Kenneth W. Boyles, Hatchery Manager
Norfolk NFH
1414 Highway 177 South
Mountain Home, AR 72653
Phone: 870/499 5255
Fax: 870/499 7755
E-mail: FW4FRNorfolk@fws.gov

Station Facts

- Established: 1957.
- Number of staff: seven permanent.
- Geographic area covered: Mitigation in eastern Oklahoma and the White River Basin in Northern Arkansas.
- Annual budget (FY 05) \$828,000.

Economic Impact

- Norfolk NFH has a significant economic impact. For each \$1 spent of budget expenditures, \$5.86 tax revenue was generated. The total economic effect for trout production at the hatchery (1999 dollars) is \$91,162,000.

Station Goals

- Provide statutory mitigation fish for Eastern Oklahoma and the White River Basin in Northern Arkansas.
- Provide environmental education.

Fish Species and Capability

- Rainbow trout, cutthroat trout and brown trout.
- Present production is 500,000 lbs. annually.

Public Use

- 280,000 visitors annually.
- Hours of operation: 7:00 am - 3:30 pm including weekends.
- Hatchery tours.
- Off-site presentations.
- Fishing for the disabled and for those 15 and under in Dry Run Creek.

Calendar of Events

June: National Fishing week, Annual Fishing Derby.

Questions and Answers

What do you feed the fish?

We feed a commercially prepared diet produced specifically for trout. It contains all the essential elements necessary for growth and development.

Where do you get the eggs?

We do not have any Rainbow or Cutthroat Broodstock. Most of these eggs are received come from Ennis, Montana; Erwin, Tennessee; and White Sulphur Springs, West Virginia. Norfolk maintains Brown Trout Broodstock and takes eggs from those fish in November.

How many fish are in a raceway?

15,000-100,000 fish are in a raceway, depending on the size of the fish.

What kinds of fish do you raise?

Rainbow trout, brown trout and cutthroat trout.

What size are the fish when they are stocked?

Most of the fish are stocked when they are 11" long.

How often do you stock fish?

Weekly, year-round.

How long does it take to grow the fish to stocking size?

It takes about 22 months to grow the fish from egg to 11" inches.
