**TEXAS, South**

**TXZ255**

**Cameron**

**25 1330CST 0 0 30K Strong Wind (EG40)**

Strong north winds behind a cold front helped contribute to the collapse of a roof to a warehouse in Brownsville. The sheet metal roof knocked down power lines, damaged cars and landed on a nearby building on the same property. Winds were gusting to between 35 and 40 mph that day at the nearest official observation site of Brownsville.
