IRIS Substance List

The substances are listed in alphabetical order. You can click on the first letter of the substance you want which will bring you to the section that the substance is in, or use your browser's Find command to search for a substance name or Chemical Abstracts Service Registry Number (CASRN). These substance files are typically about 15K to 40K in size, within a range from less than 10K up to about 120K.
