Just Ahead of the Ultralight-led Cranes, Wild Whooping Crane Completes Fall Migration

(November 22, 2004)

The first of eastern North America's new migratory flock of wild whooping cranes has arrived at its winter home in Florida, as the younger, ultralight-led cranes continued making progress on their first southward migration. The birds are part of an effort by the Whooping Crane Eastern Partnership (WCEP) to establish a self-sustaining wild, migrating flock of whooping cranes in eastern North America.

The five whooping cranes from the Class of 2003 that spent the summer in Michigan are also on their way south for their first unassisted fall migration. Four of them made history once again when they detoured through South Carolina, spending some time on Cape Romain NWR, along the Atlantic coast, before heading north into North Carolina. This is the first time whooping cranes have been in South Carolina in more than a century.

Northern Spotted Owl still Threatened despite progress in addressing habitat needs

(November 18, 2004)

After completing a formal 5-year status review of the northern spotted owl, the U.S. Fish and Wildlife Service has concluded that the species continues to warrant the protection of the Endangered Species Act as a threatened species.

Endangered Species Act Status Codes

E -- Endangered

T -- Threatened

EmE -- Emergency Listing, Endangered

EmT -- Emergency Listing Threatened

EXPE, XE -- Experimental Population, Essential

EXPN, XN -- Experimental Population, Non-Essential

SAE, E(S/A) -- Similarity of Appearance to an Endangered Taxon

SAT, T(S/A) -- Similarity of Appearance to a Threatened Taxon

PE -- Proposed Endangered

PT -- Proposed Threatened

PEXPE, PXE -- Proposed Experimental Population, Essential

PEXPN, PXN -- Proposed Experimental Population, Non-Essential

PSAE, PE(S/A) -- Proposed Similarity of Appearance to an Endangered Taxon

PSAT, PT(S/A) -- Proposed Similarity of Appearance to a Threatened Taxon

C -- Candidate Taxon, Ready for Proposal

D3A -- Delisted Taxon, Evidently Extinct

D3B -- Delisted Taxon, Invalid Name in Current Scientific Opinion

D3C -- Delisted Taxon, Recovered

DA -- Delisted Taxon, Amendment of the Act

DM -- Delisted Taxon, Recovered, Being Monitored First Five Years

DO -- Delisted Taxon, Original Commercial Data Erroneous

DP -- Delisted Taxon, Discovered Previously Unknown Additional Populations and/or Habitat

DR -- Delisted Taxon, Taxonomic Revision (Improved Understanding)

AD -- Proposed Delisting

AE -- Proposed Reclassification to Endangered

AT -- Proposed Reclassification to Threatened
