

GENERAL INFORMATION, INSTRUCTIONS, AND DEFINITIONS FOR COMMISSION FOREIGN PRODUCER/EXPORTER QUESTIONNAIRES

CERTAIN ACTIVATED CARBON

Investigation No. 731-TA-1103 (Preliminary)

<u>Further information</u>.--If you have any questions concerning the enclosed questionnaire(s) or other matters related to this investigation, you may contact the following member of the Commission's staff (Fax 202-205-3205):

Jim McClure, investigator (202-205-3191; james.mcclure@USITC.GOV)

GENERAL INFORMATION, INSTRUCTIONS, AND DEFINITIONS

GENERAL INFORMATION

Background.--This investigation was instituted in response to a petition filed on March 8, 2006 by Calgon Carbon Corporation, Pittsburgh, PA, and Norit Americas, Inc., Marshall, TX. Antidumping duties may be assessed on the subject imports as a result of this investigation if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce makes an affirmative determination of dumping.

Additional questionnaires will be supplied promptly upon request, or photocopies of the enclosed questionnaire(s) may be used. Address all correspondence to the United States International Trade Commission, Washington, DC 20436. Hearing-impaired individuals can obtain information regarding this investigation via the Commission's TDD terminal (202-205-1810).

<u>Due date of questionnaire(s)</u>.--Return the completed questionnaire(s) to the United States International Trade Commission by no later than **March 22, 2006**. Although the enclosed postpaid envelope may be used to return the completed questionnaire, use of an overnight mail service may be necessary to ensure that your response actually reaches the Commission by **March 22, 2006**. If you do not use the enclosed envelope, please make sure the completed questionnaire is sent to the attention of **Jim McClure**. **Return only one copy of the completed questionnaire(s)**, but <u>please keep a copy for your records</u> so that you can refer to it if the **Commission staff contacts you with any questions during the course of the investigation**.

<u>Service of questionnaire response(s)</u>.--In the event that your firm is a party to this investigation, you are required to serve a copy of the questionnaire(s), once completed, on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties is maintained by the Commission's Secretary and may be obtained by calling 202-205-1803. A certificate of service must accompany the copy of the completed questionnaire(s) you submit (see 19 CFR § 207.7).

<u>Confidentiality</u>.--The commercial and financial data furnished in response to the enclosed questionnaire(s) that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, nonnumerical characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

GENERAL INFORMATION, INSTRUCTIONS, AND DEFINITIONS--Continued

GENERAL INFORMATION--Continued

<u>Verification</u>.--The information submitted in the enclosed questionnaire(s) is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all your workpapers and supporting documents used in the preparation of the questionnaire response(s).

Release of information.--The information provided by your firm in response to the questionnaire(s), as well as any other business proprietary information submitted by your firm to the Commission in connection with the investigation, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this investigation or other importingury investigations conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

INSTRUCTIONS

Answer all questions.--Do not leave any question or section blank unless a questionnaire expressly directs you to skip over certain questions or sections. If the answer to any question is "none," write "none." If information is not readily available from your records in exactly the form requested, furnish carefully prepared estimates--designated as such by the letter "E"--and explain the basis of your estimates. Answers to questions and any necessary comments or explanations should be supplied in the space provided or on separate sheets attached to the appropriate page of the questionnaire(s). If your firm is completing more than one questionnaire in connection with this investigation (i.e., a producer, importer, purchaser, and/or foreign producer questionnaire), you need not respond to duplicated questions in the questionnaires.

<u>Consolidate all establishments in CHINA</u>.--Report the requested data for your establishment(s) located in China. Firms operating more than one establishment should combine the data for all establishments into a single report.

GENERAL INFORMATION, INSTRUCTIONS, AND DEFINITIONS--Continued

DEFINITIONS

Certain activated carbon.-- The product subject to this investigation is certain activated carbon currently classifiable under Harmonized Tariff System of the United States (HTS) subheading 3802.10.00. Certain activated carbon is defined as a powdered, granular or pelletized carbon product obtained by "activating" with heat and steam various materials containing carbon, including but not limited to coal (including bituminous, lignite and anthracite), wood, coconut shells, olive stones, and peat. The thermal and steam treatments remove organic materials and create an internal pore structure in the carbon material. The producer can also use carbon dioxide gas (CO₂) in place of steam in this process. The vast majority of the internal porosity developed during the high temperature steam (or CO₂ gas) activation process is a direct result of oxidation of a portion of the solid carbon atoms in the raw material, converting them into a gaseous form of carbon. This definition covers all forms of activated carbon that are activated by steam or CO₂, regardless of raw material, grade, mixture, additives, further washing or postactivation chemical treatment (chemical or water washing, chemical impregnation or other treatment), or product form. Unless specifically excluded, this definition covers all physical forms of certain activated carbon, including powdered activated carbon ("PAC"), granular activated carbon ("GAC"), and pelletized activated carbon.

Excluded from this definition are chemically-activated carbons. The carbon-based raw material used in the chemical activation process is treated with a strong chemical agent, including but not limited to phosphoric acid or zinc chloride sulfuric acid, that dehydrates molecules in the raw material, and results in the formation of water that is removed from the raw material by moderate heat treatment. The activated carbon created by chemical activation has internal porosity developed primarily due to the action of the chemical dehydration agent. Chemically- activated carbons are typically used to activate raw materials with a lignocellulosic component such as cellulose, including wood, sawdust, paper mill waste and peat.

To the extent that an imported activated carbon product is a blend of steam and chemically activated carbons, products containing 50 percent or more steam (or CO_2 gas) activated carbons are within this definition, and those containing more than 50 percent chemically-activated carbons are outside this definition.

Also excluded from this definition are reactivated carbons and activated carbon cloth. Reactivated carbons are previously used activated carbons that have had adsorbed materials removed from their pore structure after use through the application of heat, steam and/or chemicals. Activated carbon cloth is a woven textile fabric made of or containing activated carbon fibers. It is used in masks and filters and clothing of various types where a woven format is required.

Any activated carbon meeting the physical description of subject merchandise provided above that is not expressly excluded from this definition is included within the definition.

GENERAL INFORMATION, INSTRUCTIONS, AND DEFINITIONS--Continued

DEFINITIONS--Continued

<u>Chemically-activated carbon</u>.—Chemically-activated carbon is obtained when the carbon-based raw material used in the chemical activation process is treated with a strong chemical agent, including but not limited to phosphoric acid or zinc chloride sulfuric acid, that dehydrates molecules in the raw material, and results in the formation of water that is removed from the raw material by moderate heat treatment. The activated carbon created by chemical activation has internal porosity developed primarily due to the action of the chemical dehydration agent. Chemically-activated carbons are typically used to activate raw materials with a lignocellulosic component such as cellulose, including wood, sawdust, paper mill waste and peat. Chemically-activated carbon is currently classifiable under HTS subheading 3802.10.00.

<u>Firm</u>.--An individual proprietorship, partnership, joint venture, association, corporation (including any subsidiary corporation), business trust, cooperative, trustee in bankruptcy, or receiver under decree of any court.

Related firm.--A firm that your firm solely or jointly owned, managed, or otherwise controlled; a firm that solely or jointly owned, managed, or otherwise controlled your firm; and/or a firm that was solely or jointly owned, managed, or otherwise controlled by a firm that also solely or jointly owned, managed, or otherwise controlled your firm.

<u>Establishment.</u>.--Each facility of a firm in China involved in the production of certain activated carbon (as defined above), including auxiliary facilities operated in conjunction with (whether or not physically separate from) such facilities.

<u>United States</u>.--For purposes of this investigation, the 50 States, Puerto Rico, the U.S. Virgin Islands, and the District of Columbia.

<u>Importer</u>.--Any person or firm engaged, either directly or through a parent company or subsidiary, in importing certain activated carbon (as defined above) into the United States from a foreign manufacturer or through its selling agent.

GENERAL INFORMATION, INSTRUCTIONS, AND DEFINITIONS -- Continued

DEFINITIONS--Continued

<u>Average production capacity</u>.--The level of production that your establishment(s) could reasonably have expected to attain during the specified periods. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix).

Production.--All production in your establishment(s) in China, including production consumed internally within your firm.

Shipments.--Shipments of products produced in your establishment(s) in China. Quantities reported should be net of returns.

Home market commercial shipments.--Shipments, other than internal consumption and transfers to related firms, within China.

Home market internal consumption/transfers to related firms.--Shipments made to related firms in China, including product consumed internally by your firm.

Export shipments.--Shipments to destinations outside China, including shipments to related firms.

<u>Inventories</u>.--Finished goods inventory, not raw materials or work-in-progress.
