Dear Sir/Mam

I recently heard on CNN that the Federal Trade Commission was considering to change the "Made in America" label from 98% American made to 75%. This obviously will encourage American manufactures too drop to that 75% while scraping non-union and union American employees in favor of some 1/4 a day 3rd world employee products. The change is said to be due to a changing economy. It's our job as consumers to look for the "Made in America" label; however, lowering the standard to 75% is consumer fraud on the part of the F.T.C.. Please don't listen to big business lobbyists by deceiving the public with 75%.

Pete Roettger
