01	0001CST	0	0			Drought
17	0001CST					

Drought conditions eased considerably during early and mid August as thunderstorm activity increased to typical levels for mid-summer. Timely rainfall offset the potentially devastating agricultural impacts of this drought. River levels on the Ohio and Mississippi Rivers continued to drop through the middle of the month. At Cairo, the Ohio River stage fell as low as 7.2 feet. The effects on Ohio River traffic were comparable to those observed in the 1997 and 1988 droughts. Barges ran aground, forcing the Coast Guard to close a seven-mile stretch of the Ohio River from Mound City to Olmsted for almost a week. Several hundred barges were reportedly waiting to pass through the bottleneck. The U.S. Army Corps of Engineers conducted emergency dredging operations to reopen the river. A casino riverboat in Metropolis was closed due to complications from the low water, only eight months after having been closed by high water. Along the Mississippi River, a power generation plant in Grand Tower (Jackson County) closed for a couple weeks because water levels were too low to generate electricity.

Jackson County

Elkville

07	1430CST	0	0	9K	Thunderstorm Wind (EG60)
-----------	----------------	----------	----------	-----------	---------------------------------

Severe thunderstorm winds destroyed a metal barn on U.S. Highway 51 on the north side of Elkville. A car inside the barn was heavily damaged. Trees and power lines in the immediate vicinity were blown down

ILZ075>078-080>094 **Jefferson - Wayne - Edwards - Wabash - Perry - Franklin - Hamilton - White - Jackson - Williamson - Saline - Gallatin - Union - Johnson - Pope - Hardin - Alexander - Pulaski - Massac**

08	0100CST	0	0		Dense Fog
	0500CST				

Dense fog blanketed southern Illinois for several hours, reducing visibility to a quarter mile or less in many areas.

Jefferson County

Mt Vernon

10	1753CST	0	0	3K	Thunderstorm Wind (EG66)
-----------	----------------	----------	----------	-----------	---------------------------------

A wind gust to 76 MPH was reported at the junction of Interstates 57 and 64. The wind gust was reported by the general public as a measured wind gust. A tree and a power line were down in the city of Mount Vernon.

Jefferson County

Woodlawn

13	1850CST	0	0	3K	Thunderstorm Wind (EG50)
-----------	----------------	----------	----------	-----------	---------------------------------

Estimated winds near 60 MPH downed a few power lines.

Williamson County

Cartersville

14	1638CST	0	0		Thunderstorm Wind (EG50)
-----------	----------------	----------	----------	--	---------------------------------

Three to four medium size trees were blown down on Route 148.

Johnson County

Simpson

14	1642CST	0	0		Thunderstorm Wind (EG52)
-----------	----------------	----------	----------	--	---------------------------------

Several trees were blown down.

Saline County

**Harrisburg to
Eldorado**

14	1728CST	0	0	40K	Thunderstorm Wind (EG50)
	1735CST				

Wind gusts estimated from 55 to 60 MPH downed trees and power lines. At least a half dozen trees were knocked down in Eldorado. Several of the trees fell across houses and garages. One tree fell on a swimming pool. Numerous tree limbs and small trees fell across Harrisburg streets.

Gallatin County

Countywide

14	1750CST	0	0	4K	Thunderstorm Wind (EG50)
-----------	----------------	----------	----------	-----------	---------------------------------

Several trees and power lines were blown down across the county.

19	1000CST			0	0			Excessive Heat
20	1800CST							

The heat index exceeded 105 degrees on two consecutive afternoons across most of southern Illinois. At Carbondale, the peak heat index was 111 degrees on the 19th and 106 on the 20th.

Jackson County

Ava to Murphysboro	26	1315CST 1325CST			0	0	15K		Thunderstorm Wind (EG50)
-----------------------	----	--------------------	--	--	---	---	-----	--	---------------------------------

Small trees were blown down, and there were some power outages. Two tents secured by ropes were blown down at the Murphysboro High School. One home in Murphysboro sustained major damage when two 16-inch tree limbs fell on the home and a car.

Saline County

Harrisburg	26	1417CST			0	0			Thunderstorm Wind (EG52)
------------	----	---------	--	--	---	---	--	--	---------------------------------

Estimated by a trained spotter.

Johnson County

Vienna	26	1445CST			0	0			Thunderstorm Wind (EG50)
--------	----	---------	--	--	---	---	--	--	---------------------------------

Numerous trees were blown down in the Vienna area.

Gallatin County

8 SSW Shawneetown	26	1510CST			0	0			Thunderstorm Wind (EG50)
-------------------	----	---------	--	--	---	---	--	--	---------------------------------

Several trees were blown down in the Pounds Hollow area of the Shawnee National Forest, near the Hardin County line.

Hardin County

2 E Karbers Ridge	26	1515CST			0	0			Thunderstorm Wind (EG50)
-------------------	----	---------	--	--	---	---	--	--	---------------------------------

Small trees were blown down along the Gallatin County border.

Saline County

Harrisburg	26	1420CST 1510CST			0	0			Heavy Rain
------------	----	--------------------	--	--	---	---	--	--	-------------------

Street flooding was reported, mainly on secondary streets.

Saline County

Eldorado	28	1845CST 2045CST			0	0	5K		Flash Flood
----------	----	--------------------	--	--	---	---	----	--	--------------------

Flooding was reported on almost every street in town. In downtown Eldorado, floodwaters were two to three feet deep in places. Floodwaters entered at least one business, but no major damage was reported. Rainfall was estimated around one inch within 30 minutes.

Massac County

Countywide	30	0600CST 1000CST			0	0			Heavy Rain
------------	----	--------------------	--	--	---	---	--	--	-------------------

Heavy rainfall from weakening tropical system Katrina caused some flooding of low spots on roadways. A spot on a rural road prone to flooding of Seven Mile Creek was covered with a few inches of water.

INDIANA, Southwest

INZ081>082-085>088	Gibson - Pike - Posey - Vanderburgh - Warrick - Spencer								
	19	1000CST			0	0			Excessive Heat
	20	1800CST							
	The heat index topped 105 degrees across most of southwest Indiana on two consecutive afternoons. At Evansville, the official peak heat indices were 106 degrees on the 19th and 107 on the 20th.								
Vanderburgh County									
Evansville	25	2340CST			0	0			Hail(0.75)
	Occurred on Interstate 164.								
Vanderburgh County									
Evansville	26	0200CST 0700CST			0	0	500K		Flash Flood
	Rainfall amounts reported by emergency management officials ranged from 2.2 inches in downtown Evansville to 5 inches on the east side. Numerous city roads and one county road were closed by high water. Residential areas that were affected were mostly limited to three neighborhoods on Evansville's southeast side. Approximately 50 homes and 3 apartment buildings were affected by high water, many with water in the basements. Numerous vehicles were flooded, including those parked on the street, in garages, and driven into high water. At least 17 cars were reportedly flooded in the Dexter neighborhood.								
Posey County									
Countywide	26	1520CST			0	0			Thunderstorm Wind (EG50)
	There were several reports of trees blown down across the county, but no structural damage								
Vanderburgh County									
Countywide	26	1532CST			0	0	10K		Thunderstorm Wind (EG50)
	Trees and power poles were down throughout the county.								
Warrick County									
Newburgh to 1 N Boonville	26	1600CST 1607CST			0	0			Thunderstorm Wind (EG52)
	Numerous trees and limbs, measuring six to 10 inches in diameter, were snapped in Newburgh. A few tree limbs were down near Boonville, where a spotter estimated wind gusts to 60 MPH								
Spencer County									
Richland City to Grandview	26	1625CST			0	0			Thunderstorm Wind (EG50)
	Numerous trees were down across the county, including areas near Richland City and Grandview								
Posey County									
Mt Vernon	28	2025CST 2130CST			0	0			Flash Flood
	Eight to 12 inches of water was over old Highway 69. The flooding was caused by very heavy rain from slow-moving thunderstorms.								
Vanderburgh County									
5 W Evansville	28	2025CST 2130CST			0	0			Flash Flood
	Eight to 12 inches of water was over Highway 62 along the Posey/Vanderburgh County line.								
Warrick County									
Boonville	30	0900CST 1300CST			0	0			Heavy Rain
	About five inches of water was on Main Street, and a few other side streets had water over them.								
Posey County									
Poseyville	30	1000CST 1300CST			0	0			Heavy Rain
	Several inches of water was over State Highway 165 in a low-lying area. Heavy rainfall was the result of the remnants of Katrina.

Fulton - Hickman - Carlisle - Ballard - Mccracken - Graves - Livingston - Marshall - Calloway - Crittenden - Lyon - Trigg - Caldwell - Union - Webster - Hopkins - Christian - Henderson - Daviess - Mclean - Muhlenberg - Todd	19	1000CST			0	0			Excessive Heat
	20	1900CST							

The heat index rose above 105 degrees across most of western Kentucky on two consecutive afternoons. At Paducah, the peak heat index was 106 degrees on the 19th and 107 on the 20th. At Hopkinsville, the peak heat index was 105 on the 19th and 107 on the 20th.

Christian County

Crofton to Kelly	26	0720CST 0845CST			0	0			Heavy Rain
-----------------------------	-----------	----------------------------	--	--	----------	----------	--	--	-------------------

Secondary roads in the northern part of the county experienced some flooding

Hopkins County

Madisonville	26	0740CST 0940CST			0	0	250K		Flash Flood
---------------------	-----------	----------------------------	--	--	----------	----------	-------------	--	--------------------

Flooding was particularly severe around the Parkway Plaza Mall off of the Pennyrile Parkway. At least six businesses in the mall area sustained flood damage. Several inches of water covered the floor of one business. Local police reported one and a half feet of water flowing down the main street through Madisonville. Local officials reported nearly four inches of rain fell during the day, mostly in the morning.

Muhlenberg County

Central City	26	0810CST 0940CST			0	0			Heavy Rain
---------------------	-----------	----------------------------	--	--	----------	----------	--	--	-------------------

Low-lying areas were flooded in Central City.

Caldwell County

Princeton	26	0900CST 1200CST			0	0	100K		Flash Flood
------------------	-----------	----------------------------	--	--	----------	----------	-------------	--	--------------------

Much of Princeton was underwater after local residents reported five to six inches of rainfall in less than two hours. Yards and streets were left flooded and impassable. In one of the hardest hit neighborhoods, waist-deep water kept a street closed for hours after the rain stopped. About a dozen streets, including some main arteries such as Kentucky 91, were closed. A number of vehicles stalled in the flooding. City workers helped stranded motorists out of the flooding. Several buildings sustained flood damage, which was aggravated by waves in the wake of passing vehicles. About 18 inches of water backed up into a laundromat. Three to four inches of water covered a factory warehouse floor, causing an estimated 10,000 dollars in damage. Water entered fewer than a dozen houses, mostly flooding basements. In one house, the basement filled up, and water spilled onto the first floor. At the local electric plant, floodwater from Eddy Creek was chest-deep in the plant's storage yard, and water entered garages where trucks are parked. At the city's hospital, a basement filled with water, which was pumped out by the fire department. The flooding was described by an emergency management director as the city's worst flooding in 18 years.

KENTUCKY, Southwest

was directly attributed to the flooding in Hopkinsville, where a 10-year-old girl was swept into a culvert while playing in a low-lying area. A total of 142 residences and 38 businesses were affected by flooding. Many of the evacuees were from neighborhoods flooded by the Little River. About a dozen families were sheltered at Red Cross or Salvation Army facilities. The Kentucky National Guard was mobilized to assist Christian County, where the Governor of Kentucky surveyed flood damage. At least a dozen businesses were closed along the main corridor between Fort Campbell and Hopkinsville. A number of people were rescued from their car rooftops on flooded streets. At the Christian County High School, a section of the roof collapsed, destroying a couple of classrooms. Two other school facilities in the county sustained water damage. All schools in the county were closed. Between 40 and 50 roads were closed or had substantial high water on them. The emergency management director reported this flooding was comparable to the 1997 flood. The initial round of very heavy rain during the early morning of the 29th was not directly associated with Tropical Storm Katrina. This round of flooding rains, between 6 and 8 inches, occurred in a narrow east-west band through Hopkinsville. The co-operative observer in Hopkinsville reported 6.47 inches during this initial event. A second heavy rainfall event, directly associated with Katrina, produced an additional 3.45 inches at Hopkinsville less than 24 hours later.

In Trigg County, schools were closed. Over a dozen roads were closed in Trigg County, mainly due to flooding. The Little River in Cadiz rose out of its banks.

In Todd County, at least 15 secondary roads were closed, including many roads off of U.S. Highway 68. County schools were closed. The Elk Fork Creek rose out of its banks.

Calloway County

Countywide

30	0009CST 0500CST								
		0	0						Flash Flood

Around nine county roads had water over them, and a few creeks overflowed their banks. A co-operative observer reported around 3.25 inches of rain in Murray from early on the 29th through the 30th.

30	0100CST 0800CST								
		0	0	288K					Strong Wind (EG40)

The center of Tropical Depression Katrina, which was once a powerful hurricane along the Gulf of Mexico coast, moved northward across western Kentucky. The center of the depression passed near Hopkinsville around noon. Peak wind gusts were generally around 45 MPH. At Hopkinsville, the peak wind gust was 44 MPH as measured at the Fort Campbell observing station. The strong winds were generally along and southeast of a line from Henderson to Madisonville to Mayfield. An unofficial measurement of a wind gust to 72 MPH was reported along the west shore of Kentucky Lake in Calloway County, however, minor damage in the area was not supportive of such strong winds. A couple of docks were dislodged or damaged along a bay near Jonathan Creek. Elsewhere in Calloway County, the road department responded to 32 reports of roads blocked by trees or limbs. Across the entire area affected by strong winds, scattered trees and limbs were blown down, including some across roads and power lines. A few large trees were uprooted in Christian County, which fell in yards and across roads. No structural damage was reported. In the city of Henderson, several trees fell on city streets. Power outages affected over 10,000 utility customers in western Kentucky. In the Henderson and Owensboro region, 6000 customers were affected. 2500 customers lost power in the Kentucky Lake region, 2000 customers lost power in the Pennyriple region (Madisonville to Hopkinsville), and 800 were affected in the Purchase area (west of Kentucky Lake). Widespread power outages were reported in Princeton and Marion.

Mccracken County

Countywide	30	0500CST 0900CST			0	0			Heavy Rain
------------	----	--------------------	--	--	---	---	--	--	------------

Heavy rainfall from weakening Katrina caused high water in flood-prone low spots on roads. Near Paducah, the intersection of Lovelaceville Road and Gum Springs Road was impassable due to a few feet of water. In Madisonville, up to a few inches of water was over several streets. Portions of the following flood-prone roads were closed: Kentucky 358 in Ballard County, Kentucky 1820 and 1628 in Carlisle County, Kentucky 94 and 1128 in Fulton County, U.S. 45 at Mayfield-Paducah Road in Graves County, Kentucky 1433 in Livingston County, and Kentucky 812 in Henderson County

----------	--	--------------------	--	--	---	---	--	--	---------

Drought conditions eased considerably during early and mid August as thunderstorm activity increased to typical levels for mid-summer. Timely rainfall offset the potentially devastating agricultural impacts of this drought. River levels on the Mississippi River continued to drop through the middle of the month. At Cape Girardeau, the river stage fell as low as 6.5 feet. The river transportation industry was negatively affected by these levels. The U.S. Army Corps of Engineers conducted emergency dredging operations to keep critically shallow sections of the river open to barge traffic. Even so, load restrictions were placed on barges to keep them riding higher in the water. These river levels were not as low as in 1989, when the Cape Girardeau stage fell to 1.29 feet.

Cape Girardeau County

Cape Girardeau	07	1200CST 1400CST			0	0			Heavy Rain
----------------	----	--------------------	--	--	---	---	--	--	------------

Flooded intersections were reported as the result of 1.77 inches of rain in about an hour.
