¹ Weighted to adjust for selection probabilities and non-response.

² Weighted to adjust for selection probabilities, non-response, and then post-stratified by household composition to the U.S. population estimates as provided by the March 2002 Current Population Survey and the 2000 U.S. Census. Each respondent was further ratio adjusted to their age-sex-race group in the population using data from the July 2002 Bridged Population data file prepared by the U. S. Census Bureau in collaboration with the National Center for Health Statistics.

³ With the exception of the unweighted count, frequencies are in units of 1,000.
