Demonstrations of

E-Link
Input and Management Tool

and

STI Products

Information Bridge,
Energy Citations Database,
and Science Research Connection

Tuesday, April 22, 2009
Piedmont A
10:30 am – 12:00 noon

E-Link

In this session you will discover that E-Link is more than just an input system. E-Link is also a management tool used to track the progress of STI report deliverables from input to completion. Learn how to input/edit/release an E-Link announcement record; find documents that are in need of review for sensitivity, view documents that are flagged for data cleanup; etc.

STI Products

You will learn how the STI products provided to OSTI are made available via the Web thru the STI Product demonstrations. The Information Bridge (IB) and Energy Citations Database (ECD) are both publicly available. The Science Research Connection (SRC) is only available to the DOE Community and there are various levels of access driven by IP address, passwords, etc.
