Penny to quarter size hail was reported in and around Roanoke.

#### Chambers County

**3 W Welch**      **05**    **2112CST**      **0**    **0**    **0**    **0**    **Hail(0.75)**  
Penny size hail was observed in extreme northern Chambers County near US 431.

#### Blount County

**Countywide**      **06**    **0230CST**  
**0330CST**      **0**    **0**    **8K**    **0**    **Flash Flood**  
Several roadways across the county were temporarily impassable because of flooding conditions. Some roads that were flooded include CR 42 at Murphys Valley, Center Springs Road near Locust Fork, Highway 79 in Cleveland, CR 1 in Cleveland, House Road in Oneonta, and Sibleyville Road in Hayden.

#### Calhoun County

**.1 W White Plains to**      **06**    **0248CST**      **3.1**    **250**    **0**    **3**    **200K**    **0**    **Tornado (F1)**  
**3.1 ENE White Plains**      **0251CST**

#### Cleburne County

**8.3 NW Edwardsville to**      **06**    **0251CST**      **5.9**    **250**    **0**    **0**    **0**    **12K**    **Tornado (F1)**  
**4.8 NW Edwardsville**      **0257CST**

Alabama's second tornado of 2003 touched down in the early morning hours of Thursday, March 6, and affected portions of eastern Calhoun and western Cleburne counties. No deaths and only three minor injuries were reported with this tornado.

The tornado first touched down in the White Plains community of Calhoun County, just west of the intersection of SR-9 and Cottaquilla Road. Damage at this location was light and scattered consisting mainly of downed trees and damaged roofs. From there, the tornado traveled east-northeast across SR-9 and County Road 55, where it caused considerable damage to greenhouses at a nursery business as well as chicken houses and other farm structures.

The tornado then moved through open country for about a mile and a half continuing to uproot trees before destroying a mobile home on Chinch Creek Road. From there, the tornado moved eastward into a wooded area of Cleburne County, across Rattlesnake Mountain, causing sporadic tree damage until it lifted about a half mile east of the Shoal Creek Picnic area.

The tornado destroyed two homes and damaged 21 others according to EMA and Red Cross damage assessments. Alabama Power

### ALABAMA, Central

reported that 250 people were without power.

The tornado was rated an F1, mainly based on the amount of damage done to a mobile home on Chinch Creek Road. The tornado path length was about 8.9 miles. The average damage path width directly associated with the tornado was 100-200 yards, although peripheral damage occurred up to a half mile south of center of the tornado path.

### ALABAMA, Central

A tornado touched down in a heavily wooded area near the top of the ridge that forms Lookout Mountain in northeast Etowah County. The tornado was photographed by a person in southwest Cherokee County and observed by several people on the west side of the ridge. Besides trees, no other damage occurred since it was in an extremely remote area.
