Subject: Want to increase baseline waste volume

Kirk,

High Explosives Testing (firing sites) wants to increase their projected MLLW volume generation by at least ten-fold to accommodate their expanded hydrotest program. This would mean an increase from about 1 cubic yard per year to at least 10 cubic yards per year. This doesn't seem like a big deal to me. But, what do I know?!

Can we do this easily? Thx for your help.

Susan
