

Certification Checklist	Yes or No
1. Are KEY objectives for fire suppression identified and measurable?	
2. Are there a minimum of two alternatives (with identifiable differences in strategies and/or outcomes) analyzed, and an extreme case considered?	
3. Are the values at risk adequately displayed and analyzed?	
4. Do alternatives have safety issues well documented and risk mitigation identified where needed?	
5. Is the rationale for the selected alternative, whether or not most cost effective, compelling?	
6. Were costing estimates derived with current data, are they relevant for this incident, and documented?	
7. Are the assigned probabilities for success in line with the current and expected situation and documented?	
8. Are critical resources listed and available to implement alternatives?	
9. Was the estimated suppression cost used for identifying the certifying official?	
10. Does the approving official meet qualification criteria?
