**Re: 16 CFR Part 303 – Textile Rule * Mohawk, Dupont, and PTT Canada Comment
Matter No. P074201**

To Whom It May Concern:

C & J Carpet Center has used both P.E.T. polyester and P.T.T. polyester. We have found that the P.T.T. products have had a superior history. They are much more resilience and have superior stain resistance. We have also found them to have a much softer feel.

We find that because the product has to be labeled as polyester, that many of our customers confuse these products made with P.T.T. with the products made with P.E.T. products. Because P.E.T. products don't perform at the same level as the P.T.T., some of our consumers that have had the P.E.T. in the past are more likely not to purchase these products based on past results. The average consumer does not understand that these products are very different in their performances. Therefore we feel that a separation is very much needed.

We acknowledge that both products are quality products, we find superior results with the Dupont & PTT products.

Please allow a separate classification in order to make an easier market separation for our consumers.

Sincerely,
Carol Cochran

C & J Carpet Center
