Dear Sir or Madam,

I feel it is very important that products we buy in this country be labeled honestly as to where they are made. It is our right to know. It is the American way - as it should be.

Recently I have been very disturbed by lack of information on where frozen foods and canned foods originate. I called D + W food chain and found out that canned goods may just say where it is packed into cans.

Health standards for fertilizing, etc. in some countries may be very poor, etc.

Recently in Michigan we had bad strawberries (frozen) get into our school system. It has cost our state a great deal of money as many children had to be vaccinated, etc. These berries came from Mexico I believe. Then they were packaged out west.

In Michigan many people wear bracelets labeled "W W J D." This means, "What would Jesus do?" Well, Jesus would tell the truth - so should our government.

Thank you for
listening.

Marabel B. Gugle
