CHAPTER 5 CONSULTATION AND COORDINATION

This resource management plan was prepared by an interdisciplinary team of natural resource specialists from the Garnet Resource Area and the Butte District. Beginning in December 1980, a nine step process led to the RMP's formulation. Four of the nine steps, including the review of this document, have allowed for public review and comment. This BLM planning process, is outlined in full in the Introduction. Consultation and coordination with various agencies, organizations, and individuals occurred throughout the planning process.

CONSISTENCY

The BLMs planning regulations require that resource management plans be "consistent with officially approved or adopted resource related plans of other federal agencies, state and local governments, and Indian tribes, so long as the guidance and resource management plans are also consistent with the purposes, policies and programs of federal law, and regulations applicable to public lands . . .". Interested parties have been notified and their comments solicited.

The State Historic Preservation Officer and the Advisory Council on Historic Preservation will be given an opportunity to review the draft RMP.

PUBLIC PARTICIPATION

A Federal Register notice was published on February 20, 1981 that announced the formal start of the planning process.

A preliminary list of 17 major issues was mailed to about 600 individuals and organizations for comment in February 1981. Open houses on the issues were held February 25, 1981 in Drummond, February in Philipsburg, and March 5, 1981 in Ovando. The District 26, 1981 in Missoula, March 3, 1981 Advisory Council also reviewed the preliminary issues and the public response to them in March. As a result of the input from about 100 persons who attended the open houses and 60 written comments, issues were redefined and three new ones were added. These were published for further public comment in November 1981. These were subsequently grouped into five broad issues from which the plan developed. The final list was published in August 1982.

Resource inventories were taken in 1982 and 1983, and a management situation analysis was prepared that examined the capability of the public lands to accommodate the needs and issues previously identified. The criteria for developing the RMP and the District Manager's Concept of the RMP were published for public review in July 1983. Five comments were received.

In early 1984, work began on the formulation of alternatives. Resource specialists aided in the development and made suggestions on resource allocations leading to the analysis of alternatives as laid out herein.

Other informal coordination with the public took place throughout the planning process by means of personal contacts, phone calls, etc.

AGENCIES AND ORGANIZATIONS CONTACTED

Federal Agencies

U. S. Department of Agriculture Farmers Home Administration Forest Service Soil Conservation Service

U. S. Department of the Interior Bureau of Indian Affairs Bureau of Mines Fish and Wildlife Service Geological Survey National Park Service Environmental Protection Agency
