**“NCMA/ESI International Contracting Award”
Presented to: Robert Burton**

Robert Burton, OMB-Office of Federal Procurement Policy is recognized for pursuing several high-profile initiatives to improve the federal acquisition system while serving as Acting Administrator 09/05 to 08/06. Rob’s initiatives have resulted in long-term, improved changes to the federal acquisition system, with significant savings for taxpayers. The strategic sourcing strategies resulted in savings of over \$16.8 m at just one agency. The FY06 public-private competitions are expected to generate \$780 m in net savings or cost avoidances over the next 5 to 10 years. He established a new certification program standardizing the training, education, and experience requirements for the civilian acquisition workforce.

“David Packard Excellence in Acquisition Awards”

Recognizes DoD civilian and/or military organizations, groups, or teams, who have made highly significant contributions which demonstrated exemplary innovation and best acquisition practices.

The **CM Flares Team** was recognized for their hands-on coordination with contractors to meet the Army's accelerated demand for life-saving M211, M212 and M206 flares. In collaboration with flare producers, the team increased production capability without interrupting current production, delivery and product quality. Working with new suppliers allowed the team to increase production, eliminate single point of failures and mitigate poor production risks. By developing effective solutions and accelerating multiple contract awards, the team was able to provide a higher level protection to our Soldiers fighting the global war on terrorism.

“David Packard Excellence in Acquisition Awards”

Recognizes DoD civilian and/or military organizations, groups, or teams, who have made highly significant contributions which demonstrated exemplary innovation and best acquisition practices.

The **ICRM team** was recognized for its ability to surge Common Missile Warning System (CMWS) fielding to multiple aircraft platforms in the theater of operations, regardless of geographic distance, different aircraft types and time zones. The team performed an item-by-item analysis to determine commonality and key specific items required for each different Army aircraft type. This analysis enhanced system quantity buys and eased management of different installation kits. Installation efforts were coordinated with aircraft platform project manager unit commanders to achieve concurrent Reset and CMWS installation.
