

Good Start, Grow Smart

**A Guide to
Good Start,
Grow Smart
and Other
Federal Early
Learning
Initiatives**

U.S. Department of Health and Human Services

U.S. Department
of Education

Good Start, Grow Smart (GSGS) is President George W. Bush's Early Childhood Initiative aimed at helping States and local communities strengthen early learning for young children. The goal of *GSGS* is to ensure that children enter kindergarten with the skills they need to succeed by partnering with States to improve early childhood education; strengthening Head Start (HS); and providing information based on scientific research to teachers, caregivers, and parents. Federal agencies encourage and support States to develop voluntary early learning guidelines that align with K through 12 standards, address professional development needs, and coordinate early childhood programs, such as the Child Care and Development Fund (CCDF); Temporary Assistance for Needy Families (TANF); Head Start; and Federal- and State-funded and locally funded early childhood public education programs (including Title I preschool; Early Reading First; Part B, Section 619; and Part C under the *Individuals with Disabilities Education Act*).

Good Start, Grow Smart Goals

- **Strengthening Head Start**—Head Start developed an accountability system, known as the National Reporting System, to ensure that every Head Start program assesses student learning in language, early literacy, and premathematics skills. The U.S. Department of Health and Human Services (HHS) implemented a national training program using a train-the-trainer and mentoring approach to reach all Head Start teachers with techniques to promote prereading skills for Head Start students.
- **Partnering With States To Improve Early Learning**—The Child Care Bureau (CCB) partnered with States to improve early learning through the following:
 - **Early Learning Guidelines (ELGs)**—The development of voluntary State early reading and premathematics guidelines on what children should know and learn at different ages. These guidelines are adaptable to various child care settings and align with State K through 12 standards so that young children are learning skills that will prepare them for school.
 - **Professional Development**—The development of a State plan that aligns its early learning guidelines with its teacher and caregiver training and education system. Through these professional development activities, teachers and caregivers learn teaching practices that reflect the early learning guidelines developed and implemented by the State or local community.
 - **Program Coordination**—The development of a State plan for an integrated system of early learning programs for children and families by coordinating at least seven early childhood programs, which may include the CCDF program, TANF program, Head Start, and public education programs, including Title I preschool; Early Reading First; Part B, Section 619; and Part C under the *Individuals with Disabilities Education Act*.

Good Start, Grow Smart Goals

- **Providing Information to Teachers, Caregivers, and Parents—**

To close the gap between the best research and current practices in early childhood education, the U.S. Department of Education (ED) initiated a broad public awareness campaign for parents, early childhood educators, child care providers, and the public. In summer 2002, First Lady Laura Bush and ED officials hosted Early Learning Summits and Early Childhood Educator Academies. New publications were released for parents and caregivers. (See the Resources section.) In addition, the National Institute of Child Health and Human Development, Office of the Assistant Secretary for Planning and Evaluation and Administration for Children and Families in HHS, and Institute of Education Sciences and Office of Special Education Programs in ED collaborated on a 5-year, multimillion-dollar research agenda to identify effective early childhood curricula and teaching strategies.

Good Start, Grow Smart Interagency Workgroup

The *Good Start, Grow Smart* Interagency Workgroup is the collaborative Federal effort to coordinate programs supporting children's early learning. Its goal is to develop a common early childhood message across Federal agencies and programs and to identify strategies for collaborating and coordinating resources to support the development of high-quality, coordinated State and local early care and education systems.

To achieve this goal, the workgroup meets regularly to exchange information about new research evidence on effective approaches to fostering children's school readiness, coordinate research agendas, and share technical assistance resources and professional development opportunities. It has sponsored two roundtables of selected States demonstrating collaborative approaches to working across their child care, Head Start, and early education programs and professional development and research briefings to increase cross-agency understanding of programs. Members of the workgroup also have presented jointly at professional meetings and conferences.

Overview of Selected Federal Early Learning Programs

Program	Federal Agency	Who Is Eligible for Services	Number of Children Served	Annual Budget ¹	Type of Program
Child Care and Development Fund	Child Care Bureau, Administration for Children and Families, HHS	Children younger than age 13 whose parents are leaving welfare or low-income working families	1.7 million children (of these, 1.1 million children are younger than age 6)	\$8.9 billion total from a variety of sources (of this, \$4.8 billion is part of the Federal CCDF) ²	States receive a block grant and have policy flexibility. Most families receive a voucher to use in the regular child care market.
Head Start and Early Head Start (EHS)	Head Start Bureau, Administration for Children and Families, HHS	Children younger than age 5 living in poverty (EHS serves those ages 0 to 3; HS serves those ages 3 to 5)	906,000 children (of these, 62,000 are younger than age 3)	\$6.8 billion	Federal grants directly to local agencies that agree to meet Federal Head Start standards.
Title I Preschool	Office of Elementary and Secondary Education, ED	Preschool children in school districts or schools with a high percentage of low-income children who are most at risk of failing to meet the State academic achievement standards	400,000 preschool children	\$274 million	Federal assistance through State educational agencies to local school districts and public schools. Schools decide how to allocate the money.
Special Education Grants for Infants, Toddlers, and Families (Part C of IDEA)	Office of Special Education Programs, ED	Children from birth to age 3 with disabilities and developmental delays	272,000	\$441 million	Federal assistance to the States, which pass along most of the money to local early intervention agencies.
Special Education Preschool Grants (Part B, Section 619 of IDEA)	Office of Special Education Programs, ED	Children ages 3 through 5 with disabilities and developmental delays	680,000	\$385 million	Federal assistance to the States, which pass along most of the money to local school districts.

¹ All funding reflects FY 2005 unless noted below.

² Includes CCDF mandatory and discretionary spending, TANF transfers, and State matching and maintenance-of-effort funds for FY 2004 for children from birth through age 12.

Accomplishments to Date

GSGS has been a catalyst for broad coordination across early learning programs through activities that respond directly to and complement GSGS goals. Looking across Federal early learning programs, the following accomplishments have been achieved as of October 2005.

Strengthening Head Start

- Implemented the Head Start National Reporting System, including a training-of-trainers model for Head Start programs.
- Provided eight Innovation and Implementation grants to organizations for designing and implementing innovative programs to strengthen the early education experiences of Head Start children before they enter kindergarten.
- Developed the Head Start Mentor-Coach Instruction design, which consists of multimedia strategies for early literacy mentor coaches to use to work with classroom teams and home visitors.

Partnering With States To Improve Early Learning

- The 50 States, Washington, D.C., and the Territories are all actively engaged in developing or implementing Early Learning Guidelines applicable to all early care and education programs within their borders.
- More than 27 States are implementing their guidelines through dissemination, training, and/or the embedding of the guidelines in their professional development systems. (See the *Child Care and Development Fund Report of State Plans FY 2004-2005* for further highlights of State accomplishments in meeting their GSGS goals and early literacy objectives. This report is available on the Web at <http://nccic.acf.hhs.gov/pubs/stateplan/>.)

Accomplishments to Date

- The 50 States, Washington, D.C., and the Territories all have partnerships with at least four key early care and education programs within their borders and are coordinating with these stakeholders to establish their professional development systems.

Providing Information to Teachers, Caregivers, and Parents

- Provided publications for parents and caregivers on child development. (See pages 10 to 12 of this booklet for a resource list.)
- Conducted research on effective early childhood interventions, professional development, and coordination among early childhood programs.
- Brought information based on scientific research to teachers through Early Childhood Educator Academies.
- Launched the Head Start Parent-Mentor training program, in which Head Start parents learn to help their own children with language and literacy skills and to mentor other parents on early literacy techniques.

Interagency Program Coordination

- Exchanged information among agencies on state-of-the-art research methods and on new evidence concerning effective approaches to foster young children's school readiness.
- Coordinated agency research agendas.
- Through the Interagency School Readiness Consortium, jointly funded eight research projects to examine interventions that promote school readiness.
- Shared technical assistance tools and professional development opportunities.

Frequently Asked Questions

What are the Early Learning Guidelines?

Early Learning Guidelines, or content standards, describe what children need to know, understand, and be able to do at certain ages or developmental stages. Selected State Early Learning Guidelines documents are available on the Web at <http://nccic.org/pubs/goodstart/elgwebsites.html>

How can I find out what my State is doing related to early learning programs?

Each State and Territory submitted a Biennial Child Care and Development Fund State plan to the Administration for Children and Families, HHS, in July 2005 that described what they were doing or planned to do in the three priority areas of GSGS for the next two years. Many of these State plans are available on State child care agency Web sites, and a 50-State summary will be available in 2006 from Child Care Bureau. A summary of the CCDF State plans for FY 2004–2005 is available on the Web at <http://nccic.org/pubs/stateplan/index.html>.

Do Early Learning Guidelines only address early literacy and early mathematics concepts?

GSGS asks States and Territories to specifically address early literacy and early mathematics concepts of children ages 3 through 5, but almost all States have developed guidelines that address other domains of development, such as social-emotional development and physical development. Some States also have developed guidelines for children from birth through 5 years of age.

Are Early Learning Guidelines voluntary?

All States and Territories have been asked to develop Early Learning Guidelines for children ages 3 through 5, but the use of Early Learning Guidelines at the program level is voluntary, unless required by a State or Territory.

What is the definition of a professional development plan?

Professional development plans are defined as systems of training and instruction developed for the purpose of improving the preparation and ongoing development of early care and education providers. States and Territories receive information and technical assistance to develop a comprehensive system of professional development that is built on Early Learning Guidelines, which are aligned with States academic achievement standards for K-12. In addition, States are encouraged to offer training that is scientific, research-based, ongoing, intensive, and accessible to early care and education practitioners in all settings. Information on State early care and education professional development Web sites is available at <http://nccic.org/pubs/goodstart/state-ece.html>.
