

# Passenger Safety Instructions Transcript

Welcome and thanks for traveling with us.

We are happy to have you aboard.

Your safety and comfort are very important to us.

Before we get started, we want you to be familiar with the safety features on this vehicle and how to use them properly.

First, please stay seated while the vehicle is in motion.

Never block the center aisle.

Follow all safety instructions made by the driver.

If necessary, notify authorities of an emergency by using a cellular telephone to call 911.

There is a fire extinguisher on this vehicle. It will be located behind the driver's seat, or beneath the front row passenger's seat, or in the front-most overhead compartment.

Remember: the primary exit from this vehicle is the same door at the front through which you entered.

In an extreme emergency situation, the windows can also serve as exits. Follow the instruction markings on the windows or the window frames.

Also note that there is an emergency exit hatch in the roof above the center aisle.

Please take a moment to locate the emergency exits nearest to you.

If you have any questions about the safety procedures, ask the driver.

Thank you again for riding with us today.

This message has provided in cooperation with the Federal Motor Carrier Safety Administration, U.S. Department of Transportation.
