

# THE EUFAR-FP6 JRA: Airborne Aerosol Reference Pod

The AARP project is conducted by 7 research institutions representing 5 countries:

Leader : University of Manchester (UK) : Hugh Coe

Météo-France, CNRM (FR) : Thierry Bourriane, Laurent Gomes

Enviscope GmbH (DE) : Rolf Maser

Stockholm University (SE) : Radovan Krejci

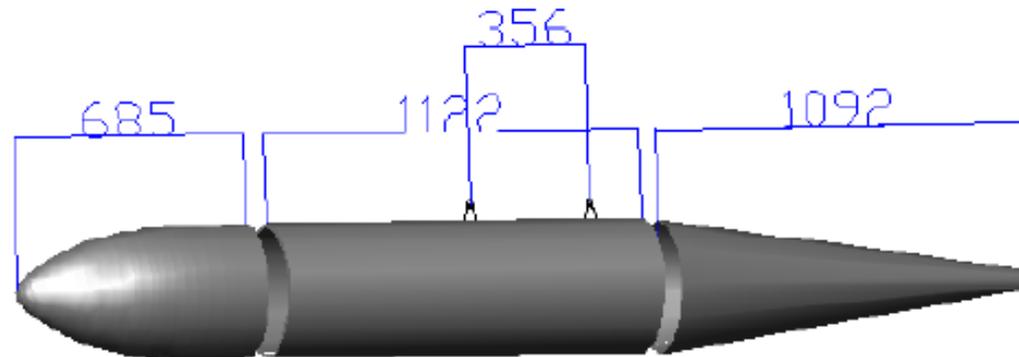

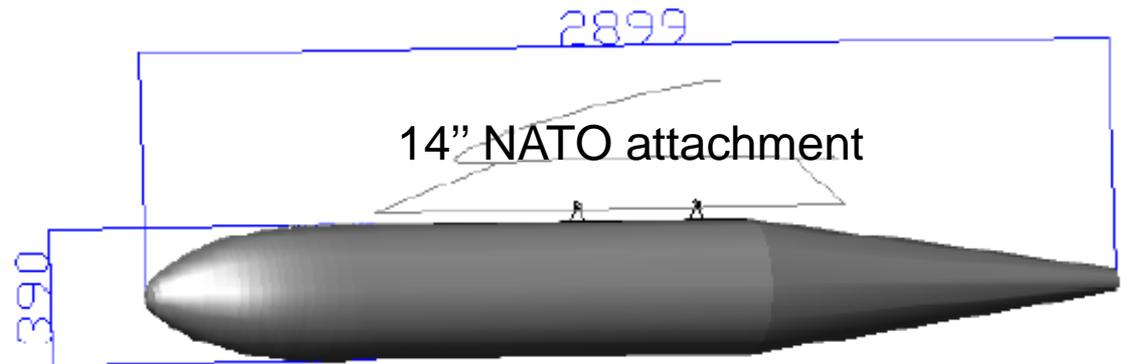

Max-Planck-Institute for Chemistry (DE) : Joachim Curtius

National University of Ireland, Galway (IE) : Regis Dupuy

Leibniz-Institut for Tropospheric Research (DE): Markus Hermann

**To design and construct an Aerosol Reference Pod that can be flown on several aircraft and will serve as a true basis for inter-calibration of airborne aerosol instrumentation, as well as being a stand-alone aerosol payload.**

# THE EUFAR-FP6 JRA: Airborne Aerosol Reference Pod

Pod candidate eK01

Mounting system: 14 inch lug

Empty weight 40 kg,

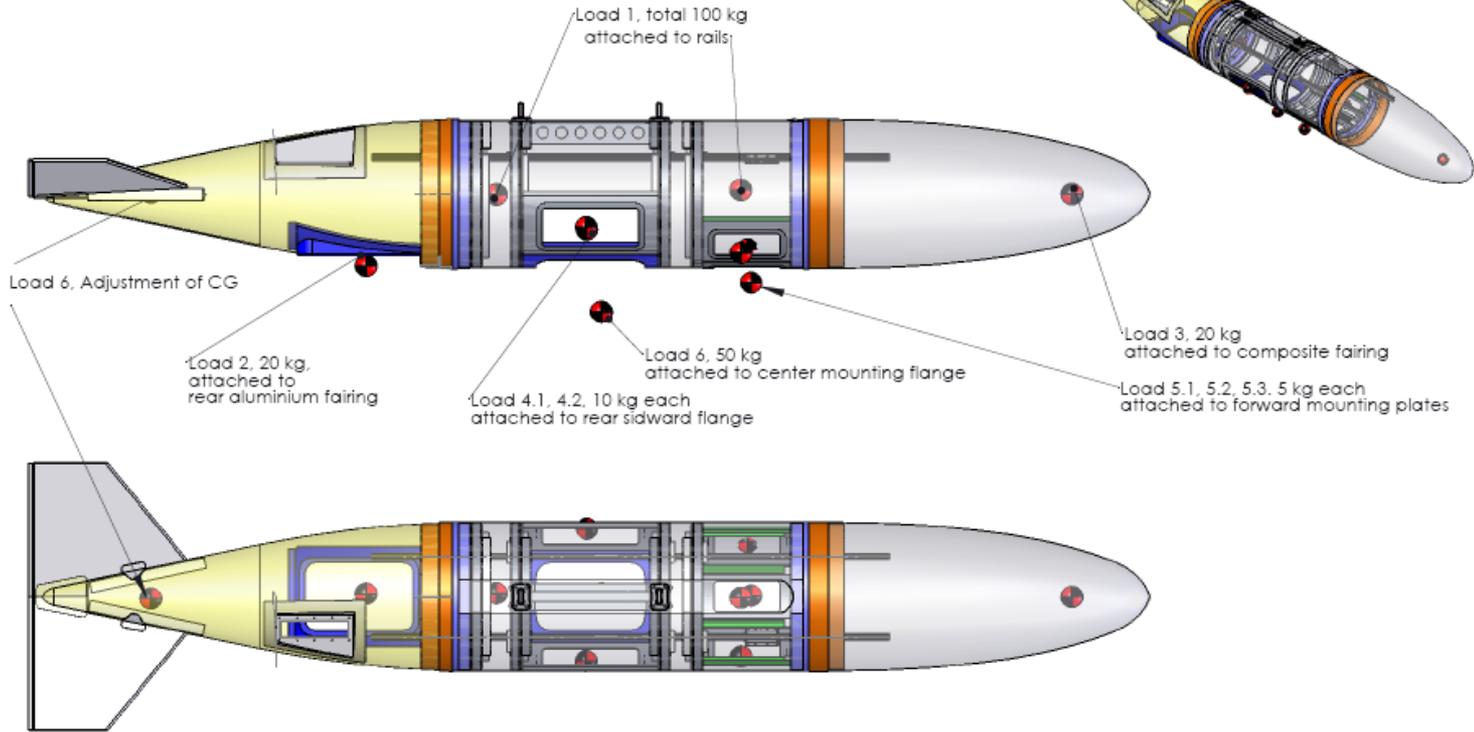

Total weight: < 100 kg

PMS housing for comparison

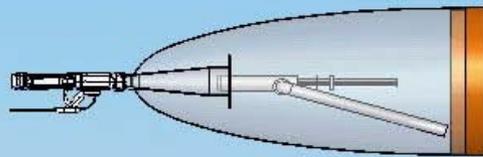

# THE EUFAR-FP6 JRA: Airborne Aerosol Reference Pod

Static Load Cases:  
LC1: 10g DWD with stations 1, 2, 3  
LC2: 10g DWD with stations 4, 5, 6  
LC3: x g UWD with stations .....  
LC4: 3g, FWD with stations 1, 2, 3  
LC5: 3g, FWD with stations 4, 5, 6

Front section

Middle section

Aft section

Inlet components:

**Isokinetic Inlet**

- High speed inlet incl. Pitot
- Low speed inlet incl. Pitot
- Pressure sensors
- Heaters control unit

**Diffusor and Flow Splitter**

- Diffusor
- Restrictor Disc
- Provision to achieve isokinetic conditions at entrance of sampling tubes
- Sampling lines
- Excess air tubes

Peripherie:

- Excess Air:
  - Volume Flow Sensing Element
  - Control Valve (Isokineticity Inlet)
- Excess Air Bracket
- Venturi ??
- Several temperature sensors

Externally mounted instruments:

- CDP** sensor unit  
(electronic box inside pod)
- ASPEN** Probe  
(electronics integrated in pylon)

Internally mounted instruments:

- **MARIE**  
2 x CPC  
separate electronic unit
- **SMPS**  
various components
- **OPC**  
(1 unit)
- **Data Acquisition Unit**  
(PC104)
- **Static Temperature Sensor**

Peripherie:

- Power distribution
- Vacuum Pump
- Front Connector Bracket to a/c

Basic Infrastructure:

- Power Converters  
DC/DC  
DC/AC  
AC/DC  
EMV Filter
- Rear Connector Bracket to aircraft

Removable lips on the diffuser and on the shroud to adapt the inlet to slow (100 m/s) and high (200 m/s) flying aircraft

Adjustable diffuser to adapt to the airspeed and flow rates of the instruments

# THE EUFAR-FP6 JRA: Airborne Aerosol Reference Pod

The two aerosol pods are now  
maintained and operated by the  
**University of Manchester**
