

7/13/97

To Whom it May Concern:

I strongly disagree with the change being recommended to allow manufacturers to claim products as "made in the U.S.A." if their costs account for 75% of the product's cost. This to me, is false advertising. If a product is marked "Made-in-the-U.S.A." I believe that all or virtually all of the product's cost should be in the U.S.A. This is just another way the government is attempting to deceive the public for various political reasons.
