/a/ Miles of trails for Alaska were overreported in 1996; the 1997 figure is from a more accurate inventory.

/b/ Number of buildings for Arizona was underreported in 1996 due to a typographical error.

/c/ Number of administrative sites for California and Montana increased in 1997 because leased office buildings were included and new sites were acquired.

/d/ Reduction in miles of trails for California is due to transfer of approximately 1.3 million acres to the National Park Service to create the East Mojave National Preserve.

/e/ Number of bridges for Western Oregon was overreported in 1996; the 1997 figure is from a more accurate inventory.
