UNCONSOLIDATED DEPOSITS		SEDIMENTARY ROCKS		TERRIGENOUS ROCKS	
Qca, Alluvium Qfp, Floodplain deposits	Qcu, Colluvium	Qsu, Silt, undifferentiated	Qst, Silt terrace	Qgl, High level gravels	Qla, Landslides
Qsa, Sandstone	Qsl, Shale and limestone	Qch, Chert and shale	Qun, UNCONFORMITY	Qm, Mafic and ultramafic rocks	Qp, Plutonic
Qsh, Shale, graywacke, conglomerate	Qsl, Sandstone	Qgr, Grit, quartzite, shale and argillite	Qgs, Greenschist	Qf, Fault	Qtr, Thrust Fault
Qsc, Graywacke, shale and conglomerate	Qsl, Sandstone	Qgr, Grit, quartzite, shale and argillite	Qgs, Greenschist	Qf, Fault	Qtr, Thrust Fault
Qsl, Graywacke, shale, and conglomerate	Qsl, Sandstone	Qgr, Grit, quartzite, shale and argillite	Qgs, Greenschist	Qf, Fault	Qtr, Thrust Fault

Base from U. S. Geological Survey 1:250,000 series, 1956

Geology by Reuben Kachadorian, 1969,  
Reuben Kachadorian and H. J. Moore II, 1970.  
Bedrock geology by R. M. Chapman, F. R. Weber,  
and W. E. Yeend, 1970.

Bedrock units shaded.

FIGURE 5. - Preliminary engineering geologic maps of the proposed Trans-Alaska Pipeline route, Tanana and Livengood Quadrangles.
