

Rangers at Glacier Bay National Park & Preserve (top and bottom) and Klondike Gold Rush National Historical Park (center).

## How Do I Become a Park Ranger?

Thank you for your inquiry into employment as a ranger. The basic goal of a national park ranger is to protect and preserve public resources while helping people enjoy them. This may be accomplished by fighting fires, enforcing land use regulations, or studying the natural world to learn how to better care for it. Education or interpretation is another field in which rangers work. Teaching people about parks, national monuments, and historic sites helps people understand and appreciate these national treasures and inspires their desire to protect them. These varied tasks can all be part of the job of a ranger.

Many rangers start as seasonal employees or volunteers. They work in urban and rural areas and often work in several different parks or positions to find the situation they enjoy the most. Some move into permanent positions and higher government service levels as their careers continue and they take on more administrative or legislative responsibilities.

If you are interested in following this career path, there are several information sources and programs to help you get started. Look up <Park Ranger Careers> on the National Park Service's website at <http://www.nps.gov>. The Student Conservation Association cooperates with the National Parks with a volunteer program which provides valuable on-the-job training. Undergraduate and graduate studies focused on physical sciences, resource management, and business administration or pertinent work experience can also help a candidate qualify for a ranger position. Applications for seasonal ranger work can be found on the web at <http://www.sep.nps.gov>. Special local knowledge about a park near home can be useful in the National Park Service's local hire program. These are some of the ways you can begin a ranger career. For other than seasonal jobs, check the web site at <http://www.usajobs.opm.gov>

*“Climb the mountains and get their good tidings.  
Nature's peace will flow into you as sunshine flows into  
trees. The winds will blow their own freshness into you,  
and the storms their energy, while cares will drop off  
like autumn leaves.”*

John Muir, Naturalist
