Dear Senator Kyl:

I am a Snap-on Tools dealer in Tucson. My customers have come to trust the MADE IN THE USA label that all tools produced by Snap-on proudly display. The FTC has proposed guidelines which greatly change the definition of the MADE IN USA label. I feel that the proposed guidelines are misleading to consumers and ultimately cheapen this proud designation.

American workers through **their** pride and toil have gained the recognition and respect of a worldwide market with their efforts to give a real meaning of quality and workmanship to this proud label. Please do not cheapen the work of generations of American craftsmen by allowing a relaxation of content standards as the FTC proposes in H Con Res 80.

Thank you for any attention you may give this problem. Please let me know if you do cosponsor this resolution. If you have any reason for not supporting us on this important issue, please contact me since I **would** like to discuss it **further** with you.

This issue is important to my business as well as our city, **state** and nation. Worldwide consumers will be misled and our proud workers and ancestors will have labored in vain if we don't stop this change. The United States government should not support any action undermining the proud **label** MADE IN THE USA!

Thank you for your time,

Glenn Miller Snap-on Tools Dealer
