#### Walker County

<b>2 SW Carbon Hill to 1 S Carbon Hill</b>	<b>24</b>	<b>1141CST 1144CST</b>	<b>1.1</b>	<b>300</b>	<b>0</b>	<b>0</b>	<b>25K</b>	<b>0</b>	<b>Tornado (F3)</b>
--	-----------	----------------------------	------------	------------	----------	----------	------------	----------	---------------------

What was the longest tornado of the day began at 10:55 am about a two tenths of a mile inside Pickens County or about 5.8 miles southwest of Kennedy. The tornado traveled across southeastern Lamar County damaging or destroying a number of structures south and east of Kennedy. The tornado traveled on a northeast track moving into Fayette County at 11:07 am. Traveling northeast it went across western and northern sections of the city of Fayette doing serious damage to a number of structures. From the city of Fayette the tornado traveled across mostly rural areas damaging occasional structures and downing numerous trees and power lines. The tornado while still strong was weaker than it had been in southern Lamar County. The tornado crossed into Walker County at 11:41 am a little south-southwest of Carbon Hill before ending.

Total path length has been estimated at 38.9 miles with a Fujita-scale rating of F3. The tornado began with F0 damage in Pickens County but strengthened to F3 intensity in southern Lamar County. It weakened some as it moved across Fayette County where the Fujita rating was an F2. Damage in Walker County was rated an F1 as the tornado dissipated. The path was 300 yards wide in Lamar County but estimated to have decreased to about 90 yards wide across much of Fayette County

Two people, a mother and her daughter, were killed in a double-wide mobile home in Lamar County just southwest of Kennedy and one person was injured. No deaths or injuries were reported in Pickens, Fayette or Walker counties.

Beginning: 33 31.528/88 03.156 Ending: 33 52.606/87 31.676

#### Greene County

<b>9 N Clinton to 10 NE Clinton</b>	<b>24</b>	<b>1056CST 1102CST</b>			<b>0</b>	<b>0</b>	<b>3K</b>	<b>0</b>	<b>Thunderstorm Wind (G50)</b>
---	-----------	----------------------------	--	--	----------	----------	-----------	----------	--------------------------------

A few trees were blown down from near the Lewiston community to near Mantua.

.9 SW Haleyville to .7 NE Haleyville	24	1122CST 1124CST	1.6	70	0	13	800K	0	Tornado (F2)
---	----	--------------------	-----	----	---	----	------	---	--------------

The Haleyville tornado first struck about 3 tenths of a mile inside Marion County just south of CR196 at 11:21 am. The tornado traveled on a northeast path moving directly through the center of downtown Haleyville severely damaging buildings including a shopping mall. The tornado continued traveling northeast through a residential and partially wooded area before ending about 7 tenths of a mile northeast of downtown Haleyville at 11:24 am.

The tornado was rated an F2 on the fujita scale for tornado classification making it a strong tornado. Wind speeds associated with an F2 fall in the range of 113 to 157 mph, however, winds speeds probably remained on the low side of the range perhaps 115 to 130 mph. The tornado path was 1.9 miles long and approximately 70 yards wide. Winston County EMA reported 13 injuries with the tornado including one that was listed as serious.

Beginning: 34 13.037/87 38.354 Ending: 34 13.939/87 36.667

---------------------------------------	----	--------------------	---	----	---	---	-----	---	--------------

A supercell thunderstorm spawned an F1 tornado near Lake Lurleen State Park just northwest of Northport. The tornado began at 11:39 am about 10 miles northwest of Northport and just west of the intersection of Rue Road and CR 90. The tornado ended at 11:41 am near Pole Bridge Creek. The tornado mainly snapped off trees along its path but a home suffered damage at the intersection of CR 90 and Rue Road. The home sustained major roof damage and had its front porch totally removed. A few outbuildings were also destroyed on this same property. No injuries were reported. Storm spotters followed this storm near Buhl and Elrod and reported a wall cloud and funnel cloud prior to the development of a tornado. Beg: 33 21.600/87 40.314 End: 33 22.947/87 38.979

--	----	--------------------	-----	-----	---	---	------	---	--------------

The same supercell thunderstorm that produced the tornado in Haleyville produced another tornado near the Lawrence-Morgan county line. The tornado began at 12:10 pm 1 mile southwest of Caddo near CR 214. The tornado moved northeast through Caddo and into Morgan County. The tornado ended at 12:15 pm near North Mountain Road in Trinity. Emergency Management officials estimated that around 25 homes sustained varying degrees of damage including 3 homes that were totally destroyed, one mobile home demolished, and 2 homes received significant damage. Additional damage was reported to several businesses and one church. Numerous trees were snapped or uprooted and numerous outbuildings were destroyed. Two minor injuries were reported in Caddo. The tornado path was 4.9 miles long and 300 yards wide at its widest point. Beg: 34 33.765/87 09.104 End: 34 35.979/87 04.963

---	----	--------------------	-----	----	---	---	-----	---	--------------

A supercell tornado produced an F0 tornado near Cedarville. The tornado began at 12:34 pm about 1 mile south of Cedarville on SR 69. The tornado snapped and uprooted several trees along its path. One farm received damage to a few structures including one barn that had its roof torn off. Two automobiles were damaged by flying debris. The tornado ended at 12:36 pm near CR 9 just north of CR 16. The tornado path was 2.1 miles long and 75 yards wide at its widest point. The tornado remained over rural farmland for most of its path. Beg: 32 35.959/87 41.096 End: 32 37.530/87 38.748

#### Tuscaloosa County

<b>6.1 E Abernant to 6.3 E Abernant</b>	24	1237CST 1238CST	0.2	30	0	0	1K	0	Tornado (F0)
---	----	--------------------	-----	----	---	---	----	---	--------------

A supercell thunderstorm produced a very brief F0 tornado near mile marker 100 on Interstate 59. The tornado was spotted by numerous individuals and storm spotters a quarter to half mile east of Exit 100 on Interstate 59. The tornado only briefly touched down at 12:37 pm in a rural area with little or no damage. Beg: 33 16.848/87 05.529 End: 33 16.967/87 05.319

#### Jefferson County

<b>Pleasant Grove</b>	24	1238CST 1300CST			0	0	15K	0	Hail(2.75)
-----------------------	----	--------------------	--	--	---	---	-----	---	------------

Quarter to baseball size hail was reported from Pleasant Grove to McDonald's Chapel. This was the second storm effecting the area in less than one hour.

### ALABAMA, Central

Several people witnessed a small tornado touchdown in the Half Acre Community. The tornado occurred in a rural, wooded area. Several trees and power lines were blown down along the short, narrow path. Beg: 32 11.426/87 55.750 End: 32 11.789/87 55.323

#### **Cullman County**

**2.3 SW Vinemont to  
.3 W Vinemont**

24	1259CST 1303CST	2.1	200	0	0	75K	0	Tornado (F1)
----	--------------------	-----	-----	---	---	-----	---	--------------

North of Cullman damage was reported at Terri Pines Country Club and in the town of Vinemont. At Terri Pines several tall trees were damaged, either uprooted or snapped off at mid-trunk. One witness at the golf course reportedly saw a funnel; another witness reported a sudden end to a downpour, the sky turning black, then a sudden return of the downpour with the sky becoming lighter. From the golf course, the storm moved northeast. The tornado appeared to have lifted or weakened as it crossed I-65 with only minimal debris from the trees along the road. The tornado continued northeasterly to Vinemont just west of US 31 and south of CR 1292. The tornado reached F1 strength destroying 2 chicken barns and severely damaging a third, scattering debris at least a mile away. A mobile home downhill from the chicken barns had parts of its roof torn off, and there were several holes in the side of the mobile home caused by debris projectiles. The final damage along the track was to a frame garage which was shifted off its slab in a twisting motion causing it to collapse on itself. Witnesses at this location reported hearing a load roaring noise similar to a jet aircraft. At its widest point, the tornado was approximately 200 yards wide. The total length of the path was about 2.1 miles. Beg: 33 13.049/86 53.578 End: 34 14.568/86 52.260

.6 NW Good Hope**

24	1302CST	0.2	50	0	0	1K	0	Tornado (F0)
----	---------	-----	----	---	---	----	---	--------------

At the rest area on Interstate 65, south of Cullman, a funnel cloud had been reported at 1257 pm. At the Shell Station just off I-65, a witness reported another funnel cloud off to the west around 1 pm. Another witness reported a brief touchdown in a rural area with only a few trees blown down. Beg: 34 07.049/86 52.536 End: 34 07.190/86 52.365

#### **Perry County**

**10 NW Heiberger**

24	1304CST			0	0	0	0	Hail(1.75)
----	---------	--	--	---	---	---	---	------------

Golf ball size hail was reported 4 miles northwest of North Perry near the Bibb County line. The hail fell in a rural area with no damage reports received.

#### **Cullman County**

**Cullman**

24	1305CST 1312CST			0	0	1K	0	Hail(1.75)
----	--------------------	--	--	---	---	----	---	------------

Golf ball size hail fell near the intersection of Interstate 65 and US 278. Quarter to golf ball size hail was observed in the city of Cullman.

#### **Jefferson County**

**Fultondale**

24	1305CST			0	0	0	0	Hail(0.75)
----	---------	--	--	---	---	---	---	------------

Dime size hail fell in Fultondale.

#### **Blount County**

**2.9 SE Oneonta to  
9.2 NE Oneonta**

24	1319CST 1330CST	8.3	500	0	22	800K	0	Tornado (F4)
----	--------------------	-----	-----	---	----	------	---	--------------

#### **Etowah County**

**.8 SW Altoona to  
1 NE Altoona**

24	1330CST 1335CST	1.8	500	0	0	1.5M	0	Tornado (F4)
----	--------------------	-----	-----	---	---	------	---	--------------

The F4 tornado first touched down in the vicinity of the Mt. Carmel Church, south of US 231 on CR 29, where several trees were snapped off. The tornado tracked northeast and produced extensive F2-type damage to homes and trailer homes along Tidwell Road where several injuries occurred. All trees in the neighborhood were snapped mid-trunk. As the tornado crossed US 231, it completely destroyed a frame house with F4 magnitude damage. Large trees around the house were uprooted and snapped at mid-trunk. From there, the tornado continued moving northeast and produced its worst, F4 magnitude damage, between Robbins Lake and Airport Road. Large trees were completely snapped off at ground level; two tandem-wheel dump trucks were overturned, and moved or rolled 30 yards; several storage containers filled with construction supplies and equipment were rolled up to 50 yards;

A tornado began weakly on the east side of the Cahaba River in Trussville and damaged a dugout and fencing at the Trussville Sports Complex. The tornado downed trees as it moved northeastward crossing Deerfoot Parkway near the intersection of Interstate 59 in Trussville at 1:31 pm. The tornado followed along Interstate 59 for a short distance downing trees and causing damage to houses especially on the east side of the Interstate. The tornado crossed into St. Clair County at Argo at approximately 1:36 pm. The tornado continued on a northeast track moving primarily through rural settings with property damage along the way including a number of houses and mobile homes. The tornado ended about 5.5 miles east of Springville around 1:52 pm.

The tornado was rated an F2 and was on the ground for 13.8 miles with a width of about 125 yards. Only one injury was reported at Argo with this tornado.

### ALABAMA, Central

The same storm that spawned the Union Grove Tornado moved northeast across the Tennessee River and produced another tornado in southeastern Madison County. This tornado, rated an F2 on the Fujita scale, touched down around 1:50 pm about 3.6 miles west-southwest of the city of New Hope near the base of Lemley Mountain where it downed trees and produced light damage to some homes. The tornado then strengthened as it moved northeast through a mobile home community where several mobile homes were thrown and demolished. After crossing US 431 and damaging several businesses, the tornado lifted about three-quarters of a mile northeast of the US 431/Old US 431 intersection around 1:54 pm. Despite damage to at least 21 homes, including eight that were completely demolished, there were no known injuries. In the mobile home community where the greatest damage occurred, residents stated they heard the Tornado Warning on television and through NOAA Weather Radio and took cover in underground storm shelters. ----	--------------------	-----	-----	--	---	---	------	---	---------------------

The tornado first touched down at 2:25 pm along CR 65 southwest of Peaks Corner causing tree damage. The tornado tracked northeast to CR 52 where a small barn was destroyed. As the tornado continued northeastward, several chicken barns received heavy damage, and many trees were snapped off at mid-trunk. A narrow path of damage continued northeast removing the roof from a cinder-block building, knocking down a wall, and moving a small pickup truck several feet. The tornado continued northeast destroying a trailer home, snapping off trees, and damaging more chicken barns along CR 44. The tornado descended a steep hill into the Pine Ridge community damaging a church before it ended. The width of the tornado was approximately 100 yards wide with a track length of 7.1 miles. There were no injuries reported with this tornado. Beg: 34 23.227/85 53.365 End: 34 27.040/85 47.568

### ALABAMA, Central

#### St. Clair County

.5 SW Pell City to  
3.7 NE Pell City

24    1510CST  
1517CST            4.5    100    0    2    500K    0    Tornado (F2)

A tornado rated an F2 began weakly on the west-southwest side of Pell City just behind the school at 3:10 pm. The tornado traveled on an east-northeast path downing a communication tower at the EMA/911 office and doing minor roof damage. The storm then crossed over downtown Pell City where a number of buildings sustained light to moderate roof damage along with awnings damaged and some windows broken. The tornado crossed US 231 and became very weak, possibly lifting for a little more than a mile, before slamming into a number of buildings in an industrial park. Some of the greatest destruction was done here. The tornado crossed Interstate 20 and ended after damaging a couple of houses on Sprayberry Road at approximately 3:17 pm

The tornado path was 4.5 miles long and approximately 100 yards wide at the widest. No deaths occurred in this tornado but there were two injuries, both classified as minor.

Beginning: 33 34.926/86 17.647 Ending: 33 37.039/86 14.029

#### Talladega County

3.6 W Sylacauga to  
2.6 NW Sylacauga

24    1542CST  
1545CST            3.1    400    0    15    800K    0    Tornado (F2)

The F2 tornado began at 3:42 pm near the intersection of Forest Glen Rd. and Odens Mill Rd., in the Oak Grove Community. It traveled northeast crossing US 280 and ended at 3:45 pm near Shirtee Creek in the Odena Community. The Red Cross and the local Emergency Management Agency estimate that 15 people were injured, two critically. Forty to 50 homes were damaged with 7 of the homes sustaining significant damage. Ten mobile homes were totally destroyed. Several outbuildings and sheds were destroyed and numerous trees were blown down or uprooted along the entire path. The tornado path was 3.1 miles long and 400 yards wide at its widest point. Beg: 33 10.930/86 18.818 End: 33 12.502/86 16.176

#### Autauga County

9.4 SW Pine Level to  
4.6 NW Pine Level

24    1554CST  
1607CST            9.8    50    0    0    40K    0    Tornado (F1)

The tornado first touched down near Huckleberry Lane just north of SR 82 where a trailer home was destroyed. The tornado moved northeast and produced damage on Olmstead Drive just off CR 63, overturning a travel trailer, destroying a shed, and knocking over a flag pole. On CR 40, several homes and mobile homes were damaged. One trailer had its roof torn off and another was rolled over. The tornado next caused damage on CR 57 in Poseys Crossroads. One vacant trailer was destroyed and a second received major damage. Additional damage occurred on CR 62 and CR 59, where a shed was destroyed and a home had roof damage. The tornado dissipated just before reaching Interstate 65. Beg: 32 32.914/86 37.225 End: 32 38.652/86 29.882

#### Talladega County

4.1 SE Winterboro to  
7 SE Talladega

24    1559CST  
1609CST            9.1    200    0    0    230K    0    Tornado (F2)

The same thunderstorm that spawned the Sylacauga tornado produced another tornado in eastern Talladega County. This tornado was also rated an F2 on the Fujita scale and began at 3:59 pm 4 miles southeast of Winterboro in the Talladega National Forest. The tornado tracked northeast across Germany Mountain and ended at 4:09 pm, 1 mile southeast of Waldo. Several homes were damaged on Germany Mountain with one receiving significant damage. At least 6 mobile homes were totally destroyed and several outbuildings and barns were destroyed. Several trees were blown down or snapped off along the path. No injuries were reported. Beg: 33 17.453/86 08.146 End: 33 22.351/86 00.750

#### Randolph County

12.1 NW Wedowee

24	1722CST 1723CST	0.2	300	0	0	50K	0	Tornado (F1)
----	--------------------	-----	-----	---	---	-----	---	--------------

The start of this F1 tornado was approximately 1 mile east of SR 9 on CR 58 where a roof was torn off a barn. On Black's Chapel road near Black's Chapel, several trees were snapped off at mid-trunk. Black's Chapel itself had the steeple torn off with additional roof damage. Across the street, there was extensive damage with a barn destroyed. A path of damage extended across Ingram Road, Wakefield Road, across Foster's Bridge Road, to Monroe. Several barns were destroyed with widespread tree damage. The storm track continued northeast across Mt Moriah Road (CR 58) and crossed into Randolph County along CR 82 for about 2 tenths of a mile. The tornado appeared to have a wide path of damage, up to 300 yards at the widest point, with a total length of 6.1 miles. Witnesses in the area reported hearing the load roaring or "freight train" noise as the storm passed. Beg: 33 24.441/85 42.555 End: 33 25.484/85 38.549

#### Dale County

1 SW Daleville to 1 NE Daleville	25	0112EST 0115EST	2	100	0	25	3M		Tornado (F1) A strong F1 tornado touched down just southwest of Daleville, near the northwest corner of Cairns Army Airfield at Fort Rucker. Several maintenance buildings sustained minor roof damage. One aircraft suffered minor damage from flying sheet metal. The tornado tracked northeast into Daleville and damaged 25 businesses along Highway 85, including a church, gas station, two supermarkets, a bank and several homes. It destroyed a restaurant and two industrial park buildings. The tornado lifted the roof off of the Daleville Inn and Landing Zone Lounge, causing its walls to collapse. Of the 125 patrons inside, 23 suffered minor injuries and two serious injuries. One restaurant was destroyed. Nearly 40 businesses and 1,000 residential customers lost power after the tornado toppled numerous power poles. The intersection of Highways 85 and 134 in Daleville was closed and a curfew was imposed for 24 hours. Fort Rucker damage surveyed by an off-duty Air Force meteorologist and Daleville damage surveyed by the NWS.

<b>Belleville</b>	24	1605CST 1610CST			0	0	10K		<b>Thunderstorm Wind (G55)</b>
-------------------	----	--------------------	--	--	---	---	-----	--	--------------------------------

High thunderstorm winds blew trees down along Highway 84 near Belleville.

#### Conecuh County

<b>Evergreen</b>	24	1642CST 1645CST	0.1	20	0	0	15K		<b>Tornado (F0)</b>
------------------	----	--------------------	-----	----	---	---	-----	--	---------------------

A weak tornado downed trees and power lines around the community.

#### Butler County

<b>Georgiana</b>	24	1658CST 1700CST			0	0			<b>Hail(1.00)</b>
------------------	----	--------------------	--	--	---	---	--	--	-------------------

#### Butler County

<b>Georgiana</b>	24	1708CST 1710CST	3	100	0	0	30K		<b>Tornado (F0)</b>
------------------	----	--------------------	---	-----	---	---	-----	--	---------------------

A weak tornado moved nearly 3 miles across mostly wooded areas to the west of Georgiana. Most of the damage along the path of the tornado was to trees. The tornado first touched down near County Road 16 near Panther Creek. From there the tornado moved northeast, crossing State Road 106, at which point some minor structural damage occurred to a church. The tornado then passed near the intersection of County Roads 25 and 37. Shortly thereafter, the tornado lifted back up into the cloud.

#### Conecuh County

<b>Repton</b>	24	1710CST 1715CST			0	0	10K		<b>Thunderstorm Wind (G55)</b>
---------------	----	--------------------	--	--	---	---	-----	--	--------------------------------

Trees were blown down along Highways 84 and 7, just to the east of Repton.

#### Monroe County

<b>Uriah</b>	24	1710CST 1715CST			0	0	10K		<b>Thunderstorm Wind (G55)</b>
--------------	----	--------------------	--	--	---	---	-----	--	--------------------------------

Several trees were blown over, and high winds damaged the skirting around a mobile home, south of Uriah and near the Little River State Park.

#### Butler County

<b>Mc Kenzie</b>	24	1742CST 1745CST	6	150	0	3	100K		<b>Tornado (F1)</b>
------------------	----	--------------------	---	-----	---	---	------	--	---------------------

A tornado touched down in a wooded area just north of Odom Crossroads, which is to the west of McKenzie. The tornado then crossed County Road 29, where a mobile home was destroyed. Three occupants of the mobile home were injured. The tornado continued to move toward the northeast over mostly wooded areas, but crossed over County Roads 28 and 8. Tree damage occurred along this portion of the storm's path. The tornado eventually crossed US Highway 31 and into a mainly wooded area south of Georgiana. The damage path of the tornado, which was again mostly to trees north of Highway 31, ended near Rocky Creek, where the tornado lifted back into the clouds.

#### Butler County

<b>Garland</b>	24	1830CST 1831CST	0.1	20	0	0	10K		<b>Tornado (F0)</b>
----------------	----	--------------------	-----	----	---	---	-----	--	---------------------

A weak tornado briefly touched down, uprooting a few trees near the community of Grace, which is to the northwest of Garland.
