**SUPPLEMENTARY INFORMATION:****Background**

On July 21, 2004, we published a proposed rule (69 FR 43664) to remove the Eastern Distinct Population Segment (DPS) of the gray wolf (*Canis lupus*) from the List of Endangered and Threatened Wildlife established under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*). We proposed this action because available data indicate that this DPS no longer

meets the definitions of threatened or endangered under the Act. The gray wolf population is stable or increasing in Minnesota, Wisconsin, and Michigan, and exceeds its numerical recovery criteria. Completed State wolf management plans will provide adequate protection and management to the species in these three States if the gray wolf is delisted in the Eastern DPS. The proposed rule would remove this DPS from the protections of the Act by ending its threatened classification. This proposed rule would also remove the currently designated critical habitat for the gray wolf in Minnesota and Michigan and remove the current special regulations for gray wolves in Minnesota and other Midwestern States. This proposal would not change the status or special regulations currently in place for the Western or Southwestern DPSs of the gray wolf or for the red wolf (*C. rufus*).

In our July 21, 2004, proposed rule, we stated that we would hold public hearings. Consistent with that document, we are now announcing the dates and locations of those hearings.

**Hearings**
