Dear Secretary Donald Clark:

Products made in Iowa, California, Missouri, New York or Michigan are made in the USA. Products made in DAKARTA, Bangkok, Shanghai, Managua, or Mexico ARE NOT!!!

Made in the USA Label should only appear on items that are assembled in the USA of American Parts!

Be a man and don't let big business scare you. Turn back this draft proposal put out by the FTC, products which are "substantially" made here would be able to sport the Made in the USA Label. Don't take this symbol of American pride and turn it into just another corporate logo. Just DO IT. Made in the USA. OH what a feeling, Toyota.

What a Shame!!
