Los Alamos County Where Discoveries are Made!

Los Alamos Wastewater Treatment Plant

Project Description:

Replace the Bayo Wastewater Treatment Plant (located in Santa Fe County) with a new advanced wastewater treatment plant in Los Alamos County to improve effluent water quality. The new plant will be located in Pueblo Canyon adjacent to the eastern Los Alamos County boundary.

Demolition of the Bayo Plant's existing structures and site restoration will be bid separately as a separate project.

Contacts:

Project Manager: Gaylyn Meyers, (505) 662-8130 or lacutilities@lacnm.us

Project Cost & Schedule:

Construction began in late January 2006 and is anticipated to be complete by the fall of 2007. Scope of work completed during the FY07 third quarter (January, February and March 2007) included: 1) Completing masonry work and roof trusses and decks for all buildings, 3) Installing clarifier equipment, belt filter press, grit classifier, pumps, blowers and associated piping, 4) Placing yard piping, and 5) Electrical and plumbing work for all buildings and structures.
