

# TRAFFIC SAFETY FACTS 2004

*A Compilation of Motor Vehicle Crash Data from the  
Fatality Analysis Reporting System and the General Estimates System*

# 2004 NATIONAL STATISTICS

## POLICE-REPORTED MOTOR VEHICLE TRAFFIC CRASHES

Fatal .....	38,253
Injury .....	1,862,000
Property Damage Only .....	4,281,000
<b>Total .....</b>	<b>6,181,000</b>

## TRAFFIC CRASH VICTIMS

	<b>Killed</b>	<b>Injured</b>
<b>Occupants .....</b>	<b>33,134</b>	<b>2,594,000</b>
Drivers .....	23,063	1,782,000
Passengers .....	9,991	811,000
Unknown .....	80	1,000
<b>Motorcycle Riders .....</b>	<b>4,008</b>	<b>76,000</b>
<b>Nonmotorists .....</b>	<b>5,494</b>	<b>118,000</b>
Pedestrians .....	4,641	68,000
Pedalcyclists .....	725	41,000
Other/Unknown .....	128	9,000
<b>Total .....</b>	<b>42,636</b>	<b>2,788,000</b>

## OTHER NATIONAL STATISTICS

Vehicle Miles Traveled .....	2,962,513,000,000
Resident Population .....	293,655,404
Registered Vehicles .....	198,888,912
Licensed Drivers .....	237,961,465
Economic Cost of Traffic Crashes (2000) (estimate for reported and unreported crashes) .....	\$230.6 billion

## NATIONAL RATES: FATALITIES

Fatalities per 100 Million Vehicle Miles Traveled .....	1.44
Fatalities per 100,000 Population .....	14.52
Fatalities per 100,000 Registered Vehicles .....	17.92
Fatalities per 100,000 Licensed Drivers .....	21.44

## NATIONAL RATES: INJURED PERSONS

Injured Persons per 100 Million Vehicle Miles Traveled .....	94
Injured Persons per 100,000 Population .....	950
Injured Persons per 100,000 Registered Vehicles .....	1,172
Injured Persons per 100,000 Licensed Drivers .....	1,402

## FOR MORE INFORMATION

Information on motor vehicle crashes is available from the National Center for Statistics and Analysis, NPO-121, 400 Seventh Street, SW, Washington, DC 20590. NCSA information can also be obtained by telephone or by fax-on-demand at 800-934-8517. FAX messages should be sent to 202-366-7078. To report a safety-related problem or to inquire about motor vehicle safety information, call the Auto Safety Hotline at 888-327-4236. General information on highway traffic safety, which can be accessed by Internet users at web site [www.nhtsa.dot.gov/people/nca](http://www.nhtsa.dot.gov/people/nca), includes the following annual NCSA fact sheets: *Overview, Alcohol, Occupant Protection, Older Population, Speeding, Children, Young Drivers, Pedestrians, Pedalcyclists, Motorcycles, Large Trucks, School Transportation-Related Crashes, State Traffic Data, and State Alcohol Estimates.*

# ADMINISTRATOR'S MESSAGE

The National Highway Traffic Safety Administration (NHTSA) is pleased to present its *Traffic Safety Facts 2004: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System*. This report combines data from two of our key crash databases, providing statistics on traffic crashes of all severities.

NHTSA's mission is to reduce deaths, injuries, and economic losses from motor vehicle crashes. This past year we continued to make major strides toward reaching these goals. In 2004, the Nation's crash fatality rate per 100 million vehicle miles of travel was the lowest (1.44) since record keeping began 30 years ago and remained below 1.50 for the second consecutive year. 2004 was also the second year in a row that fatalities from motor vehicle crashes declined. The number of police-reported motor vehicle crashes occurring on our highways dropped to under 6.2 million from over 6.3 million in 2003, and persons injured in these crashes continued a steady decline. On average, a police-reported motor vehicle crash occurred every 5 seconds, a person was injured every 11 seconds, and someone was killed every 12 minutes.

Major campaigns to increase safety belt use and to reduce impaired driving, and the efforts of some State legislatures to pass more effective safety belt and drunk driving laws, were major contributors to the reduction in fatalities and in the fatality rate. Specifically, alcohol-related fatalities declined significantly in 2004, to 16,694, the second consecutive year in which alcohol-related fatalities declined. The number of persons killed while not wearing a safety belt also continued to decline, which may reflect overall increases in safety belt use. Unfortunately, bad driving behaviors continue, as 14,409 persons were killed in crashes that involved a driver or nonoccupant with blood alcohol concentration of .08 or greater, and 55 percent of those killed in passenger vehicles were not wearing safety belts.

Today, drivers on our Nation's highways are safer than they have ever been, in part because of the safer cars, higher safety belt use, and stronger safety laws, all of which NHTSA has helped champion. But as long as the number of highway deaths remains as high as it is, NHTSA will keep advocating for the kind of vehicles, roads, and driving habits that make people safer in their cars and trucks. The progress we've made reflects NHTSA's strong commitment to improved safety. And credit must also go to those States where safety also is a high priority.

I again want to acknowledge the hard work of the many people in States and localities throughout the country who collect, code, and report much of the information contained in this document. Quality information is critical to NHTSA's efforts in our important mission of saving lives. We cannot do our part to accomplish that mission without their dedicated efforts.

I hope users of this publication find the information helpful.

Jacqueline Glassman

# TABLES

## TRENDS: General

1. Crashes by Crash Severity, 1988-2004.....	14
2. Persons Killed or Injured and Fatality and Injury Rates per Population, Licensed Drivers, Registered Vehicles, and Vehicle Miles Traveled, 1966-2004 .....	15
3. Vehicles Involved in Crashes and Involvement Rates per Vehicle Miles of Travel and per Registered Vehicle by Vehicle Type and Crash Severity, 1975-2004.....	17
4. Persons Killed or Injured by Person Type and Vehicle Type, 1975-2004.....	18
5. Drivers Involved in Crashes and Involvement Rates per Licensed Driver by Sex and Crash Severity, 1975-2004 .....	19

## TRENDS: Occupants

6. Motor Vehicle Occupant and Motorcycle Rider Fatality and Injury Rates per Population by Age Group, 1975-2004.....	21
7. Passenger Car Occupants Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2004 .....	22
8. Light Truck Occupants Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2004 .....	24
9. Large Truck Occupants Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2004 .....	26
10. Motorcycle Riders Killed or Injured and Fatality and Injury Rates per Registered Vehicle and Vehicle Miles of Travel, 1975-2004 .....	28

## TRENDS: Large Truck Related

11. Persons Killed or Injured in Crashes Involving a Large Truck by Person Type and Crash Type, 1975-2004.....	30
--	----

## TRENDS: Nonmotorists

12. Nonmotorist Fatality and Injury Rates per Population by Age Group, 1975-2004 .....	31
--	----

## TRENDS: Alcohol

13. Persons Killed, by Highest Blood Alcohol Concentration (BAC) in the Crash, 1982-2004.....	32
14. Persons Killed and Percent Alcohol-Related During Holiday Periods, 1982-2004 .....	33
15. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Time of Day, 1982-2004 .....	34
16. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Sex, 1982-2004 .....	34
17. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Vehicle Type, 1982-2004 .....	35
18. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Age, 1982-2004.....	36
19. Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Survival Status, 1982-2004 .....	38
20. Pedestrians Killed, 14 Years and Older, by Blood Alcohol Concentration (BAC), 1982-2004 .....	38

## TRENDS: Restraints

21. Drivers of Passenger Cars and Light Trucks in Crashes by Crash Severity and Restraint Use, 1975-2004.....	39
22. Occupants of Passenger Cars and Light Trucks Killed or Injured, by Restraint Use, 1975-2004 .....	40

# Tables (Continued)

# INTRODUCTION

In this annual report, *Traffic Safety Facts 2004: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System*, the National Highway Traffic Safety Administration (NHTSA) presents descriptive statistics about traffic crashes of all severities, from those that result in property damage to those that result in the loss of human life.

Information from two of NHTSA's primary data systems has been combined to create a single source for motor vehicle crash statistics. The first data system, the Fatality Analysis Reporting System (FARS), is probably the better known of the two sources. Established in 1975, FARS contains data on the most severe traffic crashes, those in which someone was killed. The second source is the National Automotive Sampling System General Estimates System (GES), which began operation in 1988. GES contains data from a nationally representative sample of police-reported crashes of all severities, including those that result in death, injury, or property damage. The next two sections provide a brief description of FARS and GES.

Both systems were designed and developed by NHTSA's National Center for Statistics and Analysis (NCSA) to provide an overall measure of highway safety, to help identify traffic safety problems, to suggest solutions, and to help provide an objective basis on which to evaluate the effectiveness of motor vehicle safety standards and highway safety initiatives. Data from these systems are used to answer requests for information from the international and national highway traffic safety communities, including state and local governments, the Congress, Federal agencies, research organizations, industry, the media, and private citizens.

# FARS OPERATIONS

The Fatality Analysis Reporting System (FARS), which became operational in 1975, contains data on a census of fatal traffic crashes within the 50 states, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public, and must result in the death of an occupant of a vehicle or a nonmotorist within 30 days of the crash.

NHTSA has a cooperative agreement with an agency in each state's government to provide information on all qualifying fatal crashes in the state. These agreements are managed by Regional Contracting Officer's Technical Representatives located in the 10 NHTSA Regional Offices. Trained state employees, called "FARS Analysts," are responsible for gathering, translating, and transmitting their state's data to NCSA in a standard format. The number of analysts varies by state, depending on the number of fatal crashes and the ease of obtaining data.

FARS data are obtained solely from the state's existing documents:

Police Accident Reports	Death Certificates
State Vehicle Registration Files	Coroner/Medical Examiner Reports
State Driver Licensing Files	Hospital Medical Reports
State Highway Department Data	Emergency Medical Service Reports
Vital Statistics	Other State Records

From these documents, the analysts code more than 100 FARS data elements. (See Appendix A for a list of the FARS data elements.) The specific data elements may be modified slightly each year to conform to changing user needs, vehicle characteristics, and highway safety emphasis areas. The data collected within FARS do not include any personal identifying information, such as names, addresses, or social security numbers. Thus, any data kept in FARS files and made available to the public fully conform to the Privacy Act.

Each analyst enters data into a local microcomputer data file, and daily updates are sent to NHTSA's central computer database. Data are automatically checked when entered for acceptable range values and for consistency, enabling the analyst to make corrections immediately. Several programs continually monitor and improve the completeness and accuracy of the data. The 2004 FARS data file used for the statistics in this report was created in June 2005; however, the 2004 FARS file will *officially* close in February 2006. This additional time provides the opportunity for submission of important variable data requiring outside sources, which may lead to changes in the final counts. The updated final counts for 2003 are reflected in this report. The updated final counts for 2004 will be reflected in the 2005 annual report.

The National Automotive Sampling System (NASS) - General Estimates System (GES) data are obtained from a nationally representative probability sample selected from all police-reported crashes. The system began operation in 1988. To be eligible for the GES sample, a police accident report (PAR) must be completed for the crash, and the crash must involve at least one motor vehicle traveling on a trafficway and must result in property damage, injury, or death. Although various sources suggest that about half the motor vehicle crashes in the country are not reported to police, the majority of these unreported crashes involve only minor property damage and no significant personal injury. By restricting attention to police-reported crashes, the GES concentrates on those crashes of greatest concern to the highway safety community and the general public.

GES data collectors make weekly visits to 410 police jurisdictions in 60 sites across the United States, where they randomly sample about 57,000 PARs per year. The collectors obtain copies of the PARs and send them to the NASS quality control centers for coding. No other data are collected beyond the selected PARs—no driver license, vehicle registration, or medical information is obtained.

Trained data entry personnel interpret and code data directly from the PARs into an electronic data file. Approximately 90 data elements are coded into a common format. (See Appendix B for a list of the GES data elements.) Some elements are modified every other year to meet the changing needs of the highway safety community. To protect individual privacy, no personal information (names, addresses, specific crash locations) is coded. During data coding, the data are checked electronically for validity and consistency. After the data file is created, further quality checks are performed on the data through computer processing and by the data coding supervisors. The 2004 file used for the statistics in this report was completed in June 2005.

# ABOUT THIS REPORT

**F**atal crash data from FARS and nonfatal crash data from GES are presented in this report in five chapters. Chapter 1, “Trends,” presents data from all years of FARS (1975 through 2004) and GES (1988 through 2004). The remaining chapters present data only from 2004. Chapter 2, “Crashes,” describes general characteristics of crashes, such as when and how often they occurred, where they occurred, and what happened during the crash. Chapter 3, “Vehicles,” concentrates on the types of vehicles involved in crashes and the damage to the vehicles. Chapter 4, “People,” is the largest chapter of this report, with statistics about drivers, passengers, pedestrians, and pedalcyclists. The last chapter of the report, “States,” contains information about crashes for each state, the District of Columbia, and Puerto Rico. Terms used throughout the report are defined in the Glossary.

About three-quarters of the tables in this report present data from both FARS and GES. The remaining tables contain FARS data only. Statistics describing fatal crashes or fatalities have been derived from FARS. Statistics describing injury crashes, property-damage-only crashes, or nonfatal injuries have been derived from GES. The reader should be aware that FARS numbers are actual counts of fatalities or fatal crashes, whereas GES numbers are estimates of counts of crashes and injuries and are subject to sampling and nonsampling errors. (See Appendix C for more information on these errors.) To emphasize this difference, FARS numbers are not rounded, while GES estimates have been rounded to the nearest thousand. As a result of the rounding, for some tables, the sum of the row or column entries may not equal the row or column total. In addition, percentages have been calculated prior to rounding.

The reader may also notice that many tables have rows or footnotes for “unknowns” for FARS data, but not for GES data. The reason for this difference is that almost all the GES unknown data have been assigned values through complex statistical procedures. FARS unknown data, on the other hand, are not assigned values, with the exception of blood alcohol concentration (BAC) test results. When the alcohol test results are unknown, BAC values have been assigned to drivers and nonoccupants involved in fatal crashes, using a method of *multiple imputation* that was revised in 2001. More information on the new multiple imputation method, including detailed tabulations of alcohol involvement in various categories (age, sex, time of day, etc.), is available in NHTSA Technical Report DOT HS 809 403, *Transitioning to Multiple Imputation: A New Method to Estimate Missing Blood Alcohol Concentration (BAC) Values in FARS*.

# DATA AVAILABILITY

While this report presents a wide spectrum of information in more than 100 tables and figures, it contains only a fraction of the data available from FARS and GES. Additional data from FARS (1975 through 2004) or from GES (1988 through 2004) are available in four ways:

- Modest requests for specific data will be answered by NCSA at no charge. Response usually requires about two weeks, depending on the nature and complexity of the data requested.
- Compact disks can be purchased in one of several formats amenable to analysis. This will enable you to process the data using your own computer system. Information on acquiring the compact disks is available by contacting the Volpe Center at the following address:

Attn: Marjorie Saccoccio  
USDOT Volpe National Transportation Systems Center  
DTS-23  
55 Broadway  
Cambridge, MA 02142  
617-494-2640  
617-494-3770 (FAX)

- FARS and GES data can be obtained by downloading any of the published files from the Internet, at <ftp://ftp.nhtsa.dot.gov/FARS> or <ftp://ftp.nhtsa.dot.gov/GES>. The files are available in SAS, sequential ASCII, and (for FARS only, not GES) DBF file formats. This will enable you to process the data using your own computer system.
- FARS data can also be accessed on the Web at [www-fars.nhtsa.dot.gov](http://www-fars.nhtsa.dot.gov). This Web site provides instant access to the 1994 through 2004 FARS data via the Create-a-Query, Create-a-Map, and Reports features. The Create-a-Query feature will enable you to process the data using our interactive user interface. The Create-a-Map feature will enable you to create state-by-state and county-by-county map displays from an inventory of report selections. The Reports feature is an inventory of the fatality statistical reports found in this publication. These are national reports for current and past years that may be customized by selection of state; and for state reports, county tabulation may be selected.

## VEHICLE SAFETY HOTLINE

To report a safety-related problem or to inquire about motor vehicle safety information, contact the Vehicle Safety Hotline at 888-327-4236.

# Data Availability

Requests for more information from FARS or GES should be directed to:

National Highway Traffic Safety Administration  
National Center for Statistics and Analysis  
NPO-121  
400 Seventh Street, SW  
Washington, DC 20590  
202-366-4198 or 800-934-8517  
202-366-7078 (FAX)

Additional information on all NHTSA's data files, including FARS and GES, can be found on the NCSA Web site: [www.nhtsa.dot.gov/people/ncsa](http://www.nhtsa.dot.gov/people/ncsa). Fact sheets, recent NCSA research notes, and abstracts of technical reports can be downloaded in portable document format (PDF). Comments and suggestions about the NCSA Web site can be e-mailed to the following address: [ncsaweb@nhtsa.dot.gov](mailto:ncsaweb@nhtsa.dot.gov).

---

Chapter 1

# TRENDS

---

The tables in this chapter present statistics about police-reported motor vehicle crashes over time. Trends for fatal crashes and fatalities generally are presented from 1975 (when FARS began operation) to 2004; however, tables with alcohol data from FARS show data only for the years these data are available—1982 to 2004. Trends for nonfatal crashes and injured are presented from 1988 (when GES began operation) to 2004. Care should be taken when comparing nonfatal crash and injury statistics from one year to the next. Since the statistics derived from GES data are estimates, year-to-year differences may be the result of the sampling process, not the result of an actual trend. The variability or sampling errors associated with the estimates must be considered when making any year-to-year comparisons using GES data. (For more information on sampling error, see Appendix C.) Below are some of the statistics you will find in this chapter:

- Fatal crashes decreased slightly (0.6 percent) from 2003 to 2004, and the fatality rate dropped to a new historic low of 1.44 fatalities per 100 million vehicle miles of travel in 2004.
- The injury rate per 100 million vehicle miles of travel decreased by 6.0 percent from 2003 to 2004.
- The occupant fatality rate (including motorcycle riders) per 100,000 population, which declined by 22.7 percent from 1975 to 1992, decreased by 1.9 percent from 1992 to 2004.
- The occupant injury rate (including motorcycle riders) per 100,000 population, which declined by 13.6 percent from 1988 to 1992, decreased by 20.3 percent from 1992 to 2004.
- The nonmotorist fatality rate per 100,000 population has declined by 53.1 percent from 1975 to 2004.
- The nonmotorist injury rate per 100,000 population has declined by 49.4 percent from 1988 to 2004.
- The percent of alcohol-related fatalities has declined from 60 percent in 1982 to 39 percent in 2004.

# Chapter 1 ■ Trends

\*Blood alcohol concentration (BAC) of .01 grams per deciliter (g/dl) or greater. NHTSA estimates alcohol involvement when alcohol test results are unknown. For more information, see page 7 of this report.

\*\*The number of whole days in the holiday period is shown in parentheses. The length of the holiday period depends on the day on which the legal holiday falls, as follows:

- If the holiday falls on *Monday*, the holiday period is from 6:00 pm Friday to 5:59 am Tuesday.
- If the holiday falls on *Tuesday*, the holiday period is from 6:00 pm Friday to 5:59 am Wednesday.
- If the holiday falls on *Wednesday*, the holiday period is from 6:00 pm Tuesday to 5:59 am Thursday.
- If the holiday falls on *Thursday*, the holiday period is from 6:00 pm Wednesday to 5:59 am Monday.
- If the holiday falls on *Friday*, the holiday period is from 6:00 pm Thursday to 5:59 am Monday.

\*\*\*No data available.

# Chapter 1 ■ Trends

**Table 15**  
**Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Time of Day, 1982-2004**

Year	Day*			Night*			Total Drivers		
	Total	Percent		Total	Percent		Total	Percent	
		BAC = .01+	BAC = .08+		BAC = .01+	BAC = .08+		BAC = .01+	BAC = .08+

Chapter 2

# CRASHES

---

## CHAPTER 2 ■ CRASHES

This chapter presents statistics about police-reported motor vehicle crashes according to the most severe injury in the crash: **Fatal**, **Nonfatal Injury** (Injury), and **Property Damage**. The tables and figures are presented in four groups: Time, Location, Circumstances, and Alcohol. Below are some of the crash statistics you will find in this section:

- Nearly 6.2 million police-reported motor vehicle crashes occurred in the United States in 2004. Almost one-third of these crashes resulted in an injury, with less than 1 percent of total crashes (38,253) resulting in a death.
- Midnight to 3 a.m. on Saturdays and Sundays proved to be the deadliest 3-hour periods throughout 2004, with 1,174 and 1,277 fatal crashes, respectively.
- Fifty-seven percent of fatal crashes involved only one vehicle, compared to 30 percent of injury crashes and 30 percent of property-damage-only crashes.
- More than half of fatal crashes occurred on roads with posted speed limits of 55 mph or more, while only 24 percent of property-damage-only crashes occurred on these roads.
- Collision with another motor vehicle in transport was the most common first harmful event for fatal, injury, and property-damage-only crashes. Collisions with fixed objects and noncollisions accounted for only 19 percent of all crashes, but they accounted for 43 percent of fatal crashes.
- Thirty-nine percent of fatal crashes involved alcohol. For fatal crashes occurring from midnight to 3 a.m., 76 percent involved alcohol.

## Chapter 2 ■ Crashes

# VEHICLES

---

## CHAPTER 3 ■ VEHICLES

**S**tatistics about the vehicles involved in police-reported motor vehicle crashes are presented in this chapter, according to six major vehicle types: Passenger Cars, Light Trucks (including pickups, vans, and utility vehicles with a gross vehicle weight rating of 10,000 pounds or less), Large Trucks (including single-unit trucks and truck tractors with a gross vehicle weight rating of more than 10,000 pounds), Motorcycles (including motorcycles, mopeds, and motorscooters), Buses (including school buses and transit buses), and Other Vehicles (including all-terrain vehicles, farm and construction equipment, and motorhomes). The tables and figures are presented for all vehicle types first, then by individual vehicle type. Below are some of the vehicle statistics you will find in this section:

- Nearly 95 percent of the 11 million vehicles involved in motor vehicle crashes in 2004 were passenger cars or light trucks.
- Large trucks accounted for 8 percent of the vehicles in fatal crashes, but only 3 percent of the vehicles involved in injury and 4 percent of the vehicles involved in property-damage-only crashes. Of the 4,862 large trucks involved in fatal crashes, 74 percent were combination trucks.
- The proportion of vehicles that rolled over in fatal crashes (20.5 percent) was 4 times as high as the proportion in injury crashes (5.0 percent) and 16 times as high as the proportion in property-damage-only crashes (1.3 percent).
- Compared with other vehicle types, utility vehicles experienced the highest rollover rates: 36.2 percent in fatal crashes, 9.6 percent in injury crashes, and 2.4 percent in property-damage-only crashes.
- Fires occurred in 0.1 percent of the vehicles involved in all traffic crashes in 2004. For fatal crashes, however, fires occurred in nearly 3 percent of the vehicles involved.
- Regardless of crash severity, the majority of vehicles in single- and two-vehicle crashes were going straight prior to the crash. The next most common vehicle maneuver differed by crash severity: negotiating a curve for fatal crashes, turning left for injury crashes, and stopped in traffic lane for property-damage-only crashes.
- Motorcycles in fatal crashes had the highest proportion of collisions with fixed objects (26.4 percent), and buses in fatal crashes had the lowest proportion (2.2 percent).

Chapter 4

# PEOPLE

---

This chapter presents statistics about the Drivers, Passengers, Pedestrians, and Pedalcyclists involved in police-reported motor vehicle crashes in 2004. The tables and figures are presented in nine groups: all killed or injured persons, crash-involved drivers, occupants (drivers and passengers), alcohol, restraints, motorcycle related, school bus related, pedestrians, and pedalcyclists. Below are some of the statistics you will find in this section:

- A total of 42,636 people lost their lives in motor vehicle crashes in 2004. Another 2.8 million people were injured.
- The majority of persons killed or injured in traffic crashes were drivers (64 percent), followed by passengers (29 percent), motorcycle riders (3 percent), pedestrians (3 percent), and pedalcyclists (1 percent).
- Persons 16 to 20 years old had the highest fatality and injury rates per 100,000 population. Children 5 to 9 years old had the lowest fatality rates, and children under 5 years old had the lowest injury rates.
- For every age group, the fatality rate per 100,000 population was lower for females than for males. The injury rate based on population was higher for females than for males in every age group, except for people over 74 years old.
- Of the persons who were killed in traffic crashes in 2004, 39 percent died in alcohol-related crashes. Nine percent of the injured persons received their injuries in alcohol-related crashes.

# Chapter 4 ■ People

**Table 64**  
**Drivers and Motorcycle Operators Involved in Fatal Crashes,**  
**by Previous Driving Record and License Type Compliance**

Previous Convictions	Valid License (49,490)		Invalid License (6,970)		Total (56,460)	
	Number	Percent	Number	Percent	Number	Percent
Previous Recorded Crashes	6,736	13.6	900	12.9	<b>7,636</b>	<b>13.5</b>
Previous Recorded Suspensions or Revocations	3,662	7.4	2,998	43.0	<b>6,660</b>	<b>11.8</b>
Previous DWI Convictions	838	1.7	815	11.7	<b>1,653</b>	<b>2.9</b>
Previous Speeding Convictions	10,204	20.6	1,298	18.6	<b>11,502</b>	<b>20.4</b>
Previous Other Harmful Moving Convictions	8,119	16.4	1,626	23.3	<b>9,745</b>	<b>17.3</b>
Drivers with No Previous Convictions	29,860	60.3	3,217	46.2	<b>33,077</b>	<b>58.6</b>

Notes: Table does not include 1,620 drivers with unknown license status. FARS records prior driving records (convictions only, not violations) for events occurring within 3 years of the date of the crash. The same driver can have one or more of these convictions. License type compliance refers to the type of drivers license possessed or not possessed by the driver for the class of vehicle being driven at the time of the crash.

**Table 65**  
**Related Factors for Drivers and Motorcycle Operators Involved in Fatal Crashes**

Factors	Number	Percent
Failure to keep in proper lane or running off road . . . . .	13,954	24.0
Driving too fast for conditions or in excess of posted speed limit or racing . . . . .	11,818	20.3
Under the influence of alcohol, drugs, or medication . . . . .	7,072	12.2
Failure to yield right of way . . . . .	4,611	7.9
Operating vehicle in erratic, reckless, careless, or negligent manner . . . . .	3,905	6.7
Inattentive (talking, eating, etc.) . . . . .	3,671	6.3
Swerving or avoiding due to wind, slippery surface, vehicle, object, nonmotorist in roadway, etc. . . . .	2,666	4.6
Failure to obey traffic signs, signals, or officer . . . . .	2,607	4.5
Overcorrecting/oversteering . . . . .	2,466	4.2
Vision obscured (rain, snow, glare, lights, building, trees, etc.) . . . . .	1,679	2.9
Drowsy, asleep, fatigued, ill, or blackout . . . . .	1,653	2.8
Making improper turn . . . . .	1,537	2.6
Driving wrong way on one-way trafficway or on wrong side of road . . . . .	936	1.6
Other factors . . . . .	9,420	16.2
None reported . . . . .	20,216	34.8
Unknown . . . . .	780	1.3
<b>Total Drivers</b> . . . . .	<b>58,080</b>	<b>100.0</b>

Note: The sum of the numbers and percentages is greater than total drivers as more than one factor may be present for the same driver.

**Table 103**

**Pedalcyclists Killed, by Related Factors**

Factors	Number	Percent
Failure to yield right of way . . . . .	131	18.1
Walking, playing, working, etc., in roadway . . . . .	83	11.4
Improper crossing of roadway or intersection . . . . .	69	9.5
Darting into road . . . . .	62	8.6
Not visible . . . . .	59	8.1
Failure to obey (e.g., signs, control devices, officers) . . . . .	57	7.9
Operating without required equipment . . . . .	51	7.0
Failure to keep in proper lane or running off road . . . . .	43	5.9
Inattentive (talking, eating, etc.) . . . . .	18	2.5
Making improper turn . . . . .	18	2.5
Riding on wrong side of road . . . . .	18	2.5
Failing to have lights on when required . . . . .	10	1.4
Improper lane changing . . . . .	10	1.4
Erratic, reckless, careless, or negligent operation . . . . .	8	1.1
Improper entry to or exit from trafficway . . . . .	5	0.7
Other factors . . . . .	53	7.3
None reported . . . . .	254	35.0
Unknown . . . . .	16	2.2
<b>Total Pedalcyclists . . . . .</b>	<b>725</b>	<b>100.0</b>

Note: The sum of the numbers and percentages is greater than total pedalcyclists killed as more than one factor may be present for the same pedalcyclist.

---

Chapter 5

# STATES

---

**F**atal crash and fatality statistics for each of the 50 states, the District of Columbia, and Puerto Rico are presented in this chapter. Several tables display state fatality rates based on population, licensed drivers, and registered vehicles. The last four tables describe each state's safety belt use laws, child passenger protection laws, motorcycle helmet use requirements, and impaired driving legislation. Below are some of the state statistics you will find in this chapter:

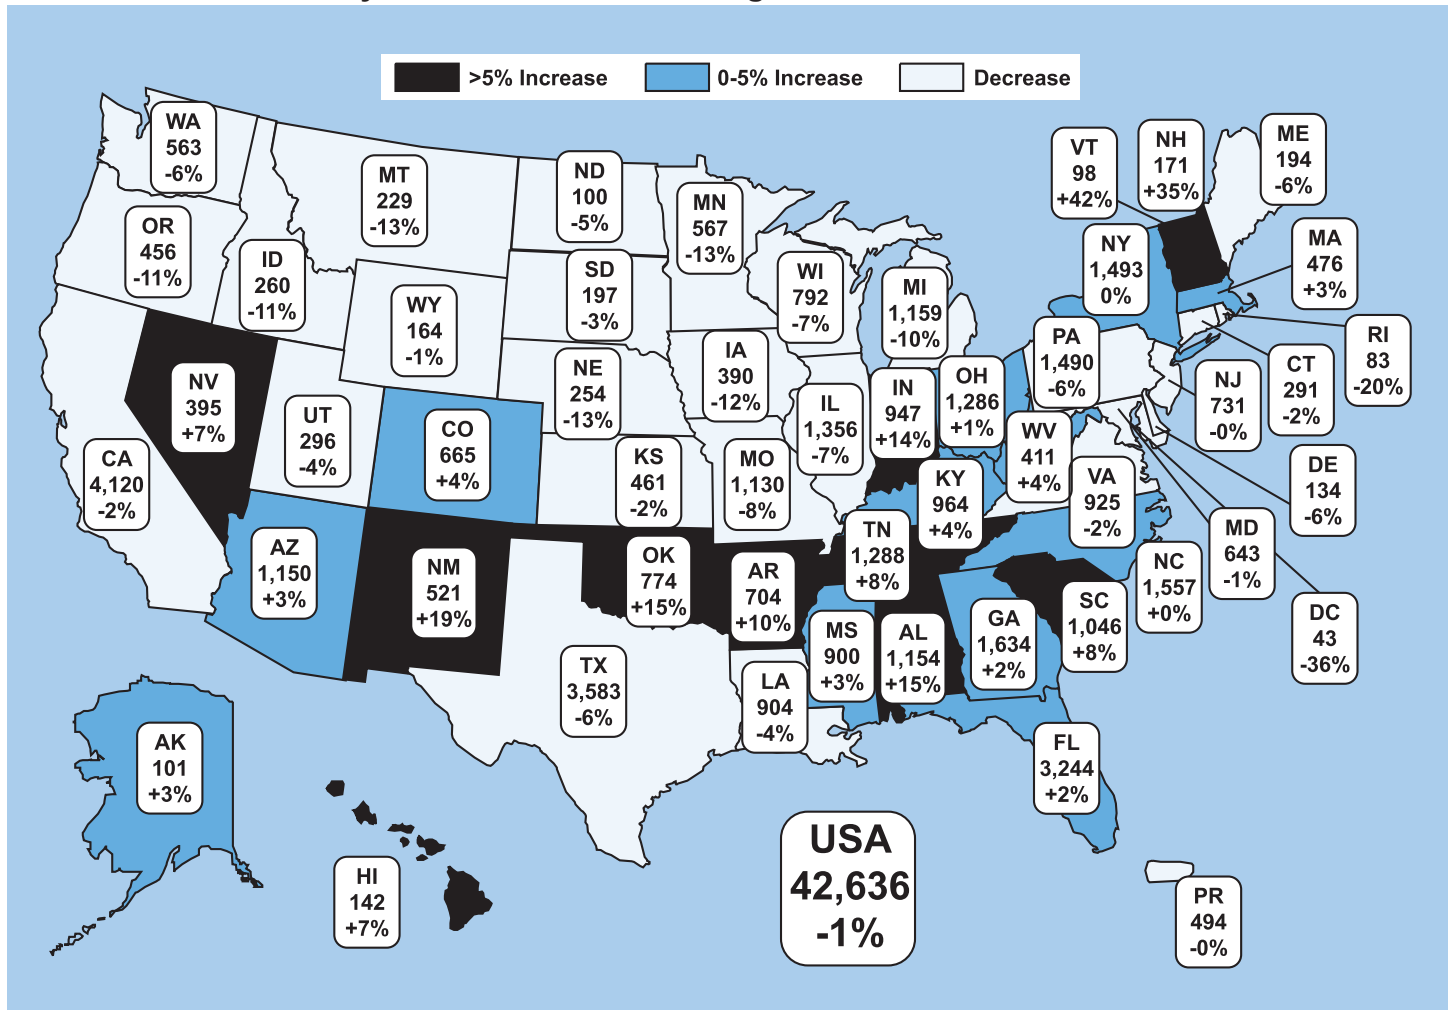

- Traffic fatalities decreased slightly (by 0.6 percent) from 2003 to 2004 for the nation as a whole. Twenty-two states showed increases, ranging from less than 1 percent to as much as 42 percent.
- The pedestrian fatality rate per 100,000 population was 1.58 for the nation. New Mexico had the highest rate (2.94) and Nebraska had the lowest (0.52).
- About 1.7 percent of all traffic crash fatalities in 2004 were pedalcyclists. Rhode Island and Wyoming reported no pedalcyclists killed.
- In 2003, all states, plus the District of Columbia and Puerto Rico, had safety belt use laws. All states, the District of Columbia, and Puerto Rico also had laws requiring children of certain ages to be restrained in child safety seats.
- Motorcycle helmets were required for all riders in 20 states, the District of Columbia, and Puerto Rico in 2003. Twenty-seven states had helmet requirements with exceptions (age, rider type, roadway type), and three states did not require helmets at all.
- In 2003, it was a criminal offense to operate a motor vehicle at a blood alcohol concentration (BAC) of .08 g/dl or above in 45 states, the District of Columbia, and Puerto Rico.

# Chapter 5 ■ States

**Table 123**  
**Key Provisions of Occupant Restraint Laws**

State	Enforcement	Belt Fine	Child Restraint Required	Safety Belt or Booster Seat Required	Safety Belt Required <sup>(1)</sup>		Vehicles Exempted and Other Information <sup>(3)</sup>
					Seats	Ages <sup>(2)</sup>	
AL	Primary	\$25	3 years and under	4-5 years	Front	6+	Designed for >10 passengers, model year <1965, rural mail carriers, trailers, newspaper delivery.
AK	Secondary	\$15	3 years and under	4-15 years	All	All	School bus.
AZ	Secondary	\$10	4 years and under	—	Front	5-15, all seats; 16 and over, front only	Designed for >10 passengers, model year <1972, postal service vehicles.
AR	Secondary <sup>(4)</sup>	\$25	5 years and under and <60 lb	6-14 years or 60+ lb	Front	All	School, church, or public bus; model year <1968.
CA	Primary	\$22	5 years and under or <60 lb	6-15 years or >60 lb	All	All	Emergency vehicles, postal service vehicles, newspaper delivery; <60 lb must be in rear seat if available.
CO	Secondary <sup>(5)</sup>	\$17	5 years and under	6-15 years and 55+ inches tall	Front	All	Passenger bus, school bus, ambulance, postal service vehicles, delivery and pickup services; <1 year and <20 lb must be in rear-facing infant seat.
CT	Primary	\$37	1-6 years and <60 lb in child restraint system	7-15 years and 60+ lb	Front	4-15, all seats	Truck or bus >15,000 lb; public, emergency, delivery, and postal service vehicles; newspaper delivery; booster seats allowed only in seating position with lap and shoulder belt; <1 year or <20 lb must be in rear-facing restraint system.
DE	Primary	\$25	6 years and under and <60 lb	7-15 years or 60+ lb	All	All	Postal service vehicles, tractors, off-highway vehicles.
DC	Primary	\$50 <sup>(6)</sup>	7 years and under	8-15 years	All	All	Seating for >8 people; manufactured before 7/1/66.
FL	Secondary	\$30	3 years and under	4-5 years	Front	6-17, rear seats	School bus purchased before 1/1/2001, farm tractors, trash trucks, newspaper delivery, living space of RVs, public bus, truck >5,000 lb; number of passengers in pickup truck required to wear seat belt shall not exceed number of installed front seat belts (extra passengers exempted).
GA	Primary	\$15-\$25	5 years and under and 57 inches tall or less	>57 inches tall	Front	6-17, <sup>(7)</sup> all seats	Designed for >10 passengers, pickup trucks (exemption only for passengers 18+ years), off-road vehicles, vehicles used for frequent stops; 5 years and younger must be in rear seat if available.
HI	Primary	\$55	3 years and under	—	Front	4-17, all seats	Bus or school bus >10,000 lb, emergency vehicles, taxicabs; exempts persons unable to use seat belt when all seat belt assemblies are in use (in this case, unsecured children must sit in back seat).
ID	Secondary	\$10	6 years and under	—	All	All	>8,000 lb.
IL	Primary	\$25	7 years and under	8-15 years	Front	8-15, all seats	Emergency vehicles, vehicles used for frequent stops; if driver <18 years, all passengers <18 years must be restrained.
IN	Primary	\$25	7 years and under	—	Front	4-11, all seats	Truck, tractor, RV, pickup truck, SUV if registered as pickup truck, postal service vehicles, delivery vehicles.

<sup>(1)</sup>Virtually every state exempts persons who for medical reasons cannot use a safety belt and vehicles not originally required to be equipped with safety belts.

<sup>(2)</sup>The word "All" used in this category means that everyone in the vehicle occupancy compartment must be restrained. For children, that may be in a child restraint.

<sup>(3)</sup>Emergency vehicle and bus exemptions generally do not apply to the driver.

<sup>(4)</sup>If a motorist is wearing a safety belt when stopped for a different violation, the fine for that violation is reduced by \$10.

<sup>(5)</sup>Primary enforcement for drivers under 17 years of age.

<sup>(6)</sup>Plus 2 points on driver's license record.

<sup>(7)</sup>Driver may be fined up to \$100 and seat passengers \$50 for each passenger under 16 years of age not wearing a safety belt.

Source: NHTSA, Regional Office. Updated as of September 2005.

**Table 123**  
**Key Provisions of Occupant Restraint Laws (Continued)**

State	Enforcement	Belt Fine	Child Restraint Required	Safety Belt or Booster Seat Required	Safety Belt Required <sup>(1)</sup>		Vehicles Exempted and Other Information <sup>(3)</sup>
					Seats	Ages <sup>(2)</sup>	
IA	Primary	\$25	5 years and under	6-10 years	Front	10 and under, all seats	Delivery vehicles that do not exceed 25 mph between stops, emergency vehicles, postal service vehicles.
KS	Secondary	\$10	3 years and under	—	Front	4-13, all seats	Designed for >10 people, truck >12,000 lb, off-road vehicles, postal service vehicles, newspaper delivery vehicles.
KY	Secondary	\$25	<40 inches tall	—	All	All	Designed for >10 people, truck >12,000 lb, farm truck 2,000+ lb, postal service vehicles.
LA	Primary	\$25	5 years and under	6-12 years or >60 lb	Front	6-12	Designed for >10 people, model year <1981, postal service vehicles, farm vehicles within 5 miles of farm.
ME	Secondary	\$50- \$250	7 years and under and <80 lb	—	All	All	Manufactured without safety belts, postal service vehicles; all passengers in school bus equipped with safety belts must use them.
MD	Primary	\$25	5 years and under or 40 lb or less	6-15 years and >40 lb	Outboard front	15 and under	"Historical" vehicles, for-hire vehicles, farm vehicles within 10 miles of farm, vanpool vehicles, ambulances, funeral limousines, modified vehicles 25+ years old.
MA	Secondary	\$25	<5 years and 40 lb or less	5-11 years	All	All	Truck >18,000 lb, buses and taxis, emergency vehicles, postal service vehicles.
MI	Primary	\$25	3 years and under	—	Front	4-15, all seats <sup>(8)</sup>	Taxi, bus, school bus, postal service vehicles, commercial vehicles making frequent stops.
MN	Secondary	\$25	3 years and under	—	Front	4-10, all seats <sup>(9)</sup>	Farm pickup truck, postal service vehicles, commercial vehicles making frequent stops if speed does not exceed 25 mph between stops.
MS	Secondary	\$25	3 years and under	—	Front	4-7, all seats	Farm vehicle, bus, postal service vehicles, utility meter readers' vehicles, all-terrain vehicles, vehicles designed to carry >15 people.
MO	Secondary <sup>(10)</sup>	\$10	3 years and under	—	Front	4-15, all seats	Designed for >10 people, truck >12,000 lb, postal service vehicles, vehicles being used for agriculture.
MT	Secondary <sup>(11)</sup>	\$20	5 years and under and <60 lb	—	All	All	Vehicles making frequent stops if exemption obtained from state; construction vehicles.
NE	Secondary	\$25	5 years and under	6-15 years	Front	4-15, all seats	Model year <1973, farm tractors and other agricultural equipment, buses, postal service vehicles, ambulance or rescue service vehicles.
NV	Secondary	\$25	5 years and under and 60 lb or less	—	All	All	Taxi (exemption for child restraints only; safety belts required for passengers over 18 years), bus, school bus, postal service vehicles, emergency vehicles, delivery vehicles not exceeding 15 mph, any vehicle or seating position if state determines compliance is impractical.
NH	No adult law	\$25	5 years and under if <55 inches tall	6-17 years	All	<18 only (primary law)	School bus, vehicle for hire, model year <1968, antique cars, vehicles in parade traveling at 10 mph or less.
NC	Primary	\$25	7 years and under and <80 lb <sup>(12)</sup>	8-15 years and children 40-80 lb in seats without shoulder belts	Front	<15, all seats	Designed for >11 people, farm vehicles, postal service vehicles, designated commercial vehicles, emergency vehicles.

<sup>(8)</sup>A driver does not have to comply with this requirement if the number of children to be secured exceeds the number of safety belts available. Unsecured children must be seated in other than the front seat, and all front seat passengers must be secured. For pickups with all safety belts being used and without an extended cab or jump seats, unsecured children may be transported in the front seat.

<sup>(9)</sup>Safety belt requirement does not apply to persons riding in a vehicle with all available safety belt positions occupied.

<sup>(10)</sup>Primary for children <6 years of age.

<sup>(11)</sup>Exemptions for persons who cannot use safety belts because all available safety belts are in use.

<sup>(12)</sup>In vehicles with front side passenger air bags, a child <5 years of age and <40 lb must be properly secured in the rear seat, unless the child restraint system is designed for use with air bags.

ND	Secondary <sup>(13)</sup>	\$20	6 years and under and <57 inches tall or <80 lb <sup>(14)</sup>	7-17 years	Front	7-17, all seats	Designed for >10 people, farm vehicles, rural mail carriers.
NJ	Primary	\$22	7 years and under and <80 lb <sup>(15)</sup>	—	Front	8-17, all seats	Manufactured before 1966, rural letter carriers.
NM	Primary	\$25 <sup>(16)</sup>	6 years and under and <60 lb <sup>(17)</sup>	7-17 years	All	All	Vehicles >10,000 lb, rural letter carriers.
NY	Primary	\$50-\$100 <sup>(18)</sup>	6 years and under	7-15 years	Front	<16, all seats	Bus, school bus <sup>(19)</sup> , taxi, emergency or delivery vehicle, rural letter carriers.
OH	Secondary	\$30 driver, \$20 passenger	3 years and under or <40 lb	—	Front	—	Postal service vehicles, vehicles delivering newspapers.
OK	Primary	\$20	5 years and under and 60 lb or less <sup>(20)</sup>	6-12 years	Front	6-12, all seats	Farm vehicles, truck, truck tractor, RV, postal service vehicles.
OR	Primary	\$75	—	—	All	All	Newspaper, mail delivery, meter reader, and transit vehicles, for-hire vehicles, trash trucks, emergency vehicles.
PA	Secondary	\$10 <sup>(21)</sup>	7 years and under <sup>(22)</sup>	—	Front	8-17, all seats	Truck >7,000 lb, rural letter carriers, delivery vehicles traveling 15 mph or less.
RI	Secondary <sup>(23)</sup>	\$75	<7 years, <54 inches tall, and <80 lb	—	All	All	Postal service vehicles.

<sup>(1)</sup>Virtually every state exempts persons who for medical reasons cannot use a safety belt and vehicles not originally required to be equipped with safety belts.

<sup>(2)</sup>The word "All" used in this category means that everyone in the vehicle occupancy compartment must be restrained. For children, that may be in a child restraint.

<sup>(3)</sup>Emergency vehicle and bus exemptions generally do not apply to the driver.

<sup>(13)</sup>Primary enforcement for all positions if occupant is <18 years of age.

<sup>(14)</sup>Requirement to use either a child restraint system or a safety belt does not apply to either (1) a child if all available safety belts are in use by other family members or (2) a child being transported in an emergency situation.

<sup>(15)</sup>Seated in rear seat if available.

<sup>(16)</sup>Plus 2 points on driver's license record.

<sup>(17)</sup>Under 1 year in rear-facing infant seat, in rear seat if available; 1-4 years or <40 lb in child safety seat; 5-6 years or <60 lb in booster seat.

<sup>(18)</sup>Plus 3 points on driver's license record. Front seat passengers 16 years and older can be fined up to \$50 and drivers can be fined up to \$100 for each passenger under 16 not wearing a safety belt.

<sup>(19)</sup>School buses sold in the state must be equipped with safety belts; Board of Education, via regulations, may provide that on school buses under its jurisdiction safety belts must be used when such vehicles are in operation.

<sup>(20)</sup>Children >40 lb may be belted in the rear seat by a lap belt if the vehicle is not equipped with lap and shoulder belts, or when all lap and shoulder belts are being used by other children.

<sup>(21)</sup>Pennsylvania's fine is \$10, but with court, EMS, judicial, and computer costs, the ticket total is \$51.50.

<sup>(22)</sup>Secondary enforcement of booster seat requirement for ages 4-7 years.

<sup>(23)</sup>Primary enforcement for drivers and occupants under 18 years old.

**Table 123**  
**Key Provisions of Occupant Restraint Laws (Continued)**

State	Enforcement	Belt Fine	Child Restraint Required	Safety Belt or Booster Seat Required	Safety Belt Required <sup>(1)</sup>		Vehicles Exempted and Other Information <sup>(3)</sup>
					Seats	Ages <sup>(2)</sup>	
SC	Primary <sup>(24, 25)</sup>	\$10	1 to 6 years, 40-80 lb <sup>(26)</sup>	—	All	All	Buses; emergency, postal service, and delivery vehicles; vehicles carrying >10 passengers; parade vehicles; vehicles in which all seating positions with safety belts are occupied; persons in rear seat if vehicle is not equipped with shoulder harnesses.
SD	Secondary <sup>(27)</sup>	\$20	4 years and under and <40 lb	5-17 years or 40 lb or more	Front	17 and under, all seats	Passenger bus, school bus, rural mail carriers, newspaper or periodical delivery.
TN	Primary	\$10 <sup>(28)</sup>	8 years and under and <60 inches tall	9-15 years	Front	<16, all seats	>8,500 lb, rural letter carriers, utility workers, newspaper delivery.
TX	Primary	\$25-\$200	4 years and under and <36 inches tall	—	Front	16 and under, all seats <sup>(29)</sup>	Designed for >10 people, truck >15,000 lb, farm vehicles, postal service vehicles, meter readers.
UT	Secondary <sup>(30)</sup>	\$45 <sup>(31)</sup>	4 years and under	5-15 years	All	All	Passengers exempted if all seats are occupied or if riding in seating positions not required to be equipped with safety belts.
VT	Secondary	\$25-\$100	<7 years in child seat <sup>(32)</sup>	5-15 years or 60 inches or taller	All	All	Bus, taxi, rural mail carriers, delivery vehicles traveling at 15 mph or less, emergency vehicles, farm tractor.
VA	Secondary	\$25	5 years and under <sup>(33)</sup>	6-15 years	Front	<16	Designed for >10 people, taxi, police vehicles, rural mail carriers, newspaper delivery, utility meter readers, commercial vehicles making frequent stops.
WA	Primary	\$86	<8 years and <57 inches tall <sup>(34)</sup>	8-15 years or 57 inches or taller <sup>(34)</sup>	All	All	Designed for >10 people; when all designated seating positions are occupied; vehicles exempted by state regulation (including farm, construction, or commercial vehicles making frequent stops).
WV	Secondary	\$25 <sup>(35)</sup>	7 years and under and <57 inches tall	7 years and under and <57 inches tall	Front	<17, all seats	Designed for >10 people, rural mail carriers.
WI	Secondary	\$10	3 years and under	4-7 years	Front	4-15, all seats	Taxi, farm trucks engaged in farming, emergency vehicles, vehicles required to make more than 10 stops per mile, rural mail carriers, land surveyors.
WY	Secondary <sup>(36)</sup>	\$25 <sup>(37)</sup>	8 years and under and 80 lb or less <sup>(38)</sup>	—	All	All	Postal service vehicles, emergency vehicles, buses; passengers exempted if all seats are occupied.

<sup>(24)</sup>Safety belt law may not be enforced by checkpoints designed for that purpose.

<sup>(25)</sup>Safety belt law does not apply to an occupant if all belts in the vehicle are used by other occupants.

<sup>(26)</sup>Less than 1 year old or <20 lb in a rear-facing infant seat; 5 years and under in rear seat if seating is available.

<sup>(27)</sup>Primary enforcement for all seating positions if occupant is <18 years old.

<sup>(28)</sup>Drivers 18 years and older pay \$10 if they do not contest the citation; 16-17 years old pay \$20; \$50 if unsuccessfully contested in court.

<sup>(29)</sup>Safety belt requirement does not apply to passengers occupying seating positions without safety belts.

<sup>(30)</sup>Primary enforcement for all seating positions if occupant is 18 years old or younger.

<sup>(31)</sup>Reduced to \$15 upon completion of class.

<sup>(32)</sup>Exemption from this requirement is granted if all safety belts available are in use, provided children <5 years old are secured in a child passenger restraint system.

<sup>(33)</sup>Children at least 4 years old may be belted if their weight or size makes the use of child restraints impractical.

<sup>(34)</sup>Effective June 1, 2007.

<sup>(35)</sup>Fine for drivers is \$25; fine for passengers over 12 years old is \$10.

<sup>(36)</sup>If a motorist is wearing a safety belt when stopped for a different violation, the fine for that violation is reduced by \$10.

<sup>(37)</sup>Passengers violating the safety belt requirements are subject to a fine of \$10.

<sup>(38)</sup>In rear seat if available. Children are exempted from the booster seat requirement if lap and shoulder belts fit properly across the collarbone, chest, and hips and do not pose a danger to the neck, face, or abdominal area in the event of a crash or sudden stop.

**History of State Motorcycle Helmet Laws**

State	Effective Date of Original Law*	Effective Date of Repeal/Amendment	
AL	11/06/67		
AK	01/01/71	06/23/76	Repealed for operators age 18 and over.
AZ	01/01/69	05/27/76	Repealed for age 18 and over.
AR	06/29/67	07/31/97	Repealed for age 21 and over.
CA	01/01/85**	01/01/92	Reinstated for all.
CO	07/01/69	05/23/77	Repealed.
CT	10/01/67	06/01/76	Repealed.
		01/01/90	Reinstated for under age 18.
DE	06/21/68	06/10/78	Repealed for age 19 and over. All riders must have helmet in their possession.
		07/17/84	Helmet required for instruction permit holders.
DC	02/11/70		
FL	09/13/67	07/01/00	Repealed for age 21 and over if covered by insurance of at least \$10,000 in medical benefits.
GA	07/01/69		
HI	06/04/67	06/07/77	Repealed for age 18 and over.
ID	01/01/68	03/29/78	Repealed for age 18 and over.
IL	07/01/67	05/28/69	Helmet law ruled unconstitutional by State Supreme Court.
IN	07/26/67	09/01/77	Repealed.
		01/01/84	Reinstated for under age 18.
IA	09/01/75	07/01/76	Repealed.
KS	07/01/67	07/01/70	Repealed for age 21 and over.
		07/01/72	Reinstated for all.
		07/01/76	Repealed for age 16 and over.
		07/01/79	Reinstated for ages 16 and 17.
KY	06/13/68	07/15/98	Repealed for age 21 and over provided operator has held motorcycle license for 1 year and has provided proof of health insurance when registering motorcycle.
		07/04/00	Health insurance requirement repealed.
LA	07/13/68	10/01/76	Repealed for age 18 and over.
		01/01/82	Reinstated for all.
		08/15/99	Repealed for age 18 and over with health insurance with \$10,000 in medical benefits for bodily injuries.
		08/15/04	Reinstated for all.
ME	10/07/67	10/24/77	Repealed.
		07/03/80	Reinstated for under age 15.
		09/23/83	Required for holders of learners' permits and for licensees holding license for 1 year or less.
MD	07/01/68	07/01/79	Repealed for age 18 and over.
		10/01/92	Reinstated for all.
MA	05/22/67		
MI	03/10/67	06/12/68	All riders required to have helmet in their possession.
		07/29/69	Reinstated for all.
MN	05/01/68	04/06/77	Repealed for age 18 and over.
MS	03/28/74		
MO	09/28/67		
MT	07/01/73	07/01/77	Repealed for age 18 and over.
NE	05/29/67	09/01/77	Repealed (law was never enforced).
		01/01/89	Reinstated for all.
NV	01/01/72		
NH	09/05/67	08/07/77	Repealed for age 18 and over.

\*Original law applied to all motorcyclists, unless otherwise noted.

\*\*Applied only to riders under age 15½.

- In 2004, 49 states plus the District of Columbia and Puerto Rico had .08 blood alcohol concentration illegal per se laws.
- In 2004, 1 state did not have .08 blood alcohol concentration illegal per se law.

Note: The term “illegal per se” refers to state laws that make it a criminal offense to operate a motor vehicle at or above a specified alcohol (or drug) concentration in the blood, breath, or urine.

Nonmotorist Safety Equipment Use	Sex
Nonmotorist Striking Vehicle Number	Taken to Hospital or Treatment Facility
Person Number	Vehicle Number

# APPENDIX C ■ GES TECHNICAL NOTES

## Standard Errors

The national estimates produced from GES data may differ from the true values, because they are based on a probability sample of crashes and not a census of all crashes. The size of these differences may vary depending on which sample of crashes was selected. [For a complete description of the GES sampling design, see *National Accident Sampling System General Estimates System Technical Note* (DOT HS 807 796) available from NCSA.] The standard error of an estimate is a measure of the precision or reliability with which an estimate from this particular GES sample approximates the results of a census.

In a report of this size, it is impractical to provide standard errors for each estimate. Instead, generalized standard errors for estimates of totals are provided in the following table. Generalized errors were calculated separately for the crash, vehicle, and people characteristics. The values for the GES estimates and an estimate of one standard error are given in Table C1 on the following page. By adding and subtracting two standard errors, a 95 percent confidence interval can be created for the GES estimates in this report. For example, the estimated number of injury crashes that occurred in the month of February is given in Table 23 as 144,000. To calculate one standard error for this crash estimate, use Table C1. Since 144,000 does not appear in the Crash Estimate column of Table C1, use linear interpolation from the standard error values for 100,000 (8,000) and 200,000 (14,600). One standard error would be approximately 10,900. The 95 percent confidence interval for this estimate would be  $144,000 \pm 2 \times 10,900$  or 122,200 to 165,800.

# Appendix C ■ GES Technical Notes

**Table C1**  
**2004 GES Estimates and Standard Errors**

Crash Estimate (x)	Crash Standard Error (SE) *	Vehicle Estimate (x)	Vehicle Standard Error (SE) **	Person Estimate (x)	Person Standard Error (SE) ***
1,000	400	1,000	400	1,000	400
5,000	900	5,000	900	5,000	900

# Appendix C ■ GES Technical Notes

## Unknowns

GES data are obtained either directly from an item on the PAR or by interpreting the information provided in the report through reviewing the crash diagram, the Officer's written summary of the crash, or combinations of variables on the PAR. Because of this interpretation, and because the police officer may not have entered some item of information or provide complete information, data can be missing. Two different statistical procedures are used on GES data to complete values for unknown data. These procedures, univariate and hotdeck imputation, are described in a technical report available from NCSA, *Imputation in the General Estimates System* (DOT HS 807 985). Table C2 below gives the reader the proportion of unknown values prior to imputation for variables with imputed values that were used in this report.

**Table C2**  
**Percent of Unknowns for 2004 GES Data Elements**

Crash Level			
Alcohol Involved in Crash . . . . .	5.8%	Manner of Collision . . . . .	0.2%
Atmospheric Condition . . . . .	1.7%	Minute of Crash . . . . .	0.5%
Crash Severity . . . . .	3.1%	Relation to Junction . . . . .	0.4%
Day of Week . . . . .	0.0%	Relation to Roadway . . . . .	0.2%
First Harmful Event . . . . .	0.1%	Roadway Surface Condition . . . . .	1.5%
Hour of Crash . . . . .	0.5%	Speed Limit . . . . .	15.7%
Light Condition . . . . .	1.0%	Traffic Control Device . . . . .	4.5%
Vehicle/Driver Level			
Driver Drinking in Vehicle . . . . .	8.7%	Rollover Type . . . . .	0.5%
Initial Point of Impact . . . . .	1.7%	Vehicle Type . . . . .	1.6%
Most Harmful Event . . . . .	0.1%		
Person Level			
Age . . . . .	8.2%	Seating Position . . . . .	1.0%
Injury Severity . . . . .	4.3%	Sex . . . . .	5.8%
Police-Reported Alcohol Involvement . . . . .	4.2%		

## Alcohol Involvement

NHTSA defines a fatal crash as alcohol-related or alcohol-involved if at least one driver or nonoccupant (such as a pedestrian or pedalcyclist) involved in the crash is determined to have had a Blood Alcohol Concentration (BAC) of .01 gram per deciliter (g/dl) or higher. Thus, any fatality that occurs in an alcohol-related crash is considered an alcohol-related fatality.

NHTSA defines a nonfatal crash as alcohol-related or alcohol-involved if police indicate on the police accident report that there is evidence of alcohol present. The code does not necessarily mean that a driver or nonoccupant was tested for alcohol.

The term “alcohol-related” or “alcohol-involved” does not indicate that a crash or fatality was caused by the presence of alcohol.

## Blood Alcohol Concentration

The BAC is measured as a percentage by weight of alcohol in the blood (grams/deciliter). A positive BAC level (.01 g/dl and higher) indicates that alcohol was consumed by the person tested; a BAC level of .01 to .07 g/dl indicates that the person was impaired; a BAC level of .08 g/dl or more indicates that the person was intoxicated.

## Body Type

Detailed type of motor vehicle within a vehicle type.

## Bus

Large motor vehicles used to carry more than ten passengers, including school buses, inter-city buses, and transit buses.

## Combination Truck

A truck tractor not pulling a trailer; a tractor pulling at least one full or semi-trailer; or a single-unit truck pulling at least one trailer.

## Construction/Maintenance Zone

An area, usually marked by signs, barricades, or other devices indicating that highway construction or highway maintenance activities are ongoing.

## Crash

An event that produces injury and/or property damage, involves a motor vehicle in transport, and occurs on a trafficway or while the vehicle is still in motion after running off the trafficway.

## Crash Severity

1. **Fatal Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which at least one person dies within 30 days of the crash.
2. **Injury Crash.** A police-reported crash that involves a motor vehicle in transport on a trafficway in which no one died but at least one person was reported to have: (1) an incapacitating injury; (2) a visible but not incapacitating injury; (3) a possible, not visible injury; or (4) an injury of unknown severity.
3. **Property-Damage-Only Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which no one involved in the crash suffered any injuries.

## Crash Type

Single-vehicle or multiple-vehicle crash.

## Day

From 6 a.m. to 5:59 p.m.

## Driver

An occupant of a vehicle who is in physical control of a motor vehicle in transport, or for an out-of-control vehicle, an occupant who was in control until control was lost.

## Ejection

Refers to occupants being totally or partially thrown from the vehicle as a result of an impact or rollover.

## First Harmful Event

The first event during a crash that caused injury or property damage.

## Fixed Object

Stationary structures or substantial vegetation attached to the terrain.

# Glossary

## Gross Vehicle Weight Rating (GVWR)

The maximum rated capacity of a vehicle, including the weight of the base vehicle, all added equipment, driver and passengers, and all cargo loaded into or on the vehicle. Actual weight may be less than or greater than GVWR.

## Initial Impact Point

The first impact point that produced personal injury or property damage, regardless of First or Most Harmful Event.

## Injury Severity

The police-reported injury severity of the person (i.e., occupant, pedestrian, or pedalcyclist).

1. Killed (Fatal)
2. Injured (Incapacitating injury, evident injury but not incapacitating, complaint of injury, or injured, severity unknown).
3. No injury.

## Jackknife

Jackknife can occur at any time during the crash sequence. In this report, jackknifing is restricted to truck tractors pulling a trailing unit in which the trailing unit and the pulling vehicle rotate with respect to each other.

## Junction

Area formed by the connection of two roadways, including intersections, interchange areas, and entrance/exit ramps.

## Land Use

The crash location (urban or rural).

## Large Trucks

Trucks over 10,000 pounds gross vehicle weight rating, including single unit trucks and truck tractors.

## Light Trucks

Trucks of 10,000 pounds gross vehicle weight rating or less, including pickups, vans, truck-based station wagons, and utility vehicles.

## Manner of Collision

A classification for crashes in which the first harmful event was a collision between two motor vehicles in transport and is described as one of the following:

**Angle.** Collisions which are not head-on, rear-end, rear-to-rear, or sideswipe.

**Head-on.** Refers to a collision where the front end of one vehicle collides with the front-end of another vehicle while the two vehicles are traveling in opposite directions.

**Rear-end.** A collision in which one vehicle collides with the rear of another vehicle.

**Sideswipe.** A collision in which the sides of both vehicles sustain minimal engagements.

## Most Harmful Event

The event during a crash for a particular vehicle that is judged to have produced the greatest personal injury or property damage.

## Motorcycle

A two- or three-wheeled motor vehicle designed to transport one or two people, including motor-scooters, minibikes, and mopeds.

## Motor Vehicle in Transport

A motor vehicle in motion on the trafficway or any other motor vehicle on the roadway, including stalled, disabled, or abandoned vehicles.

## Night

From 6 p.m. to 5:59 a.m.

## Noncollision

A class of crash in which the first harmful event does not involve a collision with a fixed object, nonfixed object, or a motor vehicle. This includes overturn, fire/explosion, falls from a vehicle, and injuries in a vehicle.

## Nonmotorist

Any person who is not an occupant of a motor vehicle in transport and includes the following:

1. Pedestrians
2. Pedalcyclists
3. Occupants of parked motor vehicles
4. Others such as joggers, skateboard riders, people riding on animals, and persons riding in animal-drawn conveyances.

## Nonmotorist Location

The location of nonmotorists at time of impact. Intersection locations are coded only if nonmotorists were struck in the area formed by a junction of two or more trafficways. Non-intersection location may include nonmotorists struck on a junction of a driveway/alley access and a named trafficway. Nonmotorists who are occupants of motor vehicles not in transport are coded with respect to the location of the vehicle.

## Objects Not Fixed

Objects that are movable or moving but are not motor vehicles. Includes pedestrians, pedalcyclists, animals, or trains (e.g., spilled cargo in roadway).

## Occupant

Any person who is in or upon a motor vehicle in transport. Includes the driver, passengers, and persons riding on the exterior of a motor vehicle.

## Other Vehicle

Consists of the following types of vehicles:

1. Large limousine (more than four side doors or stretched chassis)
2. Three-wheel automobile or automobile derivative
3. Van-based motorhome
4. Light-truck-based motorhome (chassis mounted)
5. Large-truck-based motorhome
6. ATV (all terrain vehicle, including dune/swamp buggy) and ATC (all terrain cycle)
7. Snowmobile
8. Farm equipment other than trucks
9. Construction equipment other than trucks (includes graders)
10. Other type vehicle (includes go-cart, fork lift, city streetsweeper).

## Passenger

Any occupant of a motor vehicle who is not a driver.

## Passenger Car

Motor vehicles used primarily for carrying passengers, including convertibles, sedans, and station wagons.

## Pedalcyclist

A person on a vehicle that is powered solely by pedals.

## Pedestrian

Any person not in or upon a motor vehicle or other vehicle.

## Restraint Use

The occupant's use of available vehicle restraints including lap belt, shoulder belt, or automatic belt.

## Roadway

That part of a trafficway designed, improved, and ordinarily used for motor vehicle travel.

## Roadway Function Class

The classification describing the character of service the street or highway is intended to provide. Includes the following:

**Interstates.** Limited access divided facilities of at least four lanes designated by the Federal Highway Administration as part of the Interstate System.

**Other Freeways and Expressways.** All urban principal arterial with limited control of access not on the Interstate system.

**Other Principal Arterials.** Major streets or highways, many with multi-lane or freeway design, serving high-volume traffic corridor movements that connect major generators of travel.

**Minor Arterials.** Streets and highways linking cities and larger towns in rural areas in distributing trips to small geographic areas in urban areas (not penetrating identifiable neighborhoods).

**Collectors.** In rural areas, routes serving intra-county, rather than statewide travel. In urban areas, streets providing direct access to neighborhoods as well as direct access to arterials.

**Local Streets and Roads.** Streets whose primary purpose is feeding higher order systems, providing direct access with little or no through traffic.

# Glossary

## **Rollover**

Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Includes rollovers occurring as a first harmful event or subsequent event.

## **Seating Position**

The location of the occupants in the vehicle. More than one can be assigned the same seat position; however, this is allowed only when a person is sitting on someone's lap.

## **School Bus-Related Crash**

Any crash in which a vehicle, regardless of body design, used as a school bus is directly or indirectly involved, such as a crash involving school children alighting from a vehicle.

## **Single-Unit Truck**

A medium or heavy truck in which the engine, cab, drive train, and cargo area are all on one chassis.

## **Trafficway**

Any road, street, or highway open to the public as a matter of right or custom for moving persons or property from one place to another.

## **Vehicle**

See *Motor Vehicle in Transport*.

## **Vehicle Type**

A series of motor vehicle body types that have been grouped together because of their design similarities. The principal vehicle types used in this report are passenger car, light truck, large truck, motorcycle, bus, and other vehicle. See the definition of each of the vehicle types elsewhere in this glossary.

## **Weekday**

From 6 a.m. Monday to 5:59 p.m. Friday.

## **Weekend**

From 6 p.m. Friday to 5:59 a.m. Monday.

2004	451	15,434	2,647	1,316	923	5,839	671
<b>Total</b>	<b>7,472</b>	<b>195,382</b>	<b>16,905</b>	<b>23,649</b>	<b>23,733</b>	<b>339,475</b>	<b>24,316</b>

\*Estimated reductions in deaths that resulted from the presence of laws establishing a minimum legal age of 21 years for the consumption of alcoholic beverages.

The table above presents estimates of the lives saved in 2004 and previous years by various protective devices or laws. The estimates were obtained by combining information from fatal traffic crashes with estimates of the effectiveness of each device or law in saving lives. For safety belts and motorcycle helmets, the table also estimates the numbers of additional lives that could have been saved if the devices had been used by more people.
