

The Navy initiated formal consultation under Section 7 of the Endangered Species Act with the U.S. Fish and Wildlife Service (USFWS) in 1990, 1995, and 1997, respectively, for each of the three protected wildlife species occurring at China Lake: the Inyo California towhee, the desert tortoise, and the Mojave tui chub. The USFWS issued Biological Opinions (BOs) for the three species that cover a range of actions from habitat maintenance and enhancement, to a programmatic BO for the desert tortoise encompassing established military operations conducted in tortoise habitat on NAWS. The Navy has determined that the preferred alternative is consistent with the terms and conditions of the existing BOs and would not adversely affect Federally listed species. USFWS has confirmed this conclusion through informal consultation with NAWS throughout the NEPA process.

NAWS China Lake employs a phased approach to compliance with Section 106 of the National Historic Preservation Act (NHPA) (16 U.S.C. 470). The California State Historic Preservation Officer (SHPO) has concurred that the NAWS approach is consistent with NHPA regulations. In addition, a draft Programmatic Agreement (PA) has been developed to facilitate the protection of cultural resources. This PA will be finalized through formal consultation in accordance with comments received from the California SHPO and area Tribes. NAWS China Lake will continue to implement appropriate management plans and procedures to ensure compliance with the NHPA, and to consult and coordinate (as appropriate) with the California SHPO and area Tribes.

Response To Comments Received Regarding the Final EIS: The Final EIS was distributed to government agencies and the public on March 05, 2004, for a 30-day public review period. During this period only two comment letters were received, both from private landowners in the vicinity of NAWS China Lake. The comments identified concerns related to air quality, range safety, potential seismic events, off-station land uses, access to station property, airspace management, and aircraft operations. Some of the comments are not related to the proposed action or the Final EIS and would be more appropriately directed toward local civil authorities or the NAWS China Lake Public Affairs Office. No new substantive issues concerning the proposed action were raised in the comments received. All of the issues

raised in comment letters were thoroughly analyzed and discussed in the Final EIS.

Conclusions: After carefully considering the purpose and need for the proposed action, the analyses contained in the Final EIS, and the comments received on the Draft and Final EIS from Federal, state, and local agencies, non-governmental organizations, and individual members of the public, I have determined that the preferred alternative, the Moderate Expansion Alternative, will best meet the needs of the Navy.

Implementation of the Moderate Expansion Alternative will enhance the existing assets and capabilities of NAWS China Lake; provide for meeting current and evolving Navy and DOD operational, testing, and training requirements; and achieve Navy compliance with the California Desert Protection Act of 1994 and the Sikes Act, as amended in 1997.

Dated: May 19, 2004.

Donald R. Schregardus,

Deputy Assistant Secretary of the Navy (Environment).
