. This is the same conversion factor used by carriers in preparing circuit data reports filed pursuant to Section 43.82 of the Commission's rules, and to calculate regulatory fees. Voice-equivalent circuits are denoted "64 K" in the attached tables.

Facilities-based U.S. and foreign carriers (often called post, telephone and telegraph administrations or PTTs) jointly provide most international services. This is not always apparent to the customer but is reflected in some of the traffic and revenue data that are filed. For switched services, one carrier collects from customers and then compensates its foreign partners through the settlement process. Compensation is based on minutes of calling and on accounting rates specified in settlement agreements. The number of minutes used for settlement purposes is

generally based on the number of conversation minutes. In many cases, accumulated seconds are used to determine the minutes used in settlements. In the case of Mexico, billed minutes are used to determine settlements. Carriers providing international simple resale and hubbed services may have settlement-like arrangements under which U.S. carriers and PTTs compensate each other for traffic that originates or terminates at foreign points.

For facilities-based and facilities-resale services, carriers must report the minutes used for settlement purposes. Prior to 1991, carriers were directed to report billed minutes, rather than settlement minutes. Billed minutes tend to be greater than settlement minutes because some carriers bill in 30-second or whole minute increments. Pure resale carriers continue to file billed minutes, since they do not participate in the settlement process, and may not have access to settlement minutes data.

Country-beyond calls have two international legs. Carriers are instructed to report both the originating and terminating legs of such calls. Consequently, approximately two minutes will be reported for each conversation minute. Each leg of the call may have settlement payments and these payments should be reported for the appropriate country. Carriers are instructed to report all of the revenues by the country in which the call originates. Country-direct and country-beyond traffic cannot be separately identified from a carrier's publicly filed data. Similarly, an individual carrier's public data include reoriginated traffic. This traffic is included for the country in which the call terminates.

For U.S. billed switched services, the tables show the amount that the customers are billed for service, the corresponding settlement amount that the carrier owes to its foreign partner, and the amount of revenues that it retains. Carriers are instructed to report the actual amount of revenues that they bill for service, net of discounts. Many carriers offer discount plans that entitle customers to discounts based on the customer's total bill. Some carriers do not recalculate discounted bill amounts on a call-by-call basis. These carriers collect country-by-country revenue totals based on non-discounted rates and must estimate the amount of discounts for each country.

For foreign billed traffic, the tables show the settlement amounts owed to U.S. carriers by foreign carriers. These amounts are referred to as "Receipts from Foreign Carriers" in the tables. In the case of transiting traffic, the U.S. carrier often receives a transit fee for itself, and a settlement amount which is owed to the terminating carrier. Thus, the tables show receipts, payouts and a net amount for transiting traffic. Figure 4 shows the revenue relationships.

Figure 4

U.S. Billed Traffic	$\begin{aligned} & \text{Billed revenues} \\ & - \text{Settlements owed to foreign carriers} \\ & = \text{U.S. carrier retained revenues} \end{aligned}$
Foreign Billed Traffic	$\begin{aligned} & \text{Settlements due from foreign carriers} \\ & = \text{U.S. carrier retained revenues} \end{aligned}$
Transiting Traffic	$\begin{aligned} & \text{Transit fee and settlements due from foreign} \\ & \text{carriers} \\ & - \text{Settlements owed to foreign carriers} \\ & = \text{U.S. carrier retained revenues} \end{aligned}$
Total	$\begin{aligned} & \text{Retained revenues for U.S. billed} \\ & + \text{Retained revenues from foreign billed} \\ & + \text{Retained revenues from transiting} \\ & = \text{Total U.S. carrier retained revenues} \end{aligned}$

U.S. carriers report the number of private line circuits actually leased at year-end. Financial arrangements for private line services are different than for public switched services. The U.S. carrier provides the circuit to a theoretical mid-point, and the foreign partner provides the remainder of the circuit. In some cases, each carrier bills for its half of the service; in other cases, one carrier acts as the collection agent. Unlike message telephone service, where the rate covers the whole cost of the call, the U.S. carrier's private line rate covers only the half-circuit to the theoretical mid-point. The filing manual states that U.S. carriers must report the amount of private line revenues that they record for their half of the service, regardless of who actually collects the revenues. U.S. carriers should not report revenues that they collect on behalf of the foreign carriers or amounts that they bill for services that they provide in foreign countries.

International points are grouped into ten regions for reporting purposes. The regions include all countries of the world as well as three maritime classifications -- the Atlantic, Pacific, and other oceans. In some cases, international points have been grouped outside the geographic region for reporting purposes. For example, the Azores and Madeira Islands are included with Portugal. Any data reported to these points are included with Portugal traffic and are summarized with Western Europe traffic in the tables. (See *International Points Used for FCC Reporting Purposes*, April 1994.)

Carriers are required to file separate data for each U.S. point that they serve. Alaska and Hawaii, for example, are considered distinct U.S. points for this purpose. Figure 5 identifies the U.S. points used for reporting purposes. Carriers serving larger U.S. points are required to file detailed country-by-country data on computer disk. Carriers serving smaller U.S. points may file world totals in lieu of country-by-country data. In a few instances, carriers have obtained waivers so that they can consolidate data for Hawaii and the conterminous United States.

Figure 5

Reporting Requirements for Facilities-Based Service	
Larger U.S. points for which carriers file country-by-country data	Smaller U.S. points for which carriers file world total data
<u>Domestic U.S. points</u> Alaska Conterminous U.S.* Hawaii Puerto Rico	American Samoa Baker Island Howland Island Jarvis Island Johnston Atoll Kingman Reef Midway Atoll Navassa Island Northern Mariana Islands Palmyra Atoll Wake Island
<u>Other U.S. points</u> Guam U.S. Virgin Islands	
* The conterminous United States consists of data from the 48 contiguous states and the District of Columbia.	

Figure 5 shows which U.S. points are classified as **domestic** and which are classified as **other**. Calls between domestic U.S. points are considered domestic and therefore are not reported. Calls between domestic U.S. points and other U.S. points are defined as international and are reported. For example, a directly dialed call originating in Guam and terminating in Hawaii is reported by the carrier serving Guam as U.S. billed traffic to Hawaii. The carrier serving Hawaii reports this same call as a foreign billed call from Guam. Thus, our aggregate call statistics double-count both the call and the associated minutes. Table A1 shows that U.S. carriers reported 6.1 billion calls between the U.S. and international points. Of these calls, 32 million (less than 1%) were reported for traffic between U.S. points. Thus, the double-counting is small when compared to the overall number of calls.

Presentation of Data

Figure 6 lists the carriers whose data are presented in the attached tables. Figure 7 summarizes the billed revenue data contained in the tables, and Figure 8 summarizes the net revenue data contained in the tables -- that is, billed revenues net of settlement payments. Figure 9 summarizes international message telephone service for the three largest carriers (AT&T, Sprint, and WorldCom, Inc.) for 1992 through 2002.

The Section 43.61 data have been summarized for all reporting carriers and for all U.S. points. Some tables show totals for all carriers serving individual U.S. points. Other tables show

Revised: June 3, 2004

totals for all data filed by individual carriers. Data have been consolidated where a holding company owns more than one carrier. For example, the data Verizon Communications, Inc. reported for its subsidiary, Verizon Pacifica, have been consolidated and included with other Verizon Communications, Inc. data.

The country-by-country data are presented by region of the world. The foreign points are listed alphabetically in each region, followed by U.S. points listed alphabetically. As noted above, the data for U.S. points shown in the regional breakdowns represent traffic between those points and other U.S. points, as reported by carriers that file country-by-country data. Carriers serving smaller U.S. points file world totals for international traffic. Those totals for all international points are shown separately, following the regional data. Thus, some smaller U.S. points appear twice in the tables. Those totals for smaller U.S. points are included in the total traffic reported for foreign points even though some of that traffic was carried between U.S. points.

U.S. carriers are required to file message counts for switched services that originate or terminate at a U.S. point. They are not required to provide message counts for traffic that transits U.S. points. Carriers have ready access to message counts for traffic that they bill, but sometimes have difficulty obtaining message counts for traffic billed by foreign telephone companies. As noted in Figure 3, transiting minutes are not being published on a country-by-country basis. Region totals are provided for those regions where transiting traffic is carried from more than one country.

Carriers file detailed traffic data using a record format contained in the filing manual. For switched services, each record contains a billing type code that signifies the traffic exchange method and whether the call was U.S. billed, foreign billed or transiting. For U.S. billed calls, the billing type code indicates whether the data represents (a) U.S. originated traffic and U.S. terminated collect and subscriber toll free traffic; (b) country direct and country beyond traffic; or (c) U.S. carrier reorigination traffic. For international private line services, the billing type code signifies whether the data contain facilities-based or facilities-resale circuits. The billing codes used for filing year 2002 data are contained in the International Bureau's Public Notice DA 00-1526, *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by July 31, 2000*, released July 7, 2000.

The table titles use the billing types to indicate the type of data aggregated in a particular table. There are three groups of billing type codes for switched services. Billing types 1 through 6 are used for traditional settlement traffic. Billing types 11 through 16 are used for ISR/hubbed traffic. The billing types do not distinguish whether a switched service was provided over a carrier's owned facilities or over leased circuits.

The specific billing types allow the following breakdowns.

<u>Billing Type(s)</u>	
1, 11	U.S. billed calls that originate in or terminate collect or subscriber toll-free in the United States
2, 12	foreign billed calls
3	traditional transiting calls (there is no billing type 13 because all traditional transiting calls are exchanged under traditional settlement arrangements)
4, 14	U.S. billed country-direct and country-beyond calls
5, 15	terminating leg of calls reoriginated by U.S. carriers and were terminated via facilities-based or facilities-resale circuits
35	terminating leg of calls reoriginated by U.S. carriers and were terminated via pure resale of another carrier's switched services
6, 16	originating leg of calls reoriginated by U.S. carriers

There are only two billing type codes used for private line services. Billing type 1 signifies facilities-based circuits. Billing type 11 signifies facilities-resale circuits.

Addendum to Figure 6

The following carriers submitted reports with no international messages, minutes or billed revenues for calendar year 2002:

Adelphia Communications Corporation	Indiana Fones, Inc.
Adelphia Business Solutions Atlantic, Inc.	Infone, LLC
AltiComm, Inc.	Long Distance Wholesale Club, Inc.
Amerimex Communications Corp.	Max-Tel Communications, Inc.
AmMex Communications, Inc. d/b/a Easycomm Beepers	Merced Net, Inc.
Armstrong Telecommunications, Inc.	National Directory Assistance, LLC
Aspen Telecommunications, LLC	NECC Telecom, Inc.
Arizona Dialtone, Inc.	NetworkIP, LLC
Arrival Communications, Inc.	ONS-Telecom, LLC
BBH Corp.	Paging USA South, Inc. d/b/a Paging USA
Buckeye Telesystem, Inc. d/b/a Buckeye Telesystem	Pembroke Advanced Communications, Inc.
Budget Phone, Inc.	PT-1 Communications, Inc.
Business Network Long Distance	RAM Technologies, Inc. d/b/a RAM Paging
Comerco, Inc. d/b/a YCOM Long Distance	RRV Enterprises, Inc.
Clear Lake Telephone Co.	Satellite Paging LLC
DigiTel Network Corporation	SBC Communications, Inc.
Doylestown Communications, Inc.	SNET Diversified Group, Inc.
dPi Teleconnect, LLC	Taylor Telecommunications, LTD d/b/a Taylor
DSLnet Communications, LLC	Telephone Long Distance
EPIK Communications Incorporated	Telecom Access Network, Inc.
Epixtar Communications, Corp.	Teleconex Inc.
Ernest Communications, Inc.	Telmatch Telecommunications, Inc.
Exergy Group, LLC	Telmex USA, L.L.C.
Forte Communications, Inc.	TGEC Communications Co., LLC d/b/a First
Globalcom, Inc.	World Connect
Greenfield Communications, Inc.	Universal Access, Inc.
GTC, Inc.	Universal Telecom
In Touch Communications, Inc.	Webshoppe Communications, Inc.

Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

- 1/ Traditional - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.
- 2/ ISR/Hubbed - International Simple Resale (ISR) refers to the provision of switched services over private lines, interconnected to the public switched network, between the United States and Commission-approved countries. Switched hubbing refers to the provision of switched services over interconnected private lines between the U.S. and an ISR-approved country in order to originate or terminate U.S. traffic in a third country. See 47 CFR 63.17.

The following companies' section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:

- 3/ AT&T sold AT&T Easylink Services' international exchange telex and message telegraph services February 1, 2001. AT&T Corp. & Concert Global Networks, USA LLC's calendar year 2002 43.61(a) submission includes Concert's information for January 1 through March 31, 2002. Concert Global Networks, USA, LLC was dissolved March 31, 2002. Concert was a global venture of AT&T Corp. and British Telecommunications.
- 4/ BellSouth International Access, effective March 31, 2002, merged into BellSouth Long Distance, Inc.
- 5/ Bixby Telephone Sales and Service d/b/a Bixby Telephone Long Distance and d/b/a PrimeTel Long Distance transferred its long distance services to Bixby Telephone Long Distance, LLC.
- 6/ Centennial Puerto Rico Operations Corporation, for calendar year 2002, changed its carrier status from an international pure resale provider to a facilities-based/facilities-resale international provider. Therefore, the carrier had to file the more complex section 43.61(a) for calendar year 2002. Their international statistics are located in Figures 7&8, and in Section A - Switched Services Telephone of this annual publication.
- 7/ Clark Fork Telecommunications, Inc., on January 1, 2003, merged with its parent company Blackfoot Telephone Cooperative, Inc. The companies filed separate section 43.61(a) annual international traffic and revenue reports for calendar year 2002.
- 8/ Colt Telecommunications' year 2002 section 43.61(a) submission includes Colt GmbH.
- 9/ Electric Lightwave LLC, as of June 18, 2002, became a wholly-owned subsidiary of Citizens Communications Co.
- 10/ FairPoint Communications Solutions Corp., a Competitive Local Exchange Carrier (CLEC), is no longer in business.
- 11/ Frontier Communications of America, Inc. became a wholly-owned subsidiary of Citizens Communications Company as of June 29, 2001.
- 12/ Global Crossing Ltd.'s company, International Exchange Networks, Ltd. (iXnet), discontinued international services after calendar year 2001.

Addendum to Figure 6 -- Continued

- 13/ Hemingford Telephone Company's long distance services are provided by its wholly-owned subsidiary Mobius Communications Company.
- 14/ Infonet Broadband Services Corporation, while it is authorized as a common carrier under Section 214 of the Communications Act, has determined that it provides only enhanced services, and, therefore, does not meet the requirement to file pursuant to section 43.61 of the Commission's rules.
- 15/ Intetech, L.C., after October 1, 2001, sold its assets to Campus Communications Group, Inc.
- 16/ KPU Telecommunications, City of Ketchikan d/b/a Ketchikan Public Utilities, defined its international data services within the definition of enhanced services under section 64.702, and, therefore, exempt from filing section 43.61.
- 17/ Lemonweir Valley Telephone Company's subsidiary, LVT Corporation, for calendar year 2002, determined that it did not offer international services.
- 18/ Local Communications Network, Inc. has determined itself to be a private carrier, and no longer subject to section 43.61 of the Commission's rules.
- 19/ Melbourne International Communications, Limited filed for liquidation in Florida on October 3, 2002.
- 20/ ODC International, Inc., for calendar year 2002, had not commenced operations in the United States.
- 21/ PanAmSat Communications Carrier Services, Inc. terminated international services after year 2001.
- 22/ PSO, Inc. d/b/a Canal Uno terminated international services after year 2001.
- 23/ RSL COM USA filed for Chapter 11 bankruptcy protection in New York on March 16, 2001.
- 24/ SES Americom, Inc.'s calendar year 2002 section 43.61(a) submission includes its wholly-owned subsidiary, Columbia Communications Corporation.
- 25/ Sprint PCS' calendar year 2002 section 43.61(a) submission includes Sprint's Wireless Division which consists of:
PhillieCo, L.P.
SprintCom, Inc.
Sprint Spectrum Holding Company, L.P.
- 26/ Telecom New Zealand Communications (USA), Ltd. ceased all operations and carried no international traffic after year 2001.
- 27/ The Other Phone Company, Inc. d/b/a Access One Communications' annual section 43.61(a), for calendar year 2002, is combined with the submission for Talk America, Inc.
- 28/ Viatel Inc., and its U.S. subsidiaries, are succeeded by Viatel Holding (Bermuda) Limited.
- 29/ Williams Communications acquired, in late calendar year 2001, the wholesale international voice assets previously reported by SBC Communications, Inc. companies Ameritech Communications International, Inc., and Southwestern Bell Communications Svcs., Inc. Additionally, international pure resale services previously reported by Ameritech Communications International, Inc. were also transferred to Williams Communications.

The following companies either changed their name or filed a report name different from the previous years:

- 30/ Agate Mutual Telephone filed its calendar year 2002 section 43.61(a) as its subsidiary, Prairie Networks.
- 31/ Arapahoe Cable TV, Inc. d/b/a ATC Long Distance filed its calendar year 2002 section 43.61(a) as its subsidiary, Applied Communications Technology d/b/a ATC Long Distance.
- 32/ BiznessOnline Inc./Telecom Communications Corp. filed its calendar year 2002 section 43.61(a) as Telecon Communications Corporation.
- 33/ Chippewa County Telephone Company filed its calendar year 2002 section 43.61(a) as Superior Long Distance.
- 34/ Claricom Networks, Inc. filed its calendar year 2002 section 43.61(a) as Claricom Networks, LLC.
- 35/ Direct Communications Rockland, Inc. filed its calendar year 2002 section 43.61(a) as Direct Communications LD.
- 36/ Easton Telecom Services, L.L.C. was formerly known as Weston Telecommunications, L.L.C.
- 37/ Genesis Communications Inc., in year 2002, changed its name to Vicera Communications, Inc., and then later changed its name to Vycera Communications, Inc. d/b/a Genesis Communications, Inc.
- 38/ Heart of Iowa Communications, Inc., on July 1, 2002, changed its name to Heart of Iowa Communications Cooperative.
- 39/ KDD America, Inc., as of October 2, 2000, changed its name to KDDI America, Inc.
- 40/ Lennon Telephone Company filed its calendar year 2002 section 43.61(a) as Total Communications Systems, Inc.
- 41/ NOS Communications, Inc. d/b/a 011 Communications, also d/b/a International Plus filed its calendar year 2002 section 43.61(a) as NOS Communications, Inc.
- 42/ One Call Communications Inc., d/b/a Opticom filed its calendar year 2002 section 43.61(a) as OCMC, Inc. d/b/a One Call Communications, Inc., d/b/a OPTICOM.
- 43/ OpicTel Long Distance was formerly known as Infonet Long Distance, LLC.
- 44/ Phillips County Communications, Inc. filed its calendar year 2002 section 43.61(a) as Phillips County Comm., LLC.
- 45/ T-Systems USA, Inc. was formerly known as Deutsche Telekom, Inc. Effective October 1, 2003, T-Systems changed its name to T-Systems North America, Inc. Its calendar year 2002 section 43.61(a) was submitted as T-Systems USA, Inc.
- 46/ Telenational Communication, Inc. d/b/a Worldport filed its calendar year 2002 section 43.61(a) as Telenational Communications, Inc.
- 47/ Telia International Carrier, Inc. was formerly known as Telia North America, Inc.
- 48/ Wilson Communication Co. filed its calendar year 2002 section 43.61(a) as its sister company Wilson Telephone Co., Inc.

Addendum to Figure 6 -- Continued

Addendum to Figure 9

Note: Some previously published data have been revised.

- 1/ Data exclude pure resale traffic unless otherwise noted.
- 2/ Retained revenues shown for service that originates or terminates in the United States. These figures exclude revenues for calls that transit the United States. Retained revenues are calculated as revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign-billed traffic.
- 3/ The annual rates of growth were estimated by fitting a log linear regression to data for the years indicated.

2002 Annual Section 43.61 International Traffic Data for All U.S. Points: All Settlement Arrangements

2002 Section 43.61 International Traffic Data
Traffic Measures Used For Miscellaneous Service Tables *

Company / Service	Traffic Measure #1	Traffic Measure #2
Facilities-Based and Facilities-Resale Providers of Miscellaneous Services		
AT&T Packet Switching	Kilo Segments	
France Telecom Virtual Private Line	Messages	Minutes
International Telnet, Inc. Packet Switching	Kilo Segments	
Medley International Teleport, Inc. Packet Switching	Kilo Segments	
Melbourne Teleport, Inc. Packet Switching	Kilo Segments	Minutes
Sprint Frame Relay/ATM Packet Switching	Circuits Kilo Segments	64 KBPS Hours
Teleport of the Americas, Inc. Packet Switching	Kilo Segments	
Williams Communications, Inc. Occasional Television	Hours	
WorldCom, Inc. Packet Switching	Kilo Segments	

* Traffic measures are specified in the, Manual for Filing Section 43.61 Data, June 1995.
 Carriers are not obligated to provide a second traffic measure for Packet Switching or Occasional Television services.

Note: Carriers provide pure resale services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic and report the traffic on a country-by-country basis. Reporting underlying U.S. carriers' country-by-country data are available in Section A: Switched Services Telephone of this annual publication, *International Telecommunications Data*.

2002 Annual Section 43.61 International Traffic Data for All U.S. Points: All Settlement Arrangements
