Off-site Source Recover Project

Status as of June 5, 2007

NOTE: numbers are approximate

Total number of sources managed by OSRP	15,261	
Of the 15,261 sources managed by OSRP,		
the number managed without bringing them to LANL	1,360	
the number brought to LANL	13,901	
Of the 14,000 sources brought to LANL		
the number sent offsite for disposal or disposition	2,913	
the number qualifying for offsite disposal ¹ or disposition	10,988	
the number to remain in storage at LANL ²	0	

¹ qualifying for offsite disposal means that there is an identified path to disposal (e.g., a WIPP determination has been or is expected, but the final authorization and/or transfer has not occurred).

² the number to remain at LANL for storage is the balance after subtracting the number sent offsite for disposal/disposition and the number qualifying for offsite disposal or disposition are subtracted from the sources brought to LANL
