

Tamarac

National Wildlife Refuge

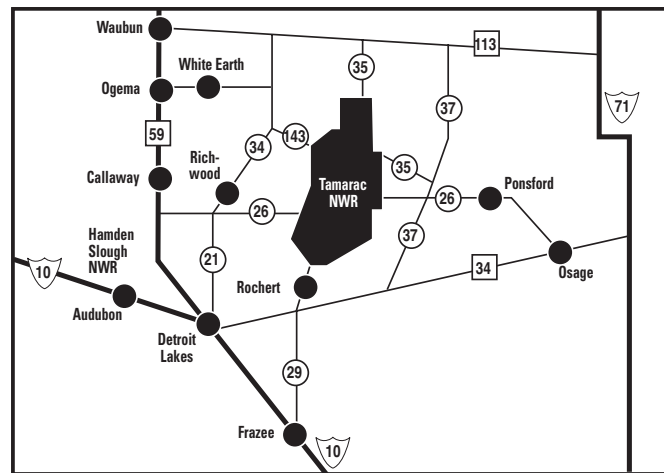

Tamarac

National Wildlife Refuge

Tamarac National Wildlife Refuge spans nearly 43,000 acres and includes over 20 lakes, three rivers and hundreds of marshes and woodland ponds. Over 250 birds, such as the bald eagle, trumpeter swan, and ruffed grouse call Tamarac home. Search for white-tail deer, porcupine, beaver, river otter, black bear, or timber wolf along the self-guided Blackbird Auto Tour Route.

Visitor Services

You'll find hiking trails, an observation platform, and great viewpoints for wildlife photography. Tamarac includes opportunities for fishing and hunting. Cross-country skiing, snow shoeing and ice fishing are popular winter activities. An attractive visitor center offers a spectacular vista of the marshes and trees that are typical of Tamarac National Wildlife Refuge. A theater presentation provides orientation to the life and legends of this unique area. The Visitor Center is open weekdays year round 7:30 a.m. - 4:00 p.m. and summer and fall weekends 10:00 a.m. - 5:00 p.m.

Contact the refuge to learn more about visitor opportunities and the special educational programs and events offered throughout the year!
