● 548 Sample site location/number

This is one of five sample site maps that accompany analytical results of samples collected in 1979 as part of the evaluation of mineral potential of parts of the Chugach National Forest RARE II study.

The 1979 Sample sites are in the Anchorage (fig.2), Blying Sound (fig.3), Cordova (fig.4), Seward (fig.5), and Valdez (fig.6) Quadrangles.

SCALE 1:25000

CENTURIES INTERVAL 200 FEET

1:5000 FEET (1:1500 METERS) INTERVAL 100 FEET

THIS MAP IS NOT A NAVIGATION MAP.
