

2002 Fast Facts for New York

Data from the U.S. Census Bureau's 2002 Vehicle Inventory and Use Survey (VIUS) are now available for New York. The VIUS produces state and U.S. level statistics on the physical and operational characteristics of the Nation's truck population.

There were 3.5 million private and commercial trucks registered in New York during 2002, up approximately 23 percent from 2.9 million trucks in 1997.

The report includes these highlights for New York:

The number of sport utility vehicles (SUVs) registered in New York during 2002 increased an estimated 47 percent from 1997. The number of minivans increased 49 percent during this same period.

- Total truck registrations in 2002 included an estimated 27 percent pickups, 37 percent SUVs, and 22 percent minivans.
- New York has approximately one pickup for every 20 people and about one SUV for every 15 people. It also has approximately one pickup for every 12 licensed drivers and about one SUV for every 8 licensed drivers. Estimates are taken from this report and statistics from the U.S. Department of Transportation Highways Statistics 2002.
- In 2002, an estimated 5 percent of all large trucks carried hazardous materials.

- About 81 percent of all trucks were used for personal transportation, while 17 percent were operated for business, including for-hire use.

The report also includes information on fuel efficiency, annual mileage, primary range of operation, permanent equipment, and other physical and operational characteristics.

The U.S. Summary will be issued in late 2004, followed by a microdata CD-ROM.

The Vehicle Inventory and Use Survey is conducted every five years as part of the Economic Census, and data are used by government agencies, businesses, academia, and the general public. Estimates in this report are based on data from the 2002 Vehicle Inventory and Use Survey. They contain sampling and nonsampling errors. To keep the identity of respondents confidential, some estimates may be suppressed. Users who make their own estimates, based on survey estimates, should cite the U.S. Census Bureau as the source of the original estimates only. See www.census.gov/svsd/www/02vehinv.html for measures of sampling variability and other survey information.
