Funding Source: (Check one.)

☐ Agency Fund

☒ General Fund

Project Title:

Background and Purpose: *Provide relevant background information necessary to establish and support the proposal. In addition, describe the scenario and all relevant contributing factors to establish the purpose. State the purpose and any supporting information that will be focusing on the "state of the art" solution(s). This explanation should clearly define the circumstances or parameters that are unknown and need evaluation. The background and/or history of the technology condition provide knowledge important for the development of the work plan. Describe how the problem affects Federal Land Management Agencies. It may be appropriate to include all documented partnering and coordination efforts with individuals stakeholders.*

Scope: *Fully describe the scope of the proposal, include the strategy, methodology, and applicable metrics to achieve the stated objectives and deliverable(s) of this proposal. Include anticipated project milestones.*

Estimated Benefits: *Describe in detail the potential tangible and intangible benefits and expected outcomes.*

Deliverables: The process and evaluation of the deployment of a multiple park connected ITS traveler information system will be documented. Other national parks, federal land agencies (USFS and USFWS), and federal land planners will be the most likely users of the project information and report.

Duration: *Time needed to complete the initiative.*

Estimated Cost by Fiscal Year
FY 05 - $123,123
FY 06 - $123,123
