Dear Secretary Donald Clark,

I'm outraged to here that the FTC would even consider a change in policy regarding product labeling made in the USA. We think people have the right to know whether a product is made totally in the USA or not. It is our right to know. I'd like to know who's getting paid off for this move.

I hope you re-consider this change and bring back our work, pride and country to us the people.

Sincerely annoyed,  
 Mr. T. J. Taccone
