Oregon	4	24
Utah	7	14
Wyoming	5	100

TABLE 5-3. **Federally listed threatened or endangered (T/E) and candidate animal species, fiscal year 1997--concluded**

/a/ Recovery plans that have been prepared, approved, and are in the process of being implemented. The total number of plans cannot be directly obtained by adding the State totals because one plan may cover more than one State.

Note: Alaska and Eastern States Office did not submit any information. Total numbers of species cannot be directly obtained by adding the various State totals because many species occur in more than one state. Changes in numbers of T/E or candidate species and estimated habitat are based on the Federal Register Review of Candidate Species dated February 27, 1996; U.S. Fish and Wildlife Service changes in Candidate Species definitions; more current data based on recent investigations; further verification of a species' presence on public land; and clearance activities related to rights-of-way, oil and gas leases, mining permits, etc. Estimated habitat acreages have not been reported because habitat data is constantly being refined; any published estimates could be misleading.
